# Midea Group Co., Ltd.

# **The 2017 Annual Report**

31 March 2018

# **Letter to Shareholders**

Fifty years ago, in 1968, Midea founder, He Xiangjian, sowed the seeds of Midea's enterprises with the goal of improving lives. After half a century, Midea has prospered into a towering presence and become a technology group with operations in consumer appliances, HVAC systems, robotics and industrial automation systems, and smart supply chain (logistics) as it takes the lead in grasping new opportunities brought forth by industrial networks, digitalization, artificial intelligence, and human-machine collaboration.

Each momentous advancement in human history is dependent on the grand context of the era; we must salute and express our gratitude to this vibrant time, for it was in these 40 years of economic reforms in China that gave birth to entrepreneurship and propagated the nation's revival. Each generation of Midea people has fought through dire times, and their unwavering resolve and courage to embrace changes and innovation has advanced Midea's glorious transformation from that small rural workshop 50 years ago.

Midea achieved some remarkable results in 2017, boasting a 51.35% growth in revenue to RMB241.92 billion, while net profit attributable to shareholders of the company rose by 17.70% to RMB17.28 billion. Midea ranked 450th in the Fortune 500 rankings of 2017, moving up 31 places from the previous year. Midea also ranked 335th in the Forbes 2017 Global 2000, an improvement of 67 ranks. According to the "BrandZ™ Top 100 Most Valuable Chinese Brands 2018", Midea rose to the 26th spot in their rankings and maintained its lead as the highest-ranking home appliance brand in three consecutive years. Midea was featured among the Top 10 companies of CCTV's "National Brands Plan" and it has been selected as one of the top ten public companies in China by CCTV for two consecutive years. As of the end of 2017, Midea's market value reached RMB 363 billion after an annual growth of more than 100%.

By the age of fifty, people must be able to understand and accept their place in the world, give up on superficial complaints, and be free of idle thoughts. To be an evergreen enterprise, we should keep up with the times, set high goals, restore confidence in entrepreneurship and the creative spirit, and undertake tasks set forth by the times.

This era's changes have been beyond imaginable. Half of the top Fortune 500 companies from 2000 have disappeared from the rankings. A large group of companies that were once great have fallen from grace in 2017. Under the swift current of changes of this era, Midea

must remain humble and respectful while embracing changes and innovation in order to keep up with the times. We must always keep a progressive mind and an entrepreneurial spirit to fulfill our dreams and abandon mediocrity. Today, Midea must progress with simultaneous grace and vigor; much like the flowing Amazon River, still waters run deep. Today, Midea must look to the stars while keeping its feet planted firmly on the ground in order to strike forward thousands of miles with small steps.

Our past is merely a preface to our future achievements. In 2018, Midea will be moving forward with a new transformative phase and reform with greater courage and resolve. We shall boldly choose what is right; only by abandoning the alluring sights before us can we make long-term plans for the future and attain our renaissance. Our struggles inside our cocoon shall give birth to a beautiful butterfly embodied in yet another glorious era for Midea.

This year, Midea shall initiate a new round of change based on user-centric core values as we reconstruct the value chain, corporate structure, and corporate culture to improve user experience and create value for users.

We shall continue to focus on fostering internal growth within the company and seize market opportunities in consumptive and structural upgrades. We shall build a user-centric business model and management system to expand investment in innovation, improve the R&D environment, innovate incentive systems, recruit top R&D talents, and improve R&D layout. We shall also continue to improve user experience and build high-quality products to improve the overall core competitive ability of our products.

We shall further promote transformation of corporate digitalization and use software and data to construct and drive high-performance operations in the value chain, including R&D, planning, manufacturing, procurement, quality, logistics, customer service, and installation. We aim to implement an end-to-end synergy, advance flexible customization, production platformization and modularization, digitalized craftsmanship, smart logistics, smart customer services, and other in-depth reforms to strengthen the foundation of industrial internet.

We shall continue to advance the integration and business development in robotics and automation and speed up our preparation for the entire industrial automation and robotics sectors. We shall seize opportunities in the robotics market in China and advance the integration and rapid growth of domestic robots in China. We shall improve our capabilities

The 2017 Annual Report of Midea Group Co., Ltd.

in developing core robotic parts and software systems as well as integrate artificial

intelligence and sensory and visual technologies for expansion into new sectors such as

smart manufacturing, smart logistics, smart home, and medical and recovery.

We shall advance the integration and synergy of global operations and M&A projects and

advance Midea's global presence to establish a framework for different sectors, different

market spaces and regions, and different cultural backgrounds and mindsets. We shall

promote our global sales operations and increase the growth of our own brand as we

strengthen risk controls overseas and establish a comprehensive overseas corporate

governance and compliance system.

Midea is standing at the forefront of the era, but only by actively seeking changes and rapid

reforms can it fulfill its mission in the midst of the great rejuvenation of the Chinese nation,

resonate with the nation, and write a more beautiful chapter.

The path towards transformation is still long and arduous. In 2018, the Midea team shall

demonstrate resolve and courage for reforms in every opportunity and make unremitting

efforts. The peak may be steep but we must climb.

Hereby, we would like to thank all shareholders for their company, support and trust, and

pay tribute to all shareholders and investors who are committed to our value creation!

Board of Directors, Midea Group Co., Ltd.

March 2018

# **Section I Important Statements, Contents and Definitions**

The Board of Directors, the Supervisory Committee, directors, supervisors and senior management of Midea Group Co., Ltd. (hereinafter referred to as the "Company") hereby guarantee that the information presented in this report is free of any misrepresentations, misleading statements or material omissions, and shall together be wholly liable for the truthfulness, accuracy and completeness of its contents.

All directors of the Company attended the Board meeting to review this Annual Report. There are no directors, supervisors, or senior management who do not warrant or who dispute the truthfulness, accuracy and completeness of the contents of this Annual Report.

The financial statements for 2017 have been audited by PricewaterhouseCoopers China (LLP) and have obtained a standard unqualified audit report.

Mr. Fang Hongbo, Chairman of the Board and President of the Company and Mr. Xiao Mingguang, Director of Finance of the Company, have represented and warranted that the financial statements in this report are true and complete.

The Board has considered and approved the following dividend payout plan for the year 2017: based on the Company's total existing shares of 6,584,022,574, it is proposed that the Company should distribute a cash dividend of RMB12 (tax inclusive) per 10 shares to all the shareholders.

The future plans and some forward-looking statements mentioned in this report shall not be considered as virtual promises of the Company to investors. Therefore, investors are kindly reminded to pay attention to possible investment risks.

This report has been prepared in both Chinese and English. Should there be any discrepancies or misunderstandings between the two versions, the Chinese version shall prevail.

# **Section III Business Profile**

## 1. Business Scope in the Reporting Period

#### 1.1 Summary of business scope

Midea is a technologies group in HVAC systems, consumer appliances, robotics & industrial automation systems, and smart supply chain (logistics). Midea offers diversified products and services, including HVAC centered on residential air-conditioning, commercial air-conditioning, heating & ventilation systems; consumer appliances centered on kitchen appliances, refrigerators, laundry appliances, and various small home appliances; robotics and industrial automation systems centered on KUKA and joint ventures with YASKAWA; and smart supply chain (logistics) centered on Annto Logistics Technology Co., Ltd. as a service platform providing integrated solutions.

Upholding the principle of "Creating Value for Customers", Midea is committed to improving lives for consumers. Midea focuses on continuous technological innovation to improve products and services, and to make life more comfortable and pleasant for around 300 million users, major customers and strategic partners from all fields across the globe every year.

Midea, a global operating company, has now established a global platform of over 135 thousand employees, around 200 subsidiaries, more than 60 overseas branches and 12 strategic business units, as well as being the majority shareholder of KUKA, a Germany-based world-leading company in robotics and automation, with a stake of approximately 95%.

#### 1.2 Position in the household appliance industry

Midea has been given excellent credit ratings by the three major international credit rating agencies, Standard & Poor's, Fitch Ratings and Moody's. The Ratings are in leading position among home appliance manufacturers worldwide as well as among Chinese non Stateowned enterprises.

Midea ranks No. 450 on the 2017 Fortune Global 500 list, a big step forward compared to No. 481 in 2016. On the Forbes 2017 Global 2000 list, Midea ranks No. 335, beating down another 67 competitors on the list from where it was last year. In addition, Midea has climbed to No. 26 on the WPP 2018 BrandZ™ Top 100 Most Valuable Chinese Brands list, making it the highest-ranking among home appliances brands for 3 consecutive years. Also, in the "National Brands Plan" launched by CCTV, China's national state-run television broadcaster, Midea is selected again as one of the top 10 brands and has been recognized by CCTV as one of China's Top 10 Listed Companies for two years in a row. At the end of 2017, the market value of Midea reached RMB363 billion, an incresse of more than 100% for 2017. Over 20% of it shares are held by international institutional investors.

According to data from AVC, the table below shows the offline market shares and rankings of the Company's primary household appliance products (by retail sales) in 2017:

| Product category          | Market share | Ranking |
|---------------------------|--------------|---------|
| Air conditioners          | 24.6%        | 2       |
| Laundry appliances        | 24.6%        | 2       |
| Refrigerators             | 10.7%        | 3       |
| Rice cookers              | 44.8%        | 1       |
| Electric pressure cookers | 47.7%        | 1       |
| Induction cookers         | 52.5%        | 1       |
| Electric fans and heaters | 45.0%        | 1       |
| Microwave ovens           | 45.3%        | 2       |
| Water purifiers           | 23.1%        | 2       |
| Electric water heaters    | 19.6%        | 3       |
| Gas water heaters         | 11.4%        | 3       |
| Hobs                      | 7.0%         | 4       |
| Range hoods               | 8.5%         | 4       |

Midea's online sales during 2017 exceeded RMB40 billion, up 80% YoY and accounting for 30% of its total domestic sales, which means Midea remains the best-selling household appliance maker online (by combined sales through major e-commerce channels of Tmall, JD and Suning). The table below shows the online market shares and rankings of the Company's primary household appliance products (by retail sales) in 2017:

| Product category       | Market share | Ranking |
|------------------------|--------------|---------|
| Air conditioners       | 24%          | 2       |
| Laundry appliances     | 29%          | 1       |
| Refrigerators          | 15%          | 2       |
| Range hoods            | 17%          | 1       |
| Rice cookers           | 33%          | 1       |
| Induction cookers      | 42%          | 1       |
| Electric kettles       | 25%          | 1       |
| Electric heaters       | 21%          | 1       |
| Garment steamers       | 30%          | 1       |
| Electric ovens         | 21%          | 1       |
| Electric water heaters | 34%          | 1       |
| Gas water heaters      | 21%          | 1       |
| Air to water heat pump | 38%          | 1       |
| Water dispensers       | 30%          | 1       |
| Water purifiers        | 12%          | 3       |

## 1.3 Industry review and outlook

## a. The industry of residential air conditioners

In 2017, benefiting from the stable operation of macro economy, the industrial structure and consumption upgrading, the outburst of emerging market, and other comprehensive effects

achieved by various positive factors, the household appliance enterprises have made unremitting effort to perform the supply-side structural reform, enhance the technical innovation and the product structure optimization, and seize the opportunities for the consumption and product structure upgrading. In despite of the rise in raw material costs and the pressure caused by corresponding regulatory policies, main operation indices realized their steady growth. According to the data from the State Statistics Bureau, the total output of household refrigerators achieved 86.703 million from January to December in 2017, up 13.6% year on year; residential air conditioners 180.398 million, up 26.4% YoY; and domestic washing machines 75.009 million, up 3.2% YoY. From January to December in 2017, the revenue of the household appliance industry amounted to RMB 1513.57 billion (with a cumulative year-on-year increase of 18.7%), and the total profit RMB 116.93 billion (with a cumulative year-on-year increase of 6.1%). In 2017, the overall market scale of kitchen appliance achieved nearly RMB 100 billion and maintained its rapid growth trend. As indicated by the monitoring data from AVC, the market terminal retail sales of the kitchen appliances in 2017 achieved RMB 69.4 billion with a year-on-year increase of 9.0%, of which, the retails sales of range hoods achieved RMB 41.44 billion with a year-on-year increase of 9.7%, gas hobs RMB 21.53 billion with 8.1%, sterilizer RMB 5.38 billion with 7.6%, and dishwashers RMB 4.4 billion with 129.2%.

In 2017, the online sales in the household appliance industry still maintained its high-speed growth, and the scale of the B2C domestic household appliance's online market (including the mobile terminal) amounted to RMB 490.6 billion with a year-on-year increase of 27.6%. In addition, the penetration rate of the online market of the household appliance industry also reached a high record (26.5%), and the online sales of traditional major appliances (including air conditioners, refrigerators and washing machines etc.) achieved a year-on-year increase of 70%. As the high-end upgrading of online market, domestic brands begin to occupy the dominant position.

In 2017, the development of the household appliance industry demonstrated the following features: 1) due to the rise in raw material costs and the consumption and industrial upgrading, various home appliance enterprises accelerated the product upgrading and

updating and improved their high-end layout; 2) while the e-commerce maintained its highspeed growth, the integration of various retail channels would speed up, and the business mode of "online+offline+logistics+service" is changing the market; 3) based on the Internet of Things Technology, with the overall platform of hardware, software and cloud computing, the smart home ecosphere would become the mainstream, including of the remote control, ineterconnection of household appliances, the and the self-learning; "hardware+service" age would come, and the sales of both hardware and services would become an important feature of the entire household appliance industry; 5) the health concept would be accepted by more and more people, as people are inclined to pursue the healthy life, the way to keep human health would be an important factor while designing various household appliances. Household appliances or various functions positioned to diet and health, home environment and personal care would become the consumption hot topics; 6) the intelligent manufacturing era of the household appliance industry would gradually come. As driven by applicable national policies, various household appliance enterprises would speed up their transformation and intelligentizing process, and the intelligent ecosystem would thus be established in the future integrating R&D, manufacturing, sales, user interaction and post-sale services; 7) the development of kitchen appliances and domestic appliances would drive the increase fo entire industry. As the improvement of the living standard, demand for the improvement of life quality would become higher, and the growth rate of kitchen appliances and domestic appliances were expected to be higher than that of other traditional household appliances.

#### b. The industry of robotics and industrial automation

As predicted by International Federation of Robotics (IFR), the global sales of industrial robots would achieve 347,000 units in 2017, year-on-year increase of 18%. In the next three years, the annual sales of the global industrial robots will maintain the growth rate of 15%, and the sales of that will exceed 500,000 units in 2020, and the newly-increased total sales will reach about 1.7 million units. Since 2013, China has consecutively beenthe world's top 1 robots consumption country, and the growth rate of Chinese robots industrial scale has basically maintained above 20%, playing an important role in the steady increase of the

global robots industrial scale. According to the relevant data, the amount of industrial robots reached 136,600 units in the Chinese market in 2017 with a year-on-year increase of 60%, accounting for 1/3 of the total output in the world. As stated by IFR, the reason for the rapid increase of the robots in China is that the robots density in China is relatively low. In China, robots density is only about 68 robots per every 10,000 workers, and the robots density in Korea is 10 times of that in China. In terms of robots usage density, Korea now occupies the dominant position (every 10,000 workers own 631 robots) and is followed by Singapore (488 robots) and Germany (309 robots). In the world, the average robots density is 74 robots per 10,000 workers.

As predicted by the World Health Organization, in 2050, 35% of Chinese people will be over 60 years old, and China will become one of the severest aging countries in the world. The labor shortage and the rise in labor costs will also propel the rapid growth of demands for automation and intelligent devices including industrial robots, and the development space of the domestic robots industry will be broad. Meanwhile, robots will also be widely applied to various manufacturing processes, and the general equipment manufacturing industry, the household appliance manufacturing industry, the electronic equipment manufacturing industry, the rubber and plastics manufacturing industry (expect the motor industry) will become more and more dependent of the large-scale industrial robots, and such dependence is also expected to extend to the textile industry and logistics industry (high labor intensity), the defense and military industry & the civil explosive industry (high risk), the pharmacy, semiconductor and food industry (high requirements in the clean production environment), and the ceramics and brick-making industry (harmful to human health). Therefore, the Chinese industrial robots market in the future is promising, and the market scale is expected to reach RMB 100 billion.

#### 2. Significant Changes in the Main Assets

#### 2.1 Significant changes in the main assets

| Main assets | Reasons for any significant change |
|-------------|------------------------------------|
|-------------|------------------------------------|

| Equity assets            | Up 19% YoY, primarily driven by acquisition of subsidiaries  |
|--------------------------|--|
| Intangible assets        | Up 121% YoY, primarily driven by acquisition of subsidiaries |
| Construction in progress | Up 51% YoY, primarily driven by acquisition of subsidiaries  |

#### 3. Core Competitiveness Analysis

# 3.1 As one of the leaders among the global household appliance makers and a dominator in the major appliance sectors, Midea Group provides high-quality, one-stop home solutions through its wide product range, complete with full specifications.

As a white goods and HVAC enterprise with a whole industrial chain and full product line, Midea Group has developed a complete industrial chain combining R&D, manufacturing and sales of key components and finished products, supported by an industry-leading R&D centre and the manufacturing technology of core components (such as compressors, electrical controls and magnetrons), and ultimately based on its powerful capabilities in logistics and services. Midea is widely known as a top appliance and HVAC brand in China. Its dominance in the major appliance and HVAC markets means that it can provide a wide range of competitive product sets. It also means internal synergies in brand awareness, price negotiation as a whole, customers' needs research and R&D investments. Compatibility, coordination and interaction among household appliances have become increasingly important since smart home is gaining popularity. With a full product line, Midea has had a head start in providing a combined and compatible e-home platform with integrated home solutions for customers.

# 3.2 Global R&D resource integration capabilities, continuing lead in R&D and technical innovation

The Group is focused on building a competitive, multi-layered global R&D system centering on user experience and product functions, which represents world-class R&D input and strength. With more than RMB20 billion invested in R&D over the past five years, the Group has set up a total of 20 research centers in nine countries including China, with its R&D employees over 10,000 and senior foreign experts over 300. As shown in *The State of Innovation Report 2017* released by Clarivate Analytics, Midea Group has processed the most invention patents in the global household appliance sector for the past three years in a row. While establishing its own research centers around the world, the Group has also signed technical cooperation agreements with domestic and foreign scientific research institutions, such as MIT, UC Berkeley, UIUC, Stanford, Purdue University, Tsinghua University and the Chinese Academy of Sciences, in order to establish joint labs and build a global innovation ecosystem. The Group's long-term focus on building technology, marketing, product and open innovation systems, building a cutting-edge research system and building reserves in technology for the mid/long term, has provided a solid foundation for the Group to maintain technical superiority across the globe.

# 3.3 A stronger network of global operations developed and designed with Midea's continual global resource allocation and investments, globally-advanced manufacturing capabilities and advantage of scale

The success of a series of global acquisitions and new business expansion moves has further solidified Midea's global operations and leading advantages in robotiscs and automation. With the world's leading production capacity and experience, and a wide variety of products as well as its production bases all over the world, the Group has been able to expand rapidly into the emerging overseas markets and is becoming a stronger competitor in those mature overseas markets. The Group is one of the biggest manufacturers in the world for many product categories, which gives it competitive edges in efficiency and cost that its overseas competitors are unable to obtain. Overseas sales of the Group's accounts for close to 50% of the total sales revenue. Its products have been exported to over 200 countries and it owns 18 overseas manufacturing bases and dozens of overseas marketing units. In addition, with a deep knowledge and understanding on product characteristics and

product demands in overseas market, Midea is promoting world-wild branding and expanding through global collaboration and cooperation set up. In this way, the global competitiveness of Midea is increased steadily.

# 3.4 Broad channel networks and a well-established smart supply chain system ensuring the steady growth of Midea's online and off-line sales

By virtue of years of development and investments, Midea Group has formed an all-dimensional market coverage. In the mature first and second-tier markets, the Company has developed and maintained good partnerships with large home appliance retail chains. While in the broad third and fourth-tier markets, the Company uses flagship stores, specialty shops, traditional channels and new channels as effective supplements. Already, the Company has achieved 100% coverage in first and second-tier markets, as well as over 95% coverage in third and fourth-tier markets. Additionally, the Company's dominance in branding, products, offline channels and logistics distribution have also created powerful guarantees for the Company's rapid expansion of its e-commerce business and channels. Achieving the highest online sales among China's household appliance manufacturers, Midea's online sales exceeded RMB40 billion (around 30% of Midea's total domestic sales) in 2017.

With advanced smart equipment technology, Annto Logistics Technology Co., Ltd. (Annto), a subsidiary of Midea, has possessed core competitiveness and advantages in logistics automation. Annto has established an efficient, customer-oriented and quick response nationwide warehouses and direct distribution network, which covers 118 logistics centers nationwide and can offer fast delivery which can be finished in 24 hours within 100 kilometers and in 48 hours within 200 kilometers. Annto increases its investments in logistics automation, warehousing robotics, etc. Annto made in-depth research in smart logistics equipment, smart logistics solutions, big data analysis and artificial intelligence has achieved remarkable results. Automatic guided vehicles (AGVs) with visual navigation and laser guiding system developed by Annto has an industry-leading technical performance. Additionally, the mobile terminal system, the smart tracking equipment and the 3D visual technology developed by Annto all promote the efficiency of logistics intelligentization.

#### 3.5 A solid foundation for digitalization-driven Industrial Internet operations

Midea has been promoting a strategy of "Smart Home + Smart Manufacturing". With continual research and investment in artificial intelligence (AI), chip, sensor, big data, cloud computing and other new technologies, Midea has built the biggest AI team in the household appliance industry, which is committed to enabling products, machines, production processes and systems to sense, perceive, understand and make decision with the combination of big data and AI, in order to reduce intermediaries for man-machine interaction to the minimum and create truly smart appliances without any assistance in interaction.

Upon years of a digitalized reform characterized by "One Midea, One System, One Standard", Midea has successfully materialized operations driven by software and data through its value chain, connecting end to end and covering R&D, PO, scheduling, flexible manufacturing, procurement, follow-up of product quality, logistics, installation & post-sale services, etc. The Group's cloud platform has made come true C2M flexible manufacturing, platform-based, modularized and digitalized production techniques, logistics simulation, intelligent logistics, digital marketing, digital customer service, etc. In addition to applying these cloud platform solutions to its manufacturing bases across the world and tens of thousands of its products, the Group also markets these solutions to other companies and sectors. Therefore, it is safe to say that Midea has built a solid foundation regarding industrial internet systems.

# 3.6 Sound corporate governance mechanism and effective incentive mechanism to provide a solid foundation for Midea's sustained and steady development

Paying close attention to the construction of a governance framework, regarding its corporate control, centralization and decentralization systems, the Group formed a mature management system for professional managers. The divisional system has been in operation for many years, and its performance-oriented evaluation and incentive mechanism featuring full decentralization has become a training and growth platform for the Group's professional managers. The Group's senior management team consists of professional managers who have been trained and forged in the operational practices of Midea Group. They have been working for Midea on average for more than 15 years, so they all have rich

industry and professional experience, a deep understanding of the home appliance industry throughout both China and the world, and an accurate understanding of the industry's functioning environment and corporate operations management. The Company's advantages in systems and mechanisms have laid a solid foundation for the efficient and effective business operations, as well as the promising, stable and sustainable future development of the Company.

So far, the Company has launched four stock option incentive schemes, one restricted share incentive scheme and three "partner" stock ownership schemes for key managerial and technical personnel, marking the establishment of a governance structure aligning the interests of management and shareholders, as well as the formulation of an incentive scheme comprising long and short-term incentives and restrains.

# **Section IV Performance Discussion and Analysis**

#### 1. Overview

In the first half of 2017, guided by the three core strategies of "Leading Products, Operational Efficiency and Global Operations", Midea focused on improving products, investigating users' needs, increasing input to technology, and promoting lean management and excellent performance through the value chain. As a result, the business objectives set for the year were successfully fulfilled, sales revenue of each product categories reached fast growth, and product quality and reputation kept improving. Meanwhile, the integration of the global acquisitions proceeded well, further strengthening Midea's competitiveness in various product categories and global operation synergies. For 2017, Midea achieved, on a consolidated basis, total revenue of RMB241.919 billion, up 51.35% YoY; and net profits attributable to Midea Group shareholders of RMB17.284 billion, up 17.70% year-on-year.

In 2017, the Company carried out the following tasks:

a. Focused on users, continuously optimized the product structure and steadily improved product competitive advantages

— Residential Air Conditioners: by virtue of the powerful and solid technical advantages and aggresive and bold innovations, Midea residential air conditioners have won many honors and wide recognition of all sectors from home and abroad. During the IF Award appraisal campaign, three kinds of Midea residential air conditioners won the IF Design awards; during the conference of EU Energy Efficiency Standard Upgrading, Midea actively participated in establishing corresponding EU standards, advocated the upgrading of the industrial energy efficiency and improved its global influences; in 2017, Midea won two awards conferred by the Ministry of Science and Technology—Outstanding Private Science and Technology Enterprise and First Prize for Innovative Product; during the appraisal campaign of The 14th Top China Real Estate, Midea residential air conditioners was awarded "The First-choice Powerful Brand for China Real Estate"; under the organization of

China National Light Industry Associations, two projects completed by Midea (High IQ Room Air Conditioner Key Technology Research and Industrialization and Integral-type Air Conditioner Mute Key Technology Research and Industrialization) were unanimously authenticated to achieve a leading level in the world by the authoritative expert panel. In the list of the 19th Chinese Outstanding Patented Invention & Industrial Design published by the State Intellectual Property Bureau of China, the patents of "the floor air conditioner air duct structure and indoor unit" and "the intelligent power module and the manufacturing method" won the Excellence Awards. In 2017-2018 China Air Conditioning Industry Summit Forum, Midea Air Conditioners won four industrial awards, including Leader Brand on Health & Comfort Technology of 2017-2018 Air Conditioner Industry, Star of Comfort Technology of 2017-2018 Air Conditioner Industry and Outstanding Chinese Air Conditioner Installer of 2017-2018 Air Conditioner Industry.

 Commercial Air Conditioners: depending on its rich technology accumulated in many years, Midea holds over 1,000 patents. By virtue of its remarkable product advantages and brand influence, Midea has won more than 50,000 important projects in the world (including the FIFA World Cup stadiums in Brazil, Rio Olympic Games stadiums,, Singapore Changi International Airport, the UAE Government Residential Villa, Exhibition halls of the EXPO 2010 and the EXPO 2015 etc.) providing various world-level air solutions, relating to various fields such as hotels, real estate, education, sports and transportation etc.. In 2017, Midea won the bidding of 2018 FIFA World Cup Russia Venues Air Conditioner Project, proving its global competitiveness again. According to relevant monitoring data collected by Commercial Air Conditioner Market, the share occupied by Midea Air Conditioners in the Chinese commercial air conditioner market reached 15.4%, ranking first in this industry. The new-generation MDVS Full-DC Inverter Intelligent Multi-link air conditioner is driven by the M-Ai Full Frequency Conversion quasi two-stage compression technology and can enable the 24-hour real-time monitoring, the remote diagnosis, and the automatic repairing application. As a matter of fact, it has realized an all-round upgrading from three aspects energy-saving, comfortableness and intelligence, and won the Golden Prize of The 7th Hong

Kong Innovative Science and Technology Achievements; in the real estate market, Midea has developed various commercial air conditioners, including the MDV X series of commercial air conditioners for the exclusive use of villas, the TR series of residential air conditioners dedicated to the duplex apartments and the large apartments, the air-water heat pump as the solution of domestic hot water, the fresh air processing machine as the indoor air quality solution, the gas boiler for the household heating, the household appliances dedicated to the "coal to electricity" conversion projectin northern China, and the air source heat pump, and is able to offer various complete and professional air conditioning, hot water, fresh air and heating solutions. During the appraisal campaign of The 14th Top China Real Estate, Midea was awarded "The First-choice Powerful Brand for China Real Estate"; in the field of rail traffic, Midea commercial air conditioner has occupied the majority share in the domestic high-speed railway market. According to relevant statistics, Midea has served 650 high-speed train stations, covering more than 300 cities and involved in more than 50% of national high-speed train heating and ventilation projects. In 44 cities obtaining the approval for the construction of metro, Midea has earned orders from 20 cities for their urban metro engineering, and covered 18 provinces, occupying 45% of all cities with metros. Midea is also reputed as the brand involving the most cities, covering the longest metro mileage and receiving the most orders.

— Laundry Appliances: since the Company has owned the world-leading frequency conversion technology and various core technologies including the intelligent drive control, the structural design and the industrial design, it has obtained more than 2,000 patents related to laundry appliances, and developed its own technical advantages in the industry. Adhering to the high-quality principle, the Company made great effort to continuously promote various boutique engineering projects, enhanced the technical innovation and R&D investment, improved the product structure and enriched the medium and hi-end product layout. Through strengthening research on consumers' needs and having an insight into the users' pain points and the market demands, the Company has solved the users' pain points and further optimized the product structure by various innovative solutions including the i-Add, the water magic cube, the i-WIFI, the cold wash, the nanometer silver disinfection, the

anti-allergy, the ultrasonic wash and the classified wash etc. Little Swan has won the AWE Award, and the Beverly washing machine the Household Appliance Innovation Award. In addition, the Little Swan Washing & Drying AIO machine has obtained the anti-allergic testing certificate, and the wall-mounted washing machine the Golden Prize of the 10th China Outstanding Patented Technology and Industrial Design in Jiangsu Province. Meanwhile, the Little Swan Testing Center has been authenticated by German CTF Accredited Laboratory. In 2017 China Washing Machine & Clothes Dryer Industry Summit Forum, Midea washing machines won six awards. As the technical advantages are further strengthened and the product's competitiveness are continuously improved, Midea laundry appliances win wide recognition from the customers and the markets.

- Refrigerators: the Company will continuously manufacture innovative first-class products and usher in the product upgrading in the refrigerator industry. Midea BCD-629 Frequency Conversion Air-cooled Refrigerator can present the customers with a new intelligent experience by means of 360-degree sensitive temperature sensing and various intelligent settings such as the timely cooling adjustment, the remote temperature control, the expiry reminder, the online report to repair etc.; Midea Vandelo BCD-532 French Refrigerator has dug deep into the user's needs, and won 2017 Red Dot Design Award by virtue of various delicate designs including 90-degree Door Opening, independent multifunctional area, cosmeceuticals container on the indoor, the precise control of temperature and humidity, the full-open drawer, and the curved surface light source in association with the breathing lights for dynamic disinfection. In 2017 China Refrigerator Industry Summit Forum, Midea was entitled as Leading Brand on Innovative Technology of 2016-2017 China Refrigerator Industry, 532 Golden Refrigerator won the award of Leading Fresh Refrigerator of 2016-2017 China Refrigerator Industry, and BCD-525 Refrigerator obtained the award of Hi-end Intelligent Best-seller Product of 2016-2017 China Refrigerator Industry.

— Small Household Appliances: the Company has relied on its continuous technical innovations to drive the improvement of product, and many small household appliances have won various authoritative awards at home and abroad for consecutive years, including

the IF Design Award, the Red Dot Award, and the AWE Award etc., which has manifested the international first-class product competitiveness of Midea. Midea "Polar Light" range hood adopted the "Sky-eye Monitoring" system to monitor the real-time temperature changes and automatically adjust corresponding working conditions without any manual operation, With the large air flow of 20m³/min, the technology of high temperature steamcleaning completely solve the user's trouble; Midea M-BOX "Cooking Robot" Electric Cooker has won the AWE Award (Golden Award) by virtue of various intelligent functions including rice identification, rice placement, rice washing, watering and cooking etc.; Midea Vacuum Transformer IH Electric Cooker has made many breakthroughs in the IH Heating Technology and is able to intelligently identify the type of rice and match the cooking curve of each rice type to satisfy different needs of consumers, and it also won the golden prize of the multistage IH Heating Technology at the IFA exhibition; Midea 105kpa High-speed Aroma Electric Pressure Cooker is able to finish cooking in 19 minutes and perform sterilization at the hightemperature of 121°C, and steadily ranks the first in the pressure cooker industry; Midea Hiend High-speed Blenders of "Gangtiexia" and "Xiaogangpao" have taken the initiative in applying the eccentric disturbed flow technology and their diversified functions and the high efficiency in boiling have won positive comments from the world, ranking the first in this industry; Midea buuilt-in dishwasher has integrated the functioins of Chinese washing machine, fruit & vegetable cleaner, food waste grinder and kitchen sink to completely solve various kitchen problems, with one button for disposal of food wastein, and create a cleaning, comfortable and high-end experience for the customers; Midea free-installation dishwasher has broken through the restriction of installation and has the diversified cleaning modes, including 29 minutes cleaning mode, which is specially designed for small families; Midea Qingyu Smart Fan has applied the biomimetic feather blade design to blow softly and satisfy the needs of children and the aged, and it can also be linked with the air conditioner to provide different work programs under different temperature conditions; Midea wireless hand-held cleaner POWER P75 has applied the fast charging technology and equipped with the multiple-cone filtering system and the powerful motor to maintain the powerful suction and the long-lasting electric quantity, and it has won the award of Annual Innovative Product

at the IFA; Midea Beverly G400E Water Purifier has a compact volume with the 1L/min net water flux to provide customers the diversified high-quality experience; Midea Beverly I8 Water Heater has applied various innovative technologies including the 3.0T zero-cold water, an adaptive constant-temperature system and the sine sonic noise reduction technology, and won 2017 AWE Award.

b. Continuously increased the R&D investment, focused on the innovative R&D, promoted the global R&D layout and established the leading technology-driven Hi-tech company.

Emphasis has been placed to increase the R&D investment, construct the innovation system and steadily improve various products. Various platforms including Technical Innovation, User Innovation and Product Innovation etc. are also applied to support the overall technical breakthroughs. Meanwhile, special effort is also made tocontinuously perfect Midea 4-grade R&D System Management Mode, systematically establish the technical innovation planning system from the product strategic planning to the technical planning, improve the standards of high-quality project system, simplify and optimize the product platform, focus on breakthrough in the advenced technology research and the generic technology research, highlight the overall arrangement of the medium and long-term technical reserves and the long-term competitiveness improvement, and develop the core selling points of product.

In 2017, great effort was made to continuously improve the global R&D layout of Midea Group, and the company indeed made progress in speeding up corresponding technical research and materializing the localized development both in scope and in depth through integrating the global R&D resources: in Apri, the Emerging Technology Center (ETC) in Silicon Valley opened, and the America Research Center in Louisville moved to a new office; in May, the Japan Research Center was established, and Midea European R&D and Innovation Center was founded in Graz, Austria; in June, Midea User Experience & Innovation (Shanghai) Lab was formally open for business; in July, Singapore R&D Center was established, and Germany R&D Center was in preparation. At the end of 2017, Midea Group established 20 R&D Centers all over the world, covering 9 countries (China included). While enhancing the global R&D Center layout, Midea has also signed the technical cooperation agreements with various first-class scientific research institutions at home and

abroad, including MIT, UC Berkeley, UIUC, Stanford, Purdue University, Tsinghua University and Chinese Academy of Sciences etc. in order to set up the united lab, deepen the technical cooperation and create the global innovative ecosystem.

While carrying out the core technology research, Midea has attached great importance to the transformation of R&D achievements, and continuously won many awards and certificates. Midea Smart Technology Co., Ltd. was recognized as Guangdong Provincial Internet of Things Smart Home Engineering and Technological Research Center, and Guangdong Provincial White Household Appliances Technical Innovation Center by the Department of Science and Technology of Guangdong Province. In 2017, 16 technologies were identified by the authoritative expert panel to achieve the international leading level, including High IQ Room Air Conditioner Key Technology Research and Industrialization, Eccentric Disturbed Flow and Multi-layer Steady Fire IH Technology-based High-speed Blender Research and Industrialization, M-Ai Full Frequency Conversion Quasi Two-stage Compression Technology and its application to MDVS, the application of spray technology in the ultra-wide circumstance temperature high-temperature backwater distributed central heating system, the research and application of household kitchen ventilator intelligent steam cleaning technology, the research and industrialization of the new-generation variable-frequency power source applied to the micro-wave oven, the modular easy-to-clean materials and their application in kitchen appliances, and the AC No-polar Frequency Conversion Technology etc.. In the field of industrial design, the Company won 72 international design awards in 2017, including 20 German Red Dot Awards, 26 American IDEA Awards, 17 German IF Awards, 5 Janpanese GMARK Awards and 4 Korean GD Awards etc.

In 2017, Midea applied for 16,934 patents in total, including 7,714 patents for invention. At the end of 2017, the number of domestic patents applied by Midea exceeded 70,000 in total and 35,000 patents were effective. According to The State of Innovation Report 2017 issued by Clarivate Analytics, the number of patents obtained by Midea in the field of household appliances has ranked the first in the world for three consecutive years, and also ranked the first in domestic appliances and kitchen appliances.

c. Continued with the marketing reform and the channel transformation, improved the channel efficiency and promoted the rapid growth of e-commerce business.

The Company continued with the transformation of channel, simplified the tiers of offline channels, canceled the 2-tier dealers, focused on the core channels, completely propelled the optimization and integration of agents and the empowerment construction, connected the commodities, capital, information and logistics, promoted the direct sales on various ecommerce platforms, decreased the channel inventory, largely improved the channel efficiency, and strengthened the full-category synergy of the domestic sales terminals. In 2017, the Company set up 29 business centers in China in charge of undertaking the fullcategory synergy in various regions. Through clearly defining the responsibilities and rights, the energy and vitality of various business centers can thus be stimulated. Meanwhile, the united promotion activities in diversified forms were frequently held in line with the actual situation, achieving remarkable results. About 1,000 core shop managers were employed to strengthen the shop's full-category synergy, the shopping guide ordering, the purchase package and the sharing of shopping guide, further promote the synergistic basic construction, propel the improvement and upgrading of the domestic sales synergy proceeding in the aspects of the organizational system, the institutional rules, the methods and abilities and the resources incentive mechanism, and enhance the channel's long-term sustainable development.

Efforts were also made to continuously deepen the channel layout. In 2017, by making use of Midea multi-category synergistic advantages, the Company continued to develop and expand six major sales channels including flagship stores, Suning, Gome, Regional Chains (TOP Clients), micro-region chains (VIP Clients) and township exclusive shops so as to realize the channel layout at different levels from the villages and towns, the counties to the first-tier cities. The cooperation with Gome and Suning would be deepened, and it's also necessary to actively promote the cooperation with TOP Club and strengthen the construction of VIP medium and small-sized chain clubs. In the meantime, special effort was made to cooperate with various house fittings chain platforms. In 2017, Midea took the initiative to establish the Whole House Appliances Experience Hall, and in line with the

consumer's home decoration style and life style, the most suitable intelligent household appliances package could be customized for the customers. In this case, the consumers only need to place an order and their demands for all needed appliances could thus be satisfied without worrying about any installation problem because the Company would provide the consumers with the one-stop services (including the pre-sales service, the post-sales service and the installation and delivery service) and devoted to providing more comfortable home life experience for the users. Moreover, the Company also expanded new channels, successively developed corresponding platform-based reward points accumulation business (including banks, communication and aviation), continuously broadened new retail channels and diversified the cross-industry cooperation.

The e-commerce supply chain system efficiency was enhanced thorough focusing on the user experience. By taking advantage of Midea's omni-channel layout featuring "Online User and Order+Offline Flagship Store+Logistics and Storage", the Internet-based big data platform was established by depending on the full-category products. Besides, it's also necessary to improve the user operation system, explore the digital precision marketing based on the user and big data, and promote the omni-channel project through linking the online products, the offline products, orders and users together. In 2017, the whole online sales exceeded RMB 40 billion with a year-on-year increase of 70%.

d. Relying on the advanced technology and the intelligent equipment technology, developed the core competitiveness and capacity advantages based on the automation of logistics.

Relying on Annto Logistics Platform, the Company has established the high-efficiency integrated storage and delivery service, and continued improving the delivery network based on the warehouses, strengthened the trunk movement allocating capacity and the system's flexibility, integrated the online and offline marketing activities and the logistics, warehousing and delivery resources, reduced corresponding operating cost, and enhanced the entire link's response and the customer experience. In 2017, the Company completed the layout of the quick-response nationwide direct delivery network to satisfy the customer's needs. Since such network covered 118 cities in China, delivery could be finished in 24 hours within 100km, and 48 hours 200km. In the same year, the revenue from the end-to-end integrated

warehousing and delivery business reached 20% of the total revenue of Annto.

Unremitting effort will be made to develop the core competitiveness based on the automation of logistics, continuously increase the investment into the automation of logistics and the warehousing robots, and deepen relevant researches and output favorable results from various aspects such as the intelligent logistics equipment, the intelligent logistics solutions, the big data analysis and the artificial intelligence. In 2017, AGV products with proprietary intellectual property rights of Annto, equipped with AIR-PICK Visual Navigation system and SLAM laser guiding system, featured advanced and outstanding technical performance, and corresponding multi-agent robot control program was also worked out and put into use; through researching, developing and applying the 4GRF mobile terminal, the digitized and paperless field management could thus be realized with high efficiency and rapid deployment; the whole logistics process was visible by developing and applying intelligent tracking devices; the logistics system could be intelligentized by researching and applying the 3D visual technology.

In 2017, Annto developed its external partners and made concerted effort to establish the advanced and high-efficiency logistics service system, obviously improving its influences in this industry. During the Double Eleven period (November 11), Annto efficiently undertook the Double Eleven Project for Tmall, and various operating indice were in the front rank among Cainiao Alliance Large Transport Partners. As a result, Annto won the Jinhong Award of Cainian Alliance, and received wide recognition from the entire industry. In October 2017, Annto and Jingdong Logistics cooperated with each other to establish the 300,000 m2 cloud warehouse project (five warehouses in four places), integrating relevant regional logistics resources, linking corresponding data platform, effectively reducing the operating cost of the industrial chain, warehousing and delivery, and providing various e-commerce platforms and brand owners with professional, standardized and high-efficiency e-commerce logistics services.

e. Implemented the "Digitization 2.0" Project and promoted the whole value chain operating management by means of digitization.

It's necessary to actively implement the "Digitization 2.0" Project, and drive the linking of the

end-to-end business by means of the software and data with the C2M (Customization) as the guiding principle. Meanwhile, all links (R&D, the supply chain, manufacturing, finance, and customer service) will be driven by orders and data to realize the flexible delivery. A digital planning platform has been established, in which way, all data from the value chain throughout the process will be collected and analyzed by means of the big data platform. The product concept database is also built to complete the analysis of the product life cycle data and accordingly support the product digitization planning; in terms of the product development, Midea propelled the product design of parameterization, standardization, modularization and platformization, and by implementing the super BOM, sales stimulated and determined the platform architecture, the module division, and the solidification and optimization of the modular interface; the digital process management system would be established to realize the electronization and structuralization of the process management data. However, C2M Phase I has made a breakthrough in the channel customization. Namely, the customers can directly customize their products on the selection and matching platform, which means that Midea has entered into the age of customization.

In addition, great importance shall be attached to promote the digitization of the channel terminal business and the online management and upgrade the CCS2.0 System. The Midea Cloud Sales System is newly launched to support and guarantee the customer's basic information maintenance, the buying and selling relationship management, the purchase-sell-stock data management, the price/order/sales management and the implementation of policies so as to largely enhance the channel inventory's authenticity control, realize the information transparency and sharing, and provide corresponding data support and system guarantee for various sales strategies. In 2017, the RMS System (Retail Management System) was released to enable two major functions with the improvement of the terminal marketing efficiency as the core, including the realization of Service Terminal Management (including the terminal inspection, work diary, promotion management, purchase-sell-stock data search) and the improvement of shopping guide (including retail reporting, salary calculation and payment, and live class). CCS, Midea Cloud Sales System and RMS served as the three fundamental management systems to support the sales in domestic market,

covering the whole channel, the information management of terminal stores, the delivery, the distribution and the retail. As a result, all business processes can be completed online, the information will be visualized and the efficiency improved.

The customer service system has completely combined with the mobile terminals in order to fully improve the work efficiency of all information staffs and various management levels. Meanwhile, electronic bills are also available now, including Electronic Invoice and Electronic Contract, and the electronic signature technology is also introduced. Besides, the legal person's identity information and three major certificates can also be authenticated online. Further, the signing of contract is visualized in real time, which will not only improve the contract signing efficiency and correctness, but also save corresponding costs.

By means of the integrated planning and purchasing project, the supply chain's upstream and downstream can thus be connected; the production can be stimulated and the seamless connection between the planning and the implementation will be realized. The production scheduling will be optimized in line with the actual production performance, and the 2-4 hour scheduling and stock system has also been established to realize the intensive production scheduling and the intensive delivery, preparing a high-efficiency supply system for the flexible manufacturing and increasing 83% production scheduling efficiency. Special attention is also paid to implement the supplier planned production synergy, the logistics synergy and the full coverage of the vehicle entry booking system, strengthen the capacity visualization synergy efficiency and the system's usability, and support the order tracking throughout the process. By means of the prior order scheduling, it is possible to realize the quick appraisal of the factory's orders received based on T+3 Mode, the precise positioning and efficient analysis of corresponding resources gaps, which will promote the systematical implementation of the general collecting mode and effectively reduce corresponding product costs.

It's also required to expand the big data technology platform, improve the enterprise-level indicator system and the data operation mechanism in order to visualize the whole process and drive the full-field data. Related data will be collected based on various products, materials, techniques and projects for the purpose of data research, and two kinds of R&D

data sub-products have also been developed including Product Cube and R&D Steward; in terms of the data from domestic sales and export sales, the omni-channel data monitoring system shall be established to focus on the product sales structure, the price system and the market layout, visualizing all data ranging from the order placement to the after-sales service; the big manufacturing data shall regard the visualization of capacity as the core objective, and completely improve the digital management on the manufacturing field; big financial and economic data shall be analyzed and applied to measure the profit and loss, the profitability and the costs indicators so as to provide a valid data support for the enterprise's endogenous growth.

f. Efficiently promoted Midea's globalized business layout and business growth; strengthened the operation organization and the compliance management; and accelerated the cooperative integration of Toshiba Household Appliances Project.

Midea has become a company involved in global operations, and will strictly adhere to its global business strategies and improve its global layout from various aspects such as R&D, manufacturing and sales to enhance its ability in global operations. Midea's global businesses involve more than 200 countries and regions, and it has established 18 overseas production bases with more than 35,000 employees from 21 countries. In addition, its overseas businesses also involve 22 settlement currencies; Midea has successfully set up its global R&D Center respectively in the U.S.A., Japan, Italy, Germany, India, Singapore, Austria and Israel etc. In 2017, Midea initiated the "Green Space" Project in India, which will further enlarge the localized layout of air conditioners, refrigerators, washing machines and other household appliances in India. Midea has established 24 sales and operation agencies all over the world, covering the Northern America, the South America, the Europe, the Asia, the Africa and the Oceania in order to stimulate and strengthen its localized operations overseas. In 2017, the business revenue from Midea's overseas companies increased rapidly, and the exports of residential air conditioners, micro-wave ovens, refrigerators, dishwasher, water heaters, fans, washing machines and induction cookers continued keeping ahead of other domestic household appliances enterprises. Midea's brand awareness is promoted steadily and continuously.

Special measures are taken to strengthen the control of overseas risks; the governance, legal affairs and compliance system framework geared to overseas companies is also established; proceeding from the board operation, the license management, the internal control mechanism, the anti-monopoly policy, the anti-corruption policy, the export control and the product liability, various mechanisms will be promoted and implemented including the affiliate transactions, the internal loan, the transnational capital transfer and the protection of the shareholder's equity. By establishing the regional headquarters of Midea Group, corresponding internationalized corporate governance principles will be further implemented in line with the actual local conditions and applicable laws and regulations.

In 2017, emphasis was placed to speed up the restructuring of core businesses, value chain, business flow and other structural adjustments, continue implementing the Toshiba Household Appliances Global Operating Strategy, cooperate with Toshiba to finish the cross licensing between brand and technology, the arrangement of internal and external supply chain, the channel licensing and the integration of corporate management, and create corresponding environment to support the self-owned brand strategy of Midea Group. In 2017, Toshiba took effective measures to conduct and deepen the reform and pay special attention to the structural adjustment. Firstly, Toshiba completely cooperated with corresponding Midea Household Appliances Business Department to enhance the product layout of Toshiba Brand in the global market and accelerate the realization of cooperative effect throughout the value chain covering the brand, channel, innovative R&D, supply chain and quality manufacturing together with Midea Product & Business Department. In 2017, there were over 75 cooperative projects. Secondly, through introducing the international 632 business system, the global IT basic platform and the internal system process were further established and the operation efficiency was also improved. Thirdly, the strategy of "Further Expand the Japanese Market and Focus on Overseas Countries" was firmly implemented, and various measures were also taken to arrange the e-commerce business in order to make comprehensive preparations for turning losses into gains in 2018 from such aspects as market, product, system and mechanism. However, Toshiba realized an annual revenue of over RMB 15 billion in 2017. Although Toshiba did not make profit on in the year due to various external factors (including the YEN Exchange Rate, the rise of raw material prices and the complicated global economic situation), its core household appliances business increased. Especially in the intensely competitive Japanese market, the shares of Toshiba Refrigerators, washing machines and air conditioners still rosesteadily.

g. Seized the opportunity of global development for robotics and automation system business, and cooperatively promote the rapid growth of the business.

Concerted effort was made to promote the rapid growth of KUKA Robotics business. In 2017, the revenue of KUKA Robotics business achieved a year-on-year increase of 18%, reaching the highest level in history, and new orders were obtained from time to time as well. The company took effective measures to expand its businesses in China from various aspects such as the application of intelligent manufacturing, the customer resources sharing, the development of logistics and medical automation business, the collaboration of governmental resources and the support.

KUKA Robotics has always maintained its investment into R&D, and explored corresponding market expansion and layout. A transition will also be finished from the hardware advantages to the software, intelligent manufacturing data system, cloud platform and the overall solutions for the purpose of enhancing the upgrading of Industry 4.0. In terms of networking, the Cloud-based software platform KUKA Connect developed by KUKA can enable the customers to access to relevant robotic data at any place in the world, in which way, the production performance and efficiency can thus be improved; in light of Human and Robot Collaboration, KUKA Sensing System can narrow or even remove the security fence between operators and robots. In 2017, KUKA invested in the Cloud Technology and the Internet of Things, and strengthened the cooperative development with various partners. Visual Components merged by KUKA is specialized in the 3D simulation software solutions geared to the factory planning, and such simulation technology will effectively enhance the application ability based on the KUKA simulation ecosystem. Besides, KUKA also invested Device Insight GmbH (an Internet of Things company in Munich) which is a leading IoT company specialized in the IoT platform, the automation industry and the network products. Based on such investment, KUKA is expected to strengthen and broaden its professional knowledge and domains related to the Internet of Things and improve its innovation ability in the field of Industry 4.0. Meanwhile, KUKA has also deepened the strategic partnership with Volkswagen Enterprise Research Company to jointly develop the creative robotics concept geared to vehicles in the future. The company has planned and built a production system applied to manufacture various battery modules and high-tension batteries that are suitable for the electric automobiles produced by leading manufacturers in Europe. In the field of service robots, KUKA and Volkswagen cooperated with each other to research the CarLa, the charging robot for electric automobiles.

Further efforts are made to integrate the Midea Robotics and automation business platform and the drive control business. The Robotics Platform of Midea is capable of working out corresponding design standards and customizing motion control solutions for the automation system suppliers, and contains a series of products including the hardware servo motor, the controller and the encoder etc. Through integrating corresponding drive control business and investing the development of ASR, AI and visual and sensing technology, Midea further expands the application of Robotics & automation system and such as Intelligent Manufacturing, Intelligent Logistics, Smart Home and Rehabilitation Therapy etc. Meanwhile, Midea has also cooperated with others to research and develop the intelligent logistics robotics system, and now 40 sets are put into production in commission, which has been continuously tested for more than 1,400 hours, and 21 patents for invention and 12 patents for utility models in total has been applied. As a result, the traditional work mode will be overturned and replaced by a brand-new mode, which will satisfy the demand for small batches & rich varieties, largely improve the order picking efficiency and the warehouse utilization rate, reduce the error rate and decrease the overall logistics costs.

The robotic platform team construction is accelerated. In 2017, Midea Automation Business Platform newly introduced a professional team consisting of 120 talents in charge of coordinating with various units to work out the medium and long-term automation planning, implementing the standardized management geared to the robotic and professional equipment, integrating internal and external resources, carrying out the key automation demonstration project, and gradually establishing Midea's ability and influences in

formulating the overall solutions in the field of 3C Household Appliances and Automation.

The product application of Midea Yaskawa Service Robotics Co., Ltd. is also accelerated. At present, several products have obtained corresponding ISO13485 Medical Equipment Authentication, and 5 new products have obtained CFDA Medical Equipment Authentication. In 2017, 3 of the 5 new rehabilitation exercise products were put into volume production.

h. Deepen the industrial layout for Smart Home Appliance and promote the implementation of Smart Home Appliance Strategy.

In 2017, Midea Smart Technology would continue and strengthen the implementation of the M-Smart Strategy, optimize the Cloud Platform, Meiju, Communication Module, Intelligent Security System and the post-sales service, and continuously improve the customer satisfaction. Meanwhile, special effort is also made to expand the overseas Internet of Things+ Business, improve the integration of Echo/Alexa ecology. The Smart Home Layout can provide strong support for Midea's Globalization Strategy.

The Company has always increased the investment into the R&D and market resources of intelligent household appliances, and continuously enhanced the market competitiveness of various intelligent household appliances. In March 2017, Midea Smart Technology launched the Internet of Things Security Wi-Fi Security Chip which was designed in conformity with the national financial security demand standards and reached the highest security level standard set by China Information Security Evaluation Center in the field of USBKEY. In May 2017, Midea Smart Technology passed corresponding security products testing conducted by PICC, and various intelligent products were insured by PICC. In fact, Midea is the first manufacturer in this industry to purchase corresponding product liability insurance for its products. In December 2017, Midea Smart Technology released Meiju APP 4.0 with the new and upgraded page and simplified operation procedures. Having an insight into various frequently-used functions, it is able to design corresponding intelligent services for the user according to the specific scenario. In 2017, Midea Smart Technology obtained 7 international industrial design awards (including IF, Red Dot, and IDEA etc.), and its patent for invention won the Excellence Award of The 19th Chinese Outstanding Patented Invention & Industrial Design.

The Company has also made great effort to propel the construction of M-Smart big platform ecosphere, developed the third-party IoT platform Meizhi by adhering to the concept of M-Smart Inside, promoted the cooperation with Hengda, Country Garden, Vanke and other real estate companies, and realized the combination of Smart Community with Smart Home. In the meantime, it's also necessary to completely open the M-Smart system to the public, and strengthen the external cooperation from such aspects as Cloud-to-Cloud Docking, the third-party mobile terminal control, the intelligent hardware access and the introduction of the third-party content resources. As a result, 105 partners have been introduced in total, and corresponding strategic partnerships are also established with China Mobile, Huawei, SGCC, COFCO, HONYAR, OnStar, Whaley, Ayla Networks, DOOYA and Hutlon etc.

Midea Smart Technology has taken the lead in establishing its systematical service capacity. In 2017, Midea Smart Technology launched a series of independently-developed new products and new technologies, including the intelligent gateway, intelligent door lock, the combustible gas detector, the smoke detector and the smart panel etc. for the purpose of creating a safe, convenient and cozy living environment for the users. As a matter of fact, it is not easy for Midea Smart Technology to become a provider that is able to offer the overall smart home solutions including chips, Cloud and Terminal.

i. Improved the corporate governance level and enhanced the long-term incentive schemes.

In 2017, Midea launched the first restricted share incentive scheme and the fourth stock option incentive scheme for its medium and top management and core business backbones as well as the third Midea Group "Partner" scheme for its core management posennel that play a significant role in the Company's overall business performance and medium and long-term development in order to encourage the management to take responsibility for the Company's long-term value and growth. The incentive schemes have helped to align the long-term interests of senior management and key personnel with that of all shareholders, and the corporate governance has been further improved.

#### 2.4 R&D investment

### √ Applicable □ N/A

In the Reporting Period, Midea continued to build a "customer-oriented" operating system. It promoted technological innovation and product improvement through improving its global, open R&D system covering four links from prior study to product development. Also, a world-class R&D team has been set up and R&D investment has been increased to work on core technology, basic technology and future technology. In this way, Midea is able to develop advanced, quality products with unique selling points appealing to customers and create differential competitive edges. For more details about R&D investment and product competitiveness improvement, please refer to the relevant contents presented in "Core Competitiveness Analysis" under "Section III Business Profile" and "Overview" under

"Section IV Operating Performance Discussion and Analysis".

### Information about R&D input

|   | 2017      | 2016      | YoY Change (%) |
|---|-----------|-----------|----------------|
| Number of R&D personnel                                       | 10,520    | 8,741     | 20.35%         |
| R&D personnel as a percentage in total employees              | 10.33%    | 9.07%     | 1.26%          |
| R&D input (RMB'000)   | 8,500,000 | 6,045,800 | 40.59%         |
| R&D input as a percentage in operating revenues               | 3.53%     | 3.80%     | -0.27%         |
| Capitalized R&D input (RMB Yuan)                              | -         | -         | -              |
| Capitalized R&D input as a percentage in total R&D investment | -         | -         | -              |

Note: The data in the table above excludes those of TLSC and KUKA.

| Risk analysis of positions held in derivatives during the Reporting Period and explanation of control measures  (Including but not limited to market risk, liquidity risk, credit risk, operational risk, legal risk, etc.) | only carried out futures business for some of the materials, but also made use of bank financial instruments and promoted forex funds business, with the purpose of avoiding the risks of exchange and interest rate fluctuation, realizing the preservation and appreciation of forex assets, reducing forex liabilities, as well as achieving locked-in costs. The Company has performed sufficient evaluation and control against derivatives investment and position risks, details of which are described as follows:  1. Legal risk: The Company's futures business and forex funds businesses shall be conducted in compliance with laws and regulations, with clearly covenanted responsibility and obligation relationship between the Company and the agencies. |

and strengthened compliance check, so as to ensure that the Company's derivatives investment and position operations meet the requirements of the laws and regulations and internal management system of the Company.

Operational risk: Imperfect internal process, staff, systems and external issues may cause the Company to suffer from loss during the course of its futures business and forex funds business.

Control measures: The Company has not only developed relevant management systems that clearly defined the assignment of responsibility and approval process for the futures business and forex funds business, but also established a comparatively well-developed monitoring mechanism, aiming to effectively reduce operational risk by strengthening risk control over the business, decision-making and trading processes.

3. Market risk: Uncertainties caused by changes in the prices of bulk commodity and exchange rate fluctuations in foreign exchange market could lead to greater market risk in the futures business and forex funds business. Meanwhile, inability to timely raise sufficient funds to establish and maintain hedging positions in futures operations, or the forex funds required for performance in forex funds operations being unable to be credited into account could also result in loss and default risks.

Control measures: The futures business and forex funds business of the Company shall always be conducted by adhering to prudent operation principles. For futures business, the futures transaction volume and application have been determined strictly according to the requirements of production & operations, and the stop-loss mechanism has been implemented. Besides, to determine the prepared margin amount which may be required to be supplemented, the futures risk measuring system has been established to measure and calculate the margin amount occupied, floating gains and losses, margin amount available and margin amount required for intended positions. As for forex funds business, a hierarchical management mechanism has been implemented, whereby the operating unit which has submitted application for funds business should conduct risk analysis on the conditions and environment affecting operating profit and loss, evaluate the possible greatest revenue and loss,

|   | and report the greatest acceptable margin ratio or total margin amount, so that the |
|---|---|
|   | Company can update operating status of the funds business on a timely basis to      |
|   | ensure proper funds arrangement before the expiry dates.                            |

Acquisition and disposal of subsidiaries during the Reporting Period

## √ Applicable □ N/A

For the main subsidiaries included in the consolidated financial statements of the current year, please refer to Note 5 and Note 6 to the Financial Statements herein. For the newly consolidated subsidiaries, see Note 5, 5.1 and 5.2, (a), and they primarily include: Guangdong Midea Electric Co., Ltd., Guangdong Midea Smart Robots Co., Ltd., Chongqing Midea Microcredit Co., Ltd., Guangdong Midea GiMAY Technology Co., Ltd., Hefei Midea Smart Technology Co., Ltd., Guangdong Midea Kafei Coffee Machine Manufacturing Co., Ltd., Midea Electric Netherlands (I) B.V., KUKA Aktiengesellschaft, SMC, Dongguan Kafei Electric Manufacturing Co., Ltd. and Fujitsu (Guangdong) Technology Service Co., Ltd. For the newly deconsolidated subsidiaries, see Note 5, 5.2, (b).

### 8. Structured Bodies Controlled by the Company

☐ Applicable √ N/A

### 9. Outlook for the Future Development of the Company

### 9.1 Development strategies of the Company

The Company will deepen its transformation towards a strategic vision of "becoming a world-leading technologies group in consumer appliances, HVAC systems, robotics and industrial automation systems, and smart supply chain (logistics)". It will keep developing advanced products based on the customer's needs by way of technological innovation, quality improvement and quality product programs. It will promote efficiency-driven growth by improving management, manufacturing and asset efficiency to create more cost efficiency. It will also promote global operations and try to lay a solid foundation in this regard through promoting its own branded products and strengthening law compliance. Additionally, it will strengthen its robotics and industrial automation operations to create new business and growth points. Meanwhile, it will push forward its Digitalization 2.0 program to improve operation and management through the entire value chain by way of digitalization, so as to construct its own industrial internet ecosystem.

### 9.2 Key operation points in 2018

a. It will focus on endogenous growth by further improving operation and management through the entire value chain. It will launch a new round of transformation and upgrading centered on the customer's needs to rebuild its corporate structure, culture and value chain

so that it can create more value for the customer. It will optimize its inventory mix, reduce the cash-to-cash cycle and overheads, improve profitability, create more cost efficiency and leverage synergies among operations. Seizing opportunities arising from consumption upgrading, it will increase R&D investment to improve its product mix and functions to maintain differential and large scale competitive edges in a changed domestic market.

- b. It will further promote digitalization to improve business and management flows. All the links must be digitalized and driven by software, and all business and core management flows must be accessible online around the clock. Through such digitalization through the entire value chain, it is laying a foundation for smart manufacturing and Industrial Internet.
- c. It will effectively push forward global operations and improve management and control in this respect. It will strengthen coordination among its business units and improve the operating capability of overseas branch companies for better operating results and better performance through the entire value chain. It is pushing forward business integration and synergies regarding newly acquired subsidiaries in an effective manner. TLSC has returned to profit; and a trial operational model for overseas operations characterized by proper centralization and well-organized decentralization has been launched in the ASEAN area and India. In the meantime, it will continue to strengthen corporate governance and law compliance in overseas operations and lay a more solid foundation in this respect. It will also increase investment in infrastructure of overseas operations to improve their logistics and after-sales service systems by setting up customer service hotlines for overseas customers.
- d. It will further reform marketing by promoting flattening and optimization to increase channel efficiency and improve user experience. It will promote better connectivity among products, money, information and logistics. It will promote direct distribution and also use central distribution to build a shared inventory system for all channels so as to increase inventory and capital turnover.
- e. Seizing opportunities arising from the development of the industrial automation and smart manufacturing sector, it will continue to work on industrial robots, commercial robots, service robots and AI. It will try to develop more key industrial automation components, as well as

strengthen coordination and integration in its general industrial robots, warehousing automation and medical automation operations in China, so as to promote its fast expansion and growth in the domestic market.

### 9.3 Key capital expenditure plan in future

To adapt to changes in the industry environment, the Company will focus its 2018 investments on technological innovation, product quality improvement, robotics and industrial automation systems, digitalization, e-commerce channel expansion and new retail channels construction, global operation capability improvement and the smart home strategy. Meanwhile, the Company will strictly control investment in infrastructure and capacity expansion, as well as expenditures not associated with production. The money to be spent will primarily come from the Company's own money.

### 9.4 Main risks in future development

### a. Risk of macro economy fluctuation

The market demand for the Company's consumer appliances and HVAC equipment, among other products, can be easily affected by the economic situation and macro control. If the global economy encounters a heavy hit, or the domestic economy consumer demand slows down in growth, the growth of the household appliance industry, to which the Company belongs, will slow down accordingly, and as a result, this may affect the product sales of Midea Group.

### b. Risks in the fluctuation of production factors

The raw materials required by Midea Group to manufacture its consumer appliances and core components primarily include different grades of copper, steel, aluminum, and plastics. At present, the household appliance manufacturing sector belongs to a labor intensive industry. If the price of raw materials fluctuate largely, or there is a large fluctuation in the cost of production factors (labor, water, electricity, and land) caused by a change to the macroeconomic environment and policy change, or the cost reduction resulted from lean production and improved efficiency, as well as the sale prices of end products cannot offset the total effects of cost fluctuations, the Company's business will be influenced to some

degree.

### c. Risk in global asset allocation and overseas market expansion

Internationalization and global operations is a long-term strategic goal of the Company. The Company has built joint-venture manufacturing bases in many countries around the world. Progress has been made day by day regarding the Company's overseas operations and new business expansion. However, its efforts in global resource integration may not be able to produce expected synergies; and in overseas market expansion, there are still unpredictable risks such as local political and economic situations, significant changes in law and regulation systems, and sharp increases in production costs.

d. Risk in product export and foreign exchange losses caused by exchange rate fluctuation As Midea carries on with its overseas expansion plan, its export revenue has accounted for nearly 50% of the total revenues. Any sharp exchange rate fluctuation might not only bring negative effects on the export of the Company, but could also lead to exchange losses and increase its finance costs.

### e. Market risks brought by trade barriers

With trade protectionism on the rise around the world, besides the tariff barriers, the non-tariff barriers among countries have become increasingly distinctive. These can mainly be seen on compulsory safety certificates, international standards and requirements, and product quality and management systems certification, energy-saving requirements, the call for increasingly strict environmental protection requirements, as well as with rigorous requirements for recycling household appliances waste. Trade protectionism and trade frictions caused by anti-dumping measures implemented by some countries and regions aggravate the burden in costs and expenses for household appliance enterprises, and have brought about new challenges to market expansion for enterprises.

# 1. Profit Distribution and Converting Capital Reserves into Share Capital for Common Shareholders

Formulation, execution or adjustments of profit distribution policy, especially cash dividend policy, for common shareholders in the Reporting Period

□ Applicable √ N/A

Plans (or preliminary plans) for profit distribution and converting capital reserves into share capital for common shareholders for the past three years (including the Reporting Period)

For 2015, based on its total of 4,267,391,228 shares, the Company distributed a cash dividend of RMB12 (tax inclusive) and a share dividend of 5 additional shares (converted from capital reserves) per 10 shares to all shareholders. The book closure day was 5 May 2016 and the ex-right & ex-dividend day 6 May 2016.

For 2016, based on its total of 6,465,677,368 shares, the Company distributed a cash dividend of RMB10 (tax inclusive) per 10 shares to all shareholders. The book closure day was 9 May 2017 and the ex-dividend day 10 May 2017.

For 2017, based on its total of 6,584,022,574 shares, it is proposed that the Company should distribute a cash dividend of RMB12 (tax inclusive) per 10 shares to all shareholders. The proposal has been considered and approved by the 30th Meeting of the 2nd Board of the Company and will later be submitted to a general meeting of shareholders for further consideration.

Midea Group has attached great importance to returns to investors ever since its holistic listing in 2013. Its accumulated cash dividend payouts have reached RMB27 billion, with the cash dividend payout accounting for at least 40% of the net profit attributable to Midea Group shareholders every year. And the Company reviews its plans for returns to shareholders at least every three years to ensure a consistent dividend payout policy.

Cash dividend to common shareholders in the past three years (including the Reporting Period)

Unit: RMB

| Year | Cash dividends<br>(tax included) | Net profit attributable to common shareholders of the Company in the consolidated statement in the year | Ratio to net  profit  attributable to  common  shareholders  in the  consolidated  statement in  the year | Cash dividends<br>in other forms | Ratio of cash<br>dividends in<br>other forms |
|------|----------------------------------|---|---|----------------------------------|--|
| 2017 | 7,900,827,088.80                 | 17,283,689,000.00   | 45.71%  | 0.00                             | 0.00   |

### A. Overview of the First Stock Option Incentive Scheme

a. The Company convened the 20<sup>th</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 29 March 2017, at which the *Proposal for the Adjustments to the Incentive Receivers and Their Exercisable Stock Options of the First Stock Option Incentive Scheme* was reviewed and approved. As such, it was agreed to adjust the incentive receivers and their exercisable stock options for the First Stock Option Incentive Scheme due to the departure, positional changes, low performance appraisals or other factors of some incentive receivers. Upon the adjustments, the number of incentive receivers decreased from 562 to 518, and the number of locked-up stock options granted to them was also reduced from 40,957,500 to 37,518,750.

The *Proposal for Matters Related to the Stock Option Exercise for the Third Exercise Period of the First Stock Option Incentive Scheme* was also considered and approved. Because the exercise conditions have grown mature for the third exercise period, a total of 514 incentive receivers who have been verified for the First Stock Option Incentive Scheme have been allowed to exercise 37,518,750 stock options in the third exercise period (ended 17 February 2019).

b. On 3 May 2017, the *Announcement on the 2016 Annual Profit Distribution* was disclosed by the Company, with a decision to distribute a cash dividend of RMB10.00 per 10 shares to all the shareholders based on the total of 6,465,677,368 shares of the Company. The book closure date was 9 May 2017 and the ex-dividend date was 10 May 2017.

The Company convened the 22<sup>nd</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 12 May 2017, at

which the *Proposal for the Adjustments to the Exercise Price for the First Stock Option Incentive Scheme* was reviewed and approved. As the 2016 Annual Profit Distribution had been carried out, the exercise price for the First Stock Option Incentive Scheme was revised from RMB11.01 to RMB10.01 per share.

c. On 24 May 2017, the exercise conditions grew mature for the third exercise period of the First Stock Option Incentive Scheme. Upon examination by the Shenzhen Stock Exchange and the Shenzhen branch of China Securities Depository and Clearing Co., Ltd., the third exercise period of the First Stock Option Incentive Scheme started on 24 May 2017. In the Reporting Period, 28,395,770 stock options have been exercised.

### B. Overview of the Second Stock Option Incentive Scheme

a. The Company convened the 22<sup>nd</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 12 May 2017, at which the *Proposal for the Adjustments to the Exercise Price for the Second Stock Option Incentive Scheme* was reviewed and approved. As the 2016 Annual Profit Distribution had been carried out, the exercise price for the Second Stock Option Incentive Scheme was revised from RMB19.56 to RMB18.56 per share.

b. The Company convened the 23<sup>rd</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 1 June 2017, at which the *Proposal for the Adjustments to the Incentive Receivers and Their Exercisable Stock Options of the Second Stock Option Incentive Scheme* was reviewed and approved. As such, it was agreed to adjust the incentive receivers and their exercisable stock options for the Second Stock Option Incentive Scheme due to the departure, positional changes, low performance appraisals or other factors of some incentive receivers. Upon the adjustments, the number of incentive receivers decreased from 639 to 583, and the number of locked-up stock options granted to them was also reduced from 72,810,000 to 66,195,000.

The Proposal for Matters Related to the Stock Option Exercise for the Second Exercise Period of the Second Stock Option Incentive Scheme was also considered and approved. Because the exercise conditions have grown mature for the second exercise period, a total of 577 incentive receivers who have been verified for the Second Stock Option Incentive Scheme have been allowed to exercise 32,940,000 stock options in the second exercise

period (ended 27 May 2019).

c. On 9 June 2017, the exercise conditions grew mature for the second exercise period of the Second Stock Option Incentive Scheme. Upon examination by the Shenzhen Stock Exchange and the Shenzhen branch of China Securities Depository and Clearing Co., Ltd., the second exercise period of the Second Stock Option Incentive Scheme started on 9 June 2017. In the Reporting Period, 28,342,341 stock options have been exercised.

### C. Overview of the Third Stock Option Incentive Scheme

a. The Company convened the 22<sup>nd</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 12 May 2017, at which the *Proposal for the Adjustments to the Exercise Price for the Third Stock Option Incentive Scheme* was reviewed and approved. As the 2016 Annual Profit Distribution had been carried out, the exercise price for the Third Stock Option Incentive Scheme was revised from RMB21.35 to RMB20.35 per share.

b. The Company convened the 24<sup>th</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 29 June 2017, at which the *Proposal for the Adjustments to the Incentive Receivers and Their Exercisable Stock Options of the Third Stock Option Incentive Scheme* was reviewed and approved. As such, it was agreed to adjust the incentive receivers and their exercisable stock options for the Third Stock Option Incentive Scheme due to the departure, positional changes, low performance appraisals or other factors of some incentive receivers. Upon the adjustments, the number of incentive receivers decreased from 929 to 891, and the number of locked-up stock options granted to them was also reduced from 127,290,000 to 121,485,000.

The *Proposal for Matters Related to the Stock Option Exercise for the First Exercise Period of the Third Stock Option Incentive Scheme* was also considered and approved. Because the exercise conditions have grown mature for the first exercise period, a total of 887 incentive receivers who have been verified for the Third Stock Option Incentive Scheme have been allowed to exercise 40,395,000 stock options in the first exercise period (ended 27 June 2019).

c. On 6 July 2017, the exercise conditions grew mature for the first exercise period of the Third Stock Option Incentive Scheme. Upon examination by the Shenzhen Stock Exchange

and the Shenzhen branch of China Securities Depository and Clearing Co., Ltd., the first exercise period of the Third Stock Option Incentive Scheme started on 7 July 2017. In the Reporting Period, 22,609,862 stock options have been exercised.

### D. Overview of the Fourth Stock Option Incentive Scheme

a. On 29 March 2017, the *Fourth Stock Option Incentive Scheme (Draft)* and its abstract were reviewed and approved at the 20<sup>th</sup> Meeting of the 2<sup>nd</sup> Board of Directors, and the incentive receiver list for the *Fourth Stock Option Incentive Scheme (Draft)* was examined at the 14<sup>th</sup> Meeting of the 2<sup>nd</sup> Supervisory Committee.

b. On 21 April 2017, the Company convened the 2016 Annual Meeting of Shareholders, at which the Fourth Stock Option Incentive Scheme (Draft) and its abstract, the Implementation and Appraisal Measures for the Fourth Stock Option Incentive Scheme, the Proposal for Asking the Meeting of Shareholders to Authorize the Board to Handle Mattes Related to the Fourth Stock Option Incentive Scheme and other relevant proposals were reviewed and approved.

For this Incentive Scheme, the Company intended to grant 98,982,000 stock options to 1,476 incentive receivers with the exercise price being RMB33.72 per share.

c. In light of the authorization given at the 2016 Annual Meeting of Shareholders, the Company convened the 22<sup>nd</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 12 May 2017, at which the *Proposal for the Adjustments to the Exercise Price, Incentive Receiver List and Number of Stock Options to Be Granted for the Fourth Stock Option Incentive Scheme*, the *Proposal for the Determination of the Grant Date for the Fourth Stock Option Incentive Scheme* and the *Proposal for the Grant-Related Matters for the Fourth Stock Option Incentive Scheme* were reviewed and approved. As such, the Company agreed to grant 98,274,000 stock options to 1,463 incentive receivers on 12 May 2017 with the exercise price being RMB32.72 per share. The incentive receiver list and the number of stock options to be granted were revised by the Company's Board of Directors because 13 incentive receivers were no longer eligible due to their departure or positional changes.

### E. Overview of the First Employee Stock Ownership Scheme

According to the first and second Core Management and "Midea Group Partner" Stock Ownership Schemes (draft) ("Employee Stock Ownership Schemes" for short), the number of shares for every intended incentive receiver should be determined based on how well the performance objectives of the Company, its business divisions and operating units for the appraisal year are achieved and how much an intended incentive receiver contributes to that. The shares will be vested in an intended incentive receiver by three installments (40% for the first installment and 30% for the second and third respectively). The first 70% shares (the first and second installments combined) vested in an incentive receiver will be locked up when these shares are until the final 30% is put under the name of the incentive receiver, and the third installment will not be subject to lock-up (tradable as soon as they are put under the name of the incentive receiver).

Where an intended incentive receiver is no longer eligible during the period of such a stock ownership Scheme due to positional changes or departure, the administrative committee for the stock ownership plan will take back, with no compensation, those shares that have not yet vested in the incentive receiver.

Because two such partners (Yuan Liqun and Wu Wenxin) had left the Company before the second installment of the First Employee Stock Ownership Scheme could be vested in them, their unvested shares of 216,000 and the corresponding dividends (if any) have been taken back by the administrative committee for no compensation, and will be sold before the First Employee Stock Ownership Scheme expires. The earnings on the sale will belong to the Company.

A total of 774,900 shares (30% of the total shares to be vested for the First Employee Stock Ownership Scheme) have been vested as the second installment, of which 335,250 shares were vested in senior executives Fang Hongbo, Zhu Fengtao, Gu Yanmin and Wang Jinliang while the remaining 439,650 shares in other nine core management personnel.

### F. Overview of the Second Employee Stock Ownership Scheme

a. The company performance requirement for the Second Employee Stock Ownership

Scheme is a weighted average ROE not lower than 20% for 2016. According to the 2016 Annual Auditor's Report for Midea Group Co., Ltd. issued by PricewaterhouseCoopers China (LLP), this ROE requirement has been met at 26.88%.

- b. A total of 3,874,590 of the Company's shares have been purchased for the Second Employee Stock Ownership Scheme. As per the Second Employee Stock Ownership Scheme (Draft), the administrative committee has confirmed the number of shares to be granted to each intended incentive receiver, with the total shares to be granted being 3,248,790 shares (1,732,800 shares for senior executives Fang Hongbo, Gu Yanmin, Yin Bitong, Zhu Fengtao and Wang Jinliang and the remaining 1,515,990 shares for other eight core management personnel). The committee has also confirmed the first installment for this employee stock ownership Scheme (1,299,516 in total).
- c. There were 625,800 shares left due to the departure of two Midea Group Partners (Yuan Liqun and Wu Wenxin) in the period of the Second Employee Stock Ownership Scheme. As per the Second Employee Stock Ownership Scheme (Draft), these shares and their dividends (if any) have been taken back by the administrative committee for no compensation, and will be sold before the Second Employee Stock Ownership Scheme expires. The earnings on the sale will belong to the Company.

### G. Overview of the Third Employee Stock Ownership Scheme

- a. The *Proposal for the Third Core Management and "Midea Group Partner" Stock Ownership Plan (Draft) of Midea Group Co., Ltd. & Its Abstract* was considered and approved at the 20<sup>th</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 29 March 2017. As resolved by a meeting of the intended incentive receivers of the Third Employee Stock Ownership Scheme, China International Capital Corporation Limited (CICC) was entrusted to conduct the "CICC Directional Asset Management Scheme for the Third Midea Group Partner Stock Ownership Scheme" with Midea Group shares purchased from the secondary market.
- b. On 18 May 2017, CICC, the stock ownership Scheme administrator, purchased a total of 2,846,445 Midea Group shares at an average price of RMB34.77/share from the secondary market. The funds used for the share purchase were sourced from Midea Group's special

fund for the Third Employee Stock Ownership Scheme of RMB99 million. As such, the shares needed by the Third Employee Stock Ownership Scheme have been purchased, with a statutory lock-up period from 19 May 2017 to 18 May 2018.

### H. Overview of the 2017 Restricted Share Incentive Scheme

a. On 29 March 2017, the *2017 Restricted Share Incentive Scheme (Draft)* and its abstract were reviewed and approved at the 20<sup>th</sup> Meeting of the 2<sup>nd</sup> Board of Directors, and the incentive receiver list for the *2017 Restricted Share Incentive Scheme (Draft)* was examined at the 14<sup>th</sup> Meeting of the 2<sup>nd</sup> Supervisory Committee.

b. On 21 April 2017, the Company convened the 2016 Annual Meeting of Shareholders, at which the 2017 Restricted Share Incentive Scheme (Draft) and its abstract, the Implementation and Appraisal Measures for the 2017 Restricted Share Incentive Scheme, the Proposal for Asking the Meeting of Shareholders to Authorize the Board to Handle Mattes Related to the 2017 Restricted Share Incentive Scheme and other relevant proposals were reviewed and approved.

For this restricted share incentive Scheme, the Company intended to issue, for the first phase, 24,240,000 restricted shares to 140 incentive receivers at the price of RMB16.86 per share, and issue another 5,550,000 restricted shares as reserve.

c. In light of the authorization given at the 2016 Annual Meeting of Shareholders, the Company convened the 22<sup>nd</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 12 May 2017, at which the *Proposal for the Adjustments to the Grant Price, Incentive Receiver List and Number of Restricted Shares to Be Granted for the First Phase of the 2017 Restricted Share Incentive Scheme, the <i>Proposal for the Determination of the Grant Date for the First Phase of the 2017 Restricted Share Incentive Scheme* and the *Proposal for the Grant-Related Matters for the First Phase of the 2017 Restricted Share Incentive Scheme* were reviewed and approved. As such, the Company agreed to grant 23,130,000 restricted shares to 133 incentive receivers on 12 May 2017 at the price of RMB15.86 per share. The incentive receiver list and the number of restricted shares to be granted were revised by the Company's Board of Directors because seven incentive receivers were no longer eligible

due to their departure or positional changes.

- d. PricewaterhouseCoopers China (LLP) issued on 19 May 2017 the *Capital Verification Report* PwC China CV (2017) No. 542, verifying the increase in the Company's registered capital and the payment thereof as of 18 May 2017 due to the Company's issue of restricted shares of its A-stock to 133 incentive receivers in the first phase of its 2017 Restricted Share Incentive Scheme. As verified, as of 18 May 2017, the Company had received RMB366,841,800 from 133 incentive receivers for restricted share subscription, representing an increase of RMB23,130,000 in share capital and an increase of RMB343,711,800 in capital reserves.
- e. As per the CSRC's *Measures for the Administration of Equity Incentives of Listed Companies*, and as confirmed by the Shenzhen Stock Exchange and China Securities Depository and Clearing Co., Ltd. (Shenzhen branch), the shares in the first phase of the Company's 2017 Restricted Share Incentive Scheme had been registered and were to go public on 16 June 2017.
- f. In light of the authorization given at the 2016 Annual Meeting of Shareholders, the Company convened the 29<sup>th</sup> Meeting of the 2<sup>nd</sup> Board of Directors on 29 December 2017, at which the Proposal on Grant of 2017 Reserved Restricted Shares to Incentive Receivers was reviewed and approved. As such, the Company agreed to grant 5,475,000 reserved restricted shares to 55 incentive receivers on 29 December 2017 at the price of RMB27.99 per share. And the incentive receiver list was examined at the 21<sup>st</sup> Meeting of the 2<sup>nd</sup> Supervisory Committee.
- g. The Company had intended to grant 5,475,000 reserved restricted shares to 55 incentive receivers. However, after the date of grant, one incentive receiver left the Company and the 90,000 reserved restricted shares that had been granted to this incentive receiver were cancelled. As such, the Company actually granted 5,385,000 reserved restricted shares to 54 incentive receivers. PricewaterhouseCoopers China (LLP) issued on 26 January 2018 the *Capital Verification Report* PwC China CV (2018) No. 0061, verifying the corresponding increase in the Company's registered capital and the payment thereof as of 24 January 2018. As verified, as of 24 January 2018, the Company had received RMB150,726,150 from 54

incentive receivers for reserved restricted share subscription, representing an increase of RMB5,385,000 in share capital and an increase of RMB145,341,150 in capital reserves.

h. As per the CSRC's *Measures for the Administration of Equity Incentives of Listed Companies*, and as confirmed by the Shenzhen Stock Exchange and China Securities Depository and Clearing Co., Ltd. (Shenzhen branch), the reserved shares in the Company's 2017 Restricted Share Incentive Scheme had been registered and were to go public on 7 February 2018.

#### 18. Social Responsibility (CSR)

#### 18.1 Measures taken to fulfill CSR commitment

The Company has voluntarily disclosed its CSR work. Attaching great importance to protecting the legal rights and interests of its shareholders, employees, consumers and business partners, as well as the government, the community and other stakeholders, the

Company sticks to harmonious common growth with them, honors its commitments, abides by law and moral principles, and continue to contribute to the sustainable development of the society and the environment. For further information, see the Company's *Corporate Social Responsibility Report 2017* released on <a href="https://www.cninfo.com.cn">www.cninfo.com.cn</a>.

#### 18.2 Measures taken for targeted poverty alleviation

#### A. Summary of the work done for targeted poverty alleviation during the year

Midea Group has been making great efforts to help alleviate poverty in the Guangdong Province. As it grows bigger and stronger, it willingly takes on social responsibility and gives back to society. In 2017, Midea donated a total of RMB20.5 million, of which RMB10 million was given for targeted poverty alleviation to the Guangdong government's office for poverty alleviation and development, and another RMB10 million was given to the Beijiao Town Charity Federation for poverty alleviation and public welfare of the town. Additionally, it supported the Foshan Municipal Government to help reduce poverty in Liangshan in the Sichuan Province by donating 1,100 sets of small domestic appliances worth RMB0.5 million to the people there in July 2017. With the donation receiving institutions knowing exactly their responsibilities and how to use the donated money properly, all the donated money has been made good use of and produced positive effects in the society.

#### B. Targeted poverty alleviation plans for the coming future

To follow the spirit of the 19<sup>th</sup> National Congress of the Communist Party of China, President Xi Jinping's ideology of socialism with Chinese characteristics in a new era, and the decisions and plans made by the Guangdong provincial party committee and government for poverty alleviation, Midea Group will stay down to earth and seek actual results in its work done for the targeted poverty alleviation drive. It will accelerate such work and stick to the basic strategy of targeted poverty alleviation in this regard. And it will continue to work with the Guangdong government's office for poverty alleviation and development to get to know realities in the poor areas, draw up specific plans to help fight poverty and carry them

out effectively.

#### 18.3 Environmental protection

Neither the Company nor any of its subsidiaries is declared a heavily polluting business by the environmental protection authorities.

#### 19. Other Significant Events

Note: Mr. He Xiangjian, Midea Group's actual controller, has declared on 25 July 2017 that he would donate

100,000,000 Midea Group shares he holds via Midea Holding to charity. Midea Holding is currently unable to transfer these shares to the charity trust it has set up because certain confirmations are needed regarding the execution of the regulations for share transfers to charitable trusts and taxes on these share transfers. Midea Holding will begin to deal with the formalities for the trust's registration and the said shares' transfer to the trust as soon as the problems are solved. Before that, these shares will remain with Midea Holding.

Did any of the top 10 common shareholders or the top 10 non-restricted common shareholders of the Company conduct any promissory repurchase during the Reporting Period

☐ Yes ✓ No

No such cases in the Reporting Period.

Punishments imposed in the recent three years by the securities regulators on the incumbent directors, supervisors and senior management as well as those who left in the Reporting Period

☐ Applicable √ N/A

#### 4. Remuneration of Directors, Supervisors and Senior Executives

The following describes the decision-making procedures, grounds on which decisions are made and actual remuneration payment of directors, supervisors and senior executives.

The decision-making remuneration procedure for directors, supervisors and senior executives: The remuneration is proposed by the Board Compensation Committee and

approved by the Board. Decisions are made finally after the deliberation of shareholders' meeting.

The remuneration of directors, supervisors and senior executives consist of basic annual payments and performance-related annual payments according to the *Salary Management System for the Directors, Supervisors and Senior Executives* which has been approved by the Company. Basic payment is determined based on the responsibility, risk and pressure of directors, supervisors and senior executives. The basic annual payment remains stable. Performance-related annual payment is related to the completion rate of corporate profit, the assessment result of target responsibility system and the performance evaluation structure of their own department. The remuneration system for directors, supervisors and senior executives serves the Company's strategy, and shall be adjusted with the Company's operating conditions in order to meet the Company's development requirements. The basis for adjusting the remuneration of directors, supervisors and senior executives are as follows:

- a. Wage growth in the industry
- b. Inflation
- c. Corporate earnings
- d. Organizational structure adjustment
- e. Individual adjustment due to a change in position

### **Section IX Corporate Governance**

#### 1. Basic Situation of Corporate Governance

The Company is constantly improving its corporate governance in strict accordance with the Company Law, the Securities Law and the relevant regulations of the China Securities Regulatory Commission. There are four special committees under the Board, namely the Strategy Committee, the Auditing Committee, the Nomination Committee as well as the Remuneration and Appraisal Committee. They were designed to provide consultation and advice to the Board and validate the professionalization and efficiency of discussions and decision-making. The Company has established clear rules of procedure for its shareholders' general meeting, board of directors, Supervisory Committee and special committees under the board, as well as the Work Rules for Company Secretary. It has also established a set of standard documents including Information Disclosure Management System, Funds Raising Management System, Connected Transaction Management System, Wealth Management Entrustment Management System, Insider Registration System, External Guaranty Decision-making System, Foreign Investment Management System, and Management System for Finance Flow with Connected Parties, Internal Auditing System. The shareholders' meeting, the Board, Supervisory Committee and operations management departments have clear authority and responsibility. Each performs its own functions and maintains its stability effectively. Their scientific decision-making and coordinated operations have laid a firm foundation for the sustained, healthy and steady development of the Company.

The Company has also launched core management team shareholding plans and equity incentive plans for core research, quality control, technical, production and management staff, which helps to develop a sound shareholding structure for the future growth of the Company.

In 2017, the Company won the following honors for its corporate governance:

"The Best Board of Directors" at "The Golden Round Table Awards 2017" presented by the *Directors & Boards* magazine; "China's Top 10 Listed Companies in 2017" by CCTV; "2018 National Brand Plan Top Brand" by CCTV; "Golden Horse Award for Social Responsibility 2018" by *Securities Daily*; "Global Top 2,000 Listed Companies" by the *Forbes*; and "Global Top 500" by the *Fortune*.

Any incompliance with the regulatory documents issued by the CSRC governing the governance of listed companies

☐ Yes ✓ No

No such cases in the Reporting Period.

# 2. Independency of businesses, personnel, assets, organizations, and finance which are separate from the controlling shareholder

The Company is totally autonomous with respect to business, personnel, assets, organizations, and finance from Midea Holding Co., Ltd., the controlling shareholder of the Company, therefore maintaining integrity and independency in both business and operations.

#### 2.1 Business independence:

The Company has a complete industrial chain for its manufacturing business, a completely distinct purchase and sales system, and an independent and comprehensive business operation capability.

#### 2.2 Personnel independence:

The Company is completely autonomous from the controlling shareholder regarding its personnel. The labor, personnel and remuneration management of the company are totally unrelated. All senior management members received remuneration from the Company except those that hold only a director's position in the controlling shareholder.

#### 2.3 Asset integrity:

The Company has its own independent production system as well as ancillary production systems and facilities. Intangible assets such as industrial rights, trademark ownership and

non-patent technology are held by the Company.

#### 2.4 Organization independence:

The Company has set up an independent organizational structure which maintains its independent operation. The Company has the right to appoint or remove any personnel so there is no overlapping with the controlling shareholder.

#### 2.5 Financial independence:

The Company's financial management is independent from the controlling shareholder. The Company has its own accounting department, accounting system, financial management system, and bank accounts and independently makes financial decisions and pays its own taxes according to relevant laws.

#### **Auditor's Report**

PwC ZT Shen Zi (2018) No. 10017 (Page 1 of 8)

To the shareholders of Midea Group Co., Ltd.,

### **Opinion**

What we have audited

We have audited the accompanying financial statements of Midea Group Co., Ltd. (hereinafter "Midea Group"), which comprise:

- the consolidated and company balance sheets as at 31 December 2017;
- the consolidated and company income statements for the year then ended;
- the consolidated and company cash flow statements for the year then ended;
- the consolidated and company statements of changes in shareholders' equity for the year then ended; and
- notes to the financial statements.

#### Our Opinion

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and company's financial position of Midea Group as at 31 December 2017, and their financial performance and cash flows for the year then ended in accordance with the requirements of the Accounting Standards for Business Enterprises ("CASs").

#### **Basis for Opinion**

We conducted our audit in accordance with China Standards on Auditing ("CSAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of Midea Group in accordance with the Code of Ethics for Professional Accountants of the Chinese Institute of Certified Public Accountants ("CICPA Code"), and we have fulfilled our other ethical responsibilities in accordance with the CICPA Code.

# **Key Audit Matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters identified in our audit are summarised as follows:

- Revenue recognition of sales of home appliances
- Fair value assessment of the identifiable net assets relating to the acquisition and recognition of goodwill
- Impairment testing of goodwill

#### **Key Audit Matter** How our audit addressed the Key Audit Matter Revenue recognition of sales of home appliances Refer to note 2(27) "Revenue" and note Regarding Midea Group's revenue from sales of home "Operating income" appliances, we performed the procedures as follows: 4(33) to the consolidated financial statements. We interviewed management from operation and financial Revenue is recognised when it's probable departments in terms of sales processes of all distribution that the economic benefits associated with channels to understand and evaluate the internal controls the transaction will flow to Midea Group, of processes relating to sale of home appliances designed the related revenue can be reliably by management and tested the operating effectiveness of measured, and the specific criteria of key controls; revenue recognition have been met for each type of Midea Group's activities. In We checked the sample sales contracts entered into by 2017, operating revenue of Midea Group Midea Group and its customers from all distribution was RMB240,712,301,000, around 80% of channels, and analysed and evaluated Midea Group's which is from sales of home appliances. accounting policies on the revenue recognition of sales of appliances based on the interview We focused on revenue recognition of management, understanding of Midea Group's business sales of home appliances mainly due to and our audit experience. Midea Group's numerous customers and sales volume at home and abroad Regarding the sales of home appliances through all achieved by its varied distribution distribution channels, we performed the procedures as channels. follows: We performed risk assessment procedures, such as analysis of fluctuation in monthly sales of home appliances and analysis of fluctuation in gross profit margin, etc.; We checked supporting documents relevant to sales of home appliances on sample basis, including sales contracts, sales orders, sales invoices, shipping orders, acknowledgement of goods receipts signed by customers, etc.; We checked sales of home appliances recognised balance sheet date around the against acknowledgement of goods receipts signed by customers or billing agreements with customers or other supporting documents to evaluate if the revenue was recognised in appropriate period.

performed.

We concluded that the Midea Group's revenue recognition of sales of home appliances complied with its applicable accounting policies based on the audit procedures

acquisition and recognition of goodwill

assessment

As at 6 January 2017 (the "Acquisition Date"), Midea Group completed the acquisition of 81.04% equity interests of KUKA Aktiengesellschaft (hereinafter referred to as "KUKA") at a cash consideration of RMB27,001,856,000. After that, Midea Group approximately 94.55% equity interests of KUKA accounting for the 13.51% equity interests acquired in prior years. KUKA and its subsidiaries (hereinafter referred to as "KUKA Group") was consolidated by Midea Group from the Acquisition Date, identifiable with net assets of RMB10,412,360,000 and goodwill (the difference between the consideration paid for the acquisition and the shares of the fair value of the identifiable net assets) of RMB20,698,212,000 recognised. increase of fair value of the identifiable net assets of KUKA Group from its carrying amount mainly represents the recognition and valuation of intangible assets, such as trademark right, technology, customer relationship and order backlog.

Critical judgements were involved in the fair value assessment of identifiable assets and liabilities, particularly in identifying and valuation of intangible assets, which have impact on the goodwill. recognition of External independent valuer was engaged by management to identify the intangible assets and perform valuation of the identifiable assets and liabilities.

Regarding the fair value assessment of identifiable net assets relating to the acquisition and recognition of goodwill, we performed the procedures as follows:

- 1. We evaluated competency, professional quality and objectivity of the external valuer, obtained the valuation results from the external valuer and interviewed management and the external valuer;
- 2. We performed the following procedures with the assistance of our internal valuation specialists:
- 1) We evaluated the appropriateness of valuation methodologies as adopted by management;
- 2) We tested the accuracy of arithmetic applied in calculating goodwill and the fair value of the identifiable assets and liabilities;
- 3) We evaluated the completeness of the identifiable assets and liabilities by reference to the acquisitionrelated announcements from the open market, external analyst reports on KUKA Group and financial information of KUKA Group;
- 4) We read the business development plan prepared by the management to evaluate the synergies achieved by the Group in the acquisition and reassessed the overall reasonableness of goodwill recognised in the acquisition;

PwC ZT Shen Zi (2018) No. 10017

# **Key Audit Matters(cont'd)**

#### **Key Audit Matter** How our audit addressed the Key Audit Matter Fair value assessment of the identifiable net assets relating to the acquisition and recognition of goodwill (cont'd) 5) We evaluated the reasonableness We focused on critical estimates and judgement management's cash flows forecasts and with regard to valuation of identifiable assets weighted average cost of capital based on the and liabilities, especially on the key interview with management and by reference to assumptions used to identify and valuate the the historical operating data of KUKA Group, intangible assets, such as revenue growth external analyst reports of the industrial rates, EBITDA (Earnings Before Interest, Taxes, development trend, and risk factors and market Depreciation and Amortisation) margins, risk premium of comparable companies. We contributory asset charges, royalty rates, evaluated the appropriateness residual useful lives of intangible assets assumptions adopted in the fair identified, discount rates, etc. assessment of intangible assets based on the reasonableness of the above analysis, such as revenue growth rates, EBITDA margins, contributory asset charges, royalty rates, residual useful lives of intangible assets identified, discount rates, etc. We concluded that the audit evidence we have obtained could support methodologies and key assumptions adopted by management in the fair value assessment of identifiable net assets and recognition of goodwill based on the audit procedures performed.

# **Key Audit Matters(cont'd)**

#### **Key Audit Matter**

#### Impairment testing of goodwill

Refer to note 4(13) "Goodwill".

As at 31 December 2017, the goodwill recorded in the consolidated balance sheet of Midea Group is RMB28,903,785,000, of which RMB22,202,569,000 and RMB2,695,355,000 arising from the acquisition of KUKA Group in 2017 and Toshiba Lifestyle Products & Services Corporation ("TLSC") in 2016, respectively. Management believed that it was not necessary to make impairment provision for the goodwill based on the impairment testing prepared in accordance with the accounting policies stated in note 2(20) to the consolidated financial statements. The impairment testing performed by assessing the recoverable amount of the groups of assets containing the relevant goodwill, based on the present value of cash flows forecasts. Key assumptions adopted in the impairment testing of goodwill included expected revenue growth rates, EBITDA margins, perpetual annual growth rates, discount rates, etc. which involved critical accounting estimates and judgement.

We focused on the impairment testing goodwill of RMB 24,897,924,000 arising from acquisition of KUKA Group and TLSC because the amount was significant and the impairment testing of goodwill involved critical accounting estimates and judgement.

#### How our audit addressed the Key Audit Matter

Regarding the impairment testing of goodwill arising from the acquisition of KUKA Group and TLSC, we performed the procedures as followings:

- We understood and evaluated the internal controls relevant to the impairment testing of goodwill, and tested the operating effectiveness of key controls, including the internal controls of review and approval of key assumptions adopted and calculation of the recoverable amounts of the groups of assets containing the relevant goodwill;
- We evaluated the appropriateness of methodologies of impairment testing of goodwill adopted by management with the assistance of of our internal valuation specialists, and evaluated and recalculated the discount rates adopted in the test by comparing industry or market data;
- 3. We tested the accuracy of arithmetic applied in the calculating process of impairment testing of goodwill;
- 4. We revaluated the accuracy of historical estimates by comparing the actual financial performance of current year with the forecasts of prior years or at the acquisition date, so as to check whether there was any bias from management during the impairment testing of goodwill;
- 5. We evaluated the reasonableness of key assumptions adopted in the impairment testing of goodwill, such as expected revenue growth rates, EBITDA margins and perpetual annual growth rates, by interviewing with management and considering the market development.

We concluded that the audit evidence we have obtained could support the accounting estimates and judgement applied by management in the impairment testing of goodwill based on the audit procedures performed.

#### Other Information

Management of Midea Group is responsible for the other information. The other information comprises all of the information included in 2017 annual report of Midea Group other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management of Midea Group is responsible for the preparation and fair presentation of these financial statements in accordance with the CASs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing these financial statements, management is responsible for assessing Midea Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Midea Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Midea Group's financial reporting process.

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether these financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

#### Auditor's Responsibilities for the Audit of the Financial Statements(Cont'd)

- Identify and assess the risks of material misstatement of the financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and
  obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The
  risk of not detecting a material misstatement resulting from fraud is higher than for one
  resulting from error, as fraud may involve collusion, forgery, intentional omissions,
  misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Midea Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in these financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause Midea Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities
  or business activities within Midea Group to express an opinion on the consolidated financial
  statements. We are responsible for the direction, supervision and performance of the group
  audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

(Page 8 of 8)

#### Auditor's Responsibilities for the Audit of the Financial Statements(Cont'd)

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 1 General information

The operational activities of Midea Group Co. Ltd. (hereinafter referred to as the "Company") and its subsidiaries (collectively referred to as the "Group") are principally engaged in the manufacturing and sale of home appliances, design and implementation of scheme for robots and industrial automation system. Other operations include sale, wholesale and processing of raw materials of home appliances and financial business, which includes customer deposits, interbank lending, consumption credit, buyer's credit and finance lease.

The Company was promoted and set up by the Council of Trade Unions of GD Midea Group Co. Ltd., and was registered in Market Safety Supervision Bureau of Shunde District, Foshanon 7 April 2000, with its headquarters located in Shunde District, Foshan. On 30 August 2012, the Company was transformed into a limited liability company. On 29 July 2013, the Company was approved to acquire additional interests in Guangdong Midea Electric Co., Ltd., a subsidiary listed on Shenzhen Stock Exchange. On 18 September 2013, the Company's shares became listed on Shenzhen Stock Exchange through share issuance and share exchange.

As at 31 December 2017, the Company's registered capital is RMB6,561,053,319 and the total number of shares in issue is 6, 561,053,319, of which 212,022,910 shares are restricted tradable shares and 6,349,030,409 shares are unrestricted tradable shares.

The detailed information of major subsidiaries included in the consolidation scope in the current year is set out in Note 5 and 6. Entities newly included in the consolidation scope in the current year include Guangdong Midea Electric Co., Ltd., Guangdong Midea Intelligent Robotics Co., Ltd., Chongqing Midea Microfinance Loan Co., Ltd., Guangdong Midea Advanced Technologies Co., Ltd., Hefei Midea Advanced Technologies Co., Ltd., Guangdong Midea Kafei Coffee Machine Manufacturing Co., Ltd., Midea Electric Netherlands (I) B.V., KUKA Aktiengesellschaft ("KUKA") and its subsidiaries ("KUKA Group"), Servotronix and its subsidiaries ("SMC"), Dongguan Alba Industries Co., Ltd., ("Dongguan Kafei") and Fujitsu South China Technology Services Limited ("Fujitsu"). Please refer to Note 5(1) and 5(2)(a) for details. The detailed information of subsidiaries no longer included in the consolidation scope in the current year is set out in Note 5(2)(b).

These financial statements were authorised for issue by the Company's Board of Directors on 29 March 2018.

#### 2 Summary of significant accounting policies and accounting estimates

The Group determines specific accounting policies and accounting estimates based on the features of production and operation, mainly including the recognition method of provision for bad debts of accounts receivable (Note 2(10)), valuation method of inventory (Note 2(12)), depreciation of fixed assets and amortisation of intangible assets (Note (15) and (18)), and recognition time of revenue (Note 2(27)).

Critical judgements applied by the Group in determining significant accounting policies are set out in Note 2(33).

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (1) Basis of preparation

The financial statements are prepared in accordance with the Accounting Standard for Business Enterprises - Basic Standard, and the specific accounting standards and other relevant regulations issued by the Ministry of Finance on 15 February 2006 and in subsequent periods (hereafter collectively referred to as "the Accounting Standards for Business Enterprises" or "CAS") and the disclosure requirements in the Preparation Convention of Information Disclosure by Companies Offering Securities to the Public No.15 – General Rules on Financial Reporting issued by the China Securities Regulatory Commission.

The financial statements are prepared on a going concern basis.

#### (2) Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company for the year ended 31 December 2017 are in compliance with the Accounting Standards for Business Enterprises, and truly and completely present the financial position of the consolidated and the Company as at 31 December 2017 and their financial performance, cash flows and other information for the year then ended.

#### (3) Accounting period

The Company's accounting year starts on 1 January and ends on 31 December.

### (4) Functional currency

The functional currency of the Company is the Renminbi ("RMB"). The Company and its subsidiaries determine their functional currency based on the primary economic environment in which the business is operated, mainly including KUKA Group's functional currency-EUR and Toshiba lifestyle Products & Services Corporation ("TLSC")'s functional currency-JPY. The financial statements are presented in RMB.

### (5) Business combinations

### (a) Business combinations involving enterprises under common control

The consideration paid and net assets obtained by the absorbing party in a business combination are measured at the carrying amount. If the absorbing party was bought by the ultimate controller from a third party in prior years, the value of its assets and liabilities (including goodwill generated due to the combination) are based on the carrying amount in the ultimate controller's consolidated financial statements. The difference between the carrying amount of the net assets obtained from the combination and the carrying amount of the consideration paid for the combination is treated as an adjustment to capital surplus (share premium). If the capital surplus (share premium) is not sufficient to absorb the difference, the remaining balance is adjusted against retained earnings. Costs directly attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (5) Business combinations

#### (b) Business combinations involving enterprises not under common control

The cost of combination and identifiable net assets obtained by the acquirer in a business combination are measured at fair value at the acquisition dates. Where the cost of the combination exceeds the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised as goodwill; where the cost of combination is lower than the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised in profit or loss for the current period. Costs directly attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

For business combinations achieved by stages involving enterprises not under common control, previously-held equity in the acquiree is remeasured at its fair value at the acquisition dates, and the difference between its fair value and carrying amount is included in investment income for the current period in consolidated financial statements. Where the previously-held equity in the acquiree involves other comprehensive income under equity method and shareholders' equity changes other than those arising from the net profit or loss, other comprehensive income and profit distribution, the related other comprehensive income and other shareholders' equity changes are transferred into income for the current period to which the acquisition dates belongs, excluding those arising from changes in the investee's remeasurement of net liability or net asset related to the defined benefit plan. The excess of the sum of fair value of the previously-held equity and fair value of the consideration paid at the acquisition dates over share of fair value of identifiable net assets acquired from the subsidiary is recognised as goodwill.

# (6) Preparation of consolidated financial statements

The consolidated financial statements comprise the financial statements of the Company and all of its subsidiaries.

Subsidiaries are consolidated from the date on which the Group obtains control and are deconsolidated from the date that such control ceases. For a subsidiary that is acquired in a business combination involving enterprises under common control, it is included in the consolidated financial statements from the date when it, together with the Company, comes under common control of the ultimate controlling party. The portion of the net profits realised before the combination date is presented separately in the consolidated income statement.

In preparing the consolidated financial statements, where the accounting policies and the accounting periods of the Company and subsidiaries are inconsistent, the financial statements of the subsidiaries are adjusted in accordance with the accounting policies and the accounting period of the Company. For subsidiaries acquired from business combinations involving enterprises not under common control, the individual financial statements of the subsidiaries are adjusted based on the fair value of the identifiable net assets at the acquisition dates.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

# 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (6) Preparation of consolidated financial statements (Cont'd)

All significant intra-group balances, transactions and unrealised profits are eliminated in the consolidated financial statements. The portion of subsidiaries' equity and the portion of a subsidiaries' net profits and losses and comprehensive incomes for the period not attributable to Company are recognised as minority interests and presented separately in the consolidated financial statements under equity, net profits and total comprehensive income respectively. Unrealised profits and losses resulting from the sale of assets by the Company to its subsidiaries are fully eliminated against net profit attributable to shareholders of the parent company. Unrealised profits and losses resulting from the sale of assets by a subsidiary to the Company are eliminated and allocated between net profit attributable to shareholders of the parent and minority interests in accordance with the allocation proportion of the parent in the subsidiary.

Unrealised profits and losses resulting from the sale of assets by one subsidiary to another are eliminated and allocated between net profit attributable to shareholders of the parent and minority interests in accordance with the allocation proportion of the parent in the subsidiary. If the accounting treatment of a transaction which considers the Group as an accounting entity is different from that considers the Company or its subsidiaries as an accounting entity, it is adjusted from the perspective of the Group.

# (7) Recognition criteria of cash and cash equivalents

Cash and cash equivalents comprise cash on hand, deposits that can be readily drawn on demand, and short-term and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### (8) Foreign currency translation

#### (a) Foreign currency transaction

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the dates of the transactions.

At the balance sheet date, monetary items denominated in foreign currencies are translated into functional currency using the spot exchange rates on the balance sheet date. Exchange differences arising from these translations are recognised in profit or loss for the current period, except for those attributable to foreign currency borrowings that have been taken out specifically for the acquisition or construction of qualifying assets, which are capitalised as part of the cost of those assets. Non-monetary items denominated in foreign currencies that are measured at historical costs are translated at the balance sheet date using the spot exchange rates at the date of the transactions. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (8) Foreign currency translation (Cont'd)

#### (b) Translation of foreign currency financial statements

The asset and liability items in the balance sheets for overseas operations are translated at the spot exchange rates on the balance sheet date. Among the shareholders' equity items, the items other than "undistributed profits" are translated at the spot exchange rates of the transaction dates. The income and expense items in the income statements of overseas operations are translated at the spot exchange rates of the transaction dates. The differences arising from the above translation are presented in other comprehensive income. The cash flows of overseas operations are translated at the spot exchange rates on the dates of the cash flows. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

#### (9) Financial instruments

#### (a) Financial assets

#### (i) Classification of financial assets

Financial assets are classified into the following categories at initial recognition: financial assets at fair value through profit or loss, loans and receivables and available-for-sale financial assets. The classification of financial assets depends on the Group's intention and ability to hold the financial assets.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for the purpose of selling in the short term and Derivative financial instruments.

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, including cash at bank and on hand, deposits with central bank, deposits with banks and other financial institutions, loans and advances, interest receivable, dividends receivable, accounts receivable and structural deposits with banks.

#### Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are either designated in this category or not classified in any of the other categories at initial recognition. Available-for-sale financial assets are included in other current assets on the balance sheet if management intends to dispose of them within 12 months after the balance sheet date.

#### (ii) Derivative financial instruments

The derivative financial instruments held or issued by the Group are mainly used in controlling risk exposures. Derivative financial instruments are initially recognised at fair value on the day when derivatives transaction contract was signed, and subsequently measured at fair value. The derivative financial instruments are recorded as assets when they have a positive fair value and as liabilities when they have a negative fair value.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (9) Financial instruments (Cont'd)

- (a) Financial assets (Cont'd)
- (ii) Derivative financial instruments (Cont'd)

The recognition of changes in fair value of derivative financial instruments depends on whether such derivative financial instruments are designated as hedging instruments and meet requirements for hedging instruments, and depends on the nature of hedged items in this case. For derivative financial instruments that are not designated as hedging instruments and fail to meet requirements on hedging instruments, including those held for the purpose of providing hedging against specific risks in interest rate and foreign exchange but not conforming with requirements of hedge accounting, the changes in fair value are recorded in gains or losses arising from changes in fair value in the consolidated income statement.

At the inception of the transaction, the Group officially designates the hedging relations between hedging instruments and hedged items and documents the hedging relations, risk management objectives and hedging strategies. The Group also makes written assessment of the effectiveness of hedging instruments in offsetting changes in the fair value or cash flow of hedged items. These criteria should be met before hedging accounting is determined as applicable to such hedges.

#### Cash flow hedge

Cash flow hedge is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability (such as all or some future interest payments on variable rate debt) or a highly probable forecast transaction that could ultimately affect the profit or loss.

The effective portion of changes in the fair value of hedging instruments that are designated and qualify as cash flow hedges is recognised in other comprehensive income in current year and accumulated in equity in the "other comprehensive income". The ineffective portion is recognised immediately in the profit or loss.

Amounts accumulated in equity are reclassified to the profit or loss in the same periods when the hedged item affects the profit or loss.

When a hedging instrument expires or is sold, or the hedge designation is revoked or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss on the hedging instrument existing in equity at that time remains in equity and is reclassified to the profit or loss when the forecast transaction ultimately occurs. When a forecast transaction is no longer expected to occur, the cumulative gain or loss existing in equity is immediately transferred to the profit or loss.

#### (iii) Recognition and measurement

Financial assets are recognised at fair value on the balance sheet when the Group becomes a party to the contractual provisions of the financial instrument. In the case of financial assets at fair value through profit or loss, the related transaction costs incurred at the time of acquisition are recognised in profit or loss for the current period. For other financial assets, transaction costs that are attributable to the acquisition of the financial assets are included in their initially recognised amounts.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (9) Financial instruments (Cont'd)

- (a) Financial assets (Cont'd)
- (iii) Recognition and measurement (Cont'd)

Financial assets at fair value through profit or loss and available-for-sale financial assets are subsequently measured at fair value. Investments in equity instruments are measured at cost when they do not have a quoted market price in an active market and whose fair value cannot be reliably measured. Receivables and held-to-maturity investments are measured at amortised cost using the effective interest method.

Gains or losses arising from change in the fair value of financial assets at fair value through profit or loss are recognised in profit or loss. Interests and cash dividends received during the period in which such financial assets are held, as well as the gains or losses arising from disposal of these assets are recognised in profit or loss for the current period.

Gains or losses arising from change in fair value of available-for-sale financial assets are recognised directly in equity, except for impairment losses and foreign exchange gains and losses arising from translation of monetary financial assets. When such financial assets are derecognised, the cumulative gains or losses previously recognised directly into equity are recycled into profit or loss for the current period. Interests on available-for-sale investments in debt instruments calculated using the effective interest method during the period in which such investments are held and cash dividends declared by the investee on available-for-sale investments in equity instruments are recognised as investment income, which is recognised in profit or loss for the period.

#### (iv) Impairment of financial assets

The Group assesses the carrying amounts of financial assets other than those at fair value through profit or loss at each balance sheet date. If there is objective evidence that a financial asset is impaired, an impairment loss is provided for.

Objective evidence indicating impairment of financial assets refers to the matter that actually occurs after the initial recognition of financial assets, it will affect estimated future cash flows of financial assets, and its impact can be reliably measured.

Objective evidence indicating impairment of available-for-sale investments in equity instruments includes a significant or prolonged decline in the fair value of an investment in an equity instrument. The Group reviews available-for-sale investments in equity instruments on an individual basis at the balance sheet date. If the fair value of an equity instrument investment at the balance sheet date is lower than 50% (inclusive) of its initial cost for more than 12 months (inclusive), it indicates that the impairment has occurred. If the fair value at the balance sheet date is lower than 20% (inclusive) but no more than 50%, the Group considers other relevant factors, such as price fluctuation rate, to determine whether an impairment of equity instrument investment occurs. The Group calculates the initial investment cost of available-for-sale equity instruments by using weighted average method.

When an impairment loss on a financial asset carried at amortised cost has occurred, the amount of loss is provided for at the difference between the asset's carrying amount and the present value of its estimated future cash flows (excluding future credit losses that have not been incurred). If there is objective evidence that the value of the financial asset recovered and the recovery is related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed and the amount of reversal is recognised in profit or loss.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (9) Financial instruments (Cont'd)

- (a) Financial assets (Cont'd)
- (iv) Impairment of financial assets (Cont'd)

If an impairment loss on available-for-sale financial assets measured at fair value incurs, the cumulative losses arising from the decline in fair value that had been recognised directly in shareholders' equity are transferred out from equity and into impairment loss. For an investment in debt instrument classified as available-for-sale on which impairment losses have been recognised, if, in a subsequent period, its fair value increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the previously recognised impairment loss is reversed into profit or loss for the current period. For an investment in an equity instrument classified as available-for-sale on which impairment losses have been recognised, the increase in its fair value in a subsequent period is recognised directly in equity.

If an impairment loss on an available-for-sale financial asset measured at cost incurs, the amount of loss is measured at the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. The previously recognised impairment loss will not be reversed in subsequent periods.

Please refer to Note 2(10) for accounting policies related to impairment of receivables.

#### (v) Derecognition of financial assets

A financial asset is derecognised when any of the below criteria is met: (1) the contractual rights to receive the cash flows from the financial asset expire; (2) the financial asset has been transferred and the Group transfers substantially all the risks and rewards of ownership of the financial asset to the transferee; or (3) the financial asset has been transferred and the Group has not retained control of the financial asset, although the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received and the cumulative changes in fair value that had been recognised directly in equity, is recognised in profit or loss.

# (b) Financial liabilities

Financial liabilities are classified into two categories at initial recognition: financial liabilities at fair value through profit or loss and other financial liabilities. The Group's financial liabilities include derivative financial liabilities, accounts payable, notes payable, borrowings, customer deposits and deposits from banks and other financial institutions, financial assets sold under repurchase agreements and interest payable.

Payables comprise accounts payable, other payables and other current liabilities, and are recognised at fair value at initial recognition. Payables are subsequently measured at amortised cost using the effective interest method.

Borrowings and debentures payable are recognised initially at fair value, net of transaction costs incurred, and subsequently measured at amortised cost using the effective interest method.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (9) Financial instruments (Cont'd)

#### (b) Financial liabilities (Cont'd)

Other financial liabilities with maturities no more than one year are classified as current liabilities. Other financial liabilities with maturities over one year but are due within one year (inclusive) since the balance sheet date are classified as the current portion of non-current liabilities. Others are classified as non-current liabilities.

A financial liability (or a part of a financial liability) is derecognised when all or part of the obligation is extinguished. The difference between the carrying amount of the financial liability or the derecognised part of the financial liability and the consideration paid is recognised in profit or loss.

#### (c) Determination of fair value of financial instruments

The fair value of a financial instrument that is traded in an active market is determined at the quoted price in the active market. The fair value of a financial instrument that is not traded in an active market is determined by using a valuation technique. In valuation, the Group uses a valuation technique that is applicable in the current situation and supported by adequate available data and other information, selects inputs with the same characteristics as those of assets or liabilities considered in relevant trade of assets or liabilities by market participants, and maximises the use of relevant observable inputs. The Group uses unobservable inputs when relevant observable inputs are not available or feasible.

### (10) Receivables

Receivables comprise accounts receivable, other receivables and notes receivable. Accounts receivable arising from sales of goods or rendering of services are initially recognised at fair value of the contractual payments from the buyers or service recipients.

(a) Receivables with amounts that are individually significant and subject to separate assessment for provision for bad debts

Receivables with amounts that are individually significant are subject to separate assessment for impairment. If there exists objective evidence that the Group will not be able to collect the amount under the original terms, a provision for impairment of that receivable is made.

The judgement standard for individually significant amount is an individual amount exceeding RMB5,000,000 for accounts receivable and RMB500,000 for other receivables.

The Group makes provision for bad debts for those individually significant amounts based on the amount by which the present value of the future cash flows expected to be derived from the receivable is below its carrying amount.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (10) Provision for bad debts of receivables (Cont'd)

(b) Accounts receivable and other receivables that are subject to provision for bad debts on the grouping basis

Receivables with amounts that are not individually significant and those receivables that have been individually assessed for impairment and have not been found impaired are classified into certain groupings based on their credit risk characteristics. The provision for bad debts is determined based on the historical loss experience for the groupings of receivables with similar credit risk characteristics, taking into consideration of the current circumstances.

The Group assesses the recovery risk of receivables based on the characteristics of different regions. No provision for bad debts of notes receivables was made because the notes receivable are all bank-acceptance bills with low credit risk.

The Company's subsidiaries in Mainland China classify the credit risk groupings by taking the ageing of receivables as the risk characteristics and determine different provision ratios based on business features.

|   | Within 6<br>months | 6 months<br>to 1 year | 1 to 2<br>years | 2 to 3<br>years | 3 to 5<br>years | Over 5<br>years |
|---|--------------------|-----------------------|-----------------|-----------------|-----------------|-----------------|
| Heating Ventilating & Air Conditioning ("HVAC") | 0%, 5%             | 5%                    | 10%             | 30%             | 50%             | 100%            |
| Consumer appliances                             | 0%, 5%             | 5%                    | 10%             | 30%             | 50%             | 100%            |
| Robots and automatic<br>system                  | 5%                 | 5%                    | 10%             | 30%             | 50%             | 100%            |
| Others  | 0%, 5%             | 5%                    | 10%             | 30%             | 50%             | 100%            |

The Company's subsidiaries in Japan classify the credit risk groupings by taking the overdue of receivables as the risk characteristics and make bad debts provision based on the average percentage of bad debts during last three years by using percentage-of-balance method. For the receivables that are overdue, they make bad debts provision on an individual basis.

The Company's subsidiaries in Hong Kong, Macau, Singapore and Italy make bad debts provision for receivables on an individual basis.

The Company's subsidiaries in Brazil make no bad debts provision for receivables with the ageing within 1 year and adopt 100% provision ratio for those with the ageing over 1 year.

The Company's subsidiaries in Germany classify the credit risk groupings by taking the expiring date of receivables as the risk characteristics.

The Company's subsidiaries in Israel classify the credit risk groupings by taking the ageing of receivables as the risk characteristics.

(c) Accounts receivable and other receivables with amounts that are not individually significant but subject to separate assessment for provision for bad debts

The reason for making separate assessment for provision for bad debts is that there exists objective evidence that the Group will not be able to collect the amount under the original terms of the receivable.

### **NOTES TO THE FINANCIAL STATEMENTS** FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

#### (10)Provision for bad debts of receivables (Cont'd)

Accounts receivable and other receivables with amounts that are not individually significant (c) but subject to separate assessment for provision for bad debts (Cont'd)

The provision for bad debts is determined based on the amount by which the present value of the future cash flows expected to be derived from the receivable is below its carrying amount.

(d) When the Group transfers the accounts receivable to the financial institutions without recourse, the difference between the proceeds received from the transaction and their carrying amounts and the related taxes is recognised in profit or loss for the current period.

#### (11) Provision for bad debts of loans and advances

The provision for bad debts of loans and advances is provided by five-tier loan classification of ending balances of loans and advances as follows:

| The Five-class Classification | Provision ratio |
|-------------------------------|-----------------|
| Pass Risk Assets              | 1.5%            |
| Special mention Risk Assets   | 3.0%            |
| Substandard Risk Assets       | 30.0%           |
| Doubtful Risk Assets          | 60.0%           |
| Loss Risk Assets              | 100.0%          |

#### (12)**Inventories**

#### Classification of inventories (a)

Inventories, including raw materials, consigned processing materials, low value consumables, work in progress, completed but unsettled products and finished goods, etc., are measured at the lower of cost and net realisable value.

The amount of completed but unsettled works is determined on the basis of individual contract at the cost of contract incurred plus profits thereof and less losses recognised and amount settled. It is recognised as assets when the balance is positive and recognised as liabilities when the balance is negative.

#### (b) Costing of inventories

Other than completed but unsettled products, cost is determined using the first-in first-out method when issued. The cost of goods of finished goods and work in progress comprises raw materials, direct labour and systematically allocated production overhead based on the normal production capacity.

Basis for determining net realisable values of inventories and method for making provision (c) for decline in the value of inventories

Inventories are initially measured at cost. The cost of inventories comprises purchase cost, processing cost and other expenditures to bring the inventories to current site and condition.

On the balance sheet date, inventories are measured at the lower of cost and net realisable value.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

## (12) Inventories (Cont'd)

(c) Basis for determining net realisable values of inventories and method for making provision for decline in the value of inventories (Cont'd)

Net realisable value is determined based on the estimated selling price in the ordinary course of business, less the estimated costs to completion and estimated costs necessary to make the sale and related taxes.

Provision for decline in the value of inventories is determined at the excess amount of the cost as calculated based on the classification of inventories over their net realisable value, and are recognised in profit or loss for the current period.

#### (d) Inventory system

The Group adopts the perpetual inventory system.

(e) Amortisation methods of low value consumables and packaging materials

Low value consumables are expensed in full when issued and recognised in cost of related assets or in profit or loss for the current period.

#### (13) Long-term equity investments

Long-term equity investments comprise the Company's long-term equity investments in its subsidiaries, and the Group's long-term equity investments in its associates and joint venture.

Subsidiaries are the investees over which the Company is able to exercise control. A joint venture is a joint arrangement which is structured through a separate vehicle over which the Group has joint control together with other parties and only has rights to the net assets of the arrangement based on legal forms, contractual terms and other facts and circumstances. Associates are the investees that the Group has significant influence on their financial and operating policies.

Investments in subsidiaries are presented in the Company's financial statements using the cost method, and are adjusted to the equity method when preparing the consolidated financial statements. Investments in a joint venture and associates are accounted for using the equity method.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (13) Long-term equity investments (Cont'd)

#### (a) Determination of investment cost

For long-term equity investments acquired through a business combination: for long-term equity investments acquired through a business combination involving enterprises under common control, the investment cost shall be the absorbing party's share of the carrying amount of equity of the party being absorbed in the consolidated financial statements of the ultimate controller at the combination date; for long-term equity investment acquired through a business combination involving enterprises not under common control, the investment cost shall be the combination cost.

For business combinations achieved by stages involving enterprises not under common control, the initial investment cost accounted for using the cost method is the sum of carrying amount of previously-held equity investment and additional investment cost. For previously-held equity accounted for using the equity method, the accounting treatment of related other comprehensive income from disposal of the equity is carried out on a same basis with the investee's direct disposal of related assets or liabilities. Shareholders' equity, which is recognised due to changes in investee's shareholders' equity other than those arising from the net profit or loss, other comprehensive income and profit distribution, is accordingly transferred into profit or loss in the period in which the investment is disposed.

For investment in previously-held equity accounted for using the recognition and measurement standards of financial instruments, the initial investment cost accounted for using the cost method is the sum of carrying amount of previously-held equity investment and additional investment cost.

For long-term equity investments acquired not through a business combination: for long-term equity investment acquired by payment in cash, the initial investment cost shall be the purchase price actually paid; for long-term equity investments acquired by issuing equity securities, the initial investment cost shall be the fair value of the equity securities issued.

### (b) Subsequent measurement and recognition of related profit and loss

For long-term equity investments accounted for using the cost method, they are measured at the initial investment costs, and cash dividends or profit distribution declared by the investees are recognised as investment income in profit or loss.

For long-term equity investments accounted for using the equity method, where the initial investment cost of a long-term equity investment exceeds the Group's share of the fair value of the investee's identifiable net assets at the acquisition dates, the long-term equity investment is measured at the initial investment cost; where the initial investment cost is less than the Group's share of the fair value of the investee's identifiable net assets at the acquisition dates, the difference is included in profit or loss and the cost of the long-term equity investment is adjusted upwards accordingly.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (13) Long-term equity investments (Cont'd)

(b) Subsequent measurement and recognition of related profit and loss (Cont'd)

For long-term equity investments accounted for using the equity method, the Group recognises the investment income according to its share of net profit or loss of the investee. The Group discontinues recognising its share of net losses of an investee after the carrying amount of the long-term equity investment together with any long-term interests that, in substance, form part of the investor's net investment in the investee are reduced to zero. However, if the Group has obligations for additional losses and the criteria with respect to recognition of provisions under the accounting standards on contingencies are satisfied, the Group continues recognising the investment losses and the provisions. The changes in the shareholders' equity of the investee other than those arising from the net profit or loss, other comprehensive income and profit distribution, are recognised in the Group's equity and the carrying amounts of the long-term equity investment are adjusted accordingly. The carrying amount of the investment is reduced by the Group's share of the profit distribution or cash dividends declared by an investee. The unrealised profits or losses arising from the intragroup transactions amongst the Group and its investees are eliminated in proportion to the Group's equity interest in the investees, and then based on which the investment gains or losses are recognised. For the loss on the intra-group transaction amongst the Group and its investees attributable to asset impairment, any unrealised loss is not eliminated.

(c) Basis for determining existence of control, jointly control or significant influence over investees

Control is the power to govern an investee and obtain variable returns from participating the investee's activities, and the ability to utilise the power of an investee to affect its returns.

Joint control is the contractually agreed sharing of control over an arrangement, and relevant economic activity can be arranged upon the unanimous approval of the Group and other participants sharing of control rights.

Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

(d) Impairment of long-term equity investments

The carrying amounts of long-term equity investments in subsidiaries, joint venture and associates are reduced to the recoverable amounts when the recoverable amounts are below their carrying amounts (Note 2(20)).

#### (14) Investment properties

Investment properties, including land use rights that have already been leased out, buildings that are held for the purpose of leasing and buildings that are being constructed or developed for future use for leasing, are measured initially at cost. Subsequent expenditures incurred in relation to an investment property are included in the cost of the investment property when it is probable that the associated economic benefits will flow to the Group and their costs can be reliably measured; otherwise, the expenditures are recognised in profit or loss in the period in which they are incurred.

The Group adopts the cost model for subsequent measurement of investment properties. Buildings and land use rights are depreciated or amortised to their estimated net residual values over their estimated useful lives. The estimated useful lives, the estimated net residual values that are expressed as a percentage of cost and the annual depreciation (amortisation) rates of investment properties are as follows:

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

### (14) Investment properties (Cont'd)

|                 | Estimated useful lives | Estimated net residual value | Annual depreciation (amortisation) rates |
|-----------------|------------------------|------------------------------|--|
| Buildings       | 20 to 40 years         | 5%                           | 2.38% to 4.75%                           |
| Land use rights | 40 to 50 years         | -                            | 2% to 2.5%                               |

When an investment property is transferred to owner-occupied properties, it is reclassified as fixed asset or intangible asset at the date of the transfer. When an owner-occupied property is transferred out for earning rentals or for capital appreciation, the fixed asset or intangible asset is reclassified as investment properties at its carrying amount at the date of the transfer. At the time of transfer, the property is recognised based on the carrying amount before transfer.

The investment properties' estimated useful lives, the estimated net residual values and the depreciation (amortisation) methods applied are reviewed and adjusted as appropriate at each year-end.

An investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. The net amount of proceeds from sale, transfer, retirement or damage of an investment property after deducting its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

### (15) Fixed assets

### (a) Recognition and initial measurement of fixed assets

Fixed assets comprise buildings, land with permanent ownership, machinery and equipment, motor vehicles, computers and electronic equipment and office equipment.

Fixed assets are recognised when it is probable that the related economic benefits will flow to the Group and the costs can be reliably measured. The initial cost of purchased fixed assets include purchase price, related taxes and expenditures that are attributable to the assets incurred before the assets are ready for their intended use. The initial cost of self-constructed fixed assets is determined based on Note 2(16).

Subsequent expenditures incurred for fixed assets are included in the cost of fixed assets when it is probable that the associated economic benefits will flow to the Group and the related cost can be reliably measured. The carrying amount of the replaced part is derecognised. All the other subsequent expenditures are recognised in profit or loss in the period in which they are incurred.

## (15) Fixed assets

### (b) Depreciation methods of fixed assets

Fixed assets are depreciated using the straight-line method to allocate the cost of the assets to their estimated residual values over their estimated useful lives. For the fixed assets that have been provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives.

The estimated useful lives, the estimated residual values expressed as a percentage of cost and the annual depreciation rates of the Group's fixed assets are as follows:

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

### (15) Fixed assets (Cont'd)

### (b) Depreciation methods of fixed assets (Cont'd)

| Classes                                    | Estimated useful<br>lives | Estimated net residual value | Annual depreciation rates |
|--|---------------------------|------------------------------|---------------------------|
| Buildings                                  | 15 to 60 years            | 0% to 10%                    | 6.7% to 1.5%              |
| Machinery and equipment                    | 2 to 18 years             | 0% to 10%                    | 50% to 5.0%               |
| Motor vehicles<br>Electronic equipment and | 2 to 20 years             | 0% to 10%                    | 50% to 4.5%               |
| other equipment                            | 2 to 20 years             | 0% to 10%                    | 50% to 4.5%               |
| Land                                       | Permanent                 | Not applicable               | Not applicable            |

The estimated useful lives and the estimated net residual values of the Group's fixed assets and the depreciation methods applied to the assets are reviewed, and adjusted as appropriate at each year-end.

# (c) Basis for identification of fixed assets held under finance leases and related measurement

A lease that in substance transfers substantially all the risks and rewards incidental to ownership of an asset is a finance lease. The leased asset is recognised at the lower of the fair value of the leased asset and the present value of the minimum lease payments. The difference between the recorded amount of the leased asset and the minimum lease payments is accounted for as unrecognised finance charge.

Fixed assets held under a finance lease is depreciated on a basis consistent with the depreciation policy adopted for fixed assets that are self-owned. When a leased asset can be reasonably determined that its ownership will be transferred at the end of the lease term, it is depreciated over the period of expected use; otherwise, the leased asset is depreciated over the shorter period of the lease term and the period of expected use.

(d) The carrying amount of a fixed asset is reduced to the recoverable amount when the recoverable amount is below the carrying amount (Note 2(20)).

# (e) Disposal of fixed assets

A fixed asset is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The amount of proceeds from disposals on sale, transfer, retirement or damage of a fixed asset net of its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

#### (16) Construction in progress

Construction in progress is measured at actual cost. Actual cost comprises construction costs, installation costs, borrowing costs that are eligible for capitalisation and other costs necessary to bring the fixed assets ready for their intended use. Construction in progress is transferred to fixed assets when the assets are ready for their intended use, and depreciation begins from the following month. The carrying amount of construction in progress is reduced to the recoverable amount when the recoverable amount is below the carrying amount (Note 2(20)).

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (17) Borrowing costs

The borrowing costs that are directly attributable to the acquisition and construction of a fixed asset that needs a substantially long period of time for its intended use commence to be capitalised and recorded as part of the cost of the asset when expenditures for the asset and borrowing costs have been incurred, and the activities relating to the acquisition and construction that are necessary to prepare the asset for its intended use have commenced. The capitalisation of borrowing costs ceases when the asset under acquisition or construction becomes ready for its intended use and the borrowing costs incurred thereafter are recognised in profit or loss for the current period. Capitalisation of borrowing costs is suspended during periods in which the acquisition or construction of a fixed asset is interrupted abnormally and the interruption lasts for more than 3 months, until the acquisition or construction is resumed.

For the specific borrowings obtained for the acquisition or construction of a fixed asset qualifying for capitalisation, the amount of borrowing costs eligible for capitalisation is determined by deducting any interest income earned from depositing the unused specific borrowings in the banks or any investment income arising on the temporary investment of those borrowings during the capitalisation period.

For the general borrowings obtained for the acquisition or construction of a fixed asset qualifying for capitalisation, the amount of borrowing costs eligible for capitalisation is determined by applying the weighted average effective interest rate of general borrowings, to the weighted average of the excess amount of cumulative expenditures on the asset over the amount of specific borrowings. The effective interest rate is the rate at which the estimated future cash flows during the period of expected duration of the borrowings or applicable shorter period are discounted to the initial amount of the borrowings.

# (18) Intangible assets

Intangible assets include land use rights, patents and non-patent technologies, trademark rights, trademark use rights, licensing rights and others, and are measured at cost.

### (a) Land use rights

Land use rights are amortised on the straight-line basis over their approved use period of 40 to 50 years. If the acquisition costs of the land use rights and the buildings located thereon cannot be reasonably allocated between the land use rights and the buildings, all of the acquisition costs are recognised as fixed assets.

### (b) Patents and non-patent technologies

Patents are amortised on a straight-line basis over the statutory period of validity, the period as stipulated by contracts or the beneficial period.

#### (c) Trademark rights

The trademark rights is measured at cost when acquired and is amortized over the estimated useful life of 30 years. The cost of trademark rights obtained in the business combinations involving enterprises not under common control is measured at fair value.

### (d) Trademark use rights

The trademark use rights is measured at cost when acquired. The cost of trademark use rights obtained in the business combinations involving enterprises not under common control is measured at fair value, and is amortized over the estimated useful life of 40 years.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (18) Intangible assets (Cont'd)

(e) Periodical review of useful life and amortisation method

For an intangible asset with a finite useful life, review of its useful life and amortisation method is performed at each year-end, with adjustment made as appropriate.

(f) Research and development ("R&D")

The expenditure on an internal research and development project is classified into expenditure on the research phase and expenditure on the development phase based on its nature and whether there is material uncertainty that the research and development activities can form an intangible asset at end of the project.

Expenditure on the planned investigation, evaluation and selection for the R&D of production processes or products is expenditure on the research phase, which is recognised in profit or loss in the period in which it is incurred. Expenditure on design and test for the final application of the R&D of production processes or products before mass production is expenditure on the development phase, which is capitalised only if all of the following conditions are satisfied:

- The R&D of production processes or products has been fully justified by technical team;
- The budget on the R&D of production processes or products has been approved by the management;
- It's been proved by previous market research analysis that the products produced by the production processes have marketing capabilities;
- There are sufficient technical and financial resources to support the R&D of production processes or products and subsequent mass production; and
- Expenditure attributable to the R&D of production processes or products can be reliably measured.

Other development expenditures that do not meet the conditions above are recognised in profit or loss in the period in which they are incurred. Development costs previously recognised as expenses are not recognised as an asset in a subsequent period. Capitalised expenditure on the development phase is presented as development costs in the balance sheet and transferred to intangible assets at the date that the asset is ready for its intended use.

# (g) Impairment of intangible assets

The carrying amount of intangible assets is reduced to the recoverable amount when the recoverable amount is below the carrying amount (Note 2(20)).

### (19) Long-term deferred expenses

Long-term prepaid expenses include the expenditure for improvements to fixed assets held under operating leases, and other expenditures that have been incurred but should be recognised as expenses over more than one year in the current and subsequent periods. Long-term prepaid expenses are amortised on the straight-line basis over the expected beneficial period and are presented at actual expenditure net of accumulated amortisation.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (20) Impairment of long-term assets

Fixed assets, construction in progress, intangible assets with finite useful lives, investment properties measured using the cost model and long-term equity investments in subsidiaries, a joint venture and associates are tested for impairment if there is any indication that the assets may be impaired at the balance sheet date. Intangible assets not ready for their intended use and land with permanent ownership are tested at least annually for impairment, irrespective of whether there is any indication that it may be impaired. If the result of the impairment test indicates that the recoverable amount of an asset is less than its carrying amount, a provision for impairment and an impairment loss are recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. Provision for asset impairment is determined and recognised on the individual asset basis. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of a group of assets to which the asset belongs is determined. A group of assets is the smallest group of assets that is able to generate independent cash inflows.

Goodwill that is separately presented in the financial statements is tested at least annually for impairment, irrespective of whether there is any indication that it may be impaired. In conducting the test, the carrying value of goodwill is allocated to the related asset groups or groups of asset groups which are expected to benefit from the synergies of the business combination. If the result of the test indicates that the recoverable amount of an asset group or group of asset groups, including the allocated goodwill, is lower than its carrying amount, the corresponding impairment loss is recognised. The impairment loss is first deducted from the carrying amount of goodwill that is allocated to the asset group or group of asset groups, and then deducted from the carrying amounts of other assets within the asset groups or groups of asset groups in proportion to the carrying amounts of assets other than goodwill.

Once the above asset impairment loss is recognised, it will not be reversed for the value recovered in the subsequent periods.

## (21) Employee benefits

Employee benefits include short-term employee benefits, post-employment benefits, termination benefits and other long-term employee benefits provided in various forms of consideration in exchange for service rendered by employees or compensations for the termination of employment relationship.

# (a) Short-term employee benefits

Short-term employee benefits include employee wages or salaries, bonus, allowances and subsidies, staff welfare, premiums or contributions on medical insurance, work injury insurance and maternity insurance, housing funds, union running costs and employee education costs, and short-term paid absences. The employee benefit liabilities are recognised in the accounting period in which the service is rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets. Non-monetary benefits are measured at their fair value.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (21) Employee benefits (Cont'd)

### (b) Post-employment benefits

The Group classifies post-employment benefit plans as either defined contribution plans or defined benefit plans. Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions into a separate fund and will have no obligation to pay further contributions; and defined benefit plans are post-employment benefit plans other than defined contribution plans. During the reporting period, the Group's defined contribution plans mainly include basic pensions and unemployment insurance, while the defined benefit plans are that TLSC and KUKA, the Group's subsidiaries, provides supplemental retirement benefits beyond the national regulatory insurance system.

### Basic pensions

Employees of the Group participate in the defined basic pension insurance plan set up and administered by local labour and social protection authorities. Basic pensions are provided for monthly according to stipulated bases and proportions to local labour and social security institutions. When employees retire, the relevant local authorities are obliged to pay the basic pensions to them. The amounts based on the above calculations are recognised as liabilities in the accounting period in which the service has been rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets.

# Supplemental retirement benefits

The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of national debt that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation. The charges related to the supplemental retirement benefits (including current service costs, past-service costs and gains or losses on settlement) and net interest costs are recognised in the statement of profit or loss or included in the cost of an asset, and the changes of remeasurements in net liabilities or net assets arising from the benefit plan are charged or credited to equity in other comprehensive.

# (c) Termination benefits

The Group provides compensation for terminating the employment relationship with employees before the end of the employment contracts or as an offer to encourage employees to accept voluntary redundancy before the end of the employment contracts. The Group recognises a liability arising from compensation for termination of the employment relationship with employees, with a corresponding charge to profit or loss at the earlier of the following dates: 1) when the Group cannot unilaterally withdraw the offer of termination benefits because of an employment termination plan or a curtailment proposal; 2) when the Group recognises costs or expenses related to the restructuring that involves the payment of termination benefits.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (21) Employee benefits (Cont'd)

## (c) Termination benefits (Cont'd)

Early retirement benefits

The Group offers early retirement benefits to those employees who accept early retirement arrangements. The early retirement benefits refer to the salaries and social security contributions to be paid to and for the employees who accept voluntary retirement before the normal retirement date prescribed by the State, as approved by the management. The Group pays early retirement benefits to those early retired employees from the early retirement date until normal retirement date. The Group accounts for the early retirement benefits in accordance with the treatment of termination benefits, in which the salaries and social security contributions to be paid to and for the early retired employees from the off-duty date to the normal retirement date are recognised as liabilities with a corresponding charge to the profit or loss for the current period. The differences arising from the changes in the respective actuarial assumptions of the early retirement benefits and the adjustments of benefit standards are recognised in profit or loss in the period in which they occur.

The termination benefits expected to be paid within one year since the balance sheet date are classified as current liabilities.

### (22) Financial assets sold under repurchase agreements

Assets sold under agreements to repurchase at a specific future date are not derecognised from the balance sheet. The corresponding proceeds are recognised on the balance sheet under "Repurchase agreements". The difference between the sale price and the repurchase price is treated as interest expense and is accrued over the life of the agreement using the effective interest method.

# (23) General reserve

General reserve is the reserve appropriated from undistributed profits to cover part of unidentified potential losses, on the basis of the estimated potential risk value of risk assets assessed by the standardised approach, which is deducted from recognised provision for impairment losses on loans. Risk assets include loans and advances, available-for-sale financial assets, long-term equity investments, deposits with banks and other financial institutions and other receivables of subsidiary engaged in financial business.

# (24) Dividend distribution

Cash dividend is recognised as a liability for the period in which the dividend is approved by the shareholders' meeting.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (25) Provisions

Provisions for product warranties, onerous contracts etc. are recognised when the Group has a present obligation, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be measured reliably.

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation. Factors surrounding a contingency, such as the risks, uncertainties and the time value of money, are taken into account as a whole in reaching the best estimate of a provision. Where the effect of the time value of money is material, the best estimate is determined by discounting the related future cash outflows. The increase in the discounted amount of the provision arising from passage of time is recognised as interest expense.

The carrying amount of provisions is reviewed at each balance sheet date and adjusted to reflect the current best estimate.

Provisions to be paid within one year since balance sheet date shall be categorised as current liability.

# (26) Share-based payment

### (a) Type of share-based payment

Share-based payment is a transaction in which the entity acquires services from employees as consideration for equity instruments of the entity or by incurring liabilities for amounts based on the equity instruments. Equity instruments include equity instruments of the Company, its parent company or other accounting entities of the Group. Share-based payments are divided into equity-settled and cash-settled payments. The Group's share-based payments are equity-settled payments.

Equity-settled share-based payment

The Group's share option plan is the equity-settled share-based payment in exchange of employees' services and is measured at the fair value of the equity instruments at grant date. The equity instruments are exercisable after services in vesting period are completed or specified performance conditions are met. In the vesting period, the services obtained in current period are included in relevant cost and expenses at the fair value of the equity instruments at grant date based on the best estimate of the number of exercisable equity instruments, and capital surplus is increased accordingly. If the subsequent information indicates the number of exercisable equity instruments differs from the previous estimate, an adjustment is made and, on the exercise date, the estimate is revised to equal the number of actual vested equity instruments. On the exercise date, the recognised amount calculated based on the number of exercised equity instruments is transferred into share capital.

The Group's restricted share plan is the equity-settled share-based payment in exchange of employees' services and is measured at the fair value of the equity instruments at grant date. The equity instruments are tradable after services in vesting period are completed or specified performance conditions are met. In the vesting period, the services obtained in current period are included in relevant cost and expenses at the fair value of the equity instruments at grant date based on the best estimate of the number of tradable equity instruments, and capital surplus is increased accordingly. If the subsequent information indicates the number of tradable equity instruments differs from the previous estimate, an adjustment is made and, on the desterilization date, the estimate is revised to equal the number of actual vested equity instruments.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (26) Share-based payment (Cont'd)

### (b) Determination of the fair value of equity instruments

The Group determines the fair value of share options using option pricing model, which is Black - Scholes option pricing model.

The Group determine the fair value of restricted shares based on the market value of restricted shares on the grant date and the price that incentive objects pay, taking into account the effects of relevant clause of the Group's restricted shares plan.

(c) Basis for determining best estimate of tradable or exercisable equity instruments

At the end of each reporting period, the group revises its estimates of the number of options that are expected to vest based on the non-marketing performance and service conditions. On the exercise or desterilization date, the final number of estimated exercisable or tradable equity instruments is consistent with the number of exercised or tradable equity instruments.

(d) Accounting treatment related to the exercise of shared-based payment plans

When the options are exercised, the company issues new shares. The proceeds received net of any directly attributable transaction costs are credited to share capital (and share premium). At the same time, capital surplus recognised in the vesting period are carried forward to share premium.

On the grant day of restricted shares, the Group debit bank deposit and increase equity and capital reserves (equity premium) when receiving subscription paid by the employees. In the meanwhile, recognize the debt for repurchase obligation (deem as acquisition of treasury stock), debit treasury stock and credit other payables-repurchase obligations of restricted share based on the number of restricted stocks issued and related repurchase price.

On the desterilization day of restricted shares, the Group transfer capital reserves that was confirmed during vesting period based on the desterilization condition.

### (27) Revenue

The amount of revenue is determined in accordance with the fair value of the consideration received or receivable for the sales of goods and services in the ordinary course of the Group's activities. Revenue is shown net of discounts, rebates and returns.

Revenue is recognised when the economic benefits associated with the transaction will flow to the Group, the related revenue can be reliably measured, and the specific revenue recognition criteria have been met for each type of the Group's activities as described below:

## (a) Sales of goods

The Group are principally engaged in the manufacturing and sales of home appliances (mainly HVAC and Consumer appliances), robots and automation systems (mainly Robots and automatic system).

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (27) Revenue (Cont'd)

### (a) Sales of goods (Cont'd)

Revenue from domestic sales of home appliances is recognised when 1) the goods are delivered to buyers by the Group pursuant to contracts; 2) the amount of revenue is confirmed; 3) payments for goods are collected or receipts are acquired; and 4) the related economic benefits will flow to the Group; and the related costs can be measured reliably. Upon confirming the acceptance, the buyer has the right to sell the products at its discretion and takes the risks of any price fluctuations and obsolescence and loss of the products.

Revenue from overseas sales of home appliances is recognised when 1) the goods have left the port and obtain the bill of lading pursuant to contracts; 2) the amount of revenue is confirmed; 3) payments for goods are collected or obtain related receipts; and 4) the related economic benefits will flow to the Group and the related costs can be measured reliably.

For robots and automation systems, revenue is recognised when 1) the goods are delivered to buyers by the Group pursuant to contracts; 2) the amount of revenue is confirmed; 3) payments for goods are collected or receipts are acquired; and 4) the related economic benefits will flow to the Group; and the related costs can be measured reliably.

# (b) Rendering of services

Revenue from transportation service, storage service, distribution service and installation service as provided by the Group is recognised when the services are completed.

Revenue from providing automation system business and intelligent logistics integration solution is recognized according to the percentage of completion.

### (c) The construction contract

Where the outcome of a construction contract can be estimated reliably, revenue and costs thereof are recognised using the "percentage-of-completion" method as at the balance sheet date, the stage of completion is measured by reference to the contract costs incurred up to the end of the reporting period as a percentage of total estimated costs for each contract.

The outcome of a construction contract can be estimated reliably when all of the following conditions are concurrently met: (1) The total contract revenue can be measured reliably; (2) It is highly probable that the economic benefits associated with the contract will flow to the enterprise; (3) The contract costs incurred thus far can be clearly identified and measured reliably; (4) Both the stage of completion and the costs necessary to complete the contract can be reliably measured.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs can be recovered actually. Contract costs are recognised as expenses in the period in which they are incurred. Otherwise, contract costs are recognised as expenses immediately, not as contract revenue. If the unexpected factors no longer exist which make construction contract unable to be estimated reliably, revenue and costs are recognised using the percentage-of-completion method.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (27) Revenue (Cont'd)

### (c) The construction contract (Cont'd)

As at the balance sheet date, the actual total contract revenue multiply the percentage of completion less the total contract revenue recognised in previous accounting periods should be recognised as the revenue for the current period. Similarly, the total contract costs multiply the percentage of completion incurred less the total contract costs recognised in previous accounting periods should be recognised as the expenses for the current period.

# (d) Interest income

Interest income from financial instruments is calculated by effective interest method and recognised in profit or loss for the current period. Interest income comprises premiums or discounts, or the amortisation based on effective rates of other difference between the initial carrying amount and the due amount of interest-earning assets.

The effective interest method is a method of calculating the amortised cost of a financial asset or liability and the interest income or expense based on effective rates. Actual interest rate is the rate at which the estimated future cash flows during the period of expected duration of the financial instruments or applicable shorter period are discounted to the current carrying amount of the financial instruments. When calculating the effective interest rate, the Group estimates cash flows by considering all contractual terms of the financial instrument (e.g. early repayment options, similar options, etc.), but without considering future credit losses. The calculation includes all fees and interest paid or received that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Interest income from impaired financial assets is calculated at the interest rate that is used for discounting estimated future cash flow when measuring the impairment loss.

### (e) Dividend income

Dividend income is recognised when the right to receive dividend payment is established.

#### (f) Rental income

Rental income from investment prosperities is recognised in the income statement on a straight-line basis over the lease period.

# (g) Fee and commission income

Fee and commission income is recognised in profit or loss for the current period when the service is provided. The Group defers the initial charge income or commitment fee income arising from the forming or acquisition of financial assets as the adjustment to effective interest rate. If the loans are not lent when the loan commitment period is expired, related charges are recognised as fee and commission income.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

### (28) Government grants

Government grants are transfers of monetary or non-monetary assets from the government to the Group at nil consideration, including refund of taxes and financial subsidies, etc.

A government grant is recognised when the conditions attached to it can be complied with and the government grant can be received. For a government grant in the form of transfer of monetary assets, the grant is measured at the amount received or receivable. For a government grant in the form of transfer of non-monetary assets, it is measured at fair value; if the fair value is not reliably determinable, the grant is measured at nominal amount.

Government grants related to assets are grants that are acquired by an enterprise and used for acquisition, construction or forming long-term assets in other ways. Government grants related to income are government grants other than government grants related to assets.

Government grants related to assets could be offset the carrying amount of related assets, or recognised as deferred income, and reasonably and systematically amortised to profit or loss over the useful life of the related asset. For government grants related to income, where the grant is a compensation for related expenses or losses to be incurred by the Group in the subsequent periods, the grant is recognised as deferred income, and included in profit or loss or offset the related cost over the periods in which the related costs are recognised; where the grant is a compensation for related expenses or losses already incurred by the Group, the grant is recognised immediately in profit or loss or offset the related cost for the current period. The same kind of government grants are presented with the same method, that is, those related to ordinary activities are recorded into operating profit while other in non-operating income and expenses.

Loans to the Group at political preferential rate are recorded at the actual amount received, and the related loan expenses are calculated based on the principal and the political preferential rate. Finance discounts directly received offset related loans expenses.

### (29) Deferred income tax assets and deferred income tax liabilities

Deferred income tax assets and deferred income tax liabilities are calculated and recognised based on the differences arising between the tax bases of assets and liabilities and their carrying amounts (temporary differences). Deferred income tax asset is recognised for the tax losses that can be carried forward to subsequent years for deduction of the taxable profit in accordance with the tax laws. No deferred income tax liability is recognised for a temporary difference arising from the initial recognition of goodwill. No deferred income tax asset or deferred income tax liability is recognised for the temporary differences resulting from the initial recognition of assets or liabilities due to a transaction other than a business combination, which affects neither accounting profit nor taxable profit (or tax loss). At the balance sheet date, deferred income tax assets and deferred income tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled.

Deferred income tax assets are only recognised for deductible temporary differences, tax losses and tax credits to the extent that it is probable that taxable profit will be available in the future against which the deductible temporary differences, tax losses and tax credits can be utilised.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (29) Deferred income tax assets and deferred income tax liabilities (Cont'd)

Deferred income tax liabilities are recognised for temporary differences arising from investments in subsidiaries, associates and a joint venture, except where the Group is able to control the timing of reversal of the temporary difference, and it is probable that the temporary difference will not reverse in the foreseeable future. When it is probable that the temporary differences arising from investments in subsidiaries, associates and a joint venture will be reversed in the foreseeable future and that the taxable profit will be available in the future against which the temporary differences can be utilised, the corresponding deferred income tax assets are recognised.

Deferred income tax assets and liabilities are offset when:

- The deferred income taxes are related to the same tax payer within the Group and the same taxation authority; and,
- That tax payer within the Group has a legally enforceable right to offset current tax assets against current tax liabilities.

### (30) Leases

### (a) Operating lease

Rental expenses for assets held under operating leases are recognised as the cost of relevant assets or expenses on a straight-line basis over the lease period. Contingent rentals are recognised as profit and loss for the current period when incurred.

Fixed assets leased out under operating leases, other than investment prosperities (Note 2(14)), are depreciated in accordance with the depreciation policy stated in Note 2(15)(b) and provided for impairment loss in accordance with the policy stated in Note 2(20). Rental income from operating leases is recognised as revenue on a straight-line basis over the lease period. Initial direct costs in large amount arising from assets leased out under operating leases are capitalised when incurred and recognised as profit and loss for the current period over the lease period on a same basis with revenue recognition; initial direct costs in small amount are directly recognised as profit and loss for the current period. Contingent rentals are recognised as profit and loss for the current period when incurred.

# (b) Finance lease

The leased asset is recognised at the lower of the fair value of the leased asset and the present value of the minimum lease payments. The difference between the recorded amount of the leased asset and the minimum lease payments is accounted for as unrecognised finance charge and is amortised using the effective interest method over the period of the lease. A long-term payable is recorded at the amount equal to the minimum lease payments less the unrecognised finance charge.

# (31) Held for sale and discontinued operations

A non-current asset or a disposal group is classified as held for sale when all of the following conditions are satisfied: (1) the non-current asset or the disposal group is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such non-current asset or disposal group; (2) the Group has entered a legally enforceable sales agreement with other party and obtained relevant approval, and the sales transaction is expected to be completed within one year.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (31) Held for sale and discontinued operations (Cont'd)

Non-current assets (excluding financial assets, investment properties measured at fair value and deferred tax assets) that are stated at the lower of carrying amount and net realisable value. Any excess of the carrying amount over the net realisable value is recognised as impairment loss.

Assets and liabilities of a non-current asset or disposal group which is classified as held for sale are classified as current assets and current liabilities, which are separately presented in the balance sheet.

A discontinued operation is a component which has been disposed or classified as held for sale of the group's business and the operations and financial reporting of the discontinued operation can be clearly distinguished from the rest of the group and can meet one of the following criteria: (1) This component of the business represents a separate major line of business or geographic area of operations; (2) This component of the business is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; (3) This component of the business is a subsidiary acquired exclusively with a view to resale.

The net profit from discontinued operations in the income statement includes operating profit or loss and disposal gains or losses of discontinued operations.

### (32) Segment information

The Group identifies operating segments based on the internal organisation structure, management requirements and internal reporting system, and discloses segment information of reportable segments which is determined on the basis of operating segments.

An operating segment is a component of the Group that satisfies all of the following conditions: (1) the component is able to earn revenue and incur expenses from its ordinary activities; (2) whose operating results are regularly reviewed by the Group's management to make decisions about resources to be allocated to the segment and to assess its performance, and (3) for which the information on financial position, operating results and cash flows is available to the Group. If two or more operating segments have similar economic characteristics and satisfy certain conditions, they are aggregated into one single operating segment.

# (33) Critical accounting estimates and judgements

The Group continually evaluates the critical accounting estimates and key judgements applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable.

Critical accounting estimates and key assumptions

The critical accounting estimates and key assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next accounting year are outlined below:

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (33) Critical accounting estimates and judgements (Cont'd)

(i) The fair value assessment of identifiable net assets and recognition of goodwill related to the acquisition

For business combinations not under common control (Note 5(1)(a)), the combination cost and the identifiable net assets acquired in the combination should be measured at fair value at the acquisition date. The Group shall allocate the cost of combination to the identifiable assets and liabilities measured at fair value at the acquisition date. The excess of the cost of combination over share of fair value of identifiable net assets acquired from the acquiree is recognised as goodwill.

The Group needs to make critical judgements in identifying the identifiable assets and liabilities, especially in identifying intangible assets and assessing their fair value, which affect the recognition of goodwill. The key assumptions adopted in assessing fair value of intangible assets include revenue growth, tax rates, EBITDA margins, contributory asset charges, royalty rates, remaining useful lives of intangible assets and discount rate, etc.

### (ii) Goodwill impairment provision

The Group conducts impairment testing on goodwill every year. The recoverable amount of the asset group and the combination of asset group that contain the apportioned goodwill is determined by the higher value between the use value and the net value that is calculated by the fair value less the disposal costs. Accounting estimate is required for the calculation of the recoverable amount. The impairment testing is performed by assessing the recoverable amount of the groups of assets containing the relevant goodwill, based on the present value of cash flows forecasts. Key assumptions adopted in the impairment testing of goodwill included expected revenue growth rates, EBITDA margins, perpetual annual growth rates, discount rates, etc. which involved critical accounting estimates and judgement.

## (iii) Income taxes

The Group is subject to income taxes in numerous jurisdictions. There are many transactions and events for which the ultimate tax determination is uncertain during the ordinary course of business. Significant judgement is required from the Group in determining the provision for income taxes in each of these jurisdictions. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred income tax provisions in the period in which such determination is made.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

# 2 Summary of significant accounting policies and accounting estimates (Cont'd)

# (34) Significant changes in accounting policies

In 2017, the Ministry of Finance released the 'Accounting Standard for Business Enterprises No. 42—Non-current Assets or Disposal Groups Held for Sale and Discontinued Operations', revised 'Accounting Standard for Business Enterprises No. 16—Government Grants' and the 'Circular on Amendment to Formats of Financial Statements of General Industry' and its interpretation (Cai Kuai [2017] 30). The financial statements are prepared in accordance with the above standards and circular, and impacts are as follows:

| The nature and the reasons of the changes in accounting policies  | The line items affected  | The amounts of 2016 affected  |
|---|--|---|
| The Group recorded the VAT return obtained in 2017 in other income. The comparatives of 2016 were not restated.   | Not applicable   | Not applicable  |
| The government grants related to income, obtained in 2017 by the Group, were recorded as a deduction of related costs, expenses or losses (Note 7(29)). The comparatives of 2016 were not restated. | Not applicable   | Not applicable  |
| The Group recorded the gains or losses on disposals of fixed assets and intangible assets, occurred in 2017, in gains on disposals of assets. The comparatives of 2016 were restated accordingly.   | Gains on disposals of assets<br>Non-operating income<br>Non-operating expenses | Decrease 111,874,000<br>Decrease 60,789,000<br>Decrease 172,663,000 |

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

# 4 Notes to the consolidated financial statements (Cont'd)

# (3) Receivables (Cont'd)

## (b) Other receivables (Cont'd)

As at 31 December 2017, other receivables with amounts that are individually significant and that the related provision for bad debts is provided on the individual basis are analysed as follows:

|                                 |                | Provision for |             |                                |
|---------------------------------|----------------|---------------|-------------|--------------------------------|
| Name of the Company             | Ending balance | bad debts     | Percentages | Reason                         |
| China Securities Depository and |                |               |             |                                |
| Clearing Corporation Limited    |                |               |             | Receivables related to share   |
| Shenzhen Branch                 | 64,760         | -             | 0%          | options without bad debt risks |

The provision for bad debts reversed in the current year is RMB3,505,000.

Other receivables as written off by the Group in the current year are arising from transactions with third parties and there's no written-off other receivables with amounts that are individually significant.

As at 31 December 2017, the top 5 other receivables assembled by debtors are analysed as follows:

|  | Amount  | Provision for bad debts | % of total balance |
|--|---------|-------------------------|--------------------|
| Total balance of top 5 other receivables | 122,050 | 2,865                   | 5%                 |

As at 31 December 2017, the Group' has no significant government grants recognised at amounts receivable.

### (4) Advances to suppliers

|  | 31 December 2017 | 31 December 2016 |
|--|------------------|------------------|
| Advances paid for raw materials and others | 1,672,248        | 1,587,366        |

(a) The ageing of advances to suppliers is analysed below:

|               | 31 Decem  | ber 2017   | 31 Dece   | ember 2016 |
|---------------|-----------|------------|-----------|------------|
|               | Amount    | % of total | Amount    | % of total |
| Within 1 year | 1,620,207 | 96s.88%    | 1,492,532 | 94.02%     |
| 1 to 2 years  | 36,689    | 2.19%      | 73,736    | 4.65%      |
| 2 to 3 years  | 5,662     | 0.34%      | 14,907    | 0.94%      |
| Over 3 years  | 9,690     | 0.58%      | 6,191     | 0.39%      |
| <u>-</u>      | 1,672,248 | 100.00%    | 1,587,366 | 100.00%    |

As at 31 December 2017, advances to suppliers over 1 year with a carrying amount of RMB52,041,000 (31 December 2016: RMB94,834,000) are mainly unsettled advances paid for raw materials.

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

# 4 Notes to the consolidated financial statements (Cont'd)

# (4) Advances to suppliers (Cont'd)

As at 31 December 2017, the top five balances of advances to suppliers assembled by debtors are summarised as follows:

|  | Amount  | % of total balance |
|--|---------|--------------------|
| Total balance of top 5 advances to suppliers | 625,655 | 37%                |

# (5) Loans and advances

(a) Financial enterprises' loans and advances analysed to individual and corporation are as follows:

| 31 December 2017 | 31 December 2016   |
|------------------|--|
|                  |  |
| 567,998          | 417,793  |
| 11,778,609       | 9,995,466  |
| 2,599,038        | 2,652,425  |
| 9,179,571        | 7,343,041  |
| 12,346,607       | 10,413,259   |
| (167,654)        | (139,862)  |
| 12,178,953       | 10,273,397   |
|                  | 567,998<br>11,778,609<br>2,599,038<br>9,179,571<br>12,346,607<br>(167,654) |

(b) Financial enterprises' loans and advances analysed by type of collateral held or other credit enhancements are as follows:

|                                  | 31 December 2017 | 31 December 2016 |
|----------------------------------|------------------|------------------|
| Unsecured loans                  | 389,057          | 230,097          |
| Guaranteed loans                 | 256,112          | 524,537          |
| Secured loans by monetary assets | 11,701,438       | 9,658,625        |
|                                  | 12,346,607       | 10,413,259       |
| Less: Loan impairment provision  |                  |                  |
| (Note 4(15))                     | (167,654)        | (139,862)        |
|                                  | 12,178,953       | 10,273,397       |

- (a) As at 31 December 2017, wealth management products with floating earnings due within one year are presented as other current assets, mainly including principal non-guaranteed products (Note 16(1)).
- (b) The Company didn't purchase wealth management product and assets management plan due more than one year which are presented as other non-current assets (31 December 2016: RMB3,842,000,000).

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

## 4 Notes to the consolidated financial statements (Cont'd)

# (8) Available-for-sale financial assets

|  | 31 December 2017 | 31 December 2016 |
|--|------------------|------------------|
| Measured at fair value - Available-for-sale equity instruments (a) | 118,711          | 3,518,693        |
| Measured at cost - Available-for-sale equity instruments (b)       | 1,712,340        | 1,669,039        |
|  | 1,831,051        | 5,187,732        |

- (a) As at 31 December 2017, the available-for-sale financial assets measured at fair value are mainly the investments in listed company Jiangsu Bank.
- (b) The available-for-sale financial assets measured at cost mainly include the unlisted equity investments held by the Group, which do not have a quoted market price in an active market and whose fair value cannot be reliably measured as the range of fair value reasonable estimates is large and probabilities for determining these estimates cannot be reasonably determined. The Group has no plan to dispose these investments.

# (9) Long-term equity investments

Long-term equity investments are classified as follows:

|   | 31 December 2017 | 31 December 2016 |
|---|------------------|------------------|
| Investment in associates (a) Less: Provision for impairment of long-term equity investments | 2,633,698        | 2,211,732        |
|   | 2,633,698        | 2,211,732        |

(a) The Group's Investment in associates are mainly investments in Foshan Shunde Rural Commercial Bank Co., Ltd., Misr Refrigeration And Air Conditioning Manufacturing Co., and Hefei Royalstar Motor Co., Ltd. and other companies.

# (13) Goodwill

The goodwill allocated to the asset groups is summarised by operating segments as follows:

|                                  | 31 December |                             | Differences<br>on translation<br>of foreign<br>currency | 31 December |
|----------------------------------|-------------|-----------------------------|---|-------------|
|                                  | 2016        | Increase in<br>current year | financial<br>statements                                 | 2017        |
|                                  |             | (Note(a))                   |   |             |
| Wuxi Little Swan Company Limited | 1,361,306   | -                           | -   | 1,361,306   |
| Clivet Co., Ltd.                 | 498,724     | =                           | -   | 498,724     |
| Carrier S.A. Co., Ltd.           | 614,728     | -                           | (45,235)  | 569,493     |
| TLSC                             | 2,697,290   | 75,190                      | (77,125)  | 2,695,355   |
| KUKA Group                       | -           | 20,698,212                  | 1,504,357   | 22,202,569  |
| Others                           | 558,947     | 1,005,715                   | 11,676  | 1,576,338   |
|                                  | 5,730,995   | 21,779,117                  | 1,393,673   | 28,903,785  |

(a) Increase of goodwill in the current year arose from the stock purchase of KUKA Group and other companies (Note 5(1)), and the consideration sharing arrangement to the purchase of TLSC in 2016.

### (b) Impairment

On 31 December 2017, the Group carried out tests for impairment of goodwill. The recoverable amount of asset groups including goodwill is calculated using the discounted estimated future cash flows determined according to the five-year budget approved by management. The future cash flows beyond the five-year period are calculated based on the estimated perpetual annual growth rates. The perpetual annual growth rates applied by management are consistent with the industry estimates, and do not exceed the long-term average growth rates of each product. Management determines EBITDA margins based on past experience and forecast on future market development. The discount rates used by management are the pre-tax interest rates that are able to reflect the risks specific to the related asset groups. The management analysed the recoverable amount of each asset group based on such estimates and believed that no provision for impairment of goodwill was required.

Key assumptions adopted by KUKA and TLSC and other asset groups used for value-in-use calculations are as follows:

31 December 2017

Perpetual annual growth rates Discount rate

1%-3% 8.2%-15.5%

#### 4 Notes to the consolidated financial statements (Cont'd)

## (28) Share capital (Cont'd)

Pursuant to the second share option incentive plan as approved at the first extraordinary general meeting dated 25 May 2015 (the "Second Options Incentive Programme), in 2017, the total number of shares exercised by the granted employees is 28,483,000, with increase in share capital of RMB28,483,000 and increase in capital surplus (share premium) of RMB693,668,000 (among which RMB189,403,000 is transferred from capital surplus (share-based payment incentive plan) to capital surplus (share premium)). The weighted average price of share options exercised in current period is RMB29.16 as calculated based on the price of exercise date.

Pursuant to the third share option incentive plan as approved at the 12th meeting of the board of directors dated 25 May 2016 (the "Third Options Incentive Programme"), in 2017, the total number of shares exercised by the granted employees is 22,278,000, with increase in share capital of RMB22,278,000 and increase in capital surplus (share premium) of RMB552,445,000 (among which RMB121,369,000 is transferred from capital surplus (share option incentive plan) to capital surplus (share premium)). The weighted average price of share options exercised in current period is RMB35.81 as calculated based on the price of exercise date.

(b) Pursuant to the restricted share incentive plan as approved at 2016 annual general meeting on 21 April 2017 (the "2017 Restricted Share Plan"), in 2017, the total number of shares exercised by the granted employees is 23,130,000 with subscription of RMB366,842,000, of which RMB23,130,000 was recognised as share capital, and RMB343,712,000 was recognised as capital surplus (share premium). The restricted shares have not reached desterilization condition in 2017. The Company regards it as treasury stock and recognize related debt for repurchase obligations.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 4 Notes to the consolidated financial statements (Cont'd)

## (29) Capital reserve (Cont'd)

- (a) The increase in share premium arose from the exercise of share options with the amount of RMB1,603,313,000, (among which RMB409,321,000 was transferred from capital surplus (Share-based payment incentive plan)(Note 4(28)(a)), and restricted shares subscription with amount of RMB343,712,000(Note 4(28)(b)).
- (b) Share-based payment incentive plan included share option incentive plan and restricted share plan. The increase of share-based payment incentive plan arose from expenses attributable to shareholders' equity of the Company in the share option incentive plan and restricted share plan with the amount of RMB735,326,000, while the decrease arose from the transfer of RMB409,321,000 to share premium due to exercise of share option (Notes 4(28)(a)).

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

## 4 Notes to the consolidated financial statements (Cont'd)

## (45) Calculation of basic and diluted earnings per share

#### (a) Basic earnings per share

Basic earnings per share are calculated by dividing consolidated net profit attributable to ordinary shareholders of the parent company by the weighted average number of outstanding ordinary shares:

| 33,689 14,684,357 |
|-------------------|
|                   |
| 92,259 6,423,317  |
|                   |
| 2.66 2.29         |
|                   |
| 2.66 2.29         |
|                   |

## (b) Basic earnings per share (Cont'd)

Diluted earnings per share are calculated by dividing consolidated net profit attributable to ordinary shareholders of the parent company by the diluted weighted average number of outstanding ordinary shares:

|   | Currency<br>unit | 2017       | 2016       |
|---|------------------|------------|------------|
| Consolidated net profit attributable to ordinary shareholders of the parent |                  |            |            |
| company   | RMB'000          | 17,283,689 | 14,684,357 |
| Weighted average number of  | Thousand         |            |            |
| outstanding ordinary shares   | shares           | 6,492,259  | 6,423,317  |
| Weighted average number of ordinary   | Thousand         |            |            |
| shares increased due to share options                                       | shares           | 73,658     | 21,439     |
| Weighted average number of diluted  | Thousand         |            |            |
| outstanding ordinary shares   | shares           | 6,565,917  | 6,444,756  |
|   | RMB per          |            |            |
| Diluted earnings per share  | share _          | 2.63       | 2.28       |

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

## 5 Changes in consolidation scope

#### (1) Business combinations involving enterprises not under common control

(a) Business combinations involving enterprises not under common control incurred in current year.

As at 6 January 2017 (the "Acquisition Date"), Midea Group completed the acquisition of 81.04% equity interests of KUKA at a cash consideration of RMB27,001,856,000. After that, Midea Group held approximately 94.55% equity interests of KUKA accounting for the 13.51% equity interests acquired in prior years. KUKA Group was consolidated by the Group from the acquisition date on which control was transferred to the Group. KUKA Group is mainly engaged in robot and automatic system business.

Except for the acquisition above, the group acquired Servotronix and its subsidiaries ("SMC"), Dongguan Alba Industries co. Ltd. ("Dongguan Kafei") and Fujitsu South China Technology Services Limited ("Fujitsu"), Easy Conveyors B.V., Talyst Systems LLC, Device Insight GmbH, Visual Components Oy in 2017, with total consideration of RMB1,744,430,000. Such acquisitions do not have significant impact on the financial statement of the Group.

(b) Details of costs of combination and good will are as follows:

| Costs of combination -  | KUKA        | Other<br>Acquired<br>Companies | Total        |
|---|-------------|--------------------------------|--------------|
| Cash consideration Fair value of 13.51% equity previously held at acquisition             | 27,001,856  | 1,457,473                      | 28,459,329   |
| date  | 3,540,726   | N/A                            | 3,540,726    |
| Future payment of consideration   | N/A         | 286,957                        | 286,957      |
| Total costs of combination<br>Less: Share of fair value of the<br>identifiable net assets | 30,542,582  | 1,744,430                      | 32,287,012   |
| obtained  | (9,844,370) | (738,715)                      | (10,583,085) |
| Goodwill  | 20,698,212  | 1,005,715                      | 21,703,927   |

The Group mainly uses valuation techniques such as market approach, income approach and cost approach to determine the fair value of non-cash assets transferred and liabilities incurred.

| Acquired net asset  | 10,412,360                      | 6,141,557                                     | 6,141,557                              |

The appreciation of evaluation mainly represents intangible asset, including trademark right, technology, customer relationship and order backlog. External independent valuer was engaged by management to identify the intangible assets and perform valuation of the identifiable assets and liabilities. The valuation method and critical assumptions applied to the major assets are as follows:

The fair value of land was estimated by applying the market value approach. To evaluate the fair value of the assets, it compares the transaction price and desired selling price of similar assets in the active market and adjusts the actual difference between the evaluated assets and similar assets.

The fair value of building and machine was estimated by applying cost approach, which considers the current replacement cost of fixed assets after deduction of the loss value. The current replacement cost is calculated at full price multiplied by the newness rate.

The fair value of trademarks and technologies was estimated by applying Relief-from-Royalty method, which considers present value of royalty fees discounted at a proper rate that are saved annually by using the relevant assets during the remaining useful life of trademarks and technologies.

The fair value of customer relationship and order backlog was estimated by applying Multi Period Excess Earnings Method, which considers present value of the excess returns after the annual tax economic benefit deducted in accordance with the customer relationship or order backlog in the future, and discounted at a proper rate.

### 5 Changes in consolidation scope (Cont'd)

### (2) Changes in consolidation scope due to other reasons (Cont'd)

#### (a) Increase of consolidation scope

In June 2017, Midea Electrics Netherlands B.V. (subsidiary of the Company), established Midea Emerging Technology Co., Ltd., a fully-owned subsidiary.

In June 2017, Shunde Home Appliance Industrial Co., Ltd. (subsidiary of the Company) invested of RMB300,000,000 by cash in the establishment of Chongqing Midea Microfinance Loan Co., Ltd..

In June 2017, Midea Electric Appliance (Singapore) Co., Ltd. (subsidiary of the Company), established Midea India Private Limited.

In July 2017, Midea Innovation Investment Co., Ltd. (subsidiary of the Company), established Shenzhen Shuzhi Scene Positioning Technology Co., Ltd..

In October 2017, Guangdong Midea Heating & Ventilation Equipment Co., Ltd. (subsidiary of the Company), invested RMB60,000,000 by cash in the establishment of Hefei Midea Hicks electronics Co., Ltd., a subsidiary.

In November 2017, the Company invested RMB47,500,000 in the establishment of Guangdong Midea environmental technology Co., Ltd..

In December 2017, Guangdong Midea Electric Co., Ltd. (subsidiary of the Company), established Midea Electric Netherlands (II) B.V., a fully-owned subsidiary.

In December 2017, the Company established Foshan Midea Zhihui Real Estate Development Co., Ltd., a fully-owned subsidiary.

In December 2017, Guangdong Midea Microwave Electric Manufacturing Co., Ltd. (subsidiary of the Company), established Guangdong Deyijie electric appliance Co., Ltd..

#### (b) Decrease of consolidation scope

Decrease of consolidation scope mainly includes deregistration of subsidiaries. Details are as follows:

| Name of entity                                | Disposal method of the equity | Disposal time-<br>point<br>of the equity |
|---|-------------------------------|--|
| Wuhu BaiNian Technology Development Co., Ltd. | Deregistration                | February 2017                            |

#### 6 Interests in other entities (Cont'd)

## (3) Interests in associates and a joint venture

The impact of the Group's associates on the Group is not significant. Summarised information is as follows:

| 2017      | 2016                             |
|-----------|----------------------------------|
| 2,633,698 | 2,211,732                        |
|           |                                  |
| 310,016   | 165,904                          |
| (36,017)  | (73,811)                         |
| 273,999   | 92,093                           |
|           | 2,633,698<br>310,016<br>(36,017) |

(i) The net profit and other comprehensive income have taken into account the impacts of both the fair value of the identifiable assets and liabilities upon the acquisition of investment and accounting policies unifying.

### 7 Segment information

The reportable segments of the Group are the business units that provide different products or service, or operate in different areas. Different businesses or areas require different technologies and marketing strategies, the Group, therefore, separately manages the production and operation of each reportable segment and evaluates their operating results respectively, in order to make decisions about resources to be allocated to these segments and to assess their performance.

In 2016 and early of 2017, the Group finished a series of overseas merges, such as TLSC and KUKA Group, and carried out integration on the existing business and newly acquired business. On the basis of new management mode, the segment reporting was adjusted accordingly, and the comparative figures were presented in the same way accordingly too. The Group identified four reportable segments as follows:

- Heating & ventilation, as well as air-conditioner
- Consumer appliances
- Robots and automatic system
- Others

Inter-segment transfer prices are measured by reference to selling prices to third parties.

The assets are allocated based on the operations of the segment and the physical location of the asset. The liabilities are allocated based on the operations of the segment. Expenses indirectly attributable to each segment are allocated to the segments based on the proportion of each segment's revenue.

Operating expenses include cost of sales, interest expenses, fee and commission expenses, taxes and surcharges, selling and distribution expenses, general and administrative expenses, financial expenses and asset impairment losses.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

## 10 Share-based payment

## (1) Share option incentive scheme

(a) Pursuant to the forth share option incentive plan (the "Forth Share Option Incentive Plan") approved at the general meeting dated 21 April 2017, the Company granted 98,274 share options with exercise price of RMB32.72 to 1463 employees. Under the circumstance that the Company meets expected performance, 1/3 of the total share options granted will become effective after 1 year, 2 years and 3 years respectively since 12 May 2017.

Determination method for fair value of share options at the grant date

| Exercise price of options:                                  | RMB32.72 |
|---|----------|
| Effective period of options:                                | 4 years  |
| Current price of underlying shares:                         | RMB35.75 |
| Estimated fluctuation rate of share price:                  | 38.13%   |
| Estimated dividend rate:                                    | 4.40%    |
| Risk-free interest rate within effective period of options: | 2.83%    |

The fair value of the Forth Share Option Incentive Plan calculated pursuant to the above parameters is RMB835,743,000.

#### (b) Movements of share options during the year

|   | 2017<br>(share options in<br>thousands) | 2016<br>(share options in<br>thousands) |
|---|---|---|
| Share options issued at beginning of            |   |   |
| year  | 250,797                                 | 203,595                                 |

## (1) Share option incentive scheme (Cont'd)

(c) Impact of share-based payment transactions on financial position and financial performance.

The total share option expenses recognised in 2017 were RMB677,565,000 (2016: RMB546,914,000). As at 31 December 2017, the balance relating to the option incentive plan and provided for in capital surplus was RMB800,424,000 (31 December 2016: RMB617,238,000).

## (2) Restricted share plan

(a) Pursuant to the restricted share incentive plan (the "2017 Restricted Share Plan") approved by 2016 general meeting on 21 April 2017, the Company granted 23,130,000 restricted shares to 133 employees with exercise price of RMB15.86 and fair value of RMB19.89 per share at the grant date. Under the circumstance that the Company meets expected performance, 1/3 of the total restricted share granted will become tradable after 1 year, 2 years and 3 years respectively since 12 May 2017.

Pursuant to the restricted share incentive plan (the "2017 Restricted Share Plan") approved by twenty-ninth meeting of the second session of the board meeting on 29 December 2017. The Company granted 5,475,000 restricted shares to 55 employees with exercise price of RMB27.99 and fair value of RMB27.44 per share at the grant date. Under the circumstance that the Company meets expected performance, 1/3 of the total restricted share granted will become tradable after 1 year, 2 years and 3 years respectively since 29 December 2017.

(b) Movement of restricted shares in 2017

|  | 2017                    |
|--|-------------------------|
|  | (movement in thousands) |
|  |                         |
| Restricted shares at the beginning of the year | -                       |
| Restricted shares granted this year            | 28,605                  |
| Restricted shares desterilized this year       | -                       |
| Restricted shares lose efficiency this year    | -                       |
| Restricted shares at the end of the year       | 28,605                  |
|  |                         |

(c) Influence of restricted share plan on the financial situation and operation results of the Company

In 2017, total expenses confirmed due to restricted share plan is RMB164,001,000. As at 31 December 2017, the balance in share capital in relation to this plan is RMB142,819,000 (31 December 2016: 0).

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 11 Contingencies

The amount in tax disputes involving Brazilian subsidiary with 51% interests held by the Company is about BRL672 million (equivalent to RMB1,328 million) (some cases have lasted for more than 10 years and the above amount includes the principal and interest). As at 31 December 2017, relevant cases are still at court. Original shareholders of Brazilian subsidiary have agreed to compensate the Company according to verdict results of the above tax disputes. The maximum compensation amount is about BRL157 million (equivalent to RMB310 million). With reference to judgements of third-party attorneys, management believes that the probability of losing lawsuits and making compensation is small, and expects no significant risk of debt default, therefore, no provisions are made and appropriate disclosures are made in the financial statements.

#### 12 Commitments

#### (1) Capital commitments

Capital expenditures contracted for by the Group at the balance sheet date but are not yet necessary to be recognised on the balance sheet are as follows:

31 December 2017 31 December 2016

Buildings, machinery and equipment 735,928 1,372,700

#### (2) Operating lease commitments

The Group has no significant operating lease commitments at the balance sheet date.

#### 13 Subsequent events

#### (1) Significant non-adjusting events

According to the project documentation on 11 January 2018, Welling Holding Limited and Midea international holdings inc. had arranged the plan that Midea international holdings inc. would privatize Welling Holding Limited and repeal the listing status of Welling Holding Limited according to the No. 673 of Companies Ordinance. The plan will come into effect on 15 February 2018, and listed shares of Welling Holding Limited at SEHK have been repealed officially at 9 a.m. on 20 February 2018.

#### (2) Profit distribution

On 29 March 2018, on the basis of the 6,584,022,574 shares of the Company, the Board of Directors proposed a distribution of cash dividends of approximately RMB7,900,827,089 at RMB1.2 per share (including tax). The distribution of cash dividends proposed subsequent to the balance sheet date is not recognised as liabilities at the balance sheet date.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 14 Finance lease

The future lease payments of fixed assets held under finance leases are as follows:

|                 | 31 December 2017 |
|-----------------|------------------|
| Within one year | 135,972          |
| Over one year   | 250,493          |
|                 | 386,465          |

As at 31 December 2017, the unrecognised financing charge amounts to RMB10,459,000.

#### 15 Financial risk

The Group is exposed to various financial risks in the ordinary course of business, mainly including:

- Foreign exchange risk
- Interest rate risk
- Credit risk
- Liquidity risk

The following mainly relates to the above risk exposures and relevant causes, objectives, policies and process of risk management and method of risk measurement, etc..

The objective of the Group's risk management is to seek balance between risk and income, minimising the adverse impact of financial risks on the Group's financial performance. Pursuant to the risk management objective, the Group has made risk management policies to identify and analyse the risks it is exposed to and set appropriate risk resistant level and design relevant internal control procedures to monitor the Group's risk level. The Group reviews regularly these risk management policies and relevant internal control systems to adapt to changes in market condition or its operating activities.

#### (1) Market risk

#### (a) Foreign currency risk

The Group mainly operates in Mainland China, Europe, America, Asia and Africa for the manufacturing, sales, investments and financing activities. Any foreign currency denominated monetary assets and liabilities other than in RMB would subject the Group to foreign exchange exposure.

The Group's finance department at its headquarters has a professional team to manage foreign exchange risk, with approach of the natural hedge for settling currencies, signing forward foreign exchange hedging contracts and controll the scale of foreign currency assets and liabilities, to minimize foreign exchange risk, and to reduce the impact of exchange rate fluctuations on business performance.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 15 Financial risk (Cont'd)

#### (1) Market risk (Cont'd)

#### (b) Interest rate risk

The Group's interest rate risk arises from interest bearing borrowings including long-term borrowings and debentures payable. Financial liabilities issued at floating rates expose the Group to cash flow interest rate risk. Financial liabilities issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 31 December 2017, the Group does not have long-term interest bearing borrowings at floating rates (31 December 2016: RMB71,560,000) (Note 4(25)).

The Group's finance department at its headquarters continuously monitors the interest rate position of the Group. Increases in interest rates will increase the cost of new borrowing and the interest expenses with respect to the Group's outstanding floating rate borrowings, and therefore could have a material adverse effect on the Group's financial position. The Group makes adjustments timely with reference to the latest market conditions and may enter into interest rate swap agreements to mitigate its exposure to interest rate risk.

#### (2) Credit risk

Credit risk is managed on the grouping basis. Credit risk mainly arise from cash at bank, deposits with central bank, deposits with banks and other financial institutions, notes receivable, accounts receivable, interest receivable, loans and advances, other receivables and other structural deposits in current assets.

The Group expects that there is no significant credit risk associated with cash at bank, deposits with central bank and deposits with banks and other financial institutions since they are deposited at state-owned banks and other medium or large size listed banks. Management does not expect that there will be any significant losses from non-performance by these counterparties.

In addition, the Group has policies to limit the credit exposure on notes receivable, accounts receivable, interest receivable, loans and advances, other receivables and other structural deposits in current assets. The Group assesses the credit quality of and sets credit limits on its customers by taking into account their financial position, the availability of guarantee from third parties, their credit history and other factors such as current market conditions. The credit history of the customers is regularly monitored by the Group. In respect of customers with a poor credit history, the Group will use written payment reminders, or shorten or cancel credit periods, to ensure the overall credit risk of the Group is limited to a controllable extent.

# (3) Liquidity risk

Cash flow forecasting is performed by each subsidiary of the Group and aggregated by the Group's finance department in its headquarters. The Group's finance department at its headquarters monitors rolling forecasts of the Group's short-term and long-term liquidity requirements to ensure it has sufficient cash and securities that are readily convertible to cash to meet operational needs, while maintaining sufficient headroom on its undrawn committed borrowing facilities from major financial institutions so that the Group does not breach borrowing limits or covenants on any of its borrowing facilities to meet the short-term and long-term liquidity requirements. On the balance sheet date, the sum amount of cash and cash equivalents, paper assets, deposit of capital discounted, financial funds recorded in other current assets as well as available-for-sale financial assets and other monetary assets was RMB 109,654,798,000.

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 16 Fair value estimates

The level in which fair value measurement is categorised is determined by the level of the fair value hierarchy of the lowest level input that is significant to the entire fair value measurement:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

#### (1) Assets and liabilities measured at fair value on a recurring basis

As at 31 December 2017, the assets and liabilities measured at fair value on a recurring basis by the above three levels are analysed below:

|  | Level 1  | Level 2  | Level 3    | Total      |
|--|----------|----------|------------|------------|
| Financial assets at fair value through profit or loss -                              |          |          |            |            |

| instrument  | <u>-</u>  | 6,264   | <u>-</u>   | 6,264      |
| Total liabilities   | -         | 96,102  | _          | 96,102     |

The Group takes the date on which events causing the transfers between the levels take place as the timing specific for recognising the transfers. There was no significant transfer of fair value measurement level of the above financial instruments.

The fair value of financial instruments traded in an active market is determined at the quoted market price; and the fair value of those not traded in an active market is determined by the Group using valuation technique. The valuation models used mainly primarily comprise discounted cash flow model and market comparable corporate model. Inputs of valuation technique mainly comprise risk-free interest rate, estimated interest rate and estimated annual yield.

There was no change in the valuation technique for the fair value of the Group's financial instruments in current year.

The changes in Level 3 financial assets are analysed below:

Available-for-sale financial assets -Available-for-sale equity instruments

| 1 January 2017                                       | 30,109,067   |
|--|--------------|
| Increase   | 26,513,177   |
| Decrease   | (35,571,427) |
| Total gains of current period                        |              |
| Investment income recognised in the income statement | 975,534      |
| Gains recognised in other comprehensive income       | 148,615      |
| 31 December 2017                                     | 22,174,966   |

| Total   | 22.174,966                           |  |  |                        |                                    |                             |

Assets and liabilities subject to level 2 fair value measurement are mainly forward exchange contracts and are evaluated by income approach.

#### (2) Assets and liabilities not measured at fair value but disclosed

The Group's financial assets and financial liabilities measured at amortised cost mainly include: cash at bank and on hand, deposits with central bank, deposits with banks and other financial institutions, notes receivable, accounts receivable, loans and advances, other receivables, other current assets (excluding those mentioned in Note 16(1)), accounts payable, notes payable, short-term borrowings, long-term borrowings, customer deposits and deposits from banks and other financial institutions, financial assets sold under repurchase agreements, interest payable and other current liabilities, etc..

Carrying amounts of the Group's financial assets and financial liabilities as at 31 December 2017 and 31 December 2016 approximated their fair value.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(All amounts in RMB'000 Yuan unless otherwise stated) [English translation for reference only]

#### 17 Capital management

The Group's capital management policies aim to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, refund capital to shareholders, issue new shares or sell assets to reduce debts.

The Group is not subject to external mandatory capital requirements, and monitors capital structure on the basis of gearing ratio (total assets total liabilities).

As at 31 December 2017 and 31 December 2016, the Group's gearing ratio is as follows:

|                   | 31 December 2017 | 31 December 2016 |
|-------------------|------------------|------------------|
| Total liabilities | 165,181,687      | 101,624,015      |
| Total assets      | 248,106,858      | 170,600,711      |
| Gearing ratio     | 66.58%           | 59.57%           |

#### 18 Notes to the parent company's financial statements

#### (1) Other receivables

|                               | 31 December 2017 | 31 December 2016 |
|-------------------------------|------------------|------------------|
| Current accounts              | 8,316,708        | 12,584,623       |
| Other                         | 87,645           | 60,707           |
|                               | 8,404,353        | 12,645,330       |
| Less: Provision for bad debts | (789)            | (738)            |
|                               | 8,403,564        | 12,644,592       |

#### (a) Other receivables are analysed by ageing as follows:

|                               | 31 December 2017 | 31 December 2016 |
|-------------------------------|------------------|------------------|
| Within 1 year (inclusive)     | 5,150,753        | 6,088,475        |
| 1 to 2 years (inclusive)      | 3,253,600        | 6,556,855        |
