

# **Midea Group Co., Ltd.**

## **The 2019 Annual Report**

**30 April 2020**

## **Section I Important Statements, Contents and Definitions**

**The Board of Directors, the Supervisory Committee, directors, supervisors and senior management of Midea Group Co., Ltd. (hereinafter referred to as the “Company”) hereby guarantee that the information presented in this report is free of any misrepresentations, misleading statements or material omissions, and shall together be wholly liable for the truthfulness, accuracy and completeness of its contents.**

**All directors of the Company attended the Board meeting to review this Annual Report. There are no directors, supervisors, or senior management who do not warrant or who dispute the truthfulness, accuracy and completeness of the contents of this Annual Report.**

**The financial statements for 2019 have been audited by PricewaterhouseCoopers China (LLP) and have obtained an unqualified audit report.**

**Mr. Fang Hongbo, Chairman of the Board and CFO of the Company and Ms. Zhong Zheng, Director of Finance of the Company, have represented and warranted that the financial statements in this report are true and complete.**

**The Board has considered and approved the following dividend payout plan for the year 2019: based on the 6,957,181,058 shares at the disclosure date of this report (the total share capital of 6,999,467,315 shares minus the repurchased 42,286,257 shares in the repo securities account at that date), it is proposed that the Company should distribute a cash dividend of RMB16 (tax inclusive) per 10 shares to all the shareholders and should not convert capital surplus into share capital. When the profit distribution plan is implemented, if any change occurs to the total shares eligible for profit distribution, the profit distribution plan shall be based on the total shares eligible for profit distribution at the book closure date of the profit distribution, and the dividend per share shall be adjusted under an unchanged total distribution**

**amount.**

**The future plans and some forward-looking statements mentioned in this report shall not be considered as virtual promises of the Company to investors. Therefore, investors are kindly reminded to pay attention to possible investment risks.**

**This report has been prepared in both Chinese and English. Should there be any discrepancies or misunderstandings between the two versions, the Chinese version shall prevail.**

## Letter to Shareholders

While a heart-shaking fight against the pandemic is now on globally, this once-in-a-century “black swan” incident has casted tremendous changes to the lives of everyone. We sincerely hope everyone stays safe and healthy. And we have strong belief that the haze will eventually disappear and there will always be bright light.

In this nationwide operation, Midea was amongst the first companies to respond and participate in frequent support missions, reflecting the heritage of utmost importance from Midea's development history of 50 years—taking rapid actions amid crises and changes, bearing responsibilities amid challenges and chaos.

Now, as the world is faced with changes that have not been seen for a century, history-making global economic fluctuations and a continuous stream of uncertainties come thick and fast. In light of this unprecedented time, by committing to its unhesitating strategies and responsibilities, Midea has managed to maintain steady growth in business performance. In 2019, Midea achieved revenue of RMB279.381 billion, marking a year-on-year increase of 6.71%; and achieved RMB24.211 billion in net profit attributable to shareholders of the Company, recording a year-on-year increase of 19.68%. Midea was ranked 312th among Fortune Global 500 in 2019, moving up by 169 places since its debut in 2016. As for Fortune China 500, Midea was ranked 36th, topping the industry chart for 5 consecutive years. In addition, Midea was ranked 33rd among BrandZ™ Top 100 Most Valuable Chinese Brands in 2019 with an increase of brand value by 20%. Midea ranked 27th on the list of Brand Finance Tech 100 in 2019, moving up 16 places in comparison to the year before, leading its industry peers throughout the country.

2019 was yet another year that gave us the feeling that time flies. As market iteration cycles become more rapid, one may say this is a tempestuous era with so many tides. Things change drastically, yet vision, dreams, perspectives and ambitious setup will always persist. No one could stay young forever, but young people will always be there. Companies decline and fall, but there are always some firms which are thriving. For us, nothing is more critical

than upholding our long-term perspective mindset and adapting to external uncertainties with determined strategic focus.

We are devoted to the three strategic focuses of "Product Leadership, Efficiency Driven, Global Operations" to continue to set the stage for our business. Today, such three strategic focuses have already become our guidelines for daily business and operations. Business performance is, therefore, said to be continuously improving. Moreover, we increased investments in weaker product categories and made bold moves on new product categories and new business models in 2019. Whereas our international layout increases in clarity over time, we do look forward to business prosperity in the days to come.

We uphold our user-centric strategy and promote business reforms. We continued to break through stereotype in 2019 and placed interests and needs of users first in the top-down systematic and comprehensive business model reforms across the Group to enhance connections between our services and products and users.

We are committed to building future-oriented innovation capabilities and R&D scaling advantages. In 2019, we kicked off our plan to build a global R&D network of "4+2", promoting the Shanghai Global Innovation Center, Midea America Research Center, Midea Germany Research Center and Midea Japan Research Center as comprehensive technology R&D centers, and Midea Milan Design Center as Industrial Design Center. We progressed in promoting global R&D resources integration and enhancing the world's R&D layout plus innovation mechanisms.

We insist that human capital is the most essential component for an enterprise, taking further steps to strengthen employee rights and interests and invest in employee care. Over the past year, the core management and all employees have maintained an excellent fighting spirit, learning ability, as well as accountability. With rapid growth in the mid-level young managers and non-stop inflow of fresh blood, we have created a diverse internal culture that fuels the Company's long-term development.

These long-term layouts and investments, together with the unwavering commitment to sticking to and promoting Midea's culture, are all Midea's wealth of tomorrow. They also provide the confidence for us to believe in Midea's achievement in long-term steady growth and safeguard the interests of our shareholders.

Actually it is not the changing world, but how we interpret the changing that affects us most. With merely past knowledge, we will never be able to reach further future. The manufacturing industry's underlying logic for achieving growth from the past has been profoundly altered. The most active business pulse in the digitalization era is the speed and ability to create value.

Like the stirring melody in a grand and complex symphony, Midea will renew and refocus our strategies amidst the vast changing world. We will launch and strengthen the next round transformation of comprehensive digitalization and intellectualization. As we have learned from the past, every successful transformation requires the courage to risk life, through devotion, persistence and perseverance. By promoting comprehensive digitalization and intellectualization, Midea's product models and business value chain are going to observe groundbreaking changes, whereas Midea will evolve from a hardware-based company to a data-driven innovative technology group that takes affirmative steps forward.

We shall strive to achieve changes in the format of products and thus transform our traditional business of simply selling hardware to a software-driven business, intensifying contents and services at the same time.

It is in our list to achieve changes in business methodology and promote reforms in research, production and sales. And with digitalization tools and approaches, we are going to promote online and offline integration, decentralization and flat management.

The goals are to foster changes in business models, achieve direct communication, direct contact and high-frequency interaction with users, in order to uncover user value and transform to an Internet mindset.

When the going gets tough, the tough get going. In the face of a series of challenges brought forth by the coronavirus epidemic, we shall remain true to our original aspiration and carry our dreams through long distances. Let us be prepared for strategic deployment, resource investments and team building efforts—all in the long term. They do not have to be magnificent fireworks that echo down in history but can still become the sparkling lights in our unique stories!

Future is defined by the path we've been through! At this moment, Midea is flourishing and the most shining Midea is still ahead of us and far from being achieved.

We hereby express our gratitude for all shareholders' support all the way along.

Board of Directors, Midea Group

April 2020

Applicable N/A

No such cases for the Reporting Period.

## Section III Business Profile

### 1. Business Scope in the Reporting Period

#### 1.1 Summary of business scope

Midea is a global technologies group in HVAC systems, consumer appliances, robotics & industrial automation systems, and digital business. Midea offers diversified products and services, including HVAC centered on residential air-conditioning, commercial air-conditioning, heating & ventilation systems; consumer appliances centered on laundry appliances, refrigerators, kitchen appliances, and various small home appliances; robotics and industrial automation systems centered on KUKA and Guangdong Midea Intelligent Robotics Co., Ltd.; and the digital business centered on smart supply chains, Industrial Internet of things (IIOT) and silicon chips.

With “Bring Great Innovations to Life” as its corporate vision, “Integrate with the World, to Inspire Your Future” as its mission, and “Embrace what’s next - Aspiration、Dedication、Collaboration、Innovation” as its values, Midea integrates global resources and promotes technological innovation to create a better life for over 400 million users, major customers and strategic partners in different areas worldwide every year with satisfying products and services.

Midea, a global operating company, has now established a global platform with around 200 subsidiaries, 28 R&D centers, 34 major manufacturing bases, and approximately 150,000 employees. Its business covers more than 200 countries and regions. Overseas, Midea has 18 R&D centers and 17 manufacturing bases in more than ten countries, with over 30,000 employees. 22 currencies are used by Midea in settlement. In addition, Midea is the majority shareholder of KUKA, a Germany-based world-leading company in robotics and automation, with a stake of approximately 95%.

#### 1.2 Position in the household appliance industry

Midea ranks No. 312 on the *2019 Fortune Global 500* list, moving up 169 places since its debut on the list in 2016, and ranks No. 36 on the *2019 Fortune China 500* list, the highest-ranking among the home

appliance industry in the country for five consecutive years. It also ranks highly on the *Top 500 Most Credible Chinese Enterprises* list, the *Top 100 Most Credible Chinese Manufacturers* list, the *Top 100 Most Credible Chinese Private Enterprises* list and the *Top 500 Most Credible Chinese Listed Companies* list of 2018 released by the 2019 China Enterprise Credit Development Forum & the 10th Good Faith Public Welfare Ceremony. In addition, Midea ranks No. 33 on the *2019 BrandZ™ Top 100 Most Valuable Chinese Brands* list, with its brand value up 20%. Also, Midea takes the lead among domestic home appliance makers by ranking No. 27 on the *2019 Brand Finance Tech 100* list released by Brand Finance, a British brand assessment institution, moving up 16 places from last year. Midea has been given excellent credit ratings by the three major international credit rating agencies, Standard & Poor's, Fitch Ratings and Moody's. The ratings are in a leading position among home appliance manufacturers worldwide as well as among Chinese non-state-owned enterprises.

According to data from AVC, Midea's major home appliances all took up a larger share in the domestic market 2019. Its residential air-conditioners, in particular, saw a much bigger share in all channels, with an online market share of 30% and an offline market share of nearly 29%.

The table below shows the offline market shares and rankings of the Company's primary home appliance products (by retail sales) in 2019:

Product category	Market share	Ranking
Residential air conditioners	28.9%	2
Laundry appliances	27.4%	2
Refrigerators	12.6%	2
Rice cookers	43.9%	1
Electric pressure cookers	44.3%	1
Electric kettles	38.6%	1
Induction cookers	48.5%	1
Blender	37.7%	1
Electric fans	39.3%	1
Electric radiators	42.9%	1

Water dispensers	42.3%	1
Gas water heaters	11.6%	2
Water purifiers	22.2%	2
Countertop microwave ovens	44.5%	2
Countertop electric ovens	36.2%	2
Dishwashers	9.2%	3
Electric water heaters	20.7%	3
Range hoods	8.7%	4
Gas stoves	7.0%	4
Robot vacuum cleaners	4.6%	4
Push-rod vacuum cleaners	3.4%	4

Midea's online retail sales during 2019 were close to RMB70 billion, up by over 30% YoY, remaining the best-selling home appliance manufacturer on major e-commerce channels such as JD, Tmall and Suning.

The table below shows the online market shares and rankings of the Company's primary home appliance products (by retail sales) in 2019:

Product category	Market share	Ranking
Residential air conditioners	30.0%	1
Commercial air conditioners	50.0%	1
Laundry appliances	31.2%	2
Refrigerators	17.7%	2
Microwave ovens	53.0%	1
Pressure cookers	41.0%	1
Rice cookers	29.6%	1
Electric ovens	22.7%	1
Induction cookers	39.0%	1
Electric water heaters	30.6%	1
Gas water heaters	18.0%	1

Electric kettles	23.0%	1
Electric fans	19.2%	1
Electric radiators	16.9%	1
Vacuum cleaners	10.3%	2
Water dispensers	18.9%	2
Water purifiers	13.1%	2
Dishwashers	24.6%	2
Sterilizing cabinets	10.8%	2
Range hood + stove suites	10.4%	4

## 2. Significant Changes in the Main Assets

### 2.1 Significant changes in the main assets

Main assets	Reasons for any significant change
Construction in progress	Down 42% YoY, primarily driven by the completion of construction projects
Cash at bank and on hand	Up 154% YoY, primarily driven by an increase in fixed deposits
Notes receivable	Down 62% YoY, primarily driven by the reclassification to receivables financing
Available-for-sale financial assets	Down 100% YoY, primarily driven by the reclassification to financial assets held for trading and other non-current financial assets
Long-term receivables	Up 3,370% YoY, primarily driven by an increase in finance lease
Other non-current assets	Up 799% YoY, primarily driven by an increase in structural deposits with a maturity of over one year

### 2.2 Main assets overseas

Applicable N/A

## 3. Core Competitiveness Analysis

**3.1 As one of the leaders among the global household appliance makers and a dominator in the major appliance sectors, Midea Group provides high-quality, one-stop home solutions through its wide product range, complete with full specifications.**

As a white goods and HVAC enterprise with a whole industrial chain and full product line, Midea Group has developed a complete industrial chain combining R&D, manufacturing and sales of key components and finished products, supported by an industry-leading R&D center and manufacturing technologies of core components (such as compressors, electrical controls, magnetrons and controllers), and ultimately based on its powerful capabilities in logistics and services. Midea is widely known as a top brand of household appliance and HVAC in China. Its dominance in the major appliance and HVAC markets means that it can provide a wide range of competitive product sets. It also means internal synergies in brand awareness, price negotiation as a whole, customer needs research and R&D investments. Compatibility, coordination and interaction among household appliances have become increasingly important since smart home is gaining popularity. With a full product line, Midea has had a head start in providing a combined and compatible smart home platform with integrated home solutions for customers.

### **3.2 Global R&D resource integration capabilities, continuing lead in R&D and technical innovation**

The Group is focused on building a competitive, multi-layered global R&D system centering on user experience and product functions, which represents world-class R&D input and strength. With close to RMB40 billion invested in R&D over the past five years (over RMB10 billion in 2019), the Group has set up a total of 28 research centers in 11 countries to gradually build up a “4+2” global R&D network and gain the advantage of scale in this respect. Domestically, with the core being Midea Global Innovation Center in Shunde District, Foshan City, Midea has also started to build a global innovation center in Shanghai. Overseas, with Midea America Research Center, Midea Germany Research Center, Midea Japan Research Center and Midea Milan Design Center as the cores, Midea makes use of the regional advantages, integrates global R&D resources and refines its global R&D network. It has over 10,000 R&D employees and over 500 senior foreign senior experts. While establishing its own research centers around the world, the Group has also cooperated with domestic and foreign scientific research institutions, such as MIT, UC Berkeley, UIUC, Stanford, Purdue University, University of Maryland, The University of Sheffield, Polytechnic University of Milan, Tsinghua University, Shanghai Jiao Tong University, Zhejiang University, the Chinese Academy of Sciences, Harbin Institute of Technology, Xi’an Jiaotong University, Huazhong University of Science and Technology and South China University of Technology, in order to establish joint labs for deepening technological innovation. The Group also carries out strategic

cooperation with tech giants such as BASF and Honeywell to build a global innovation ecosystem. The Group's long-term focus on building technology, marketing, product, design and open innovation systems, building a cutting-edge research system and building reserves in technology for mid/long term, has provided a solid foundation for the Group to maintain technical superiority across the globe.

### **3.3 A stronger network of global operations developed and designed with Midea's continual global resource allocation and investments, globally-advanced manufacturing capabilities and advantage of scale**

The success of a series of global acquisitions and new business expansion moves has further solidified Midea's global operations and leading advantages in robotics and automation. With the world's leading production capacity and experience, and a wide variety of products as well as its production bases all over the world, the Group has been able to expand rapidly into the emerging overseas markets and is becoming a stronger competitor in those mature overseas markets. The Group is one of the biggest manufacturers in the world for many product categories, which gives it competitive edges in efficiency improving and cost reducing that its overseas competitors are unable to achieve. Overseas sales of the Group accounts for more than 40% of the total sales revenue. Its products have been exported to over 200 countries and regions, and it owns 17 overseas manufacturing bases and 24 overseas operating agencies. Midea's global operations system has been further improved through the reform of international business organizations changing from a platform unit to a business entity. It also increases investments in overseas business operations, focuses on the needs of the local customers and enhances product competitiveness in a bid to promote growth in its Own Branding & Manufacturing (OBM) business. In addition, with a deep knowledge and understanding on product characteristics and product demands in overseas market, Midea is promoting worldwide branding and expansion through global collaboration and cooperation. In this way, the global competitiveness of Midea is increasing steadily.

### **3.4 Broad channel networks and a well-established smart supply chain system ensuring the steady growth of Midea's online and off-line sales**

By virtue of years of development and investments, Midea Group has formed an all-dimensional market coverage. In the mature first and second-tier markets, the Company has developed and maintained good

partnerships with large home appliance retail chains. While in the broad third and fourth-tier markets, the Company uses flagship stores, specialty shops, traditional channels and new channels as effective supplements. Currently, the Company has already covered the markets at all tiers. Additionally, the Company's dominance in branding, products, offline channels and logistics distribution have also created powerful guarantees for the Company's rapid expansion of its e-commerce business and channels. Achieving the highest online sales among China's household appliance manufacturers, Midea's online retail sales were close to RMB70 billion in 2019, up by over 30% YoY, maintaining the highest sales on China's mainstream e-commerce platforms such as JD, Tmall and Suning in various home appliance categories.

Making full use of the digital technology, Annto Logistics Technology Co., Ltd. (Annto), a subsidiary of Midea, refines its offline logistics network through the big data technology to build a smart and digital distribution platform. Relying on nearly 140 urban distribution centers nationwide, Annto concentrates its resources on urban distribution. It is able to provide fully visualized direct distribution services covering every town and village of the country. It can finish the delivery to 19,692 (or 46%) towns and villages within 24 hours and to 35,944 (or around 85%) towns and villages within 48 hours in the country. Additionally, Annto works closely with Midea's post-sale service network to provide one-stop services of delivery and installation, which has effectively improved user experience.

### **3.5 A user experience-oriented reform of “Comprehensive Digitalization and Comprehensive Intellectualization” to make Midea an icon in digitalization**

Midea has put forward a user experience-oriented strategic objective of “Comprehensive Digitalization and Comprehensive Intellectualization”. On one hand, it promotes deep integration of the digital technology and business in the whole value chain, with the view to becoming an icon in digitalization. On the other hand, with foresight, it plans for whole new products, services and business models centering on smart technologies, products and scenes, so as to outcompete Internet companies. With continual investment and research in artificial intelligence (AI), silicon chip, sensor, big data, cloud computing and other new technologies, Midea has built the biggest AI team in the household appliance industry, which is committed to enabling products, machines, production processes and systems to sense, perceive, understand and judge, driven by the combination of big data and AI, in order to reduce obstacles for man-

machine interaction to the minimum and create smart appliances without any assistance in interaction. Focusing on “people and their family”, Midea builds a whole value chain of IoT. Breakthroughs have been made in user data protection, content operation for smart scenes, smart connection technology, the smart home ecosystem, cloud platforms, the smart voice function, the big data-based cloud housekeeper services, etc. By doing so, Midea is able to offer complete smart home solutions for users, as well as to empower its business partners.

Upon years of a digitalized reform characterized by “One Midea, One System, One Standard”, Midea has successfully materialized operations driven by software and data through its value chain, connecting end to end and covering R&D, PO, scheduling, flexible manufacturing, procurement, follow-up of product quality, logistics, installation & post-sale services, etc. The Group’s cloud platform has made come true C2M flexible manufacturing, platform-based and modularized R&D, digitalized production techniques and simulation, intelligent logistics, digital marketing, digital customer service, etc. “M.IoT”, the Midea IIOT Platform, has become China’s first complete IIOT platform provider covering industrial knowledge, software and hardware. M.IoT focuses on building the SCADA platform, the industrial cloud platform, the industrial big data platform and the industrial SaaS service to provide the standardized, cloud-based and platform service, including C2M, supply coordination and solutions. It has developed over 20 platform products so far. In addition to applying these IIOT platform solutions to its manufacturing bases across the world and various products, the Group has also provided these solutions for over 200 customers in different industries. Therefore, it is safe to say that Midea has built a solid foundation regarding IIOT systems.

### **3.6 Sound corporate governance mechanism and effective incentive mechanism to provide a solid foundation for Midea’s sustained and steady development**

Paying close attention to the construction of a governance framework, regarding its corporate control, centralization and decentralization systems, the Group formed a mature management system for professional managers. The divisional system has been in operation for many years, and its performance-oriented evaluation and incentive mechanism featuring full decentralization has become a training and growth platform for the Group's professional managers. The Group's primary senior management team consists of professional managers who have been trained and forged in the operational practices of Midea

Group. They have been working for Midea on average for more than 15 years, all with rich professional and industrial experience, deep understanding of the home appliance industry throughout both China and the world, and accurate understanding of the industry environment and corporate operations management. The Company's advantages in such systems and mechanisms have laid a solid foundation for the efficient and effective business operations, as well as the promising, stable and sustainable future development of the Company. At present, the Company has launched six Stock Option Incentive Schemes, three Restricted Share Incentive Schemes, five Global Partner Stock Ownership Schemes and two Business Partner Stock Ownership Schemes for key managerial and technical personnel, marking the establishment of a governance structure aligning the interests of senior management and core business backbones with that of all shareholders, as well as the formulation of an incentive scheme comprising long and short-term incentives and restrains.

## Section IV Performance Discussion and Analysis

### 1. Overview

#### 1.1 Industry Overview

##### A. Home Appliance Industry

According to the statistics published by the China Household Electric Appliance Research Institute (CHEARI) and the National Household Electrical Appliance Industry Information Center, in 2019, the domestic retail sales of home appliances was RMB803.2 billion, down 2.2% year-on-year; and the exports of home appliances reached RMB303.4 billion, up 0.9% year on year. This was primarily driven by internal and external factors such as a steep slowdown in global economic and trade growth, the full-scale escalation of the China-U.S. trade conflict, a slowdown in domestic economic growth and the sluggish real estate market. Affected by the COVID-19 outbreak, 2020 is expected to see increasing uncertainties and fluctuations at home and abroad. Nevertheless, in the medium and long run, upgrading of the industrial structure, stable increase of household income, diversified consumption, the national policy support for the green and smart industries, as well as upgrading of the standards for home appliances will create new opportunities and growth points. According to the 2019 Annual Report of China's Household Electrical Appliance Industry published by CHEARI and the National Household Electrical Appliance Industry Information Center together, in terms of market size, the growth of traditional categories of home appliances slowed down while new categories were still burgeoning. Manufacturers continued to pursue high-end, smart and healthy home appliances in upgrading their products. Meanwhile, consumer needs for healthy home appliances were intensified because of the COVID-19 outbreak. Air purifiers and fresh air systems, washing machines with sterilization and drying function, as well as dishwashers and light-wave stoves with an emphasized function of sterilization, etc. gained increasing market attention.

In 2019, the domestic retail sales of air conditioners was RMB191.2 billion, down 3.4% year-on-year. In terms of product performance, the market shares of variable-frequency and high energy-efficiency air

conditioners kept growing. On one hand, the market share of variable-frequency air conditioners rose to over 85%, among which the market share of variable-frequency air conditioners with AFP Level I Energy Efficiency increased by 8% to reach 57.3%. On the other hand, the higher energy efficiency standards in 2020 will boost energy efficiency upgrading and integration in the air conditioning industry.

In 2019, the domestic retail sales of laundry appliances was RMB70.5 billion, up 1.2% year-on-year. The slight growth was attributed to significant product upgrading. In regard to product performance, the market share of high-end products was increasing in a steady way, of which the market share of laundry appliances with a unit price of above RMB6,000 was beyond 23%; clothes dryers were gaining consumer attention, of which heat-pump clothes dryers took up a much bigger share in retail sales.

In 2019, the domestic retail sales of refrigerators was RMB95.7 billion, down 1.2% year-on-year. Nevertheless, product upgrading was prominent. The sales of multi-door refrigerators continued to grow with the market share being over 50% for the first time, and the functions such as sterilization, fresh-keeping and odor-removing attracted attention in the industry. In the background of full-scale consumption upgrading, innovative smart refrigerators represented by Midea's Pesticide-Residue-Free Series (the first of its kind in the world) that can degrade pesticide residue, Odor-Free Series that feature fast odor removal and sterilization, and Micro-Crystalline Series are leading the market towards high-end, high-quality and smart refrigerators.

In 2019, the domestic retail sales of kitchen appliances was RMB175.9 billion, down 0.6% year-on-year. By product category, the sales of traditional products such as range hoods, stoves and water heaters declined, while dishwashers excelled in sales. Driven by policies, the sales of kitchen waste disposers rose evidently with great growth potential. The retail sales of dishwashers amounted to RMB6.8 billion, up 21.5%, of which the built-in dishwashers were the mainstream with the function upgraded from "cleaning" to "cleaning and drying". Functions such as "sterilization" and "drying" have emerged as the new upgrading trends. Although the retail sales of water heaters slightly went down 1.7%, the technological upgrading trend was still prominent. For instance, the remote control function of electric water heaters and the zero cold water function of gas water heaters, among others, have become increasingly popular on the market.

In 2019, the domestic retail sales of small domestic appliances was RMB128.9 billion, up 3.6% year-on-year. As new product categories kept popping up, the overall sales of small domestic appliances maintained a steady growth. Vacuum cleaners, rice cookers and blenders increased 3.2%, 3.5% and 1.4% respectively in retail sales from last year. Meanwhile, both online and offline retail sales of handheld vacuum cleaners recorded growth in the technological re-upgrading trend featuring intelligent recognition, intelligent display and sweeping-mopping integration. With people's increasing awareness for a healthy life, the sales of hair-related and personal-care appliances also saw a remarkable growth.

In 2019, the online sales of home appliances continued to expand and squeeze the offline sales. According to the data from the National Household Electrical Appliance Industry Information Center, the online retail sales of home appliances in China amounted to RMB310.8 billion, up 4.2% year-on-year, accounting for a market share of 38.7%; while the offline retail sales amounted to RMB492.4 billion, down 5.8% year-on-year, accounting for 61.3%. In light of the changes in the channel retail sales, most product categories achieved growth in the online market, while various categories declined in the offline market. Therefore, the online market is playing an important role in the consumer market of China. However, the offline market still has superiority for high-end products and product suites, and remains the mainstream channel for air conditioners, refrigerators, laundry appliances, kitchen and bathroom appliances, etc. While e-commerce platforms are setting up offline physical stores one after another, traditional offline channels are trying to develop their own business through e-commerce. The accelerated integration of online and offline channels will gradually form a relatively stable channel structure.

## **B. Robotics and Industrial Automation Industry**

According to the World Robotics Report 2019 published in September 2019 by the International Federation of Robotics (IFR), global installations of industrial robotics slowed down in growth in 2018 for the first time since 2012 and installations in 2019 were expected to be flat with the level in 2018. Meanwhile, analyzing from distribution in different countries and regions, China remained the largest market of industrial robotics, accounting for 36% of global installations, which was more than the installations in Europe and America combined. Installations in the U.S. reached a record high for the eighth consecutive year, with the installations in 2018 up 22% year-on-year. In 2018, the installations in Germany, the fifth largest robotics market in the world, increased 26%. By product category, installations

of AGV robotics were up by 60% from the 111,000 units in 2018. And installations of medical robotics also rose 50% year-on-year. Although there may be fluctuations in the global market of industrial robotics in the short run, IFR predicts that the total installations of industrial robotics worldwide will increase by 12% per year from 2020 to 2022 and reach up to 584,000 units in 2022 with the growing trend of automation and technological upgrading.

According to GGII, the output of industrial robotics reached 186,900 units in China in 2019, down 6.1% year-on-year. It is worth mentioning that the operating environment for the manufacturing industry has improved and China's output of industrial robotics kept increasing for the three months of Q4 2019, ending a string of year-on-year declines in the last 13 months. By product category, delta robotics grew nearly 20% in unit sales in 2019, with breakthroughs in food, pharmaceuticals, household chemicals, logistics and other industries; and collaborative robotics saw a growth of approximately 30% in unit sales against the headwind in 2019. In terms of policy support, MIIT issued the 2019 Work Plan for the Task Force of Industrial Internet to further promote the popularization and application of industrial internet and intelligent manufacturing technology; NDRC and the Ministry of Commerce issued the Catalogue of Encouraged Industries for Foreign Investment (2019) on June 30, in which the manufacturing sector remains a key orientation for encouraging foreign investment, with more than 80% of added or amended items in the national catalogue being within the manufacturing sector, and foreign investment in high-end, intelligent and green manufacturing is encouraged. On November 15, 15 government departments including the National Development and Reform Commission jointly released the Implementation Opinions on Deepening the Integrated Development of Advanced Manufacturing and Modern Service Industries, with the objectives of fostering new business models by integrating the two said industries, propelling the construction of smart factories, accelerating innovative application of the Industrial Internet and promoting flexible customization while at the same time deepening the integrated development of the manufacturing, service and Internet industries, as well as promoting efficient integration of modern logistics and manufacturing.

According to the latest statistics of IFR, in terms of industrial robotic density (the average number of industrial robotics per 10,000 workers), Singapore ranks No.1 in the world with 831 robotics while South Korea drops to second place. The robotic density of China has risen to 140, up 30% compared with that

in 2017 and far beyond the global average of 99, indicating great potential and prospects. Supported by diverse factors such as flexible demands of the manufacturing sector, declining demographic dividend, emerging markets and the development of innovative technologies, industrial robotics will be applied to more and more areas.

## **1.2 Analysis of the Company's Main Business**

In 2019, guided by the core strategic objectives of “Leading Products, Efficiency Driven and Global Operations” in a complicated political and economic environment at home and abroad, Midea focused on improving products, implementing the core strategy of “Comprehensive Digitalization and Comprehensive Intellectualization”, promoting high-performance operations in the whole value chain, continuously optimizing its product mix according to the consumption upgrade trends, and constructing sustainable competitiveness for the future through internal growth. As a result, the business objectives set for 2019 were successfully fulfilled, with higher profitability, further improving indicators such as own funds and channel inventories, better product quality and reputation, as well as strengthened competitiveness in various product categories and global operation synergies. For 2019, Midea achieved, on a consolidated basis, total revenue of RMB279.381 billion, up 6.71% YoY; and a net profit attributable to shareholders of the Company of RMB24.211 billion, up 19.68% YoY.

**In 2019, the Company carried out the following main tasks:**

### **A. Focused on users, developed innovative products and improved user experience, strengthened product competitive advantages**

In order to bring about the “customer-oriented” strategic reform, Midea focuses on product, service and market touchpoints for users and markedly improves user experience in all the links. It builds a customer-oriented innovative R&D system, involves customers in the whole R&D process, taps potential demand of customers in different scenes, and offers customers better-than-expected product experience through innovation. A digital user experience management system and an experience information platform have been put in place to connect experience information and data at all touchpoints of a product life cycle, boost customer satisfaction and loyalty, and achieve leadership in product experience. The system of

customers with membership has been reformed. Through continual online and offline operation of customer groups, Midea encourages its existing customers to introduce new customers as a way to achieve fission expansion of the customer base. Online platforms provide individualized shopping experience by way of refining shopping paths and improving online consultation, while offline stores adopt new retail, electronic and smart technologies to build whole-new flagship, home decoration, combo, new retail and other stores. Meanwhile, by means of digital service, as well as platform-based and modularized R&D and production, Midea takes the lead to explore the C2M model for its home appliance products, offering single product customization and product suite customization for the whole house with the house decoration considered. In terms of service, with the help of Internet tools, Midea goes beyond the traditional service model to build a “service + Internet” platform, enhance the entire service team and improve smart product experience, so as to increase customer satisfaction. In terms of innovation in industrial design, Midea won a total of 93 international design awards during 2019, including 27 Red Dot Awards, 34 iF Awards, 20 IDEA Awards and 12 G-mark Awards.

—— **Residential Air Conditioners:** Midea DF Air Conditioner Series, characterized by Dual Flow Tech - counter-rotating airflow technology originating from aviation turbine, is another major innovative breakthrough in the breezeless technology field, which has won the 2019 AWE Top Award. Through a study on user demands for breezeless air experience tailored to “multiple family members and large residential space”, and based on the application of three unique technologies, including disrotatory turbine multi-vector softened disturbance, double-layer distance circulating air, and rectification and supercharging, it achieves lower power consumption than conventional air conditions, free adjustment of breezeless zones, and uniform room temperature up to 20 meters. Midea Freshness Air Conditioner Series offers coziness in four dimensions, namely, air temperature, sensation, cleanness and freshness. This product features intelligent dual washing technology and dual hybrid power new wind technology, which enable the dust intercepted by the natural water dust filter to go through the dual cleaning by washing and brushing, so as to keep the filter clean and achieve intelligent control of the room air quality; it achieves large-range circulation of indoor air and enables room temperature to reach the set degree quickly by using a high-performance heat exchanger system and carrying an independent double duct structure; and it ensures slightly higher indoor air pressure than outdoor by adopting an innovative micro positive pressure new wind approach to prevent outdoor air from coming into the room without being

processed. In 2019, Midea launched the first All-Time (Offline) Voice-Based Floor-Standing Air Conditioner without a remote controller. Equipped with the pioneering Edge Intelligence Interaction (EII) technology, this product can be controlled and connected through Local Area Network (LAN) when the Internet is off, with a response time of only 1/4 of the industry average.

—**Commercial Air Conditioners:** As a leading HVAC provider worldwide, Midea Commercial Air Conditioners is a leader in R&D strength, product technology and market performance. And the largest domestic market share remained with Midea Commercial Air Conditioners in 2019 according to ChinaIOL.com and the *Mechanical and Electrical Information-Central Airconditioning Market* magazine. In recent years, Midea Commercial Air Conditioners have won the bids for a significant number of major programmes. These programmes include the Beijing Daxing International Airport, Terminal 3 of Beijing Capital International Airport, Terminal 2 of Guangzhou Baiyun International Airport, Shanghai Metro, Jilin Railway Station, etc.

In 2019, Midea Commercial Air Conditioners showcased in Shanghai its technological innovation achievements in the green airport area. Midea SR Residential Central Air Conditioner unveiled at the same time has multiple industry-wide advanced key indicators, improving user experience with its key functions of fast warm air, strong heating, temperature and humidity control, cozy wind sensation, strong coolness in a high temperature and convenient control. In April 2019, Midea Commercial Air Conditioners completed the production of its homegrown Maglev Variable Frequency Centrifugal Unit, which makes Midea the first AC maker in China who is able to manufacture the maglev bearing, the maglev compressor and the high power inverter all by itself. This marks the industrialization of yet another independent innovation achievement by Midea Commercial Air Conditioners. In October 2019, Midea unveiled MDV7 Series All DC Variable Frequency Smart Cloud VRF featuring the first adoption of a homegrown large-displacement DC variable-frequency enhanced vapor injection scroll compressor. This means that Midea has once again broken the technology monopoly of foreign brands over key components of high-end commercial VRF. In addition, Midea Commercial Air Conditioners' "Wide-Ambient-Temperature Energy-Efficient Air-Source Heat Pump Technology and Its Industrialization" won China Machinery Industry Federation Sci-Tech Progress Award (Second Prize), "Efficient Air-Source Heat Pump-Based Heating System and Its Application" won Ministry of Education of the People's Republic of China Scientific

Progress Award (First Prize), “Research and Application of the Energy-Efficient Technology for the Midea Building Management System (M-BMS)” won China Energy Conservation Association Sci-Tech Progress Award in Energy Conservation and Emission Reduction (Second Prize), “Efficient Centrifugal Heat Pump Unit” and “Research of the Dual-Tube Heating and Heat Recovery Technology and Its Application to VRF” are both recognized as “Innovation Achievement in the HVAC and Refrigeration Industry at the 70<sup>th</sup> Anniversary of the Founding of the People’s Republic of China” by Chinese Association of Refrigeration. Midea is also given an Outstanding Contribution Award in the air-source heat pump industry during the “Clean Winter Heating” program for its excellent performance in the heat pump market. In addition, by virtue of its outstanding product and technological strength and market influence, Midea wins the title of the “First-Choice Central Air-Conditioner Brand for Procurement by Chinese Real Estate Enterprises”.

——**Laundry Appliances:** Little Swan under Midea has launched Water Magic Cube II Washing Machine, which adopts the unique “Ultra Fine Bubble” technology. Its unique Ultra Fine Bubble generator transforms water and air into billions of nano bubbles, which permeate into fiber and release huge energy to peel off dirt. This approach helps reduce the consumption of chemical detergent through greater micromechanical force while removing dirt in an efficient and fast manner. It has been proved by an authoritative national testing institution to be able to save around 50% detergent. Little Swan has launched the “One-Tub Tech (OTT)” Top-Loading Washing Machine, featuring the revolutionary “One-Tub Tech (OTT)” + “No-Hanger-Rod Damping Pyramid System”. The no-outer-tub design goes beyond the inner-and-outer-tub structure of a conventional top-loading washing machine, offers a big capacity in a compact size, and saves energy and 30% water for the same capacity. With the entire inner tub made from stainless steel, the no-outer-tub design, the UV sterilization technology and the nano silver ion technology, it creates a 100% clean washing environment. As the first of its kind in China, Beverley Heat Pump Washer-Dryer adopts intelligent sterilization breathing light technology and has passed the authoritative certification of SGS, a world-leading testing and certification institution. The ultra low temperature heat pump washing-drying technology applied in this product has passed the German VDE certification, which is considered the Nobel Prize in the electrical appliance sector. It offers professional washing of clothes made from high-end fabrics. Beverly Household Washing Care Center is the world’s first heat pump intelligent washing care center with separate drying and washing sections and the washer-dryer with the largest capacity (12KG for the upper dryer+ 12KG for the lower washer). While the upper

dryer is a maximum heat pump washer-dryer that works efficiently, saves water, performs drying in low temperature and effectively removes acarids and bacteria, the lower washer adopts the “Ultra Fine Bubble” technology. Midea Chujian Front-Loading Washing Machine Series adopts the revolutionary ventilation, Toshiba direct drive and micro steam air washing technologies to solve consumers’ pain point of being unable to wear the clothes immediately after washing. Meanwhile, the Water Magic Cube cold washing technology protects clothes from wear and tear through smart control of the washing pace, and can automatically put in the right amount of detergent by sensing the water volume and the weight of clothes in a smart manner.

——**Refrigerators:** In June 2019, Midea unveiled three whole-new refrigerator series. The Micro-Crystalline Series adopts the V-Tech Smart Fresh-Keeping Chip, as well as the “Five-Dimensional Radar Temperature Sensing” and “Light Freezing Smart Cool Air Distribution” technologies. Meanwhile, the upgraded micro-crystalline technology it carries can do better in freshness preservation for different food characteristics. It also features better technique and quality, as well as a more stylish appearance, satisfying different needs of more families. The Pesticide-Residue-Free Series is the first refrigerator with both functions of fresh keeping and pesticide residue degradation. It adopts the core technologies of “Space Deep UV Light Wave” and “Titanium Photolyase” with massive active photoions to achieve thorough degradation of pesticide residue. It can remove hundreds of pesticides in 13 major categories. According to the laboratory test result of the authoritative institution SGS, it can degrade 98.5% pesticide residue at the most. The Ultra Odor-Free Series features the globally pioneering PST + super magnetic electrolysis odor-free technology, which is the third-generation technology of its kind jointly developed by Midea and a research institute of China State Shipbuilding Co., Ltd. It releases more active ions to quickly degrade and kill odor and bacteria with a groundbreaking super magnetic induction electrolysis device, and quickens the degradation of odor through high-activity metal catalyst, which takes only 19 minutes.

——**Kitchen Appliances:** In 2019, Midea Variable Frequency Smart Smoke Control Series Range Hood (E62S/E88) made its debut in China. Its Smart Smoke Control system can automatically identify smoke changes and provide a right exhaust mode, saving the trouble of manual operation in the middle of cooking. Also, the AI chip it carries is able to automatically adjust the fan system to reduce the noise based on its smoke curve algorithm, so as to offer a better cooking environment. Meanwhile, Midea has

launched the first smart gas stove featuring automatic cooking in China. It can automatically fry, make soup, steam, etc. The technology to match the right duration and degree of heating with the food, together with the before-boiling heating switch and bipolar emulsion technologies, can help increase nutritional content such as protein, amino acid and sarcosine in the food. Midea Storm Series P30 Dishwasher is the first smart combo of washing, sterilization, drying and storage with a large capacity. Supported by key patented technologies such as hot air drying and silver ion anti-bacteria storage, its 72-hour anti-bacteria storage function is VDE certified. Midea has successfully developed a universal global dishwasher platform with the pioneering 5MAX deep cleaning system, as well as key innovative technologies including separate washing, UV multi-sterilization, double-pump hot air drying, long-term anti-bacteria storage of tableware, etc. This platform is dedicated to developing Chinese-style dishwashers integrating washing, sterilization, drying and storage. Midea MRO1890-600G Reverse Osmosis Water Purifier with the pioneering “Large-Capacity Integrated Filter Technology” features a 5-times larger capacity, representing another technological breakthrough subsequent to the small-capacity integrated filter technology. Also, it can show water quality, distribution and the status of filter life, as well as automatically change the filter without interrupting the normal water purification process. It has won the Annual Technological Innovation Award at the 15<sup>th</sup> China Household Appliances Innovation Award. The industry’s first Purifier-Dishwasher E500B with the micro nano bubble function released by Midea uses a double pressure transducer system to generate pure physical micro nano bubble water, which removes dirt and pesticide residue from fruits and vegetables in a more thorough manner. Its tank-free large capacity of 500 gallons satisfies the whole family’s demand for healthy water. Midea MNF1979-50G, the first countertop pump-free power-free water purifier, adopts the ultra-low pressure hydrophilic film that needs no power. It also features an innovative 180°rotatable base, super-low noise, convenient installation, a super-large capacity of 2.5L, etc. Midea Magnetic Purification Water Heater 32QE6 is the first of its kind to have a full-star certificate. It displays the inner tank cleaning time on the screen in real time and reminds of timely cleaning. Meanwhile, its function of intelligent power conservation of 40% is VDE certified. Midea T3 Series Gas Water Heater is the first water heater with a dual-duty pump that enables instant heating. In addition to instant heating, it features smart pressurization, which solves the waiting and not enough hot water problems for users in a disruptive manner. It has won China Household Appliance Industry Jinshi Award. Beverly Constant Temperature I8 Water Heater can maintain a constant water temperature during a shower with its temperature buffering technology. It also features TFT big-screen smart control

and an outstanding appearance. It has won the AWE Product Award and the IFA Technical Innovation Award. Midea Intelligent Micro Combi Steamer PG2310 Cooking Oven has been released into market integrating the functions of microwave, steamer and oven. The ZOPPAS direct-spray steam technology it uses enables quick generation of plentiful steam and the five-switch intelligent variable frequency heating technology brings precision heating. It also carries a smart menu. On top of the aforesaid, Midea has been making breakthroughs in key component technologies including the magnetron, the heater-vent-air module and the steam generator.

—**Small Domestic Appliances:** In 2019, Midea unveiled a variety of disruptive lifestyle appliances with the brand value concept of “technology, fashion, convenience and durability”. The products include the industry’s first low-sugar rice cooker specifically designed for people with hyperglycemia, which is certified by China Household Electric Appliances Research Institute (CHEAR). It adopts the innovative sugar leaching technology to reduce the reducing sugar by 50%. The fuzzy logic algorithm technique based on precise temperature control and the multi-staged pressure regulation technology based on precise pressure control carried in this product help offer a healthy cooking system. Midea High-Speed Variable Pressure Boiling Series Pressure Cooker with Midea’s innovative maglev air compressing technology offers 12 pressure choices to enable continuous boiling under different pressures for different food. Midea’s unique Ultra Thin Noise-Free Blender carries three key technologies, namely, eccentric blending (a homegrown technology that has won the China Patent Gold Award), smart frequency blending and high-power three-dimensional uniform heating. It blends food ingredients thoroughly and finely to help release more nutrition. Midea Seasons Fan Heater is an innovative combo of fan, humidifier and heater for all seasons. It is equipped with the patented heating-and-cooling switching technology. It can cover a large space and rapidly increase the sensible temperature by over 20% through “heating+humidification” and a wide-angle swing. Meanwhile, supported by the Archimedes spiral air channel and a 90mm ultra-large cross-flow rotor, it can reach a speed of 185m/min, which is five times faster than the ordinary fan heaters. The humid wind enabled by its humidification function can bring much more coolness than an ordinary tower fan. Midea P6 Wireless Handheld Vacuum Cleaner adopts a high-power digital motor and a large-capacity lithium battery pack to enable it to continuously work for 60 minutes. The exclusive fallout system in the dirt cup equipped with the patented two-stage single-cone filtration technology can apply micropressure on the indrawn dust and hair so that they will fall on the

bottom of the dirt cup instead of intertwining. Midea Smart Robot Cleaner i5E features a strong suction of 4000Pa, G-SLAM autonomous path planning, a wet-mopping function with three water volumes, anti-bumping, anti-falling and automatic recharging. Carrying a 360° HD camera, it is capable of smart control, video recording and voice communication through a mobile App for smart cleaning planning for the entire house.

## **B. Continued to invest in R&D to build a global R&D platform and a responsive innovatoin R&D system**

Midea continued to invest in R&D, made innovations with respect to mechanism, and developed more leading products through both excellent user experience and differentiated technologies. It kept reforming its product development model according to the strategic objective of “Leading Products”. An innovative R&D model of “Three Generations” has been put in place, namely, “Generation I product development, Generation II platform research, Generation III technologies and product concepts research”. Innovation research is carried out on innovative product development, cutting-edge platforms, key components, differentiated selling points and basic product performance improvement. Through development of product groups across the world and building of a global product platform, Midea is building “Leading Products”.

While carrying out the core technology research, Midea has attached great importance to the transformation of R&D achievements. In 2019, 25 scientific and technological achievements made under the leadership of Midea were all certified as “Internationally Advanced” upon authoritative technical review, including “the Research and Industrialization of Key Technology of Body Sensing and Interaction of Room Air Conditioners”, a key R&D project under the national 13th Five-Year Plan - “the Integrated Technology of High Seasonal Energy Efficiency Heat Pump Room Air Conditioners for Areas with Hot Summers and Cold Winters and the Application”, “the Research and Application of the Monolithic Highly-Integrated Intelligent Power Module”, “the Research and Application of Key Technology of the R290 Room Air Conditioner Working in an Ultra-High Temperature”, “the Research and Application of Key Technology of Breezy Room Air Conditioners”, “the Research and Application of Key Technology of Smart Cleaning and Ventilation of Room Air Conditioners”, “the Research and Application of Technology of High Efficiency Opposed Variable Frequency Centrifugal Compressors”, “the Research and Application of Micro Channel

Refrigerant Heat Dissipation Variable Frequency Technology”, “the Research and Industrial Application of the Big-Inch Integral Axial Flow Fan for Central AC”, “the Research of the Three-Tube Heating and Heat Recovery Technology and Its Application to VRF”, “Midea Vandelo Strong-Drive Fast-Cleaning Front-Loading Washing Machine”, “the Research and Industrial Application of Key Technology of Cooking Healthy Food to Control Blood Sugar”, “the Research on the Precision Diet Management System and its Application in Intelligent Household Appliances”, “the Application of Electromagnetic Isolation Technology in Power Frequency Microwaves”, “the Application of Micro Perforated Plate Noise Reduction Technology in Household Appliances”, “the Research and Application of Key Technology of Vision Inspection and Clothes Washing of Smart Washing Machines”, “the Research and Application of the Food Sensing and Directed Heating Technologies of Smart Ovens”, “the Research and Application of the Voice Interaction Technology of Smart Household Appliances”, “the Research of Galvano-Cautery Inhibition Technology for Bearings of Brushless DC Motor”, “the Research and Application of the Energy-Efficient Technology Featuring Self-Learning Based on Water Using Habits for Household Electric Water Heaters”, “The Research of the Electronic Thermostatic Technology and Its Application to Household Electric Water Heaters”, “the Research and Application of Key Technology for Exhausting Steam, Removing Fog and Reducing Humidity in Steaming, Baking and Cooking Products”, “the Research and Application of Vacuum Cleaner High Speed BLDC Drive Technology and Integrated Master Controller”, “the Research and Application of Technology for the Quality of Microwaved Food”, and “the Research and Application of Miniaturized Hot Air Technology Based on Baking Uniformity”. Additionally, Midea has 12 scientific research projects winning the China Light Industry Association Sci-Tech Progress Award, the China Association for Promotion of Private Sci-Tech Enterprises Sci-Tech Progress Award, the China Machinery Industry Federation Sci-Tech Progress Award, the China Energy Conservation Association Sci-Tech Progress Award in Energy Conservation and Emission Reduction, the Ministry of Education of the People’s Republic of China Sci-Tech Progress Award, and certain provincial sci-tech awards. At the 41st Meeting of the Parties to the Montreal Protocol in July 2019, the UN agency highly praised Midea’s R290 air conditioner technology for promoting the implementation of the Kigali Amendment, which has made important contributions towards enhancing the role of the air conditioner industry in global environmental protection.

In 2019, against the backdrop of the patent quality improvement campaign, the Company focused on the

quality instead of quantity in terms of patents and achieved remarkable results. 2,704 invention patents were granted to Midea by the Chinese patent office during the year, the largest number among home appliance makers. Also in the year, Midea lodged 13,525 patent applications at home and abroad, of which over 50% were invention-related and overseas applications more than doubled the number of last year. By the end of 2019, the total number of patent applications of Midea (inclusive of TLSC) exceeded 140,000 and 57,000 patents were granted. As shown in the “Public Announcement on the Results of the 21st China Patent Awards” issued in 2019, Midea’s “High-Frequency Fast Cooling and Heating AC Technology” won a China Patent Gold Award. In addition, the “Intelligent Power Module” and other technologies of Midea won 2 China Patent Silver Awards and 15 China Patent Excellence Awards, as well as 2 Invention Gold Awards at the 6th Guangdong Patent Awards. These awards signify that Midea’s strong capability of innovation is widely recognized.

Midea Group has been sticking to the double drivers of “product innovation + standard innovation” and making active steps towards contributing to the standardization of industrial technologies. In 2019, Midea Group took part in the formulation/revision of 554 standards, including 21 international standards, 213 national standards, 128 industry standards and 192 group standards. These standards include the national standard of the *Minimum Allowable Value of the Energy Efficiency and Energy Efficiency Grades for Room Air Conditioners* which brings about a new round of energy efficiency upgrade in the air conditioning industry, as well as national and industry standards such as the *Interoperability of Smart Household Appliances System—Parts 1~5*, the *Technical Specifications of Voice Module*, the *Technical Specifications of WiFi Module*, the *Safe Service Life Standard for Air Conditioners*, the *Installation Rules for Protective Tubes of Room Air Conditions*, the *Clothes Washing Machines for Household Use - Methods for Measuring the Performance* (IEC 60456), the *Tumble Dryers for Household Use-Methods for Measuring the Performance* (GB/T 20292-2019), the *Micro-Bubble Washing Machine* (T/CAS 367-2019), the *Technical Requirement and Test Method for Low Temperature Washing Performance of Washing Machines* (T/CAQI 84—2019), the *Technical Requirement and Test Method for Non-Washing Pesticide Residue Removing Appliances*, the *Technical Requirement and Test Method for Freshness Preservation in High Humidity in the Freezing Chamber of Refrigerator*, the *Requirement and Test Method for Freshness Preservation of Meat in Refrigerator*, the *Proposal on Electric Dishwashers for Household Use—Methods for Measuring the Performance for Asian Tableware* (IEC 60436), the *Household Electric*

*Cooking Appliances—Part 2 (GB/T 38051.2-2019), the Residential Gas-Fired Heating and Hot Water Appliances with Auxiliary Energy (GB/T 38350-2019), the Minimum Allowable Values of the Energy, Water Consumption and Grades for Dishwashers (GB 38383-2019), and the Technical Requirements and Test Methods of Household and Similar Saving Water Dishwasher (QB/T 5428-2019).* Meanwhile, Midea works with China Electric Apparatus Research Institute to establish an IEC/TC72/WG13 smart home appliance controller workgroup to push forward the formulation and implementation of the relevant international standards. Additionally, Midea and China Household Electric Appliances Research Institute together have completed the upgrade and implementation of the new technical specifications for the certification of breezeless air conditioner.

### **C. Deepened the channel transformation, further improved the channel efficiency and rebuilt the retail service ability**

Midea continued to promote channel reform and transformation, flatten offline channel hierarchies, propelled the optimized integration and empowerment of distributors, firmly continued to reduce inventories, optimize structure and streamline SKU, and substantially improve channel efficiency. It strengthened the synergy of domestic sales of full product categories; Midea has established over 30 regional market operation centers nationwide; by carrying out more precise joint promotional activities for diverse categories, it drove the synergy of domestic sales towards improvements and upgrading and reinforced the long-term sustainable development capacity of channels. Midea strove to expand the sales in the engineering channel and enhance its B2B competitiveness. To better cater to the needs of corporate users, it has established long-term strategic cooperation for procurement with the domestic top 50 companies in the real estate industry, long-term leasing apartment chain operators and financial and insurance companies. Midea aims to provide corporate customers with one-stop smart product solutions. At the same time, Midea attaches great importance to improving the service quality of strategic procurement projects. Through the systemic management of “Selection, Appointment, Cultivation and Retainment” over regional service providers, Midea builds a localized service network for all of its product categories covering the entire China. It integrates installation service resources, identifies user needs in an accurate manner, boosts customer satisfaction and builds up its core competitiveness for the B2B business.

With the rising of different consumer circles and fragmented communication, online and offline markets integrate at a faster speed, and Midea rebuilds its retail and service capabilities to meet different user needs. With user demands driving the retail transformation, Midea speeds up the integration of online and offline networks, focuses on the demands of different user groups, and restructures the retail operations system. This mainly involves three aspects. Firstly, it provides one-stop, intelligent product and service solutions for users with house decoration demands. It has opened more than 260 Midea Smart Life Experience Centers in China and upgraded over 770 flagship stores into Midea Smart Life Experience Centers, providing products and services for more than 200,000 families. Secondly, Midea studies the whole new lifestyles of young consumers and develops a more efficient service delivery approach for the Millennial Generation. It provides products featuring both good experience and functions by better understanding user demands through data platforms. Meanwhile, it focuses on user data analysis, opens up the channel for converting entrance products to related products through advertisement placement on new media, steadily increases the ratio of packaged purchase, and builds the ability to market home appliance packages. Thirdly, by identifying the characteristics of different markets and distributing more resources, Midea builds a full-coverage and high-penetration retail network targeting users in different cities and regions to enhance the retail service experience, renew and upgrade its retail system and extend the reach of its network. Specifically, on one hand, it promotes the project of deep collaboration of supply chains together with e-commerce platforms, achieves accurate prediction, intelligent distribution of inventory and automatic restocking through data support and system connectivity, and develops smart supply chains for fast response to user demands. On the other hand, in terms of the offline channels, it brings one-stop services to users by closely cooperating with large chains and shopping malls in various first- and second-tier cities. In the vast third- and fourth-tier cities, in addition to providing full-category products and services through flagship store and exclusive store systems, Midea builds over 1,000 new multi-category exclusive stores to further improve the market coverage of its retail system. In less developed markets, it offers convenient products and services to users through a network of nearly 100,000 retail stores.

Midea enhances the quality of its user service system. On one hand, it builds an operations platform internally based on user data assets, develops a layered operations system facing users, links online and offline data, unifies Midea members' identity, entitlement and assets, establishes unified member profiles,

provides more member privilege services and strengthens members' identity awareness. Different operations for different levels and scenes are made possible based on user data integration, and joint services for multiple scenes are realized through targeted introduction of customers and acquisition of customers by way of live streaming. In 2019, the cumulative number of Midea members exceeded 35 million, contributing over RMB5.5 billion of sales. On the other hand, it further improves the delivery-installation integrated service network, which offers users one-stop after-sales service solutions in respect of all household appliances. By 2019, it has completed the delivery-installation integrated service network which covers over 2,600 districts and counties across the country. In addition to the existing traditional door-to-door service and delivery-installation service, Midea has also launched various individualized services including send-for-repair, exchange and pick-an-engineer-for-door-to-door-service in an effort to satisfy differentiated needs of customers in different scenes. Meanwhile, it beefs up its effort in eliminating poor services by publicizing service standards and fees and establishing channels for user communication and feedback to ensure fast response to and closed-loop processing of user needs.

In 2019, under the background of Midea Group promoting the T+3 business model deep reform, Annto further promoted the logistics reform and completed the implementation of the unified warehousing and distribution strategy across the country, which has provided a strong support for the improvement of circulation efficiency of the sales channels. Focusing on the construction of the e-commerce logistics network, Annto established 99 pre-warehouses for e-commerce and completed the basic work for an online and offline stock sharing system, which has greatly improved its distribution capability. In terms of business expansion outside Midea Group, Annto closely focused on its core business of integrated warehousing and distribution services. With warehousing networks at different levels being connected, Annto can distribute from one warehouse and multiple warehouses to anywhere in the country for clients outside Midea Group. A logistics service platform covering various industries, product categories and scenes has been put in place. Meanwhile, client service experience has further improved through enhancing direct purchase of transport capacity. In 2019, the urban distribution and home distribution business scale of Annto saw a year-on-year increase of nearly 350%, with a steadily increasing market share. During its engagement in the Double 11 project of Tmall, Annto ranked among the top large piece delivery cooperators of Cainiao in the ratings by Tmall buyers, ranked first among these large piece delivery cooperators of Cainiao in all the five service indicators, and won the "Double 11 Top Award". In

addition, due to its excellent services, Annto was granted the 2019 Red-Top Award—“Excellent High-End Home Appliances Logistics Service Provider”.

#### **D. Steadily promoted Midea’s globalized business layout, enhanced localized operations overseas and accelerated the cooperative integration of Toshiba Project**

Midea further promoted its global business layout to solidify its global competency. It formulated a global supply cooperative mechanism, strengthened localized operations overseas, and promoted product globalization. Its overseas business spans more than 200 countries and regions in North America, South America, Europe, Asia, Africa and Oceania. Meanwhile, guided by the market and focusing on users, Midea builds a global user research network with foresight. Midea Germany Research Center is newly established to strengthen research on the needs of European users. And more resources have been provided for user research centers in the U.S., Italy, Brazil, India and Singapore. In 2019, Midea continued to advance international corporate governance by adjusting measures to local conditions, reinforced the integration of R&D, production and sales systems in regional markets, and further strengthened cohesion effects. Midea proactively expanded and reasonably planned overseas production layout, beefed up the management of overseas production bases and the enhancement of efficiency, enriched the product portfolio for overseas markets, improved local manufacturing capacity to deal with uncertainties in global trade. Meanwhile, it strengthened its ability of allocating resources to production bases worldwide according to global trade changes. Continuous efforts were made to expand marketing channels and reinforce the retail capability. The number of retail outlets overseas has surpassed 30,000. Meanwhile, digital management has been achieved at the retail end through the IRMS system and shopping guides have been trained for 12,000 person-times cumulatively, with an increasing retail channel share. A portfolio of Midea’s own brands for overseas markets comprising COLMO, TOSHIBA, MIDEA and COMFEE has been established. Each brand has their positioning, target users and product portfolio. They enter major markets and channels, boost consumer recognition and expand their influence in the overseas markets. The construction of the overseas e-commerce network was completed, and the middle- and back-end systems have taken shape. Midea keeps working on the traditional American and European markets, carries out planning for emerging markets in a swift manner and fully prepares for development in the overseas e-commerce market. Midea has successfully launched popular products for

all major categories of home appliances, some of which have become the most popular of their respective kinds and have been granted the “Bestseller” and “Amazon Choice” marks. Based on the “International 632 Project”, Midea integrated overseas business systems and processes to build a digital data platform for operating decision-making, which can help improve the abilities to seize business opportunities and identify risks through data connection and sharing on the platform. It strengthened the consistency of such processes as the PSI (Purchase Sales Inventory) management model, the management of product life cycle, and spare parts management and services of overseas branches and promoted the consistency and collaboration of Midea’s commercial languages and systems to increase its operational efficiency. It set up the global service platform and accelerated the building of overseas service capacity. A global platform integrating the call center, service quality tracking, spare parts deployment and technical training has been put in place as a way to improve the global service response capability and the proactive service capability.

In 2019, TLSC continued to focus on the core white goods business, promoted the synergy and unification of value chains with the business divisions of Midea Group on all fronts, optimized product structure to increase gross profits and continually improved profitability. It recorded a considerable year-on-year growth in the profit before tax and a profit for two consecutive years. In particular in the Japanese market with fierce competition, TLSC saw continual increases in its market shares of air conditioners, refrigerators and washing machines. It implements a business division system to further simplify functional departments, boost management flexibility and enhance the matching of powers and responsibilities. Meanwhile, it works with relevant business divisions of Midea in global market planning and strengthens their synergistic effects in brand building, channel development, R&D and innovation, integration of supply chain and quality improvement. The revenue generated by these cooperation projects worldwide saw a remarkable growth in 2019.

#### **E. Stepped up the industrial internet and digitalization programmes to thoroughly improve operational efficiency of the whole value chain**

Focusing on users and user experience, Midea continued to promote industrial digitalization, deepened C2M and the T+3 business model in the whole value chain, promoted innovation synergy of 5G and the Industrial Internet platform “M.IoT”, and built iconic Industrial Internet factories. It kept promoting digital

transformation in the 3D digital model, Digital Twin, intelligent scheduling, self-developed MRP, intelligent logistics, EHS, energy management, etc. M.IoT supports equipment access, protocol analysis and edge data processing through the SCADA system to provide data support for production management, production process refinement, equipment maintenance, etc. Based on the 5G, intelligent gateway and other technologies, M.IoT simplifies the underlying connection to be accessible to industrial equipment in various scenes. A digital closed-loop management system—TPM has been put in place to enable fast response and upgrade, automatically analyze malfunctions, improve the fault database, effectively reduce the abnormal downtime of equipment, monitor the equipment status in real time, automatically remind about maintenance plans as well as the turn-on-and-off time, and increase the uptime and output rate of equipment. So far, the M.IoT platform has been applied to Midea's AC, laundry product and microwave oven production lines, among others.

Midea continued to optimize and extend the applications of the Channel Collaboration System (CCS) 2.0, the Midea Cloud Sales and the Retail Management System (RMS) in its direct supply to retailers in counties and towns, KA/TOP, e-commerce platforms, home decoration stores, etc., so as to support the T+3 business model reform program. The WeChat mini app of "Midea Home Delivery" provides offline stores with an instrument of online channeling, terminal sales and member operation, in order to facilitate the digital transformation of terminal stores. Multiple digital system tools are used to support the retail coordination program and improve user experience in every link. Transparent and uniform rates of installation and repair are made possible by deepening the smart customer service application in a bid to improve customer service experience. Meanwhile, to encourage repeat purchases, a "backpacker" model is promoted in after-sales service through the WeChat mini app of "Midea Home Delivery". The Company introduces house decoration design software, develops the suite design capacity of household scenario, and builds an app for one-stop buying needs of various household appliances to provide consumers with all household appliance solutions and one-stop shopping experience. In the user experience reform program, relying on tools such as CMS, big data, the Midea Engine app and CSS, Midea focuses on home decoration store transformation, shopping guide reform and retail system building, after-sales service innovation, product suite sales, and integration of the entire chain, so as to improve the business model. Based on inventory transparency and synergy of physical goods on the whole channel, Midea opens up the information flow of synergistic warehouse, establishes whole-channel inventory sharing and

digestion rules, and enables the automatic adjustment system of the channel inventory level, so as to implement shared inventory management and increase inventory turnover ratio.

Midea continues with international digitalization. With the “International 632 Project” as the core, full digitalization support is provided for finance, R&D, the supply chain, marketing, after-sales service and operation. The “International 632 Project” was promoted in 17 overseas operating units in 2019 to boost the efficiency of the whole value chain. Closed-loop management and budget control have been achieved in all the financial systems across the world, and financial and accounting standards in different regions have been connected. Empowerment of overseas channels has been accelerated, with the channel management system covering over 1,000 distributors overseas. The global big-data-based analysis platform helps monitor more than 50 indicators in 8 major areas, which breaks the boundaries of space and time to provide operating service support around the clock. Meanwhile, the global order processing mechanism (OPM) was launched for test. Based on visualized production capacity, the mechanism can carry out order scheduling through multi-dimensional computing and distribute orders to manufacturing bases across the world in a smart, efficient and accurate manner. It can also effectively connect overseas marketing and manufacturing in a digitalized and visualized manner.

Midea continues to further promote the business application of AI by fully covering the business scenarios of intelligent manufacturing, intelligent operations and intelligent offices based on the three AI platforms of quality testing, facial recognition and optical character recognition (OCR). While rapidly reproducing and promoting such pilot projects as PCB testing and ink-jet testing, it proactively explores the application of vocal print quality testing and digital fool-proof of accessories. The quality testing platform has optimized the efficiency and accuracy of quality testing through visual and auditory simulations. The facial recognition platform has incubated a number of individualized applications, including multi-person recognition sensor-free door access control, gate machine access control, key post recognition, intelligent conference room and facial recognition payment, empowering Midea’s business innovation in buildings, logistics and marketing. The OCR platform enables document digitization and office automation, in which only a few employees are required to efficiently and accurately process the notes that used to be processed by over 300 office centers nationwide, saving massive resources and manpower.

Midea continues to deepen data application. It sets up the Group’s data decision-making center by

combining internal data and external internet data, and develops the digital operation platform and the operations analysis module at the mobile terminal. It builds the data consistency platform for the entire group. Following the white paper for data operation, a data driven closed-loop system has been put in place, which covers business breakdown, early warning, improvement and resumption. Midea achieves the visualization of whole-range operations data through the digital operation platform to identify operational problems immediately. Meanwhile, it establishes the early warning and urging mechanism to provide a powerful data driven tool for operation and management.

Midea fully promotes the application of cloud computing. Through its platform cloud program, Midea formulates clouds of Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS) to support its strategy of digital transformation. Through the building of container cloud and hybrid cloud, with container cloud providing unified software delivery standards as well as the separated application and running environment, the IaaS platform is able to transfer business applications seamlessly among container services of Nanhai Data Center and public clouds. As a result, multi-cloud services are formed to reduce costs, increase stability and enhance the capacity of processing massive data flow during business peak periods such as “Double 11” and “618”. Upon the integration and refinement of Midea’s IT system technology and business capability, the PaaS platform with a uniform microservice framework and gateway, provides uniform services of 22 technology components and 11 business components for Midea’s internal systems, which has successfully helped reduce costs and improve quality. While extending to more components, the PaaS cloud also starts to provide service externally through a developer program. The SaaS platform targets corporate customers. Based on IaaS and PaaS, the SaaS platform provides complete management of applications through their entire life cycles and full customer service. It lowers the threshold for small- and medium-sized enterprises to gain cloud access. It also provides a one-touch function to active business applications. With purchasing cloud as a trial program, Midea has provided SRM cloud, sourcing cloud, risk control cloud and other SaaS services for over 3,000 corporate customers.

#### **F. In view of consumption stratification, launched multiple new brands and product suites to empower retail sales, enhanced the retail performance**

Since late 2018, Midea has launched a number of new brands, including COLMO targeting high-end

consumers, BUGU targeting online consumers, WAHIN targeting young consumers. Integrating cutting-edge technology and rational aesthetics, COLMO launched multiple new products for high-end customers in 2019. It released the BLANC product suite at Appliance&electronics World Expo (AWE) in March 2019, new AI-powered home appliances for various scenes including the TURING Air Conditioner, the Mantle Lava Series Refrigerator and the Phase Change Water Heater at Internationale Funkausstellung Berlin (IFA) in September 2019, and the TURING Commercial AC in Shanghai in November 2019. Cumulatively, COLMO has launched 23 new products for the high-end market, covering living room, laundry, kitchen and bathroom scenes to create a new smart life of connected home appliances for high-end consumers. COLMO equips its products with advanced technologies. All the five products of the BLANC product suite are certified by China's Ministry of Light Industry as internationally advanced, of which the BLANC Washing Machine has won the first Wu Wen Jun AI Science & Technology Award in the washing machine industry, the top AI award. In 2019, COLMO won a significant number of design and technological innovation awards at home and abroad, including the iF Award, the Red Dot Award, the AWE Product Award, the AWE Innovation Award, the IDG Technical Innovation Gold Award, the IDEA Award, the Good Design Award and the Red Star Award. At the 2019 World Artificial Intelligence Conference (WAIC), COLMO unveiled the White Paper on AI-Powered Home Appliances, initiating a reform of the "AI-Powered Future". In terms of channel expansion, COLMO made active efforts to explore online and offline new retail models in 2019. For online channels, it has established flagship stores on various platforms. For offline channels, it has put in place a national network with focus on the first- and second-tier cities, which comprises nearly 2,000 outlets including exclusive stores and flagship stores. By the end of 2019, these outlets had a total of nearly 100,000 members in approximately 80,000 families. In branding, COLMO keeps working on its target customers. Through sports event sponsorship and commercial events, it aims to build a high-end brand image and convey its brand spirit. In 2020, upholding the brand philosophy of "Technology Serve the Nature of Life and Design Maximize the Value of Rationalism", COLMO will, on the basis of AI-powered home appliances, place more emphasis on design with rational aesthetics and launch whole new product suites.

To meet the needs of modern users in the Internet era, the internet brand BUGU was unveiled at AWE Shanghai in March 2019, with its first batch of products launched in Beijing in April 2019. Upholding the brand philosophy of "Technological Aesthetics, Smart and Fun-Filled Life", BUGU builds up smart eco-

scenes primarily comprising three life scenes and two professional scenes. In order to expand the product portfolio and ecosystem, BUGU carries out strategic cooperation with Honor to jointly build smart life scenes, and gradually introduces more quality resources to improve the eco-chain of scenes. BUGU persists in taking the joint creation with users as its core strategy. Through the joint creation platform—the “BUGU Research Institute”, users can take part in the whole product process from conceptual design to public testing. It continues to win recognition for its product design in the industry. The Intelligent IH Rice Cooker, Aesthetic Electric Kettle and Intelligent Sweeping and Mopping Robot of BUGU all won the iF Award 2020, and the Aesthetic Electric Kettle, which is a bestseller, was granted the DFA Design for Asia Excellence Award. In 2019, BUGU products achieved a remarkable market performance and were chosen for the 2019 Tmall “Emerging Brands” Program. During the 618 Shopping Festival in 2019, BUGU Intelligent Dishwasher ranked among the top ten list of dishwashers on JD.com; on JD.com’s Appliances Higou Day on June 10, BUGU Intelligent Dishwasher won double championships in both sales volume and sales, and BUGU Intelligent Rice Cooker (3L) ranked among the top ten in rice cooker sales; on June 11, BUGU Intelligent Electric Fan won the championship in sales among electric fan products with a price of above RMB300; on June 16, BUGU achieved over RMB1 million in sales on the Taobao shopping system, and BUGU Intelligent Electric Fan ranked among the top three among electric fan products with a price of above RMB199. On its first “Double 11” shopping festival, BUGU saw a single day record sales of over RMB10 million, users increase by 50,000, limited star products sold out in 12 seconds, and sales exceed RMB10 million in the first 24 hours.

Unveiled in 2019, WAHIN dedicates to offering surprises to young people with “Trendy Designs, Practical Functions and Fun Interactions”. It establishes connections through a diversity of marketing activities with the young circles characterized by AGC and pop cultures. The brand stands out with its performances in sales. Since its launch, WAHIN has been focusing on online channels. In 2019, WAHIN expanded cooperation from just one e-commerce platform to all the major e-commerce platforms. Its AC sales exceeded RMB400 million in the year, and ranked 7<sup>th</sup> and 6<sup>th</sup> on JD.com during the “618” and “Double 11” shopping festivals respectively.

### **G. Promoted innovation in robotic product development, accelerated integration and expansion of the robotics business for the China market**

KUKA, a subsidiary of Midea, is the first robotic manufacturer in the world to introduce sensitive lightweight robots into the production plant, as well as the first manufacturer with a product range covering cooperative robots, mobile robots and industrial heavy-duty robots. In the automotive sector, KUKA continues to maintain its advantages and unveiled the world's first industrial robot with digital motion model - the new-generation high-load versatile robot KR QUANTEC-2 in 2019. The robot can effectively reduce costs for customers and offers substantially enhanced performances, precision and speed. At AMTS 2019, KUKA demonstrated its one-stop solutions consisting of electric drive assembly and testing model lines, square shell battery assembly model lines, LBR iiwa cell loading and testing, KUKA Connect big data and virtual image systems. Meanwhile, it's worth mentioning that KUKA took part in a large-scale joint research platform program of Germany—ARENA2036 in 2019 for the first time. It is responsible for developing and testing streamline production techniques of Industry 4.0 to explore streamline car factories for the future. In the general industrial sector, KUKA has newly launched the KR IONTEC Series robots with a load ranging from 30 kg to 70 kg, which can be used in traditional and digital production environments. In addition to the largest working range of its kind (3,100 mm), it takes less floor space and interference contours, as well as boasts the lowest maintenance cost of its kind (average malfunction interval: about 400,000 running hours). Meanwhile, at K-Show 2019, KUKA showcased its KR10 R900-2 robot designed to work with an injection molder and the robot-assisted thermoplastic elastomer (TPE) extrusion solution. In the logistics sector, targeting the industrial status where an increasing number of orders are placed online, the new-generation robot-based order sorting solution ItemPiQ, as a perfect example of the integration of know-hows by KUKA and Swisslog, combines new robotic technology and intelligent visual system and features efficient sorting performances and machine-learning functions. With regard to human-robot collaboration, KUKA's Cobot LBR iisy is a sensitive, precise and easy-to-use robot with more intuitive automation design, which has developed a new field for human-robot collaboration. In the electronics sector, KUKA launched a chip carrying solution in a clean-room environment in semiconductor manufacturing, which is the world's first one-stop solution for automatic carrying of semiconductor boxes. In the medical sector, KUKA's LBR Med Series robots have yielded remarkable results. Carrying LBR Med, medical devices Cold Ablation and Robot-guided Laser Ostetome developed by the Swiss company Advanced Osteotomy Tools AG were put into clinical practice for the first time, which is the first robot-based osteotomy in the world. Additionally, equipped with the integrated sensitive seven-axis robot of KUKA's LBR Med Series, Sculptura™, a mobile robot assistance system developed by the

American company Sensus Healthcare, is the only medical device with which a doctor can apply targeted radiation to the tumor during a surgery. Additionally, KUKA makes active steps to explore robot application in new areas. The Brazilian company Bionicook uses KUKA's KR3 AGILUS robot to cook, which can finish an order in three minutes and 100 orders in an hour at the most. KUKA won a significant number of awards and honors in 2019, including the renowned iF Award 2019 for KUKA LBR iisy and KUKA KMP 1500, the German Design Award 2019 for KUKA smartPAD, KUKA AGILUS and LBR iisy, the 2019 German Innovation Award and the Robotics Award (at HANNOVER MESSE 2019) for the car charging assistant robot of which KUKA took part in the development, and the "Excellent Partner Award" granted by Faw-Volkswagen as the customer's recognition of KUKA for its persistence in providing efficient and stable products and automation solutions on a long-term basis.

According to IFR statistics, 2019 saw a harsher market for the global industrial robotics industry as compared with 2018. However, KUKA performed rather stable and continued to make breakthroughs in new areas. In 2019, KUKA received an order of tens of millions of euros from Faw-Volkswagen involving assembly lines used to manufacture MEB platform batteries, which is KUKA's first whole battery line order in the Chinese market. In addition, KUKA obtained orders of automatic production equipment of welding robots used in electric vehicle production lines respectively from SAIC Volkswagen and Donghee Group (South Korea), with the respective amounts reaching tens of millions of euros and millions of euros. In the fourth quarter of 2019, KUKA won a contract worth as much as tens of millions of euros to supply a batter assembly line, which will be used to produce battery systems for high-end electric vehicles. KUKA also received an order worth millions of euros from Guangdong Shaoneng Group for 300 units of KR QUANTEC Series robots and an automated handling solution for mechanical equipment. Furthermore, it secured an order of 22 units of KMP 1,500 mobile platform equipment used to process body in white from an automobile manufacturer. In the healthcare sector, KUKA received an order from the North American customer Restoration Robotics to supply LBR Med lightweight robots for their intelligent repair and hair transplant system. In 2019, KUKA's Swisslog business continued to expand, with an order of approximately 43 million euros from the Malaysian customer IKEA Supply Malaysia Sdn Bhd for an automated logistics solution, and an order from the Finland customer Broman Group for an automated logistics system and the related software.

The integration of KUKA's robotics business in China has been accelerated. On one hand, under KUKA's new organizational structure, the KUKA China Division was established in 2019, covering robotics, flexible systems, general industrial automation, intelligent logistics automation and intelligent medical automation. On the other hand, the collaborative advantages of Midea and KUKA have started to show in various aspects, including development of business opportunities, technology sharing, customer service, purchase collaboration and management improvement, laying a foundation for the fast growth of the industrial automation business on all fronts. In 2019, the KUKA China Division formulated the business development planning for the next five years and established a 432+X product system for the domestic market, i.e. 4 product families, 3 digital platforms, 2 production lines for fast iteration and the whole new business layout. With regard to business expansion, KUKA China maintains its leadership in the auto sector and takes active steps to explore new areas including general industrial manufacturing, electronics, medical care and logistics, services, etc. Concerning internal management, it concentrates on R&D, supply chain management, high-performance operations and digitalization, among others, as well as commits more resources to build the core competitiveness of Midea's robotics and industrial automation business in a faster manner. In 2019, KUKA China further improved its organizational structure by connecting the R&D, production and marketing departments. It has put in place a "customer-oriented" system to promote high-performance operations in the whole value chain. Its R&D department focused on new product development, product upgrade, localization, software development and digitalization. And an OKR management tool has been introduced to build a matrix structure based on professionalism. Meanwhile, KUKA China completed the construction of the Product R&D and Testing Center covering an area of nearly 5,000 m<sup>2</sup>, which has been put into operation to support R&D and testing.

As an industrial robotic brand trusted by many auto makers around the world, KUKA China continued to see the highest unit sales in the auto sector of China in 2019. In addition to continued cooperation with a significant number of foreign-funded, Sino-foreign jointly funded and domestic traditional auto makers, it secured orders from multiple renowned makers of new energy vehicles at home and abroad, further enlarging the market share. In the general industrial sector, automation orders kept increasing from the food and beverage industry, the household chemicals and pharmaceuticals industry and other industries, and there were new customers from the glass industry. With respect to medical robotics, 2019 saw a year-on-year growth of 200% and dozens of new customers in need of surgical robotics mostly.

Concerning logistics automation, KUKA won the logistics renovation projects of several notable companies, the fifth AutoStore system launched to e-commerce customers proved a great help in their business development, and KUKA is currently the only robotics maker in the area of logistics automation who can integrate the six-axis mechanical arm with a mobile robot, with noticeable technological superiority. In 2019, KUKA enhanced development of localized products for the China market. It launched the AC-fin tube-inserting machine, and its homegrown fully automated bathroom appliance assembly line, which is the first of its kind in China, has been put into operation. KUKA's application development team launched a packaged robot polishing application and a packaged 3D sighted robot shoe-sole gumming application. And its Swisslog team has secured the first batch of orders of nearly RMB20 million for the piler that the team has developed for the local market. Servotronix released a new rotary servo product—BDHD2, and a new linear servo product—CDHD2 STD. Mass production of both has commenced. In addition, KUKA has effectively helped enhance Midea Group's intelligent manufacturing level. As of now, the robot density of Midea has exceeded 220 units per 10,000 persons. In the coming three years, this number is expected to surpass 300 units per 10,000 persons.

#### **H. Created a new smart lifestyle with the MSmartLife App as the gateway**

Capitalizing on the Group's advantage of various household appliance categories, Midea IoT is able to cover various smart scenes. 68 smart scenes have been launched on Midea MSmartLife App, including whole-house scenes such as "Secure Home", "Healthy Home", "Convenient Home" and "Personalized Home". "Healthy Home" provides complete smart healthy life solutions from three major aspects, namely, healthy food, healthy washing and healthy air. Supported by the AI technology, MSmartLife App 6.0 has introduced 18 new functions including AI-based voice control and recipe pictures and videos, built the first smart-scene AI-based interaction platform in the industry, and realized multi-screen smart voice interaction. Up to the end of 2019, Midea Group has sold a total of over 70,000,000 smart household appliances across the globe. Tens of millions of household users receive smart services through the MSmartLife App, with interaction on smart equipment and cloud exceeding one trillion times. Meanwhile, Midea Smart Cloud Housekeeper App, which is based on the big data technology, is making home appliances smarter through AI algorithms. It has provided more than ten million times of spontaneous smart services for users.

Midea IoT keeps building its cloud capability. Upon system architecture refinement, hybrid cloud deployment, multi-address disaster preparedness, etc., its cloud platforms have reached an industry-wide advanced level in availability and can be connected to more than 100 million pieces of devices. Meanwhile, the Company jointly develops chips for household appliances, and launches high-performance low-cost smart connection modules together with solutions. It joined hands with Ziroom, a notable long-term rental apartment operator, in user operation and commercial promotion. Also, it cooperates with Alibaba, JD, Huawei, OPPO, VIVO, Baidu, Tencent, Google, Amazon, Apple, Skyworth, Bull, etc. to offer whole-house smart solutions supported by a brand ecosystem.

With respect to technological innovation in smart home, in order to solve pain points such as the difficulties in network distribution and a long connecting time of smart appliances, Midea IoT has independently developed a series of connection modules including Wi-Fi, Bluetooth and NB-IoT. As such, it is the first to shorten the time used from network distribution to a successful connection to 4.62 seconds. On top of that, it has materialized more stable connection and more efficient development through M-Smart agreement refinement, code refactoring, fixing compatibility bugs, etc. It also takes the lead in launching home appliances that can be directly connected to the 5G network. Protecting user privacy and data security is a top priority in the application of smart technologies. Midea IoT takes the lead to pass the TRUSTe certification with respect to privacy data compliance. It also complies with the EU General Data Protection Regulation (“GDPR”) and other data protection regulations. Meanwhile, with regard to overall information security management, Midea IoT has passed the ISO27001 Certification for Information Security Management Systems (ISMS). And the MSmartLife App App has been certified by the globally recognized ePrivacyApp due to the multiple layers of protection of user privacy data. Therefore, Midea has reached an internationally advanced level in user data protection.

### **I. Deepened the long-term incentive and protected the interests of shareholders**

In 2019, Midea continued to encourage the core management to take responsibility for the Company’s long-term development and growth by further enhancing its long-term incentive schemes. In this year, Midea launched the Sixth Stock Option Incentive Scheme, the Third Restricted Share Incentive Scheme, the Fifth Global Partner Stock Ownership Scheme and the Second Business Partner Stock Ownership Scheme, which have helped, in a more effective manner, to align the long-term interests of senior

management and core business backbones with that of all shareholders.

Midea Group protects its shareholders' interests by ensuring a consistent dividend policy. It shares its growth with shareholders by putting forward cash dividend plans with a total amount of as much as RMB46.8 billion (2019 profit distribution plan included) since Group listing in 2013. In addition to the consistent dividend payouts, the Company has carried out a string of share repurchase plans. Subsequent to a share repurchase of RMB4 billion in 2018, to further stabilize the market capitalization and protect the shareholders' interests, the Company launched another share repurchase plan in 2019. And the repurchased shares would be used for equity incentive schemes and/or employee stock ownership schemes. As of 31 December 2019, Midea has used approximately RMB3.1 billion for the share repurchase.

Total	--	9,916,145	5.42%

## 2.3 Expense

Unit: RMB'000

	2019	2018	YoY Change (%)	Reason for any significant change
Selling and distribution expenses	34,611,231	31,085,879	11.34%	
General and administrative expenses	9,531,361	9,571,639	-0.42%	
Finance costs	-2,231,636	-1,823,040	-22.41%	
Research and development expenses	9,638,137	8,377,201	15.05%	

## 2.4 R&D investment

√Applicable □N/A

The Group is focused on building a competitive, multi-layered global R&D system centering on user experience and product functions, which represents world-class R&D input and strength. With close to RMB40 billion invested in R&D over the past five years (over RMB10 billion in 2019), the Group has set up a total of 28 research centers in 11 countries including China to gradually build up a “4+2” global R&D network and gain advantage of scale in this respect. Domestically, with the core being Midea Global Innovation Center at the company headquarters in Shunde District, Foshan City, Midea has also started to build the Shanghai Global Innovation Center. Overseas, with R&D Center in Louisville, USA, R&D Center in Stuttgart, Germany, R&D Center in Osaka, Japan and Design Center in Milan, Italy as the cores, Midea makes use of the regional advantages, integrates global R&D resources and refines its global R&D network. It has over 10,000 R&D employees and over 500 senior foreign experts. While establishing its own research centers around the world, the Group has also cooperated with domestic and foreign scientific research institutions, such as MIT, UC Berkeley, UIUC, Stanford, Purdue University, University of Maryland, The University of Sheffield, Polytechnic University of Milan, Tsinghua University, Shanghai Jiao Tong University, Zhejiang University, the Chinese Academy of Sciences, Harbin Institute of

Technology, Xi'an Jiaotong University, Huazhong University of Science and Technology and South China University of Technology, in order to establish joint labs for deepening technological innovation. The Group also carries out strategic cooperation with tech giants such as BASF and Honeywell to build a global innovation ecosystem. The Group's long-term focus on building technology, marketing, product, design and open innovation systems, building a cutting-edge research system and building reserves in technology for mid/long term, has provided a solid foundation for the Group to maintain technical superiority across the globe.

#### Information about R&D investment

	2019	2018	YoY Change (%)
Number of R&D personnel	13,727	12,321	11.41%
R&D personnel as a percentage of total employees	10.18%	10.74%	-0.56%
R&D expense (RMB'000)	9,638,137	8,377,201	15.05%
R&D expense as a percentage of operating revenue	3.46%	3.23%	0.23%

Note: The R&D personnel in the table above exclude those of KUKA.

## 2.5 Cash flow

Unit: RMB'000

Item	2019	2018	YoY Change (%)
Subtotal of cash inflows from operating activities	252,123,178	226,341,706	11.39%
Subtotal of cash outflows due to operating activities	213,532,774	198,480,626	7.58%
Net cash flows from operating activities	38,590,404	27,861,080	38.51%
Subtotal of cash inflows from investing activities	89,004,610	67,998,046	30.89%
Subtotal of cash outflows due to investing activities	112,112,311	86,640,334	29.40%
Net cash flows from investing activities	-23,107,701	-18,642,288	-23.95%
Subtotal of cash inflows from financing activities	20,015,594	5,237,681	282.15%
Subtotal of cash outflows due to financing activities	23,289,195	18,624,845	25.04%
Net cash flows from financing activities	-3,273,601	-13,387,164	75.55%
Net increase in cash and cash equivalents	12,489,478	-3,879,371	421.95%

Explanation of why the data above varied significantly

Applicable N/A

a. Primarily driven by an increase in cash received from sales of goods or rendering of services, net cash flows from operating activities increased 38.51% from last year.

b. Primarily driven by an increase in cash received from borrowings, net cash flows from financing activities increased 75.55% from last year.

c. Primarily driven by increases in net cash flows from operating and financing activities, net increase in cash and cash equivalents increased 421.95% from last year.

Explanation of main reasons leading to the material difference between net cash flows from operating activities during the Reporting Period and net profit for the year

Disclosure date of the announcement about the general meeting's consent for the derivative investment (if any)	14/05/2019
Risk analysis of positions held in derivatives during the Reporting Period and explanation of control measures (Including but not limited to market risk, liquidity risk, credit risk, operational risk, legal risk, etc.)	<p>For the sake of eliminating the cost risk of the Company's bulk purchases of raw materials as a result of significant fluctuations in raw material prices, the Company not only carried out futures business for some of the materials, but also made use of bank financial instruments and promoted forex funds business, with the purpose of avoiding the risks of exchange and interest rate fluctuation, realizing the preservation and appreciation of forex assets, reducing forex liabilities, as well as achieving locked-in costs. The Company has performed sufficient evaluation and control against derivatives investment and position risks, details of which are described as follows:</p> <p>1. Legal risk: The Company's futures business and forex funds businesses shall be conducted in compliance with laws and regulations, with clearly covenanted responsibility and obligation relationship between the Company and the agencies.</p> <p>Control measures: The Company has designated relevant responsible departments to enhance learning of laws and regulations and market rules, conducted strict examination and verification of contracts, defined responsibility and obligation well, and strengthened compliance check, so as to ensure that the Company's derivatives investment and position operations meet the requirements of the laws and regulations and internal management system of the Company.</p> <p>2. Operational risk: Imperfect internal process, staff, systems and external issues may cause the Company to suffer from loss during the course of its futures business and forex funds business.</p> <p>Control measures: The Company has not only developed relevant management systems that clearly defined the assignment of responsibility and approval process for the futures business and forex funds business, but also established a comparatively well-developed monitoring mechanism, aiming to effectively reduce operational risk by strengthening risk control over the business, decision-making and trading processes.</p> <p>3. Market risk: Uncertainties caused by changes in the prices of bulk commodity and exchange rate fluctuations in foreign exchange market could lead to greater market risk in the futures business and forex funds business. Meanwhile, inability to timely raise sufficient funds to</p>

	<p>establish and maintain hedging positions in futures operations, or the forex funds required for performance in forex funds operations being unable to be credited into account could also result in loss and default risks.</p> <p>Control measures: The futures business and forex funds business of the Company shall always be conducted by adhering to prudent operation principles. For futures business, the futures transaction volume and application have been determined strictly according to the requirements of production &amp; operations, and the stop-loss mechanism has been implemented. Besides, to determine the prepared margin amount which may be required to be supplemented, the futures risk measuring system has been established to measure and calculate the margin amount occupied, floating gains and losses, margin amount available and margin amount required for intended positions. As for forex funds business, a hierarchical management mechanism has been implemented, whereby the operating unit which has submitted application for funds business should conduct risk analysis on the conditions and environment affecting operating profit and loss, evaluate the possible greatest revenue and loss, and report the greatest acceptable margin ratio or total margin amount, so that the Company can update operating status of the funds business on a timely basis to ensure proper funds arrangement before the expiry dates.</p>
<p>Changes in market prices or fair value of derivative products during the Reporting Period, specific methods used and relevant assumption and parameter settings shall be disclosed for analysis of fair value of derivatives</p>	<ol style="list-style-type: none"> <li>1. Gain from futures contracts during the Reporting Period was RMB8,683,000.</li> <li>2. Loss from FX derivatives during the Reporting Period was RMB-419,519,000.</li> <li>3. Public quotations in futures market or forward forex quotations announced by the Bank of China are used in the analysis of derivatives fair value.</li> </ol>
<p>Explanation of significant changes in accounting policies and specific financial accounting principles in respect of the Company's derivatives for the Reporting Period as compared to the previous Reporting Period</p>	<p>No change</p>
<p>Special opinions expressed by independent directors concerning the Company's derivatives</p>	<p>The Company's independent directors are of the view that the futures hedging business is an effective instrument for the Company to eliminate price volatility and implement risk prevention measures through enhanced internal control, thereby improving the operation and management of the Company; the Company's foreign exchange risk management capability can be further improved through the forex funds business, so as to maintain and increase the value of foreign</p>

investment and risk control	exchange assets and the abovementioned investment in derivatives can help the Company to fully bring out its competitive advantages. Therefore, it is practicable for the Company to carry out derivatives investment business, and the risks are controllable.

## 9. Outlook for the Future Development of the Company

### 9.1 Development strategies of the Company

With “Bring Great Innovations to Life” as its corporate vision, “Integrate with the World, to Inspire your Future” as its mission, and “Embrace What’s Next - Aspiration、Dedication、Collaboration、Innovation” as its values, Midea adheres to its strategic objectives and focuses on the strategy of “Comprehensive Digitalization and Intellectualization”. It integrates global resources, deepens its transformation, as well as keeps developing leading products based on the customer’s needs by way of technological innovation and quality improvement. It will promote efficiency driven growth by improving management, manufacturing and asset efficiency to create more cost efficiency. It will also promote global operations and try to lay a solid foundation in this regard through promoting its own branded products and strengthening compliance management. Additionally, it will strengthen its robotics and industrial automation operations to build new business platform and growth points. Meanwhile, it will deepen its digital business to improve operation and management through digitalization of the entire value chain, so as to construct its own IIoT ecosystem.

### 9.2 Key operation points in 2020

a. Midea will firmly increase R&D investment in basic technologies, digitalization and intellectualization in particular. Driven by technology as the fundamental approach, it will beef up product innovation and efficiency improvement, and put in place a customer-oriented value chain system. It will deepen the R&D model of “Three Generations” and implement the strategy of “being the Number One or the Only One” to build product leadership. In the meantime, top talent will be brought in to help refine the R&D organizational structure and build up an R&D-centric management model.

b. Midea will keep a high-quality development direction and stick to internal, sustained and effective organic growth. It will promote the T+3 business model reform and high-performance operations in the whole value chain in every link from product planning to after-sales service, so as to increase profitability. In order to win in competition, it is important to develop high-end products to refine the product mix. It will also maintain effective investments, control non-operating expenses, increase labor productivity, improve human resource allocation efficiency, promote lean management and provide fresh impetus for continual growth through relentless innovation.

c. For the domestic market, Midea will enhance the basic systems to set up a unified business language and rules, strengthen “One Midea, One System, One Standard”, make use of the advantages of synergies, reinforce the result-oriented process control and improve operating efficiency. It will also promote transformation in domestic marketing to rebuild a user-oriented retail system, set up a standardized store management system and improve the ability of offline stores to attract customers. It will enhance product synergies, focus on the end market, lower the inventory level, streamline the channel hierarchy, and promote better channel efficiency. By promoting interactive marketing ways based on scenes and experience, as well as enhancing the operation of star products, it strives to build better recognition of the Midea brand among users. Making use of multi-category synergistic advantages, it will continuously deepen the channel layout, further promote e-commerce channel optimization and integration, work on social e-commerce, and proactively expand and build new retail channels. It will promote the transformation of sales agents towards operators, and in the meantime materialize transparent and visualized information through the whole trading process. It will also improve the after-sales service experience, optimize the delivery-installation integration service, and improve the member service system. Meanwhile, it will continue to increase the efficiency of the supply chain system, enhance the advantage

of Midea's all-channels coverage, rebuild business processes and push forward the construction of a shared inventory system.

d. For the overseas market, Midea will adhere to the strategies of being user-oriented and product leadership. Leveraging its advantageous global R&D and user research networks, as well as benchmarking to other top brands across the globe, Midea will continue to launch differentiated and innovative products to solve users' painpoints, enlarge the mainstream market share and give play to its advantage of various product categories. It will continue to improve the ability to operate multiple brands in the overseas market, refine the differentiated product portfolios of the brands, and carry out global and regional branding activities through digital marketing to boost the brands' presence and reputation. Also, it will promote retail transformation, further expand channels, improve the brand image and consumer experience at the retail end, empower the retail end with digital tools, enable real-time tracking of retail data, and improve the retail performance. A global system comprising the professional global headquarters, the coordinative regional hubs and the aggressive enterprises in various countries will be put in place, with clear responsibilities and positioning for each organization, as well as effective teamwork among them. Meanwhile, Midea will improve its overseas infrastructure, and build the four major global delivery systems of manufacturing, services, components and logistics, so as to enable adequate contract fulfillment and service on a global basis. Both approaches of "China-Based Supply for the World" and "Local Supply" will help boost the competitiveness of Midea's supply chain and its ability to deal with uncertainties in the market. Midea will also firmly promote transformation of TLSC's business, focus on the Japan market, as well as carry on with the work in user research, product development, channel reform, organizational management, etc.

e. Midea will improve its multi-brand system according to different needs from different consumer groups. COLMO, the brand targeting high-end consumers, will launch whole new product suites and expand its channel network in the first- and second-tier cities. BUGU, the brand targeting online consumers, will integrate internal and external resources to provide individualized experience for users, and establish all-scene ecosystem cooperation with external manufacturers to create innovative marketing and business models. Additionally, Midea will give play to its multi-category synergistic advantages and improve its product suites and families, including the real-estate before-market product suites, to provide customized

and integrated home solutions with full categories of the household appliances.

f. Midea will strengthen the building of Midea as a digitalized enterprise by improving the digital operational methods and systems to support the integration of every link of Midea's value chain and optimize efficiency, value creation and the fulfillment of operating objectives, as well as by further building and optimizing digitalized industrial Internet factories. And it will continue to promote and optimize the International 632 program to strengthen digital support for the "Global Operations" strategy.

g. Following the integration of KUKA's robotics business in China, Midea will beef up localized operations in China, increase investment in the development and application of robotics, foster R&D innovation of core components and software systems, as well as promote the "432+X" product system. In terms of marketing, Midea will maintain leadership in the auto sector and take active steps to explore new areas including general industrial manufacturing, electronics, medical care and logistics, services, etc. Concerning internal management, it will concentrate on R&D, supply chain management, high-performance operations and digitalization, among others, so as to build the core competitiveness of the robotics and industrial automation business in a faster manner.

h. Midea will continue to increase its investment in the R&D of IoT basic technology to improve user experience and security. In the meantime, guided by the strategy of "Comprehensive Intellectualization", it will build up a cooperation ecosystem to keep improving the performance of its smart home IoT modules through cooperating with external parties. Guided by users' thinking model, Midea will connect to more users through its MSmartLife App, carry out lean operations and provide safe, convenient and smart life experience for users. Meanwhile, it will promote smart products by providing smart scene experience, upgrading the store network, providing training in relation to smart products, increasing the percentage of smart home appliances, etc.

### **9.3 Key capital expenditure plan in future**

To adapt to changes in the industry environment, the Company will focus its 2020 investments on technological innovation, product quality improvement, robotics and industrial automation systems, digitalization, e-commerce channel expansion and new retail channels construction, new brand marketing,

global operations capability improvement and the smart home strategy. Meanwhile, the Company will strictly control investment in infrastructure and capacity expansion, as well as non-operating expenditures. The capital expenditures will primarily come from the Company's own funds.

#### **9.4 Main risks in future development**

##### **a. Risk associated with the COVID-19 outbreak**

Domestic consumption and production are expected to be affected to some degree in the short run by the COVID-19 outbreak in early 2020. Therefore, the offline retail stores of the Company are expected to see lower footfall in the short run. Meanwhile, the COVID-19 has been spreading overseas since late February 2020. Should the epidemic last for a long time, the Company could face a challenge in 2020.

##### **b. Risk of macro economy fluctuation**

The market demand for the Company's consumer appliances and HVAC equipment, among other products, can be easily affected by the economic situation and macro control. If the global economy encounters a heavy hit, or the domestic economy or consumer demand slows down in growth, the growth of the household appliance industry, to which the Company belongs, will slow down accordingly, and as a result, this may affect the product sales of Midea Group.

##### **c. Risks in the fluctuation of production factors**

The raw materials required by Midea Group to manufacture its consumer appliances and core components primarily include different grades of copper, steel, aluminum, and plastics. At present, the household appliance manufacturing sector belongs to a labor intensive industry. If the price of raw materials fluctuate largely, or there is a large fluctuation in the cost of production factors (labor, water, electricity, and land) caused by a change to the macroeconomic environment and policy change, or the cost reduction resulted from lean production and improved efficiency, as well as the sale prices of end products cannot offset the total effects of cost fluctuations, the Company's business will be influenced to some degree.

d. Risk in global asset allocation and overseas market expansion

Internationalization and global operations is a long-term strategic goal of the Company. The Company has built joint-venture manufacturing bases in many countries around the world. Progress has been made day by day regarding the Company's overseas operations and new business expansion. However, its efforts in global resource integration may not be able to produce expected synergies; and in overseas market expansion, there are still unpredictable risks such as local political and economic situations, significant changes in law and regulation systems, and sharp increases in production costs.

e. Risk in product export and foreign exchange losses caused by exchange rate fluctuation

As Midea carries on with its overseas expansion plan, its export revenue has accounted for more than 40% of the total revenues. Any sharp exchange rate fluctuation might not only bring negative effects on the export of the Company, but could also lead to exchange losses and increase its finance costs.

f. Market risks brought by trade frictions and tariff barriers

Due to the rise of anti-globalization and trade protectionism, China will see more uncertainties in export in 2020. The trade barriers and frictions of some major markets will affect the export business in the short run, as well as marketing planning and investment in the medium and long run. Political and compliance risks are rising in international trade. These can mainly be seen on compulsory safety certificates, international standards and requirements, and product quality and management systems certification, energy-saving requirements, the call for increasingly strict environmental protection requirements, as well as with rigorous requirements for recycling household appliances waste. Trade frictions caused by anti-dumping measures implemented by some countries and regions aggravate the burden in costs and expenses for household appliance enterprises, and have brought about new challenges to market planning and business expansion for enterprises.

In face of the complicated and changeable environment and risks at home and abroad, Midea will strictly follow the Company Law, the Securities Law, the CSRC regulations and other applicable rules, keep improving its governance structure for better compliance, and reinforce its internal control system so as to effectively prevent and control various risks and ensure its sustained, steady and healthy development.

## Section V Significant Events

### 1. Profit Distribution and Converting Capital Surplus into Share Capital for Common Shareholders

Formulation, execution or adjustments of profit distribution policy, especially cash dividend policy, for common shareholders in the Reporting Period

Applicable N/A

Plans (or preliminary plans) for profit distribution and converting capital surplus into share capital for common shareholders for the past three years (including the Reporting Period)

a. For 2017, based on the total share capital of 6,584,022,574 shares, the Company distributed a cash dividend of RMB12 (tax inclusive) per 10 shares to all the shareholders. The book closure day was 3 May 2018 and the ex-dividend day 4 May 2018.

b. For 2018, based on the 6,585,838,349 shares at the disclosure date of the 2018 Annual report (the total share capital minus the then repurchased shares in the repo securities account), it was proposed that the Company should distribute a cash dividend of RMB13 (tax inclusive) per 10 shares to all the shareholders and should not convert capital surplus into share capital. When the profit distribution plan was implemented, if any change occurred to the total shares eligible for profit distribution, the profit distribution plan should be based on the total shares eligible for profit distribution at the book closure date of the profit distribution, and the dividend per share should be adjusted under an unchanged total distribution amount.

When the profit distribution plan was implemented, based on 6,565,827,689 shares (the then repurchased 40,014,998 shares in the special securities account for repurchase subtracted from the total share capital of 6,605,842,687 shares), under an unchanged total distribution amount, the Company distributed a cash dividend of RMB13.039620 (tax inclusive) per 10 shares to all the shareholders. The book closure day was 29 May 2019 and the ex-dividend day 30 May 2019.

c. For 2019, based on the 6,957,181,058 shares at the disclosure date of this report (the total share

capital of 6,999,467,315 shares minus the repurchased 42,286,257 shares in the repo securities account at that date), it is proposed that the Company should distribute a cash dividend of RMB16 (tax inclusive) per 10 shares to all the shareholders and should not convert capital surplus into share capital. When the profit distribution plan is implemented, if any change occurs to the total shares eligible for profit distribution, the profit distribution plan shall be based on the total shares eligible for profit distribution at the book closure date of the profit distribution, and the dividend per share shall be adjusted under an unchanged total distribution amount.

#### Cash dividend to common shareholders in the past three years (including the Reporting Period)

Unit: RMB

Year	Cash dividends (tax included)	Net profit attributable to common shareholders of the Company in the consolidated statement in the year	Ratio of cash dividends to net profit attributable to common shareholders in the consolidated statement in the year	Cash dividends in other forms (such as share repurchase)	Ratio of cash dividends in other forms to net profit attributable to common shareholders in the consolidated statement in the year	Total cash dividends (inclusive of those in other forms)	Ratio of total cash dividends (inclusive of those in other forms) to net profit attributable to common shareholders in the consolidated statement in the year
2019	11,131,489,692.80	24,211,222,000.00	45.98%	-	-	11,131,489,692.80	45.98%
2018	8,561,589,853.70	20,230,779,000.00	42.32%	4,000,000,000	19.77%	12,561,589,853.70	62.09%
2017	7,900,827,088.80	17,283,689,000.00	45.71%	-	-	7,900,827,088.80	45.71%

The Company made a profit in the Reporting Period and the profit distributable to common shareholders of the Company (without subsidiaries) was positive, but it did not put forward a preliminary plan for cash

dividend distribution to its common shareholders

Applicable N/A

## 2. Preliminary Plan for Profit Distribution and Converting Capital Surplus into Share Capital for the Reporting Period

Applicable N/A

Bonus shares for every 10 shares (share)	0
Dividend for every 10 shares (RMB) (tax included)	16
Additional shares converted from capital surplus for every 10 shares (share)	0
Total shares as the basis for the preliminary plan for profit distribution (share)	6,957,181,058
Cash dividends (RMB) (tax inclusive)	11,131,489,692.80
Cash dividends in other forms (such as share repurchase) (RMB)	0
Total cash dividends (inclusive of those in other forms) (RMB) (tax inclusive)	11,131,489,692.80
Distributable profits (RMB)	23,249,372,000.00
Percentage of total cash dividends (inclusive of those in other forms) in the total distributed profit (%)	100%

### Details about the preliminary plan for profit distribution and converting capital surplus into share capital

As audited by PricewaterhouseCoopers China (LLP), the Company realized a net profit of RMB13,685,619,000 for 2019. Pursuant to the relevant provisions under the Articles of Association, it provided 10% as statutory surplus reserve, namely RMB1,368,562,000. Plus undistributed profits at the beginning of the year of RMB19,486,212,000 and minus the profit distributed in the year of RMB8,553,897,000, the actual distributable profit would be RMB23,249,372,000.

For 2019, based on the 6,957,181,058 shares at the disclosure date of this report (the total share capital of 6,999,467,315 shares minus the repurchased 42,286,257 shares in the repo securities account at that date), it is proposed that the Company should distribute a cash dividend of RMB16 (tax inclusive) per 10 shares to all the shareholders and should not convert capital surplus into share capital. When the profit distribution plan is implemented, if any change occurs to the total shares eligible for profit distribution, the profit distribution plan shall be based on the total shares eligible for profit distribution at the book closure date of the profit distribution, and the dividend per share shall be adjusted under an unchanged total distribution amount.

The said plan shall be submitted to the Company's 2019 annual general meeting of shareholders for further consideration.

### 3. Performance of Undertakings

#### 3.1 Undertakings of the Company's actual controller, shareholders, related parties and acquirer, as well as the Company and other commitment makers fulfilled in the Reporting Period or ongoing at the period-end

### **A. Overview of the First Stock Option Incentive Scheme**

a. The Company convened the 10th Meeting of the 3rd Board of Directors on 18 April 2019, at which the Proposal for the Retirement of Unexercised Stock Options upon Expiry was reviewed and approved. As the First Stock Option Incentive Scheme expired on 17 February 2019, the Company agreed to retire the 56,250 and 90,000 stock options that had been previously granted to Chen Lingzhi and Yang Hui respectively but was unexercised upon expiry.

During the Reporting Period, 2,666,976 shares were exercised under the First Stock Option Incentive Scheme.

## **B. Overview of the Second Stock Option Incentive Scheme**

a. The Company disclosed the Announcement on the 2018 Annual Profit Distribution on 23 May 2019. Based on the total 6,565,827,689 shares eligible for profit distribution (the total share capital of 6,605,842,687 shares minus the repurchased 40,014,998 shares), and in accordance with the principle of an unchanged total profit amount to be distributed, the Company would distribute RMB13.039620 in cash per 10 shares to shareholders. The record date was 29 May 2019 and the ex-date was 30 May 2019.

b. The Company convened the 12th Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Exercise Price for the Second Stock Option Incentive Scheme was reviewed and approved. As the 2018 Annual Profit Distribution had been carried out, the exercise price for the Second Stock Option Incentive Scheme was revised from RMB17.36 to RMB16.06 per share.

During the Reporting Period, 17,546,786 shares were exercised under the Second Stock Option Incentive Scheme.

## **C. Overview of the Third Stock Option Incentive Scheme**

a. The Company convened the 12th Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Exercise Price for the Third Stock Option Incentive Scheme was reviewed and approved. As the 2018 Annual Profit Distribution had been carried out, the exercise price for the Third Stock Option Incentive Scheme was revised from RMB19.15 to RMB17.85 per share.

b. The Company convened the 13th Meeting of the 3rd Board of Directors on 1 July 2019, at which the Proposal for the Adjustments to the Incentive Receivers and Their Exercisable Stock Options of the Third Stock Option Incentive Scheme was reviewed and approved. As such, it was agreed to adjust the incentive receivers and their exercisable stock options for the Third Stock Option Incentive Scheme due to the departure, positional changes, low performance appraisals or other factors of some incentive

receivers. Upon the adjustments, the number of incentive receivers decreased from 848 to 735, and the number of locked-up stock options granted to them was also reduced from 38,070,000 to 32,905,000.

The Proposal for Matters Related to the Stock Option Exercise for the Third Exercise Period of the Third Stock Option Incentive Scheme was also considered and approved. Because the exercise conditions have grown mature for the third exercise period, a total of 735 incentive receivers who have been verified for the Third Stock Option Incentive Scheme have been allowed to exercise 32,905,000 stock options in the third exercise period (ended 27 June 2021).

The Proposal for the Retirement of Unexercised Stock Options upon Expiry was also reviewed and approved. As the first exercise period of the Third Stock Option Incentive Scheme expired, the Company agreed to retire the 59,999 and 65,000 stock options that had been previously granted to Yang Hui and Yuan Dong respectively but was unexercised upon expiry.

During the Reporting Period, 33,192,625 shares were exercised under the Third Stock Option Incentive Scheme.

#### **D. Overview of the Fourth Stock Option Incentive Scheme**

a. The Company convened the 12rd Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Exercise Price, Incentive Receivers and Their Exercisable Stock Options for the Fourth Stock Option Incentive Scheme was reviewed and approved. As the 2018 Annual Profit Distribution had been carried out, the exercise price for the Fourth Stock Option Incentive Scheme was revised from RMB31.52 to RMB30.22 per share. Meanwhile, it was agreed to adjust the incentive receivers and their exercisable stock options for the Fourth Stock Option Incentive Scheme due to the departure, positional changes, low individual or business division performance appraisals or other factors of some incentive receivers. Upon the adjustments, the number of incentive receivers decreased from 1,354 to 1,196, and the number of locked-up stock options granted to them was also reduced from 60,676,000 to 51,122,200.

b. The Proposal for Matters Related to the Stock Option Exercise for the Second Exercise Period of the Fourth Stock Option Incentive Scheme was also considered and approved. Because the exercise

conditions have grown mature for the second exercise period, a total of 1,152 incentive receivers who have been verified for the Fourth Stock Option Incentive Scheme have been allowed to exercise 24,382,200 stock options in the first exercise period (ended 11 May 2020).

During the Reporting Period, 29,308,811 shares were exercised under the Fourth Stock Option Incentive Scheme.

### **E. Overview of the Fifth Stock Option Incentive Scheme**

a. In light of the authorization given at the 2017 Annual General Meeting of Shareholders, the Company convened the 8th Meeting of the 3rd Board of Directors on 11 March 2019, at which the Proposal on Grant of the Reserved Stock Options of the Fifth Stock Option Incentive Scheme to Incentive Receivers was reviewed and approved. As such, the Company agreed to grant 5,540,000 reserved stock options to 100 incentive receivers on 11 March 2019 at the exercise price of RMB47.17 per share.

The Company originally intended to grant 5,540,000 reserved stock options to 100 incentive receivers. However, due to two incentive receivers failing to open a securities account on time and one incentive receiver's departure from the Company before the registration of the grant, they were no longer eligible for the Fifth Stock Option Incentive Scheme. Therefore, the number of incentive receivers who were registered for the reserved stock options of the Fifth Stock Option Incentive Scheme was 97, down from 100, with 5,340,000 stock options, down from 5,540,000. On 10 May 2019, the Company completed the registration of the grant of reserved stock options under the Fifth Stock Option Incentive Scheme.

b. The Company convened the 12th Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Exercise Price for the Fifth Stock Option Incentive Scheme was reviewed and approved. As the 2018 Annual Profit Distribution had been carried out, the exercise price for the first phase of the grant was revised from RMB56.34 to RMB55.04 per share, and the exercise price for the reserved stock options from RMB47.17 to RMB45.87 per share.

### **F. Overview of the Sixth Stock Option Incentive Scheme**

a. On 18 April 2019, the Sixth Stock Option Incentive Scheme (Draft) of Midea Group Co., Ltd (hereinafter

referred to as the “Sixth Stock Option Incentive Scheme (Draft)”) and its abstract were reviewed and approved at the 10th Meeting of the 3rd Board of Directors, and the incentive receiver list for the Sixth Stock Option Incentive Scheme (Draft) was examined at the 7th Meeting of the 3rd Supervisory Committee.

b. On 13 May 2019, the Company convened the 2018 Annual General Meeting of Shareholders, at which the Proposal on the Sixth Stock Option Incentive Scheme (Draft) and Its Abstract, the Proposal on the Implementation and Appraisal Measures for the Sixth Stock Option Incentive Scheme, the Proposal for Asking the Meeting of Shareholders to Authorize the Board to Handle Matters Related to the Sixth Stock Option Incentive Scheme and other relevant proposals were reviewed and approved.

For this Incentive Scheme, the Company intended to grant 47,240,000 stock options to 1,150 incentive receivers with the exercise price being RMB54.17 per share.

c. In light of the authorization given at the 2018 Annual General Meeting of Shareholders, the Company convened the 12th Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Exercise Price, Incentive Receiver List and Number of Stock Options to Be Granted for the Sixth Stock Option Incentive Scheme, the Proposal for the Determination of the Grant Date for the Sixth Stock Option Incentive Scheme and the Proposal for the Grant-Related Matters for the Sixth Stock Option Incentive Scheme were reviewed and approved. As such, the Company agreed to grant 47,140,000 stock options to 1,146 incentive receivers on 30 May 2019 with the exercise price revised from RMB54.17 per share to RMB52.87 per share.

The Company originally intended to grant 47,140,000 stock options to 1,146 incentive receivers. However, due to 15 incentive receivers’ departure from the Company or position change, they were no longer eligible for the Sixth Stock Option Incentive Scheme. Therefore, the Board adjusted the number of incentive receivers from 1,146 to 1,131, and the number of stock options from 47,140,000 to 46,540,000. On 5 July 2019, the Company completed the registration of the grant of stock options under the Sixth Stock Option Incentive Scheme.

## G. Overview of the 2017 Restricted Share Incentive Scheme

a. The Proposal on the Repurchase and Retirement of Certain Incentive Shares under the 2017 and 2018 Restricted Share Incentive Schemes was approved at the 5th Meeting of the 3rd Board of Directors on 21 January 2019. As such, it was agreed to repurchase and retire 1,775,917 restricted shares that had been granted to 30 personnel but were still in lockup under the 2017 Restricted Share Incentive Scheme, for the reasons of their departure from the Company, violation of company rules, business unit's 2017 performance appraisal result being "just so-so", position change or other factors.

Also, the Proposal on the Satisfaction of the Conditions for the First Unlocking Period for the Reserved Restricted Shares of the 2017 Restricted Share Incentive Scheme was approved at the aforesaid meeting. A total of 50 personnel were eligible for this unlocking, with 1,629,000 restricted shares unlocked and allowed for public trading on 20 February 2019.

b. The Company submitted the application to China Securities Depository and Clearing Co., Ltd. (Shenzhen branch) (hereinafter referred to as "CSDC Shenzhen") for the retirement of the 1,775,917 restricted shares under the 2017 Restricted Share Incentive Scheme that had been granted but were still in lockup. On 3 April 2019, as confirmed by CSDC Shenzhen, the retirement of the said restricted shares had been completed.

c. The Company convened the 12th Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Repurchase Price for the 2017 Restricted Share Incentive Scheme was reviewed and approved. As the 2018 Annual Profit Distribution had been carried out, the repurchase price for the first phase of the grant was revised from RMB14.66 to RMB13.36 per share, and the repurchase price for the reserved restricted shares from RMB26.79 to RMB25.49 per share.

Also, the Proposal on the Repurchase and Retirement of Certain Incentive Shares under the 2017 Restricted Share Incentive Scheme was approved at the said meeting. As such, it was agreed to repurchase and retire 1,580,750 restricted shares that had been granted to 35 personnel but were still in lockup, for the reasons of their departure from the Company, business unit's 2018 performance appraisal result being "just so-so" or "bad", position change, individual performance appraisal result being

“substandard” or other factors.

Also, the Proposal on the Satisfaction of the Conditions for the Second Unlocking Period for the First Phase of the 2017 Restricted Share Incentive Scheme was approved at the aforesaid meeting. A total of 100 personnel were eligible for this unlocking, with 5,564,583 restricted shares unlocked and allowed for public trading on 28 June 2019.

d. The Company submitted the application to CSDC Shenzhen for the retirement of the 1,580,750 restricted shares under the 2017 Restricted Share Incentive Scheme that had been granted but were still in lockup. On 23 July 2019, as confirmed by CSDC Shenzhen, the retirement of the said restricted shares had been completed.

#### **H. Overview of the 2018 Restricted Share Incentive Scheme**

a. The Proposal on the Repurchase and Retirement of Certain Incentive Shares under the 2017 and 2018 Restricted Share Incentive Schemes was approved at the 5th Meeting of the 3rd Board of Directors on 21 January 2019. As such, it was agreed to repurchase and retire 2,237,500 restricted shares that had been granted to 47 personnel but were still in lockup under the 2018 Restricted Share Incentive Scheme, for the reasons of their departure from the Company, position change or other factors.

b. The Company submitted the application to CSDC Shenzhen for the retirement of the 2,237,500 restricted shares under the first phase of the 2018 Restricted Share Incentive Scheme that had been granted but were still in lockup. On 3 April 2019, as confirmed by CSDC Shenzhen, the retirement of the said restricted shares had been completed.

c. In light of the authorization given at the 2017 Annual General Meeting of Shareholders, the Company convened the 8th Meeting of the 3rd Board of Directors on 11 March 2019, at which the Proposal on Grant of 2018 Reserved Restricted Shares to Incentive Receivers was reviewed and approved. As such, the Company agreed to grant 2,560,000 reserved restricted shares to 34 incentive receivers on 11 March 2019 at the price of RMB23.59 per share.

d. The Company had intended to grant 2,560,000 reserved restricted shares to 34 incentive receivers.

However, after the date of grant, two incentive receivers gave up subscription and the 140,000 reserved restricted shares that had been granted to them were cancelled. As such, the Company actually granted 2,420,000 reserved restricted shares to 32 incentive receivers. Zhonghui Certified Public Accountants LLP issued on 27 April 2019 the Capital Verification Report ZHKY [2019] No. 2446, verifying the corresponding increases in the Company's registered capital and share capital and the payments thereof as of 23 April 2019, which resulted from the private placement of restricted A-shares as reserved restricted shares to 32 personnel under the 2018 Restricted Share Incentive Scheme. As verified, as of 23 April 2019, the Company had received RMB57,087,800.00 from 32 incentive receivers for reserved restricted share subscription, representing an increase of RMB2,420,000.00 in share capital and an increase of RMB54,667,800.00 in capital reserves.

e. As per the CSRC's Measures for the Administration of Equity Incentives of Listed Companies, and as confirmed by the Shenzhen Stock Exchange and CSDC Shenzhen, the reserved shares in the Company's 2018 Restricted Share Incentive Scheme had been registered and were allowed for public trading on 10 May 2019.

f. The Proposal on the Cancellation of the Remaining Reserved Restricted Shares for 2018 was approved at the 10th Meeting of the 3rd Board of Directors on 18 April 2019. The Company decided to cancel the remaining 240,000 such shares as there were no other personnel that met the conditions for the restricted share incentives within the effective period.

g. The Company convened the 12th Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Repurchase Price for the 2018 Restricted Share Incentive Scheme was reviewed and approved. As the 2018 Annual Profit Distribution had been carried out, the repurchase price for the first phase of the grant was revised from RMB27.57 to RMB26.27 per share, and the repurchase price for the reserved restricted shares from RMB23.59 to RMB22.29 per share.

Also, the Proposal on the Repurchase and Retirement of Certain Incentive Shares under the 2018 Restricted Share Incentive Scheme was approved at the said meeting. As such, it was agreed to repurchase and retire 1,238,500 restricted shares that had been granted to 21 personnel but were still in lockup, for the reasons of their departure from the Company, position change or other factors.

h. The Company submitted the application to CSDC Shenzhen for the retirement of the 1,238,500 restricted shares under the first phase of the 2018 Restricted Share Incentive Scheme that had been granted but were still in lockup. On 23 July 2019, as confirmed by CSDC Shenzhen, the retirement of the said restricted shares had been completed.

### **I. Overview of the 2019 Restricted Share Incentive Scheme**

a. On 18 April 2019, the Proposal on the 2019 Restricted Share Incentive Scheme (Draft) and Its Abstract (hereinafter referred to as the “2019 Restricted Share Incentive Scheme (Draft)”) was reviewed and approved at the 10th Meeting of the 3rd Board of Directors, and the incentive receiver list for the 2019 Restricted Share Incentive Scheme (Draft) was examined at the 7th Meeting of the 3rd Supervisory Committee.

b. On 13 May 2019, the Company convened the 2018 Annual General Meeting of Shareholders, at which the Proposal on the 2019 Restricted Share Incentive Scheme (Draft) and Its Abstract, the Proposal on the Implementation and Appraisal Measures for the 2019 Restricted Share Incentive Scheme, the Proposal for Asking the Meeting of Shareholders to Authorize the Board to Handle Matters Related to the 2019 Restricted Share Incentive Scheme and other relevant proposals were reviewed and approved. For this scheme, the Company intended to grant 30,350,000 restricted shares to 451 incentive receivers with the price being RMB27.09/share.

c. In light of the authorization given at the 2018 Annual General Meeting of Shareholders, the Company convened the 12th Meeting of the 3rd Board of Directors on 30 May 2019, at which the Proposal for the Adjustments to the Grant Price of the 2019 Restricted Share Incentive Scheme, the Proposal for the Determination of the Grant Date for the 2019 Restricted Share Incentive Scheme and the Proposal for the Grant-Related Matters for the 2019 Restricted Share Incentive Scheme were reviewed and approved. As such, the Company agreed to grant 30,350,000 restricted shares to 451 incentive receivers on 30 May 2019 under the said scheme with the price revised from RMB27.09 per share to RMB25.79 per share.

d. The Company had intended to grant 30,350,000 restricted shares to 451 incentive receivers. However, after the date of grant, 28 incentive receivers left the Company, experienced position change or gave up

subscription, and the 1,790,000 restricted shares that had been granted to them were cancelled. As such, the Company actually granted 28,560,000 restricted shares to 423 incentive receivers. Zhonghui Certified Public Accountants LLP issued on 25 June 2019 the Capital Verification Report ZHKY [2019] No. 3970, verifying the payments as of 24 June 2019 by the 423 incentive receivers for share subscription under the 2019 Restricted Share Incentive Scheme. As verified, as of 24 June 2019, the Company had received RMB736,562,400.00 from the 423 incentive receivers for restricted share subscription. After the grant, the total share capital of the Company remained the same, and the restricted shares rose by 28,560,000 due to the equity incentive and the unrestricted public shares decreased by 28,560,000.

e. As per the CSRC's Measures for the Administration of Equity Incentives of Listed Companies, and as confirmed by the Shenzhen Stock Exchange and CSDC Shenzhen, the shares under the Company's 2019 Restricted Share Incentive Scheme had been registered and were allowed for public trading on 10 July 2019.

#### **J. Overview of the First Global Partner Stock Ownership Scheme**

a. The Proposal on the Extended Duration of the First Global Partner Stock Ownership Scheme was approved at the 7th Meeting of the 3rd Board of Directors on 22 February 2019. As proposed by the administrative committee of this scheme, the Board agreed to extend the duration of this scheme from four years to five years, i.e. to 21 April 2020.

b. The Company disclosed on 2 July 2019 the Announcement on the Completion of Share Clearing & Early Termination of the First Global Partner Stock Ownership Scheme. As per the relevant provisions of the First Core Management and Global Partner Stock Ownership Scheme of Midea Group Co., Ltd. (Draft), this scheme was completed and terminated ahead of schedule.

#### **K. Overview of the Second Global Partner Stock Ownership Scheme**

a. The Company disclosed the Reminder of the Completion of Vesting under the Second Global Partner Stock Ownership Scheme on 30 April 2019. As such, the final 30% installment of shares under the Second Global Partner Stock Ownership Scheme had been vested, marking the completion of this scheme. A total of 1,684,540 shares had been vested in the Company's incumbent senior management (Fang

Hongbo, Yin Bitong, Gu Yanmin, Wang Jianguo and Wang Jinliang), and a total of 1,179,170 shares had been vested in other incentive receivers, totaling 2,863,710 shares. The remaining unvested 1,010,880 shares and the corresponding dividends (if any) had been taken back by the administrative committee of this scheme for no compensation, and would be sold at a proper timing before this scheme expired. The earnings on the sale would belong to the Company.

#### **L. Overview of the Third Global Partner Stock Ownership Scheme**

a. The Company disclosed the Announcement on the Share Allocation and Vesting under a Partner Stock Ownership Scheme on 22 May 2019. As such, the second 30% installment of shares under the Third Global Partner Stock Ownership Scheme was vested. A total of 478,724 shares were vested in the Company's incumbent senior management (Fang Hongbo, Yin Bitong, Gu Yanmin, Wang Jianguo, Xiao Mingguang and Wang Jinliang), and a total of 215,640 shares were vested in other incentive receivers.

Due to certain incentive receivers' position change or departure from the Company before the second vesting period, the unvested 138,005.5 shares of the second installment of shares under the Third Global Partner Stock Ownership Scheme and the corresponding dividends (if any) had been taken back by the administrative committee of this scheme for no compensation, and would be sold at a proper timing before this scheme expired. The earnings on the sale would belong to the Company.

#### **M. Overview of the Fourth Global Partner Stock Ownership Scheme**

a. The Company's performance requirement for the Fourth Global Partner Stock Ownership Scheme is a weighted average ROE not lower than 20% for 2018. According to the 2018 Annual Auditor's Report for Midea Group Co., Ltd. issued by PricewaterhouseCoopers China (LLP), this ROE requirement has been met at 25.66%.

b. The Company disclosed the Announcement on the Share Allocation and Vesting under a Partner Stock Ownership Scheme on 22 May 2019. A total of 3,318,540 of the Company's shares were purchased for this scheme. As per the Fourth Global Partner Stock Ownership Scheme (Draft), the administrative committee of this scheme confirmed the number of shares to be granted to each partner, with the total shares to be granted being 2,714,700 shares (1,564,200 shares for senior management Fang Hongbo,

Yin Bitong, Gu Yanmin, Wang Jianguo and Wang Jinliang, and the other 1,150,500 shares for other core management personnel).

c. Due to certain incentive receivers' position change or departure from the Company in the duration of the Fourth Global Partner Stock Ownership Scheme, there are remained 603,840 shares unallocated under this scheme. As per the Fourth Global Partner Stock Ownership Scheme (Draft), these unallocated shares and the corresponding dividends (if any) had been taken back by the administrative committee of this scheme for no compensation, and would be sold at a proper timing before this scheme expired. The earnings on the sale would belong to the Company.

#### **N. Overview of the First Business Partner Stock Ownership Scheme**

a. The Company's performance requirement for the First Business Partner Stock Ownership Scheme is a weighted average ROE not lower than 20% for 2018. According to the 2018 Annual Auditor's Report for Midea Group Co., Ltd. issued by PricewaterhouseCoopers China (LLP), this ROE requirement has been met at 25.66%.

b. The Company disclosed the Announcement on the Share Allocation and Vesting under a Partner Stock Ownership Scheme on 22 May 2019. A total of 1,779,300 of the Company's shares were purchased for this scheme. As per the First Business Partner Stock Ownership Scheme (Draft), the administrative committee of this scheme confirmed the number of shares to be granted to each partner, with the total shares to be granted being 1,151,687 shares (182,566 shares for senior management Zhang Xiaoyi, Xiao Mingguang, Hu Ziqiang, Liu Min and Jiang Peng, and the other 969,121 shares for other core management personnel).

c. Due to certain incentive receivers' position change or departure from the Company in the duration of the First Business Partner Stock Ownership Scheme, there are remained 627,613 shares unallocated under this scheme. As per the First Business Partner Stock Ownership Scheme (Draft), these unallocated shares and the corresponding dividends (if any) had been taken back by the administrative committee of this scheme for no compensation and belonged to the Company. In this case, the Company still had to return the performance bonuses corresponding to these unallocated shares under this scheme to the

relevant senior management.

### **O. Overview of the Fifth Global Partner Stock Ownership Scheme**

a. The Fifth Core Management and Global Partner Stock Ownership Scheme was approved at the 10th Meeting of the 3rd Board of Directors on 18 April 2019 and the 2018 Annual General Meeting of Shareholders on 13 May 2019. The shares for this scheme would be obtained from the Company's securities account for repurchase in a non-transaction transfer and put into the securities account of "Midea Group Co., Ltd.—the Fifth Employee Stock Ownership Scheme" for management.

b. As of 30 June 2019, the Company cumulatively repurchased 40,014,998 shares (0.5764% of the Company's total share capital as of that date) through centralized bidding in its securities account for repurchase at an average price of RMB49.79/share (RMB1,992,451,807.06 in total, exclusive of trading fees), which was funded by the Company's special fund of RMB185.82 million for this scheme. With the said average repurchase price as the price for transferring the shares in the repurchase securities account to the securities account of the Fifth Global Partner Stock Ownership Scheme, the shares to be transferred would be 3,732,075.

c. According to the Confirmation of Securities Transfer received by the Company from CSDC Shenzhen on 9 July 2019, 3,732,075 shares (0.0537% of the Company's total share capital) had been transferred from the Company's securities account for repurchase to the securities account of "Midea Group Co., Ltd.—the Fifth Employee Stock Ownership Scheme" in a non-transaction transfer on 8 July 2019. As required by the Fifth Global Partner Stock Ownership Scheme (Draft), the shares transferred shall be locked up for no less than 12 months from the disclosure date of the announcement on the completion of the transfer from the Company's securities account for repurchase. Therefore, the shares transferred to the securities account of the Fifth Global Partner Stock Ownership Scheme would be locked up from 11 July 2019 to 10 July 2020.

### **P. Overview of the Second Business Partner Stock Ownership Scheme**

a. The Second Core Management and Business Partner Stock Ownership Scheme was approved at the 10th Meeting of the 3rd Board of Directors on 18 April 2019 and the 2018 Annual General Meeting of

Shareholders on 13 May 2019. The shares for this scheme would be obtained from the Company's securities account for repurchase in a non-transaction transfer and put into the securities account of "Midea Group Co., Ltd.—the Sixth Employee Stock Ownership Scheme" for management.

b. The Second Business Partner Stock Ownership Scheme was funded by the Company's special fund and the performance bonuses for senior management of RMB93 million. With the average repurchase price as the price for transferring the shares in the repurchase securities account to the securities account of the Second Business Partner Stock Ownership Scheme, the shares to be transferred would be 1,867,845.

c. According to the Confirmation of Securities Transfer received by the Company from CSDC Shenzhen on 15 July 2019, 1,867,845 shares (0.0269% of the Company's total share capital) had been transferred from the Company's securities account for repurchase to the securities account of "Midea Group Co., Ltd.—the Sixth Employee Stock Ownership Scheme" in a non-transaction transfer on 12 July 2019. As required by the Second Business Partner Stock Ownership Scheme (Draft), the shares transferred shall be locked up for no less than 12 months from the disclosure date of the announcement on the completion of the transfer from the Company's securities account for repurchase. Therefore, the shares transferred to the securities account of the Second Business Partner Stock Ownership Scheme would be locked up from 16 July 2019 to 15 July 2020.

a. The Proposal for Related Transactions Regarding Making Deposits in and Obtaining Loans from Shunde Rural Commercial Bank in 2019 was reviewed and approved at the 10th Meeting of the 3rd Board of Directors held on 18 April 2019 and later at the 2018 Annual General Meeting of Shareholders held on 13 May 2019.

In 2019, the deposit balance of the Company in Shunde Rural Commercial Bank shall not exceed RMB5 billion and neither shall the credit balance provided by the bank to the Company exceed RMB5 billion.

b. In order to diversify the Group's portfolio of long-term assets, as well as promote technological innovation and development in emerging industries, Midea Innovation Investment Co., Ltd., a wholly-owned subsidiary of the Company, took part in the establishment of an industry investment fund, Guangdong Midea Smart Technology Industry Investment Fund (LLP), in January 2019 as one of the limited partners.

In order to further optimize its business layout, foster quality programs for its strategies and business,

and boost its comprehensive competitiveness, the Company intended to increase the subscribed capital contribution by RMB300 million via Midea Innovation Investment, bringing the cumulatively subscribed capital contribution to the aforesaid industry investment fund to RMB600 million.

Applicable  N/A

No such cases in the Reporting Period.

## 18. Social Responsibility (CSR)

### 18.1 Measures taken to fulfill CSR commitment

The Company has voluntarily disclosed its CSR work. Attaching great importance to protecting the legal rights and interests of its shareholders, employees, consumers and business partners, as well as the

government, the community and other stakeholders, the Company sticks to harmonious common growth with them, honors its commitments, abides by law and moral principles, and continue to contribute to the sustainable development of the society and the environment. For further information, see the Company's Corporate Social Responsibility Report 2019 released on [www.cninfo.com.cn](http://www.cninfo.com.cn).

## **18.2 Measures taken for targeted poverty alleviation**

### **A. Summary of the work done for targeted poverty alleviation during the year**

In 2019, the decisive year for the battle against poverty, Midea Group readily responded to the government's poverty alleviation policy and took targeted poverty alleviation as the top priority in fulfilling its social responsibility.

In January 2019, Midea donated RMB10 million to the Beijiao Charity Federation for the 10th consecutive year, which were used for poverty alleviation, education and other charitable activities in the local community.

In June 2019, Midea made another donation of RMB10 million for improving education, medical care and housing in poor villages of Guangdong Province. This was the 10th consecutive year of Midea's participation in this event since the "Guangdong Poverty Alleviation Day" was founded in 2010.

In June 2019, in a charity event held by China Social Welfare Foundation and ShenZhen Dream Inspiration Foundation, Midea made a donation of RMB200,000 to the "Support Education Project" to equip schools in the poor areas of Guizhou Province with professional teachers, with a view to alleviating the shortage of educational resources in remote villages.

### **B. Targeted poverty alleviation plans for the coming future**

In 2020, in order to win the decisive battle against poverty, Midea Group will readily respond to the call of the CPC Committee and the Government of Guangdong Province to make further efforts with greater determination and devotion, overcome the impact of the COVID-19 outbreak in a continuous and serious manner, and help accomplish the great cause of poverty alleviation, which is of enormous significance to the Chinese people and even all mankind. Midea Group will donate yet another RMB10 million to the Beijiao Charity Federation to improve education, medical care, housing, etc. for the impoverished people.

### 18.3 Environmental protection

Whether the Company or any of its subsidiaries is declared a heavily polluting business by the environmental protection authorities

Yes  N/A

### The construction of pollution prevention facilities and their operation

During the Reporting Period, all subsidiaries have strictly abided by the laws and regulations related to environment protection, and no major

environmental pollution incidents occurred. All subsidiaries have set up reliable waste water and gas treatment systems. Through regular monitoring, supervision and inspection mechanisms, as well as third-party testing, it is ensured that the discharge of waste water, waste gas and solid waste during the production and operation process meets the national and local laws and regulations. There is no excessive discharge by any subsidiary, which is in compliance with the relevant requirements of the environment administrations. The specific treatments for waste water, waste gas and solid wastes are as follows:

**A. Waste water treatments:** The waste water from subsidiaries is classified as household waste water and industrial waste water. Household waste water is discharged to the municipal waste water treatment network and waste water treatment plants after being pre-treated in septic tanks, etc. And industrial waste water is discharged to the municipal waste water treatment network and waste water treatment plants after being pre-treated in the subsidiaries' waste water treatment stations. Meanwhile, the rain sewage diversion system is promoted in old factories and the existing production processes are improved to reduce waste water.

**B. Waste gas treatments:** The waste gas from the subsidiaries is mainly the industrial waste gas and dust produced in the production process. Corresponding waste gas treatment systems have been set up for different types of waste gas. For example, waste gas from screen printing line is treated with spraying, defogging, UV photolysis and activated carbon adsorption devices, and organic waste gas from oil spray lines for metal working and plastic injection is treated with molecular sieve wheel adsorption and RCO catalytic combustion devices. Waste gas is discharged at a high altitude after emission concentration of benzene, toluene, xylene and VOCs in it is up to the Emission Limits of Air Pollutants, a local standard. Dust producing equipment operates in a closed environment, with a fully automatic dust sucker or powder dust collector treating powder dust without discharging it outwards.

**C. Prevention and control of noise pollution:** Noise produced in the operating process of the main noise equipment in the production processes of

various factories including punching machines, powder spray coating line, oil spray line, plastic injection machine, wire winding machine, waste water and gas treatment facilities is 60~90dB (A). The company has taken the following preventive and control measures: 1) Select environmentally friendly low noise equipment, deploy various equipment in the workshop rationally and take basic shock absorption and enclosed sound insulation measures for the equipment; 2) Ensure sound insulation by making use of factory buildings and doors and windows, and especially in the air fan room with big noise, doors and windows with good sound insulation effect are recommended being set; 3) Forestation in the factory area and on the border of projects is strengthened and green plants are set rationally there, which both beautify the environment and assist in noise adsorption and sound insulation. After taking the above noise prevention and control measures, noise in the factory area can be up to third-level standard in the Emission Standard for Industrial Enterprises noise at Boundary(GB12348-2008):  $\leq 65\text{dB (A)}$  at daytime and  $\leq 55\text{dB (A)}$  at nighttime.

**D. Solid waste treatments:** The solid waste from subsidiaries is classified into general solid waste, hazardous solid waste, and household solid waste. Hazardous solid waste, according to laws and regulations, is required to be treated by qualified treatment institutions; general solid waste, after being classified at the subsidiaries, is collected and treated by resource recycling plants; and household solid waste is treated by the local sanitation administration, which is in compliance with the relevant regulations.

#### **The environmental effect evaluation of construction projects and other administrative permits in relation to environmental protection**

All subsidiaries strictly observe the laws and regulations governing environmental protection, and all construction projects are in compliance with the environmental effect requirements and other rules, with no misdeeds during the Reporting Period. Once a construction project is finished, a third-party testing institution is hired to examine indexes including waste water, waste gas and noise, and the compilation and approval of the environmental effect evaluation report is finished in time.

#### **Contingency plans for environmental accidents**

All subsidiaries have finished the compilation and approval of their contingency plans for environmental accidents. Emergency mechanisms for environmental pollution accidents have been established and improved, and the subsidiaries' ability to deal with environmental pollution accidents has been enhanced, so as to maintain social stability, protect the lives, health and properties of the public, protect the environment, and promote a comprehensive, coordinated and sustainable development of the society.

According to the accident levels, subsidiaries have formulated rules covering working principles, contingency plans, risk prevention measures, commanding departments, responsibilities and labor division, and have filed these contingency plans with the government.

### **Environment self-monitoring plans**

All the subsidiaries have formulated their own environment self-monitoring plans according to China's relevant laws and regulations, which include: 1) Waste gas pollution source monitoring: Sampling points are set at various discharge ports of waste gas for monitoring on a quarterly basis; 2) Waste water pollution source monitoring: Samples are fetched at intake and outlet ports of waste water treatment stations to monitor changes of pollution source of waste water and up-to-standard emission of waste water after being treated at the waste water treatment stations. Monitoring items include COD<sub>Cr</sub>, SS and petroleum, etc. The data is uploaded to the governmental monitoring authority online and the government authority conducts real-time monitoring; 3) Noise monitoring: Noise monitoring points are set at noise sensitive points and on the border of factories. Noise is monitored once in spring and summer respectively and at daytime and at nighttime respectively each time; 4) Solid waste pollution source monitoring: Hazardous waste produced from the subsidiaries is handed over to the units with qualifications for treatment, monitoring systems are established, and related management forms and accounts are set up. Meanwhile, 11 factories have been equipped with an online waste water monitoring system, and such a system is underway for other operations.

### **Other environment-related information that should be made public**

According to the national and local laws and regulations, information including pollutant discharge information, the construction and operation of pollution prevention facilities, environmental effect evaluations of construction projects and other administrative permits in relation to environmental protection, contingency plans for environmental accidents, and environment self-monitoring results is all made public through the official WeChat account on a regular basis.

**Other environment-related information**

## 19. Other Significant Events

√Applicable □N/A

### **Midea's merger with Little Swan in a share swap via A-share offering and the related transaction**

A. On 12 March 2019, the Company received the CSRC Reply on the Approval of the Merger of Midea Group Co., Ltd. with Wuxi Little Swan Company Limited (ZJXK [2019] No. 352), approving the issuance of 342,130,784 shares by Midea Group to merge with Little Swan.

B. On 22 April 2019, the Company received the Reply of the Foshan Central Sub-Branch of the State Administration of Foreign Exchange on the Foreign Exchange Affairs in Midea Group Co., Ltd.'s Merger with Wuxi Little Swan Company Limited in a Share Swap via A-share Offering (FHF [2019] No. 1), according to which the Board of the Company would assist investors in handling the relevant foreign exchange affairs.

C. Trading in the Company's stock was suspended from 8 May 2019 for the implementation of the appraisal rights of dissenting shareholders. During the declaration period for the appraisal rights (15 May 2019 to 21 May 2019), no investor declared the exercise of appraisal rights.

D. As Little Swan and Midea Group conducted profit distribution before the completion of the merger, the following adjustments were made:

The swap prices for a Little Swan-A share and a Little Swan-B share were adjusted to RMB46.91 and RMB38.07, respectively. The issue price of a Midea Group share was adjusted from RMB42.04 to RMB40.74. The respective swap ratios for Little Swan-A and Little Swan-B shares became 1:1.15144821 and 1:0.93446244. And the shares to be issued by Midea Group for this merger became 323,657,476.

E. On 21 June 2019, the total 323,657,476 new shares issued by the Company for this merger were allowed for public trading at the Shenzhen Stock Exchange. Upon the completion of this merger, Little Swan would be delisted and de-registered as a corporate body, and Midea Group or its wholly-owned subsidiary would take over all the assets, liabilities, business, personnel, contracts and all the other rights

and obligations of Little Swan.

## Reasons for the changes in shares

√Applicable □N/A

a. As the conditions for the first unlocking period for the reserved restricted shares of the 2017 Restricted Share Incentive Scheme had been satisfied, the 1,629,000 restricted shares of a total of 50 eligible employees were unlocked and allowed for public trading on 20 February 2019, including 60,000 restricted shares of foreign employees.

b. As the conditions for the second unlocking period for the first phase of the 2017 Restricted Share Incentive Scheme had been satisfied, the 5,564,583 restricted shares of a total of 100 eligible employees were unlocked and allowed for public trading on 28 June 2019, including 150,000 restricted shares of foreign employees.

c. For the reason of certain incentive receivers' departure from the Company, violation of company rules, business unit's 2017 performance appraisal result being "just so-so", position change or other factors, the Company repurchased and retired 1,775,917 shares of 30 incentive receivers under the 2017 Restricted Share Incentive Scheme on 3 April 2019, and 2,237,500 shares of 47 incentive receivers under the 2018 Restricted Share Incentive Scheme, totaling 4,013,417 restricted shares.

d. 2,420,000 reserved restricted shares were granted to 32 employees for the Company's 2018 Restricted Share Incentive Scheme. These shares would be allowed for public trading on 10 May 2019.

e. The Company issued a total of 323,657,476 new A-shares for the merger with Little Swan in a share swap, including 321,278,100 non-restricted public shares and 2,379,376 restricted public shares (inclusive of such shares held by senior management). These shares would be allowed for public trading on 21 June 2019.

f. 28,560,000 restricted shares (repurchased shares) were granted to 423 employees for the Company's 2019 Restricted Share Incentive Scheme, with no change to the total share capital of the Company. These shares would be allowed for public trading on 10 July 2019.

g. For the reason of certain incentive receivers' departure from the Company, business unit's 2018 performance appraisal result being "just so-so", individual performance appraisal result of 2018 being "substandard" or other factors, the Company repurchased and retired 1,580,750 shares of 35 incentive receivers under the 2017 Restricted Share Incentive Scheme on 23 July 2019, and 1,238,500 shares of 21 incentive receivers under the 2018 Restricted Share Incentive Scheme, totaling 2,819,250 restricted shares.

h. In 2019, the incentive receivers of stock options chose to exercise 84,729,274 shares, which have been registered into the Company's share capital.

i. In 2019, locked-up shares held by senior management decreased by 1,089,598 shares.

Approval of share changes

Applicable  N/A

On 12 March 2019, the Company received the CSRC Reply on the Approval of the Merger of Midea Group Co., Ltd. with Wuxi Little Swan Company Limited (ZJXK [2019] No. 352), approving the issuance of 342,130,784 shares by Midea Group to merge with Little Swan.

Transfer of share ownership

Applicable  N/A

Progress of any share repurchase

Applicable  N/A

a. The Proposal on the Plan for the Repurchase of Some Public Shares (hereinafter referred to as the “2019 Repurchase Plan”) was approved at the 7th Meeting of the 3rd Board of Directors on 22 February 2019. As such, the Company was agreed to repurchase, with its own funds, no less than 60,000,000 shares and no more than 120,000,000 shares by way of centralized bidding at a price not exceeding RMB55/share within 12 months starting from the approval of the repurchase plan by the Board of Directors. All the repurchased shares would be used for the Company’s equity incentive schemes and/or employee stock ownership schemes. As disclosed in the Announcement on the Expiry of the Repurchase Period & the Completion of the Implementation of the Repurchase Plan dated 22 February 2019, during the repurchase period, the Company cumulatively repurchased 62,181,122 shares by way of centralized bidding. With the highest trading price being RMB55.00/share and the lowest being RMB45.62/share, the total payment amounted to RMB3,200,329,932.45 (exclusive of trading fees). The 2019 Repurchase Plan has expired and the number of shares repurchased has reached the lower limit of the repurchase plan. Therefore, the implementation of the repurchase plan has been completed. So far, cumulatively 34,159,920 repurchased shares have been transferred.

b. The Proposal on the Plan for the Repurchase of Some Public Shares (hereinafter referred to as the “2020 Repurchase Plan”) was approved at the 18th Meeting of the 3rd Board of Directors on 21 February 2020. As such, the Company was agreed to repurchase, with its own funds, no less than 40,000,000 shares and no more than 80,000,000 shares by way of centralized bidding at a price not exceeding RMB65/share within 12 months starting from the approval of the repurchase plan by the Board of Directors. All the repurchased shares would be used for the Company’s equity incentive schemes and/or employee stock ownership schemes. As disclosed in the Announcement on the Share Repurchase

Progress dated 2 April 2020, as of 31 March 2020, the Company had repurchased 14,265,055 shares (0.2038% of the Company's total share capital as of that date) by way of centralized bidding. With the highest trading price being RMB54.18/share and the lowest being RMB46.30/share, the total payment amounted to RMB701,292,302.13 (exclusive of trading fees). The repurchase was in line with the requirements of applicable laws and regulations, as well as the repurchase plan of the Company.

#### 4. Remuneration of Directors, Supervisors and Senior Executives

The following describes the decision-making procedures, grounds on which decisions are made and actual remuneration payment of directors, supervisors and senior executives.

The decision-making remuneration procedure for directors, supervisors and senior executives: The remuneration is proposed by the Board Compensation Committee and approved by the Board. Decisions are made finally after the deliberation of shareholders' meeting.

The remuneration of directors, supervisors and senior executives consist of basic annual payments and performance-related annual payments according to the Salary Management System for the Directors, Supervisors and Senior Executives which has been approved by the Company. Basic payment is determined based on the responsibility, risk and pressure of directors, supervisors and senior executives. The basic annual payment remains stable. Performance-related annual payment is related to the completion rate of corporate profit, the assessment result of target responsibility system and the performance evaluation structure of their own department. The remuneration system for directors, supervisors and senior executives serves the Company's strategy, and shall be adjusted with the Company's operating conditions in order to meet the Company's development requirements. The basis for adjusting the remuneration of directors, supervisors and senior executives are as follows:

- a. Wage growth in the industry
- b. Inflation
- c. Corporate earnings
- d. Organizational structure adjustment
- e. Individual adjustment due to a change in position

## Section VIII Corporate Governance

### 1. Basic Situation of Corporate Governance

Any incompliance with the regulatory documents issued by the CSRC governing the governance of listed companies

Yes No

The Company is constantly improving its corporate governance in strict accordance with the Company Law, the Securities Law and the relevant regulations of the China Securities Regulatory Commission. There are four special committees under the Board, namely the Strategy Committee, the Auditing Committee, the Nomination Committee as well as the Remuneration and Appraisal Committee. They were designed to provide consultation and advice to the Board and validate the professionalization and efficiency of discussions and decision-making. The Company has established clear rules of procedure for its shareholders' general meeting, board of directors, Supervisory Committee and special committees under the board, as well as the *Work Rules for Company Secretary*. It has also established a set of standard documents including *Information Disclosure Management System, Funds Raising Management System, Connected Transaction Management System, Wealth Management Entrustment Management System, Insider Registration System, External Guaranty Decision-making System, Foreign Investment Management System, and Management System for Finance Flow with Connected Parties, Internal Auditing System*. The shareholders' meeting, the Board, Supervisory Committee and operations management departments have clear authority and responsibility. Each performs its own functions and maintains its stability effectively. Their scientific decision-making and coordinated operations have laid a firm foundation for the sustained, healthy and steady development of the Company.

The Company has also launched core management team shareholding plans and equity incentive plans for core research, quality control, technical, production and management staff, which helps to develop a sound shareholding structure for the future growth of the Company.

In 2019, the Company won the following honors:

No. 312 of “2019 Fortune Global 500”; No. 253 of “The World’s 2,000 Largest Public Companies” released by the Forbes; No. 33 of the “BrandZ™ Top 100 Most Valuable Chinese Brands” jointly released by WPP and Kantar Millward Brown; No. 149 of the “2019 Brand Finance Global 500”; the “Best Responsibility Advancement Award” at “China ESG Golden Awards 2019” presented by finance.sina.com.cn; and “The Enterprise with Excellent Governance” at “The Golden Round Table Awards 2019” presented by the *Directors & Boards* magazine.

## **2. Independency of businesses, personnel, assets, organizations, and finance which are separate from the controlling shareholder**

The Company is totally autonomous with respect to business, personnel, assets, organizations, and finance from Midea Holding Co., Ltd., the controlling shareholder of the Company, therefore maintaining integrity and independency in both business and operations.

### **2.1 Business independence:**

The Company has a complete industrial chain for its manufacturing business, a completely distinct purchase and sales system, and an independent and comprehensive business operation capability.

### **2.2 Personnel independence:**

The Company is completely autonomous from the controlling shareholder regarding its personnel. The labor, personnel and remuneration management of the company are totally unrelated. All senior management members received remuneration from the Company except those that hold only a director’s position in the controlling shareholder.

### **2.3 Asset integrity:**

The Company has its own independent production system as well as ancillary production systems and facilities. Intangible assets such as industrial rights, trademark ownership and non-patent technology are held by the Company.

### **2.4 Organization independence:**

The Company has set up an independent organizational structure which maintains its independent operation. The Company has the right to appoint or remove any personnel so there is no overlapping with the controlling shareholder.

## 2.5 Financial independence:

The Company's financial management is independent from the controlling shareholder. The Company has its own accounting department, accounting system, financial management system, and bank accounts and independently makes financial decisions and pays its own taxes according to relevant laws.

Han Jian	12	1	11	0	0	No
Presence of independent directors in meetings of shareholders (times)		1				

### 5.2 Objections from independent directors on related issues of the Company

Were there any objections on related issues of the Company from independent directors

Yes  No

No such cases in the Reporting Period.

### 5.3 Other details about the performance of duties by independent directors

Were there any suggestions from independent directors adopted by the Company

Yes  No

Details about advice of independent directors accepted or not accepted by the Company

During the Reporting Period, independent directors strictly followed related rules, regulations and the Articles of Association. They focused on the Company operation, carried out their duties independently and imparted lots of professional advice on perfecting the Company's systems, daily operations and decisions. They provided fair advice during the Reporting Period and played an effective role in improving the Company supervisory systems and protecting the legal rights of the Company and the shareholders as a whole.

## 6. Performance of Duties by Special Committees under the Board during the Reporting Period

6.1 The Audit Committee under the Board convened four meetings in the Reporting Period, at which the following proposals were considered and approved: *The 2018 Final Account Report, The 2018 Annual Report & Its Abstract, The Report of the Audit Committee on Concluding and Appraising the 2018 Annual Audit Work, The Proposal for Appointing an Auditor for the 2019 Annual Result, The Proposal for Appointing an Auditor for the Internal Control in 2019, The Proposal for Writing off Asset Impairment Provisions, The Report on the First Quarter of 2019, The 2019 Semi-Annual Report and The Report on the Third Quarter of 2019.*

6.2 The Remuneration and Appraisal Committee under the Board convened three meetings in the Reporting Period, at which the following proposals were considered and approved: *The Proposal on the Repurchase and Retirement of Certain Incentive Shares under the 2017 and 2018 Restricted Share Incentive Schemes, The Proposal on the Satisfaction of the Conditions for the First Unlocking Period for the Reserved Restricted Shares of the 2017 Restricted Share Incentive Scheme, The Proposal for Matters Related to the Stock Option Exercise for the Second Exercise Period of the Fourth Stock Option Incentive Scheme, The Proposal on the Satisfaction of the Conditions for the Second Unlocking Period for the First Phase of the 2017 Restricted Share Incentive Scheme, and The Proposal for Matters Related to the Stock Option Exercise for the Third Exercise Period of the Third Stock Option Incentive Scheme.*

6.3 The Nomination Committee under the Board convened two meetings in the Reporting Period, at which the following proposals were considered and approved: *The Proposal for Vice President Appointment, The Proposal for the Appointment of Director of Finance and The Proposal for the Appointment of Chief Financial Officer.*

## 7. Performance of Duties by the Supervisory Committee

Were there any risks to the Company identified by the Supervisory Committee when performing its duties during the Reporting Period

Yes  No

The Supervisory Committee of the Company had no objection to the matters of supervision during the

Reporting Period.

## 8. Assessment and Incentive Mechanism for the Senior Management

The Company established an appraisal system on the basis of its target-oriented responsibility system and adopted an appraisal agreement for senior management members, which determines the appraisal criterion, appraisal method and measures taken based on the appraisal result. During the Reporting Period, the Company has carried out appraisals of senior management members on the basis of its target-oriented responsibility system and the appraisal result was reflected in the annual performance-based incentive rewards. Meanwhile, the Company promoted the unification of interests between managers and shareholders through high-level staff and core management teams' shareholding schemes as well as multiple stock option or restricted share incentive schemes, laying a good foundation for the future growth of the Company.

## 9. Internal Control

### 9.1 Serious internal control defects found in the Reporting Period

## Auditor's Report

PwC ZT Shen Zi (2020) No. 10017  
(Page 1 of 6)

To the shareholders of Midea Group Co., Ltd.,

### Opinion

#### *What we have audited*

We have audited the accompanying financial statements of Midea Group Co., Ltd. (hereinafter “the Group”), which comprise:

- the consolidated and company balance sheets as at 31 December 2019;
- the consolidated and company income statements for the year then ended;
- the consolidated and company cash flow statements for the year then ended;
- the consolidated and company statements of changes in shareholders' equity for the year then ended; and
- notes to the financial statements.

#### *Our opinion*

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and company's financial position of the Group as at 31 December 2019, and their financial performance and cash flows for the year then ended in accordance with the requirements of the Accounting Standards for Business Enterprises (“CASs”).

### Basis for Opinion

We conducted our audit in accordance with China Standards on Auditing (“CSAs”). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Group in accordance with the Code of Ethics for Professional Accountants of the Chinese Institute of Certified Public Accountants (“CICPA Code”), and we have fulfilled our other ethical responsibilities in accordance with the CICPA Code.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters identified in our audit are summarised as follows:

- Recognition of revenue from sales of household appliances
- Impairment testing of goodwill

Key Audit Matters(Cont'd)	How our audit addressed the Key Audit Matters
<p><b>Recognition of revenue from sales of household appliances</b></p> <p>Please refer to Note 2(26)(a) “Revenue - sales of goods” and Note 4(42) “Operating revenue” to the financial statements.</p> <p>Revenue is recognised when it’s probable that the economic benefits associated with the transaction will flow to the Group, the related revenue can be reliably measured, and the specific criteria of revenue recognition have been met for each type of the Group’s activities. In 2019, the Group’s consolidated operating revenue was RMB278,216,017,000 and the revenue from sales of household appliances accounted for over 80% of the consolidated operating revenue.</p> <p>We focused on recognition of revenue from sales of household appliances mainly due to the Group’s numerous clients and big sales volume at home and abroad achieved by its varied distribution channels.</p>	<p>Regarding the Group’s revenue from sales of household appliances, we performed procedures as follows:</p> <p>We interviewed management from operation and financial departments in terms of sales processes of all distribution channels to understand and evaluate the internal control of processes relating to the revenue from sale of household appliances designed by management and tested the operating effectiveness of key controls;</p> <p>We checked the household appliance sales contract template entered into by and between the Group and the clients from all distribution channels, and analysed and evaluated the Group’s accounting policies on the revenue from sales of household appliances based on our interview with management, understanding of the Group’s selling operation and audit experience.</p> <p>Regarding the sales of household appliances through all distribution channels, we performed the procedures as follows:</p> <ol style="list-style-type: none"> <li>1. We performed such risk assessment procedures as analysis of fluctuation in revenue from sales of household appliances on a monthly basis and analysis of fluctuation in gross profit rates;</li> <li>2. We checked supporting documents relevant to recognition of revenue from sales of household appliances on sample basis, including sales contracts, orders, sales invoices, shipping orders, acknowledgement of goods receipts signed by customers, billing agreements with customers, etc.;</li> <li>3. We checked the amount of revenue by sending confirmations to customers on a sampling basis;</li> <li>4. We checked revenue from sales of household appliances recognised around the balance sheet date against acknowledgement of goods receipts signed by customers, billing agreements with customers or other supporting documents to evaluate if the revenue was recognised over appropriate period.</li> </ol> <p>We concluded that the Group’s recognition of revenue from sales of household appliances complied with its applicable accounting policies based on the audit procedures performed.</p>

Key Audit Matters (Cont'd)	How our audit addressed the Key Audit Matters
<p><b>Impairment testing of goodwill</b></p> <p>Please refer to Note 4(17) “Goodwill” to the financial statements.</p> <p>As at 31 December 2019, the goodwill recorded in the consolidated balance sheet of the Group amounted to RMB28,207,065,000, including RMB22,240,132,000 and RMB2,984,110,000 arising from business acquisition of KUKA Aktiengesellschaft (“KUKA Group”) and Toshiba Lifestyle Products &amp; Services Corporation (“TLSC”), respectively. Management believed that it was not necessary to make impairment provision for the goodwill based on the impairment testing prepared in accordance with the accounting policies stated in Note 2(19) to the consolidated financial statements. The impairment testing is performed by assessing the recoverable amount of the groups of assets containing the relevant goodwill, based on the present value of cash flows forecasts. Key assumptions adopted in the impairment testing of goodwill included expected revenue growth rates, EBITDA margins, perpetual annual growth rates, discount rates, etc. which required key accounting estimates and judgement.</p> <p>We focused on the impairment risk of the goodwill totalling RMB25,224,242,000 arising from the business acquisition of KUKA Group and TLSC because the amount is significant and the impairment testing of goodwill involved key accounting estimates and judgements.</p>	<p>Regarding the impairment testing of goodwill arising from the acquisition of KUKA Group and TLSC, we performed the procedures as followings:</p> <ol style="list-style-type: none"> <li>1. We understood and evaluated the internal controls relevant to the impairment testing of goodwill, and tested the operating effectiveness of key control, including review and approval of key assumptions applied and internal control of calculation of the recoverable amounts of the asset groups containing the allocated goodwill.</li> <li>2. We evaluated the appropriateness of methodologies of impairment testing of goodwill adopted by management with the assistance of internal valuers, and evaluated and recalculated the discount rates adopted in the test by comparing industry or market data;</li> <li>3. We tested the accuracy of arithmetic applied in the calculating process during the impairment testing of goodwill;</li> <li>4. We evaluated the accuracy of historical estimates on future cash flows by comparing the actual financial performance of current year with the forecasts of prior year, so as to check whether there was any bias from management during the evaluation of the impairment testing of goodwill;</li> <li>5. We evaluated the reasonableness of key assumptions on expected revenue growth rates, EBITDA margins, perpetual annual growth rates, discount rates, etc. adopted in the impairment testing of goodwill by interviewing with management and considering the market developments.</li> </ol> <p>We concluded that the audit evidence we have obtained could support the accounting estimates and judgement applied by management in the evaluation of impairment testing of goodwill based on the audit procedures performed.</p>

### **Other Information**

Management of the Group is responsible for the other information. Other information comprises all the information included in the 2019 annual report of the Group other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### **Responsibilities of Management and Those Charged with Governance for the Financial Statements**

Management of the Group is responsible for the preparation and fair presentation of these financial statements in accordance with the CASs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing these financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

## **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether these financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in these financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation (including the disclosures), structure and content of the financial statements, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

**Auditor’s Responsibilities for the Audit of the Financial Statements (Cont’d)**

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor’s report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### 1 General information

The principal business activities of MIDEA GROUP CO., LTD. (hereinafter referred to as “the Company”) and its subsidiaries (hereinafter collectively referred to as “the Group”) include heating & ventilation, as well as air-conditioner (hereinafter referred to as “HVAC”) centred on household air-conditioner, central air-conditioner, heating and ventilation systems; consumer appliances centred on kitchen appliances, refrigerators, washing machines and various small appliances; robotics and automation system centred on KUKA Aktiengesellschaft (hereinafter referred to as “KUKA”) and its subsidiaries (hereinafter referred to as “KUKA Group”), and other robots business of Midea Group. Other services include service platform with Annto Logistics Technology Co., Ltd. providing the smart supply chain integrated solutions; sale, wholesale and processing of raw materials of household electrical appliances; and financial business involved in customer deposits, interbank lendings and borrowings, consumption credits, buyer’s credits and finance leases.

The Company was set up by the Council of Trade Unions of GD Midea Group Co., and was registered in Market Safety Supervision Bureau of Shunde District, Foshan on 7 April 2000, with its headquarters located in Foshan, Guangdong. On 30 August 2012, the Company was transformed into a limited liability company. On 29 July 2013, the Company was approved to merge and acquire Guangdong Midea Electric Co., Ltd., which was listed on Shenzhen Stock Exchange. On 18 September 2013, the Company’s shares listed on Shenzhen Stock Exchange

As at 31 December 2019, the Company’s share capital is RMB 6,971,899,574, and the total number of shares in issue is 6,971,899,574, of which 165,402,513 shares are restricted tradable A shares and 6,806,497,061 shares are unrestricted tradable A shares. In 2019, the increasing of Company’s share capital are mainly from shares in exchange for the equity of Wuxi Little Swan Company Limited (hereinafter referred to as “Little Swan”) (Note 4 (35), (41)).

The detailed information of major subsidiaries included in the consolidation scope in current period is set out in Notes 5 and 6. Entities newly included in the consolidation scope in current year include Midea Electrics Egypt, Anhui Welling Auto Parts Co., Ltd., Wuxi Little Swan Electric Co., Ltd., Guangdong Swisslog Technology Co., Ltd., Guangdong Yueyun Industrial Internet Innovation Technology Co., Ltd., Midea Refrigeration Equipment (Thailand) Co., Ltd and Tianjin Midea Commercial Factoring Co., Ltd. Please refer to Note 5(1)(a) for details. The detailed information of subsidiaries no longer included in the consolidation scope in current year is set out in 5(1)(b).

These financial statements were authorised for issue by the Company’s Board of Directors on 28 April 2020.

#### 2 Summary of significant accounting policies and accounting estimates

The Group determines specific accounting policies and accounting estimates based on the features of production and operation, mainly including the measurement of expected credit loss (ECL) on accounts receivable (Note 2(9(a))), valuation method of inventory (Note 2(11)), depreciation of fixed assets and amortisation of intangible assets (Note 2(14), (17)), impairment of long-term assets (Note 2(19)) and recognition of revenue (Note 2(26)).

Critical judgements applied by the Group in determining significant accounting policies are set out in Note 2(31).

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(1) Basis of preparation

The financial statements are prepared in accordance with the *Accounting Standard for Business Enterprises - Basic Standard*, and the specific accounting standards and other relevant regulations issued by the Ministry of Finance on 15 February 2006 and in subsequent periods (hereinafter collectively referred to as the "Accounting Standards for Business Enterprises" or "CAS") and the disclosure requirements in the *Preparation Convention of Information Disclosure by Companies Offering Securities to the Public No. 15 - General Rules on Financial Reporting* issued by the China Securities Regulatory Commission ("CSRC").

The financial statements are prepared on a going concern basis.

(2) Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company for the year ended 31 December 2019 are in compliance with the Accounting Standards for Business Enterprises, and truly and completely present the consolidated and the Company's financial position of the Company as at 31 December 2019 and their financial performance, cash flows and other information for the year then ended.

(3) Accounting period

The Company's accounting year starts on 1 January and ends on 31 December.

(4) Functional currency

The functional currency of the Company is Renminbi ("RMB"). The subsidiaries determine their functional currency based on the primary economic environment in which the business is operated, mainly including EUR, JPY, USD and HKD. The financial statements are presented in RMB.

(5) Business combinations

(a) Business combinations involving enterprises under common control

The consideration paid and net assets obtained by the absorbing party in a business combination are measured at the carrying amount. If the absorbing party was bought by the ultimate controller from a third party in prior years, the value of its assets and liabilities (including goodwill generated due to the combination) are based on the carrying amount in the ultimate controller's consolidated financial statements. The difference between the carrying amount of the net assets obtained from the combination and the carrying amount of the consideration paid for the combination is treated as an adjustment to capital surplus (share premium). If the capital surplus (share premium) is not sufficient to absorb the difference, the remaining balance is adjusted against retained earnings. Costs directly attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(5) Business combinations (Cont'd)

(b) Business combinations involving enterprises not under common control

The cost of combination and identifiable net assets obtained by the acquirer in a business combination are measured at fair value at the acquisition date. Where the cost of the combination exceeds the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised as goodwill; where the cost of combination is lower than the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised in profit or loss for the current period. Costs directly attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

For business combinations achieved by stages involving enterprises not under common control, previously-held equity in the acquiree is remeasured at its fair value at the acquisition dates, and the difference between its fair value and carrying amount is included in investment income for the current period in consolidated financial statements. Where the previously-held equity in the acquiree involves other comprehensive income under equity method and shareholders' equity changes other than those arising from the net profit or loss, other comprehensive income and profit distribution, the related other comprehensive income and other shareholders' equity changes are transferred into income for the current period to which the acquisition dates belong, excluding those arising from changes in the investee's remeasurements of net liability or net asset related to the defined benefit plan. The excess of the sum of fair value of the previously-held equity and fair value of the consideration paid at the acquisition dates over share of fair value of identifiable net assets acquired from the subsidiary is recognised as goodwill.

(6) Preparation of consolidated financial statements

The consolidated financial statements comprise the financial statements of the Company and all of its subsidiaries.

Subsidiaries are consolidated from the date on which the Group obtains control and are de-consolidated from the date that such control ceases. For a subsidiary that is acquired in a business combination involving enterprises under common control, it is included in the consolidated financial statements from the date when it, together with the Company, comes under common control of the ultimate controlling party. The portion of the net profits realised before the combination date is presented separately in the consolidated income statement.

In preparing the consolidated financial statements, where the accounting policies and the accounting periods of the Company and subsidiaries are inconsistent, the financial statements of the subsidiaries are adjusted in accordance with the accounting policies and the accounting period of the Company. For subsidiaries acquired from business combinations involving enterprises not under common control, the individual financial statements of the subsidiaries are adjusted based on the fair value of the identifiable net assets at the acquisition date.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(6) Preparation of consolidated financial statements (Cont'd)

All significant intra-group balances, transactions and unrealised profits are eliminated in the consolidated financial statements. The portion of subsidiaries' equity and the portion of a subsidiaries' net profits and losses and comprehensive income for the period not attributable to Company are recognised as minority interests and presented separately in the consolidated financial statements under equity, net profits and total comprehensive income respectively. Unrealised profits and losses resulting from the sale of assets by the Company to its subsidiaries are fully eliminated against net profit attributable to owners of the parent. Unrealised profits and losses resulting from the sale of assets by a subsidiary to the Company are eliminated and allocated between net profit attributable to owners of the parent and minority interests in accordance with the allocation proportion of the parent in the subsidiary. Unrealised profits and losses resulting from the sale of assets by one subsidiary to another are eliminated and allocated between net profit attributable to owners of the parent and minority interests in accordance with the allocation proportion of the parent in the subsidiary. If the accounting treatment of a transaction which considers the Group as an accounting entity is different from that considers the Company or its subsidiaries as an accounting entity, it is adjusted from the perspective of the Group.

(7) Recognition criteria of cash and cash equivalents

Cash and cash equivalents comprise cash on hand, deposits that can be readily drawn on demand, and short-term and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(8) Foreign currency translation

(a) Foreign currency transaction

Foreign currency transactions are translated into RMB using the exchange rates prevailing at the dates of the transactions.

At the balance sheet date, monetary items denominated in foreign currencies are translated into the functional currency using the spot exchange rates on the balance sheet date. Exchange differences arising from these translations are recognised in profit or loss for the current period, except for those attributable to foreign currency borrowings that have been taken out specifically for the acquisition or construction of qualifying assets, which are capitalised as part of the cost of those assets. Non-monetary items denominated in foreign currencies that are measured at historical costs are translated at the balance sheet date using the spot exchange rates at the date of the transactions. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

(b) Translation of foreign currency financial statements

The asset and liability items in the balance sheets for overseas operations are translated at the spot exchange rates on the balance sheet date. Among the shareholders' equity items, the items other than "undistributed profits" are translated at the spot exchange rates of the transaction dates. The income and expense items in the income statements of overseas operations are translated at the spot exchange rates of the transaction dates. The differences arising from the above translation are presented in other comprehensive income. The cash flows of overseas operations are translated at the spot exchange rates on the dates of the cash flows. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(9) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. A financial asset or a financial liability is recognised when the Group becomes a party to the contractual provisions of the instrument.

(a) Financial assets

(i) Classification and measurement

Based on the business model for managing the financial assets and the contractual cash flow characteristics of the financial assets, financial assets are classified as: (1) financial assets at amortised cost; (2) financial assets at fair value through other comprehensive income; (3) financial assets at fair value through profit or loss.

The financial assets are measured at fair value at initial recognition. Related transaction costs that are attributable to the acquisition of the financial assets are included in the initially recognised amounts, except for the financial assets at fair value through profit or loss, the related transaction costs of which are recognised directly in profit or loss for the current period. Accounts receivable or notes receivable arising from sales of products or rendering of services (excluding or without regard to significant financing components) are initially recognised at the consideration that is entitled to be charged by the Group as expected.

(i-1) Debt investments

The debt instruments held by the Group refer to the instruments that meet the definition of financial liabilities from the perspective of the issuer, and are measured in the following three ways:

Measured at amortised cost:

The objective of the Group's business model is to hold the financial assets to collect the contractual cash flows, and the contractual cash flow characteristics are consistent with a basic lending arrangement, which gives rise on specified dates to the contractual cash flows that are solely payments of principal and interest on the principal amount outstanding. The interest income of such financial assets is recognised using the effective interest method. Such financial assets mainly comprise cash at bank and on hand, loans and advances, notes receivable, accounts receivable, other receivables, structural deposits, debt investments and long-term receivables, etc. Debt investments and long-term receivables that are due within one year (inclusive) as from the balance sheet date are included in the current portion of non-current assets; debt investments with maturities of no more than one year (inclusive) at the time of acquisition are included in other current assets.

Measured at fair value through other comprehensive income:

The objective of the Group's business model is to hold the financial assets to both collect the contractual cash flows and sell such financial assets, and the contractual cash flow characteristics are consistent with a basic lending arrangement. Such financial assets are measured at fair value through other comprehensive income, except for the impairment gains or losses, foreign exchange gains and losses, and interest income calculated using the effective interest method which are recognised in profit or loss for the current period. Such financial assets are mainly included in receivables financing, other debt investments; other debt investments that are due within one year (inclusive) as from the balance sheet date are included in the current portion of non-current assets; other debt investments with maturities no more than one year (inclusive) at the time of acquisition are included in other current assets.

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(9) Financial instruments (Cont'd)

(a) Financial assets (Cont'd)

(i) Classification and measurement (Cont'd)

(i-1) Debt investments (Cont'd)

Measured at fair value through profit or loss:

Debt instruments held by the Group that are not divided into those at amortised cost, or those measured at fair value through other comprehensive income, are measured at fair value through profit or loss and included in financial assets held for trading. At initial recognition, Group designates a portion of financial assets as at fair value through profit or loss to eliminate or significantly reduce an accounting mismatch. Financial assets that are due over one year as from the balance sheet date and are expected to be held over one year are included in other non-current financial assets.

(i-2) Equity investments

Investments in equity instruments, over which the Group has no control, joint control or significant influence, are measured at fair value through profit or loss under financial assets held for trading; investments in equity instruments expected to be held over one year as from the balance sheet date are included in other non-current financial assets.

(i-3) Derivative financial instruments

The derivative financial instruments held or issued by the Group are mainly used in controlling risk exposures. Derivative financial instruments are initially recognised at fair value on the day when derivatives transaction contract was signed, and subsequently measured at fair value. The derivative financial instruments are recorded as assets when they have a positive fair value and as liabilities when they have a negative fair value.

The recognition of changes in fair value of derivative financial instruments depends on whether such derivative financial instruments are designated as hedging instruments and meet requirements for hedging instruments, and depends on the nature of hedged items in this case. For derivative financial instruments that are not designated as hedging instruments and fail to meet requirements on hedging instruments, including those held for the purpose of providing hedging against specific risks in interest rate and foreign exchange but not conforming with requirements of hedge accounting, the changes in fair value are recorded in gains or losses arising from changes in fair value in the consolidated income statement.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

- (9) Financial instruments (Cont'd)
- (a) Financial assets (Cont'd)
- (i) Classification and measurement (Cont'd)
- (i-3) Derivative financial instruments (Cont'd)

Cash flow hedge

The effective portion of gains or losses on hedging instruments is recognised in other comprehensive income as cash flow hedging reserve, while the ineffective portion is recognised in profit or loss for the current period. Where the hedge is a forecast transaction which subsequently results in the recognition of a non-financial asset or liability, the amount originally recognised in other comprehensive income is transferred and included in the initially recognised amount of the asset or liability. For cash flow hedge beyond the foregoing scope, the amount originally recognised in other comprehensive income is transferred and included in profit or loss for the current period during the same time in which the profit or loss is influenced by the hedged expected cash flow. However, if all or part of net loss recognised directly in other comprehensive income will not be recovered in future accounting periods, the amount not expected to be recovered should be transferred to profit or loss for the current period. When the Group revokes the designation of a hedge, a hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting, the Group will discontinue the hedge accounting treatments prospectively. Where the Group discontinues the hedge accounting treatment for cash flow hedging, for hedged future cash flows that will still happen, the accumulated gains or losses that have been recognised in other comprehensive income are retained and subject to accounting treatment under the subsequent treatment method of aforesaid cash flow hedging reserve; for hedged future cash flows that the forecast transaction will never happen, the accumulated gains or losses that have been recognised in other comprehensive income are transferred immediately and included in profit or loss for the current period.

- (ii) Impairment

Loss provision for financial assets at amortised cost, investments in debt instruments at fair value through other comprehensive income, as well as financial guarantee contracts is recognised on the basis of ECL.

Giving consideration to reasonable and supportable information on past events, current conditions and forecasts of future economic conditions, and weighted by the risk of default, the Group recognises the ECL as the probability-weighted amount of the present value of the difference between the cash flows receivable from the contract and the cash flows expected to collect.

As at each balance sheet date, the expected credit losses of financial instruments at different stages are measured respectively. 12-month ECL provision is recognised for financial instruments in Stage 1 that have not had a significant increase in credit risk since initial recognition; lifetime ECL provision is recognised for financial instruments in Stage 2 that have had a significant increase in credit risk yet without credit impairment since initial recognition; and lifetime ECL provision is recognised for financial instruments in Stage 3 that have had credit impairment since initial recognition.

## MIDEA GROUP CO., LTD.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

#### 2 Summary of significant accounting policies and accounting estimates (Cont'd)

(9) Financial instruments (Cont'd)

(a) Financial assets (Cont'd)

(ii) Impairment (Cont'd)

For the financial instruments with lower credit risk on the balance sheet date, the Group assumes there is no significant increase in credit risk since initial recognition and recognises the 12-month ECL provision.

For the financial instruments in Stage 1, Stage 2 and with lower credit risk, the Group calculates the interest income by applying the effective interest rate to the gross carrying amount (before deduction of the impairment provision). For the financial instrument in Stage 3, the interest income is calculated by applying the effective interest rate to the amortised cost (after deduction of the impairment provision from the gross carrying amount).

For notes receivable, accounts receivable, and receivables financing arising from sales of goods or rendering of services in the ordinary course of business, the Group recognises the lifetime ECL provision regardless of whether there exists a significant financing component.

In case the ECL of an individually assessed financial asset cannot be evaluated with reasonable cost, the Group divides the receivables into certain groupings based on credit risk characteristics, then pursuant to which, calculates the ECL. Basis and provision method for determining groupings are as follows:

Notes receivable - bank acceptance notes	Bank credit risk grouping
Accounts receivable	Domestic/overseas business grouping
Other receivables	Security deposit/guarantee payables grouping
Long-term receivables	Finance lease payable grouping
Loans and advances	Loans business grouping

The Group, on the basis of the exposure at default and the lifetime ECL rate, calculates the ECL of notes receivable and receivables financing that are classified into groupings with consideration to historical credit losses experience, current conditions and forecasts of future economic conditions.

With consideration to historical credit loss experience, current conditions and forecasts of future economic conditions, the Group prepares the cross-reference between the number of overdue days of accounts receivable and the lifetime ECL rate, and calculates the ECL of accounts receivable that are classified into groupings.

The Group, on the basis of the exposure at default and the 12-month or lifetime ECL rate, calculates the ECL of other receivables, loans and advances, and long-term receivables that are classified into groupings with consideration to historical credit losses experience, the current conditions and forecasts of future economic conditions.

The Group recognises the loss provision made or reversed into profit or loss for the current period. For debt instruments held at fair value through other comprehensive income, the Group adjusts other comprehensive income while the impairment loss or gain is recognised in profit or loss for the current period.

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(9) Financial instruments (Cont'd)

(a) Financial assets (Cont'd)

(iii) Derecognition of financial assets

A financial asset is derecognised when: (i) the contractual rights to the cash flows from the financial asset expire, (ii) the financial asset has been transferred and the Group transfers substantially all the risks and rewards of ownership of the financial asset to the transferee, or (iii) the financial asset has been transferred and the Group has not retained control of the financial asset, although the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset.

When a financial asset is derecognised, the difference between the carrying amount and the sum of the consideration received and the cumulative changes in fair value that are previously recognised directly in other comprehensive income is recognised in profit or loss for the current period, except for those as investments in other equity instruments, the difference aforementioned is recognised in retained earnings instead.

(b) Financial liabilities

Financial liabilities are classified as financial liabilities at amortised cost and financial liabilities at fair value through profit or loss at initial recognition.

Financial liabilities of the Group mainly comprise financial liabilities at amortised cost, including notes payable, accounts payable, other payables, borrowings and debentures payable, customer deposits and deposits from banks and other financial institutions, borrowings from the Central Bank, long-term payables, etc. Such financial liabilities are initially recognised at fair value, net of transaction costs incurred, and subsequently measured using the effective interest method. Financial liabilities that are due within one year (inclusive) are classified as current liabilities; those with maturities over one year but are due within one year (inclusive) as from the balance sheet date are classified as current portion of non-current liabilities. Others are classified as non-current liabilities.

A financial liability is derecognised or partly derecognised when the underlying present obligation is discharged or partly discharged. The difference between the carrying amount of the derecognised part of the financial liability and the consideration paid is recognised in profit or loss for the current period.

(c) Determination of fair value of financial instruments

The fair value of a financial instrument that is traded in an active market is determined at the quoted price in the active market. The fair value of a financial instrument that is not traded in an active market is determined by using a valuation technique. In valuation, the Group adopts valuation techniques applicable in the current situation and supported by adequate available data and other information, selects inputs with the same characteristics as those of assets or liabilities considered in relevant transactions of assets or liabilities by market participants, and gives priority to the use of relevant observable inputs. When relevant observable inputs are not available or feasible, unobservable inputs are adopted.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(10) Receivables

Receivables comprise accounts receivable, other receivables, notes receivable, long-term receivables, loans and advances, etc. Accounts receivable arising from sale of goods or rendering of services are initially recognised at fair value of the contractual payments from the buyers or service recipients, and subsequently measured at amortised cost less provision for impairment using the effective interest method. Provision for impairment of receivables are set out in Note 2(9)(a).

(11) Inventories

(a) Classification of inventories

Inventories, including raw materials, consigned processing materials, low value consumables, work in progress, completed but unsettled products and finished goods, etc., are measured at the lower of cost and net realisable value.

The amount of completed but unsettled works is determined on the basis of individual contract at the cost of contract incurred plus profits thereof and less losses recognised and amount settled. It is recognised as assets when the balance is positive and recognised as liabilities when the balance is negative.

(b) Costing of inventories

Other than completed but unsettled products, cost is determined using the first-in, first-out method when issued. The cost of finished goods and work in progress comprises raw materials, direct labour and systematically allocated production overhead based on the normal production capacity.

(c) Basis for determining net realisable values of inventories and method for making provision for decline in the value of inventories

Inventories are initially measured at cost. The cost of inventories comprises purchase cost, processing cost and other expenditures to bring the inventories to current site and condition.

On the balance sheet date, inventories are measured at the lower of cost and net realisable value.

Net realisable value is determined based on the estimated selling price in the ordinary course of business, less the estimated costs to completion and estimated costs necessary to make the sale and related taxes.

Provision for decline in the value of inventories is determined at the excess amount of the cost as calculated based on the classification of inventories over their net realisable value, and are recognised in profit or loss for the current period.

(d) Inventory system

The Group adopts the perpetual inventory system.

(e) Amortisation methods of low value consumables and packaging materials

Low value consumables are expensed in full when issued and recognised in cost of related assets or in profit or loss for the current period.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(12) Long-term equity investments

Long-term equity investments comprise the Company's long-term equity investments in its subsidiaries, and the Group's long-term equity investments in its associates and joint venture.

Subsidiaries are the investees over which the Company is able to exercise control. A joint venture is a joint arrangement which is structured through a separate vehicle over which the Group has joint control together with other parties and only has rights to the net assets of the arrangement based on legal forms, contractual terms and other facts and circumstances. Associates are the investees that the Group has significant influence on their financial and operating policies.

Investments in subsidiaries are presented in the Company's financial statements using the cost method, and are adjusted to the equity method when preparing the consolidated financial statements. Investments in a joint venture and associates are accounted for using the equity method.

(a) Determination of investment cost

For long-term equity investments acquired through a business combination: for long-term equity investments acquired through a business combination involving enterprises under common control, the investment cost shall be the absorbing party's share of the carrying amount of equity of the party being absorbed in the consolidated financial statements of the ultimate controller at the combination date; for long-term equity investment acquired through a business combination involving enterprises not under common control, the investment cost shall be the combination cost.

For business combinations achieved by stages involving enterprises not under common control, the initial investment cost accounted for using the cost method is the sum of carrying amount of previously-held equity investment and additional investment cost. For previously-held equity accounted for using the equity method, the accounting treatment of related other comprehensive income from disposal of the equity is carried out on a same basis with the investee's direct disposal of related assets or liabilities. Shareholders' equity, which is recognised due to changes in investee's shareholders' equity other than those arising from the net profit or loss, other comprehensive income and profit distribution, is accordingly transferred into profit or loss in the period in which the investment is disposed.

For investment in previously-held equity accounted for using the recognition and measurement standards of financial instruments, the initial investment cost accounted for using the cost method is the sum of carrying amount of previously-held equity investment and additional investment cost. The difference between the fair value and carrying amount for investment in previously-held equity and the accumulated changes in fair value previously included in other comprehensive income are transferred to profit or loss for the current period accounted for using the cost method.

For long-term equity investments acquired not through a business combination: for long-term equity investment acquired by payment in cash, the initial investment cost shall be the purchase price actually paid; for long-term equity investments acquired by issuing equity securities, the initial investment cost shall be the fair value of the equity securities issued.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(12) Long-term equity investments (Cont'd)

(b) Subsequent measurement and recognition of related profit and loss

For long-term equity investments accounted for using the cost method, they are measured at the initial investment costs, and cash dividends or profit distribution declared by the investees are recognised as investment income in profit or loss.

For long-term equity investments accounted for using the equity method, where the initial investment cost of a long-term equity investment exceeds the Group's share of the fair value of the investee's identifiable net assets at the acquisition date, the long-term equity investment is measured at the initial investment cost; where the initial investment cost is less than the Group's share of the fair value of the investee's identifiable net assets at the acquisition date, the difference is included in profit or loss and the cost of the long-term equity investment is adjusted upwards accordingly.

For long-term equity investments accounted for using the equity method, the Group recognises the investment income according to its share of net profit or loss of the investee. The Group discontinues recognising its share of the net losses of an investee after the carrying amounts of the long-term equity investment together with any long-term interests that in substance form part of the investor's net investment in the investee are reduced to zero. However, if the Group has obligations for additional losses and the criteria with respect to recognition of provisions under the accounting standards on contingencies are satisfied, the Group continues recognising the investment losses and the provisions. The changes of the Group's share of the investee's owner's equity other than those arising from the net profit or loss, other comprehensive income and profit distribution, are recognised in the Group's equity and the carrying amounts of the long-term equity investment are adjusted accordingly. The carrying amount of the investment is reduced by the Group's share of the profit distribution or cash dividends declared by an investee. The unrealised profits or losses arising from the transactions between the Group and its investees are eliminated in proportion to the Group's equity interest in the investees, based on which the investment gain or losses are recognised. Any losses resulting from transactions between the Group and its investees attributable to asset impairment losses are not eliminated.

(c) Basis for determining existence of control, joint control, significant influence over investees

Control is the power to govern an investee and obtain variable returns from participating the investee's activities, and the ability to utilise the power of an investee to affect its returns.

Joint control is the contractually agreed sharing of control over an arrangement, and relevant economic activity can be arranged upon the unanimous approval of the Group and other participants sharing of control rights.

Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

(d) Impairment of long-term equity investments

The carrying amounts of long-term equity investments in subsidiaries, joint venture and associates are reduced to the recoverable amounts when the recoverable amounts are below their carrying amounts (Note 2(19)).

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(13) Investment properties

Investment properties, including land use rights that have already been leased out, buildings that are held for the purpose of leasing and buildings that are being constructed or developed for future use for leasing, are measured initially at cost. Subsequent expenditures incurred in relation to an investment property are included in the cost of the investment property when it is probable that the associated economic benefits will flow to the Group and their costs can be reliably measured; otherwise, the expenditures are recognised in profit or loss in the period in which they are incurred.

The Group adopts the cost model for subsequent measurement of investment properties. Buildings and land use rights are depreciated or amortised to their estimated net residual values over their estimated useful lives. The estimated useful lives, the estimated net residual values that are expressed as a percentage of cost and the annual depreciation (amortisation) rates of investment properties are as follows:

	Estimated useful lives	Estimated net residual values	Annual depreciation (amortisation) rates
Buildings	20 to 40 years	5%	2.38% to 4.75%
Land use rights	40 to 50 years	-	2% to 2.5%

When an investment property is transferred to owner-occupied properties, it is reclassified as fixed asset or intangible asset at the date of the transfer. When an owner-occupied property is transferred out for earning rentals or for capital appreciation, the fixed asset or intangible asset is reclassified as investment properties at its carrying amount at the date of the transfer. At the time of transfer, the property is recognised based on the carrying amount before transfer.

The investment properties' estimated useful lives, the estimated net residual values and the depreciation (amortisation) methods applied are reviewed and adjusted as appropriate at each year-end.

An investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. The net amount of proceeds from sale, transfer, retirement or damage of an investment property after its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

(14) Fixed assets

(a) Recognition and initial measurement of fixed assets

Fixed assets comprise buildings, overseas land, machinery and equipment, motor vehicles, electronic equipment and others.

Fixed assets are recognised when it is probable that the related economic benefits will flow to the Group and the costs can be reliably measured. The initial cost of purchased fixed assets include purchase price, related taxes and expenditures that are attributable to the assets incurred before the assets are ready for their intended use. The initial cost of self-constructed fixed assets is determined based on Note 2(15).

Subsequent expenditures incurred for a fixed asset are included in the cost of the fixed asset when it is probable that the associated economic benefits will flow to the Group and the related cost can be reliably measured. The carrying amount of the replaced part is derecognised. All the other subsequent expenditures are recognised in profit or loss in the period in which they are incurred.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(14) Fixed assets (Cont'd)

(b) Depreciation methods for fixed assets

Fixed assets are depreciated using the straight-line method to allocate the cost of the assets to their estimated net residual values over their estimated useful lives. For the fixed assets that have been provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives.

The estimated useful lives, the estimated net residual values expressed as a percentage of cost and the annual depreciation rates of the Group's fixed assets are as follows:

Categories	Estimated useful lives	Estimated net residual values	Annual depreciation rates
Buildings	15 to 50 years	0% to 10%	6.7% to 1.8%
Machinery and equipment	2 to 18 years	0% to 10%	50% to 5.0%
Motor vehicles	2 to 20 years	0% to 10%	50% to 4.5%
Electronic equipment and others	2 to 20 years	0% to 10%	50% to 4.5%
Overseas land	Permanent	N/A	N/A

The estimated useful lives and the estimated net residual values of the Group's fixed assets and the depreciation methods applied to the assets are reviewed, and adjusted as appropriate at each year-end.

(c) Basis for identification of fixed assets held under finance leases and related measurement

A lease that transfers substantially all the risks and rewards incidental to ownership of an asset is a finance lease. The leased asset is recognised at the lower of the fair value of the leased asset and the present value of the minimum lease payments. The difference between the recorded amount of the leased asset and the minimum lease payments is accounted for as unrecognised finance charge.

Fixed assets held under a finance lease is depreciated on a basis consistent with the depreciation policy adopted for fixed assets that are self-owned. When a leased asset can be reasonably determined that its ownership will be transferred at the end of the lease term, it is depreciated over the period of expected use; otherwise, the leased asset is depreciated over the shorter period of the lease term and the period of expected use.

(d) The carrying amount of a fixed asset is reduced to the recoverable amount when the recoverable amount is below the carrying amount (Note 2(19)).

(e) Disposal of fixed assets

A fixed asset is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The amount of proceeds from disposal on sales, transfer, retirement or damage of a fixed asset net of its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(15) Construction in progress

Construction in progress is measured at actual cost. Actual cost comprises construction costs, installation costs, borrowing costs that are eligible for capitalisation and other costs necessary to bring the fixed assets ready for their intended use. Construction in progress is transferred to fixed assets when the assets are ready for their intended use, and depreciation begins from the following month. The carrying amount of construction in progress is reduced to the recoverable amount when the recoverable amount is below the carrying amount (Note 2(19)).

(16) Borrowing costs

The borrowing costs that are directly attributable to the acquisition and construction of a fixed asset that needs a substantially long period of time for its intended use commence to be capitalised and recorded as part of the cost of the asset when expenditures for the asset and borrowing costs have been incurred, and the activities relating to the acquisition and construction that are necessary to prepare the asset for its intended use have commenced. The capitalisation of borrowing costs ceases when the asset under acquisition or construction becomes ready for its intended use and the borrowing costs incurred thereafter are recognised in profit or loss for the current period. Capitalisation of borrowing costs is suspended during periods in which the acquisition or construction of an asset is interrupted abnormally and the interruption lasts for more than 3 months, until the acquisition or construction is resumed.

For the specific borrowings obtained for the acquisition or construction of a fixed asset qualifying for capitalisation, the amount of borrowing costs eligible for capitalisation is determined by deducting any interest income earned from depositing the unused specific borrowings in the banks or any investment income arising on the temporary investment of those borrowings during the capitalisation period.

For the general borrowings obtained for the acquisition or construction of a fixed asset qualifying for capitalisation, the amount of borrowing costs eligible for capitalisation is determined by applying the weighted average effective interest rate of general borrowings, to the weighted average of the excess amount of cumulative expenditures on the asset over the amount of specific borrowings. The effective interest rate is the rate at which the estimated future cash flows during the period of expected duration of the borrowings or applicable shorter period are discounted to the initial amount of the borrowings.

(17) Intangible assets

Intangible assets include land use rights, patents and non-patent technologies, trademark rights, trademark use rights, royalties and others, and are measured at cost.

(a) Land use rights

Land use rights are amortised on the straight-line basis over their approved use period of 40 to 50 years. If the acquisition costs of the land use rights and the buildings located thereon cannot be reasonably allocated between the land use rights and the buildings, all of the acquisition costs are recognised as fixed assets.

(b) Patents and non-patent technologies

Patents are amortised on a straight-line basis over the statutory period of validity, the period as stipulated by contracts or the beneficial period.

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(17) Intangible assets (Cont'd)

(c) Trademark rights

The trademark rights is measured at cost when acquired and is amortised over the estimated useful life of 30 years. The cost of trademark rights obtained in the business combinations involving enterprises not under common control is measured at fair value. As some of the trademarks are expected to attract net cash inflows injected into the Group, the management considers that these trademarks have an indefinite useful lives and are presented based upon the carrying amounts after deducting the provision for impairment (Note 4(16)).

(d) Trademark use rights

The trademark use rights is measured at cost when acquired. The cost of trademark use rights obtained in the business combinations involving enterprises not under common control is measured at fair value, and is amortised over the estimated useful life of 40 years.

(e) Periodical review of useful life and amortisation method

For an intangible asset with a finite useful life, review of its useful life and amortisation method is performed at each year-end, with adjustment made as appropriate.

(f) Research and development (“R&D”)

The expenditure on an internal research and development project is classified into expenditure on the research phase and expenditure on the development phase based on its nature and whether there is material uncertainty that the research and development activities can form an intangible asset at the end of the project.

Expenditure on the planned investigation, evaluation and selection for the research of production processes or products is categorised as expenditure on the research phase, and it is recognised in profit or loss when it is incurred. Expenditure on design and test for the final application of the development of production processes or products before mass production is categorised as expenditure on the development phase, which is capitalised only if all of the following conditions are satisfied:

- The development of production processes or products has been fully justified by technical team;
- The budget on the development of production processes or products has been approved by the management;
- There is market research analysis that demonstrates the product produced by the production process or product has the ability of marketing;
- There are sufficient technical and financial resources to support the development of production processes or products and subsequent mass production; and
- Expenditure attributable to the development of production processes or products can be reliably measured.

Other development expenditures that do not meet the conditions above are recognised in profit or loss in the period in which they are incurred. Development costs previously recognised as expenses are not recognised as an asset in a subsequent period. Capitalised expenditure on the development phase is presented as development costs in the balance sheet and transferred to intangible assets at the date that the asset is ready for its intended use.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(17) Intangible assets (Cont'd)

(g) Impairment of intangible assets

The carrying amounts of intangible assets are reduced to the recoverable amounts when the recoverable amounts are below their carrying amounts (Note 2(19)).

(18) Long-term prepaid expenses

Long-term prepaid expenses include the expenditure for improvements to fixed assets held under operating leases, and other expenditures that have been incurred but should be recognised as expenses over more than one year in the current and subsequent periods. Long-term prepaid expenses are amortised on the straight-line basis over the expected beneficial period and are presented at actual expenditure net of accumulated amortisation.

(19) Impairment of long-term assets

Fixed assets, construction in progress, intangible assets with finite useful lives, investment properties measured using the cost model and long-term equity investments in subsidiaries, a joint venture and associates are tested for impairment if there is any indication that the assets may be impaired at the balance sheet date. Intangible assets not ready for their intended use and overseas land are tested at least annually for impairment, irrespective of whether there is any indication that it may be impaired. If the result of the impairment test indicates that the recoverable amount of an asset is less than its carrying amount, a provision for impairment and an impairment loss are recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. Provision for asset impairment is determined and recognised on the individual asset basis. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of a group of assets to which the asset belongs is determined. A group of assets is the smallest group of assets that is able to generate independent cash inflows.

Goodwill that is separately presented in the financial statements is tested at least annually for impairment, irrespective of whether there is any indication that it may be impaired. In conducting the test, the carrying value of goodwill is allocated to the related asset groups or groups of asset groups which are expected to benefit from the synergies of the business combination. If the result of the test indicates that the recoverable amount of an asset groups or a group of asset groups, including the allocated goodwill, is lower than its carrying amount, the corresponding impairment loss is recognised. The impairment loss is first deducted from the carrying amount of goodwill that is allocated to the asset groups or group of asset groups, and then deducted from the carrying amounts of other assets within the asset groups or group of asset groups in proportion to the carrying amounts of assets other than goodwill.

Once the above asset impairment loss is recognised, it will not be reversed for the value recovered in the subsequent periods.

(20) Employee benefits

Employee benefits include short-term employee benefits, post-employment benefits, termination benefits and other long-term employee benefits provided in various forms of consideration in exchange for service rendered by employees or compensations for the termination of employment relationship.

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(20) Employee benefits (Cont'd)

(a) Short-term employee benefits

Short-term employee benefits include employee wages or salaries, bonus, allowances and subsidies, staff welfare, premiums or contributions on medical insurance, work injury insurance and maternity insurance, housing funds, union running costs and employee education costs, short-term paid absences. The employee benefit liabilities are recognised in the accounting period in which the service is rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets. Employee benefits which are non-monetary benefits are measured at fair value.

(b) Post-employment benefits

The Group classifies post-employment benefit plans as either defined contribution plans or defined benefit plans. Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions into a separate fund and will have no obligation to pay further contributions; and defined benefit plans are post-employment benefit plans other than defined contribution plans. During the reporting period, the Group's defined contribution plans mainly include basic pensions and unemployment insurance, while the defined benefit plans are Toshiba Lifestyle Products & Services Corporation ("TLSC"), and KUKA Group, the Group's subsidiaries, provide supplemental retirement benefits beyond the national regulatory insurance system.

Basic pensions

The Group's employees participate in the basic pension plan set up and administered by local authorities of Ministry of Human Resource and Social Security. Monthly payments of premiums on the basic pensions are calculated according to prescribed bases and percentage by the relevant local authorities. When employees retire, the relevant local authorities are obliged to pay the basic pensions to them. The amounts based on the above calculations are recognised as liabilities in the accounting period in which the service has been rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets.

Supplementary retirement benefits

The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method at the interest rate of treasury bonds with similar obligation term and currency. The charges related to the supplemental retirement benefits (including current service costs, past-service costs and gains or losses on settlement) and net interest costs are recognised in the statement of profit or loss or included in the cost of an asset, and the changes of remeasurement in net liabilities or net assets arising from the benefit plan are charged or credited to equity in other comprehensive income.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(20) Employee benefits (Cont'd)

(c) Termination benefits

The Group provides compensation for terminating the employment relationship with employees before the end of the employment contracts or as an offer to encourage employees to accept voluntary redundancy before the end of the employment contracts. The Group recognises a liability arising from compensation for termination of the employment relationship with employees, with a corresponding charge to profit or loss at the earlier of the following dates: 1) when the Group cannot unilaterally withdraw the offer of termination benefits because of an employment termination plan or a curtailment proposal; 2) when the Group recognises costs or expenses related to the restructuring that involves the payment of termination benefits.

Early retirement benefits

The Group offers early retirement benefits to those employees who accept early retirement arrangements. The early retirement benefits refer to the salaries and social security contributions to be paid to and for the employees who accept voluntary retirement before the normal retirement date prescribed by the State, as approved by the management. The Group pays early retirement benefits to those early retired employees from the early retirement date until the normal retirement date. The Group accounts for the early retirement benefits in accordance with the treatment for termination benefits, in which the salaries and social security contributions to be paid to and for the early retired employees from the off-duty date to the normal retirement date are recognised as liabilities with a corresponding charge to the profit or loss for the current period. The differences arising from the changes in the respective actuarial assumptions of the early retirement benefits and the adjustments of benefit standards are recognised in profit or loss in the period in which they occur.

The termination benefits expected to be settled within one year since the balance sheet date are classified as current liabilities.

(21) General risk reserve

General risk reserve is the reserve appropriated from undistributed profits to cover part of unidentified potential losses, on the basis of the estimated potential risk value of risk assets assessed by the standardised approach, which is deducted from recognised provision for impairment losses on loans. Risk assets include loans and advances, long-term equity investments, deposits with banks and other financial institutions and other receivables of subsidiary engaged in financial business.

(22) Dividend distribution

Cash dividend is recognised as a liability for the period in which the dividend is approved by the shareholders' meeting.

(23) Provisions

Provisions for product warranties, onerous contracts, etc. are recognised when the Group has a present obligation, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be measured reliably.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(23) Provisions (Cont'd)

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation. Factors surrounding a contingency, such as the risks, uncertainties and the time value of money, are taken into account as a whole in reaching the best estimate of a provision. Where the effect of the time value of money is material, the best estimate is determined by discounting the related future cash outflows. The increase in the discounted amount of the provision arising from passage of time is recognised as interest expense.

The carrying amount of provisions is reviewed at each balance sheet date and adjusted to reflect the current best estimate.

The provisions expected to be settled within one year since the balance sheet date are classified as current liabilities.

(24) Share-based payments

(a) Type of share-based payment

Share-based payment is a transaction in which the entity acquires services from employees as consideration for equity instruments of the entity or by incurring liabilities for amounts based on the equity instruments. Equity instruments include equity instruments of the Company, its parent company or other accounting entities of the Group. Share-based payments are divided into equity-settled and cash-settled payments. The Group's share-based payments are equity-settled payments.

Equity-settled share-based payment

The Group's equity-settled share-based payment contains share option incentive plan, restricted share plan and employee stock ownership plan. These plans are measured at the fair value of the equity instruments at grant date and the equity instruments are tradable or exercisable when services in vesting period are completed or specified performance conditions are met. In the vesting period, the services obtained in current period are included in relevant cost and expenses at the fair value of the equity instruments at grant date based on the best estimate of the number of tradable or exercisable equity instruments, and capital surplus is increased accordingly. If the subsequent information indicates the number of tradable or exercisable equity instruments differs from the previous estimate, an adjustment is made and, on the exercise date, the estimate is revised to equal to the number of actual vested equity instruments.

(b) Determination of the fair value of equity instruments

The Group determines the fair value of share options using option pricing model, which is Black - Scholes option pricing model.

The fair value of other equity instruments are based on the share prices, which excluded the price that incentive objects pay, and the number of the shares on the grant date, taking into account the effects of clause of the Group's relevant plans.

(c) Basis for determining best estimate of tradable or exercisable equity instruments

At the end of each reporting period, the group revises its estimates of the number of options that are expected to vest based on the non-marketing performance and service conditions. On the exercise or desterilisation date, the final number of estimated exercisable or tradable equity instruments is consistent with the number of exercised or tradable equity instruments.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(25) Treasury stock

The Group's treasury stock mainly comes from the repurchase of equity instruments and the issuance of restricted shares and so on.

Consideration and transaction costs paid by the Group for repurchasing equity instruments are deducted from equity and not recognised as financial assets. The considerations and the related transaction costs paid by the Group for repurchasing equity instruments are measured as treasury stock.

On the deregistration day of shares, relevant share capital and treasury stock are reversed with the difference included in capital surplus (share premium) based on actual deregistration results.

On the grant day of restricted shares, the Group recognise bank deposits when receiving subscription from the employees and measures the repurchase obligation as liability. On the day of release of restricted shares, relevant treasury stocks, liabilities and capital surplus recognised in the vesting period are reversed based on the actual vesting results.

(26) Revenue

The amount of revenue is determined in accordance with the fair value of the consideration received or receivable for the sales of goods and services in the ordinary course of the Group's activities. Revenue is stated net of discounts, rebates and returns.

Revenue is recognised when it's probable that the economic benefits associated with the transaction will flow to the Group, the related revenue can be reliably measured, and the specific criteria of revenue recognition have been met for each type of the Group's activities as described below:

(a) Sales of products

The Group are principally engaged in the manufacturing and sales of home appliances (mainly comprises HVAC and consumer appliances), and robotics and automation system (mainly comprises robotics and automation system).

Revenue from domestic sales is recognised when 1) the goods are delivered to buyers by the Group pursuant to contracts; 2) the amount of revenue is confirmed; 3) payments for goods are collected or receipts are acquired; and 4) the related economic benefits will flow to the Group; and the related costs can be measured reliably. Upon confirming the acceptance, the buyer has the right to sell the products at its discretion and takes the risks of any price fluctuations and obsolescence and loss of the products.

Revenue from overseas sales is recognised when 1) the goods have been declared to the customs and shipped out of the port; 2) the amount of revenue is confirmed; 3) payments for goods are collected or obtain related receipts; and 4) the related economic benefits will flow to the Group and the related costs can be measured reliably.

Revenue from sales of robotics and automation system is recognised when 1) the goods are delivered to buyers by the Group pursuant to contracts; 2) the amount of revenue is confirmed; 3) payments for goods are collected or receipts are acquired; and 4) the related economic benefits will flow to the Group; and the related costs can be measured reliably.

(b) Rendering of services

Revenue from transportation service, distribution service and installation service as provided by the Group is recognised when the services are completed.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(26) Revenue (Cont'd)

(b) Rendering of services (Cont'd)

Revenue from providing automation system business, intelligent logistics integration solution and storage service is recognised according to the percentage of completion.

(c) Construction contract

Where the outcome of a construction contract can be estimated reliably, revenue and costs thereof are recognised using the “percentage-of-completion” method as at the balance sheet date. The stage of completion is measured by reference to the contract costs incurred up to the end of the reporting period as a percentage of total estimated costs for each contract.

The outcome of a construction contract can be estimated reliably when all of the following conditions are concurrently met: (1) the total contract revenue can be measured reliably; (2) it is highly probable that the economic benefits associated with the contract will flow to the enterprise; (3) the contract costs incurred thus far can be clearly identified and measured reliably; (4) both the stage of completion and the costs necessary to complete the contract can be reliably measured.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs can be recovered actually. Contract costs are recognised as expenses in the period in which they are incurred. Otherwise, contract costs are recognised as expenses immediately, not as contract revenue. If the unexpected factors no longer exist which make construction contract unable to be estimated reliably, revenue and costs are recognised using the percentage-of-completion method.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

As at the balance sheet date, the actual total contract revenue multiply the percentage of completion less the total contract revenue recognised in previous accounting periods should be recognised as the revenue for the current period. Similarly, the total contract costs multiply the percentage of completion incurred less the total contract costs recognised in previous accounting periods should be recognised as the expenses for the current period.

(d) Interest income

Interest income from financial instruments is calculated by effective interest method and recognised in profit or loss for the current period. Interest income comprises premiums or discounts, or the amortisation based on effective rates of other difference between the initial carrying amount and the due amount of interest-earning assets.

The effective interest method is a method of calculating the amortised cost of a financial asset or liability and the interest income or expense based on effective rates. Actual interest rate is the rate at which the estimated future cash flows during the period of expected duration of the financial instruments or applicable shorter period are discounted to the current carrying amount of the financial instruments. When calculating the effective interest rate, the Group estimates cash flows by considering all contractual terms of the financial instrument (e.g. early repayment options, similar options, etc.), but without considering future credit losses. The calculation includes all fees and interest paid or received that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(26) Revenue (Cont'd)

(d) Interest income (Cont'd)

Interest income from impaired financial assets is calculated at the interest rate that is used for discounting estimated future cash flow when measuring the impairment loss.

(e) Dividend income

Dividend income is recognised when the right to receive dividend payment is established.

(f) Rental income

Rental income from investment prosperities is recognised in the income statement on a straight-line basis over the lease period.

(g) Fee and commission income

Fee and commission income is recognised in profit or loss for the current period when the service is provided. The Group defers the initial charge income or commitment fee income arising from the forming or acquisition of financial assets as the adjustment to effective interest rate. If the loans are not lent when the loan commitment period is expired, related charges are recognised as fee and commission income.

(27) Government grants

Government grants are transfers of monetary or non-monetary assets from the government to the Group at nil consideration, including refund of taxes and financial subsidies, etc.

A government grant is recognised when the conditions attached to it can be complied with and the government grant can be received. For a government grant in the form of transfer of monetary assets, the grant is measured at the amount received or receivable. For a government grant in the form of transfer of non-monetary assets, it is measured at fair value; if the fair value is not reliably determinable, the grant is measured at nominal amount.

Government grants related to assets are grants that are acquired by an enterprise and used for acquisition, construction or forming long-term assets in other ways. Government grants related to income are government grants other than government grants related to assets.

Government grants related to assets are recorded as deferred income reasonably and systematically amortised to profit or loss over the useful life of the related asset.

For government grants related to income, where the grant is a compensation for related expenses or losses to be incurred by the Group in the subsequent periods, the grant is recognised as deferred income, and included in profit or loss over the periods in which the related costs are recognised; where the grant is a compensation for related expenses or losses already incurred by the Group, the grant is recognised immediately in profit or loss for the current period.

The same kind of government grants are presented with the same method.

Those related to ordinary activities are recorded into operating profit while other in non-operating income and expenses.

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(27) Government grants (Cont'd)

Loans to the Group at political preferential rate are recorded at the actual amount received, and the related loan expenses are calculated based on the principal and the political preferential rate. Finance discounts directly received offset related loans expenses.

(28) Deferred tax assets and deferred tax liabilities

Deferred tax assets and deferred tax liabilities are calculated and recognised based on the differences arising between the tax bases of assets and liabilities and their carrying amounts (temporary differences). Deferred income tax asset is recognised for the tax losses that can be carried forward to subsequent years for deduction of the taxable profit in accordance with the tax laws. No deferred tax liability is recognised for a temporary difference arising from the initial recognition of goodwill. No deferred tax asset or deferred tax liability is recognised for the temporary differences resulting from the initial recognition of assets or liabilities due to a transaction other than a business combination, which affects neither accounting profit nor taxable profit (or deductible loss). At the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled.

Deferred tax assets are only recognised for deductible temporary differences, deductible tax losses and tax credits to the extent that it is probable that taxable profit will be available in the future against which the deductible temporary differences, deductible tax losses and tax credits can be utilised.

Deferred tax liabilities are recognised for temporary differences arising from investments in subsidiaries, associates and joint ventures, except where the Group is able to control the timing of reversal of the temporary difference, and it is probable that the temporary difference will not reverse in the foreseeable future. When it is probable that the temporary differences arising from investments in subsidiaries, associates and joint ventures will be reversed in the foreseeable future and that the taxable profit will be available in the future against which the temporary differences can be utilised, the corresponding deferred tax assets are recognised.

Deferred tax assets and liabilities are offset when:

- the deferred taxes are related to the same tax payer within the Group and the same taxation authority; and,
- that tax payer within the Group has a legally enforceable right to offset current tax assets against current tax liabilities.

(29) Leases

(a) Operating leases

Rental expenses for assets held under operating leases are recognised as the cost of relevant assets or expenses on a straight-line basis over the lease period. Contingent rentals are recognised as profit and loss for the current period when incurred.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(29) Leases (Cont'd)

(a) Operating leases (Cont'd)

Fixed assets leased out under operating leases, other than investment prosperities (Note 2(13)), are depreciated in accordance with the depreciation policy stated in Note 2(14(b)) and provided for impairment loss in accordance with the policy stated in Note 2(19). Rental income from operating leases is recognised as revenue on a straight-line basis over the lease period. Initial direct costs in large amount arising from assets leased out under operating leases are capitalised when incurred and recognised as profit and loss for the current period over the lease period on a same basis with revenue recognition; initial direct costs in small amount are directly recognised as profit and loss for the current period. Contingent rentals are recognised as profit and loss for the current period when incurred.

(b) Finance leases

The leased asset is recognised at the lower of the fair value of the leased asset and the present value of the minimum lease payments. The difference between the recorded amount of the leased asset and the minimum lease payments is accounted for as unrecognised finance charge and is amortised using the effective interest method over the period of the lease. A long-term payable is recorded at the amount equal to the minimum lease payments less the unrecognised finance charge.

(30) Segment information

The Group identifies operating segments based on the internal organisation structure, management requirements and internal reporting system, and discloses segment information of reportable segments which is determined on the basis of operating segments.

An operating segment is a component of the Group that satisfies all of the following conditions: (1) the component is able to earn revenue and incur expenses from its ordinary activities; (2) whose operating results are regularly reviewed by the Group's management to make decisions about resources to be allocated to the segment and to assess its performance, and (3) for which the information on financial position, operating results and cash flows is available to the Group. Two or more operating segments that have similar economic characteristics and satisfy certain conditions can be aggregated into one single operating segment.

(31) Critical accounting estimates and judgements

The Group continually evaluates the critical accounting estimates and key judgements applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable.

Critical accounting estimates and key assumptions

The critical accounting estimates and key assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next accounting year are outlined below:

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**2 Summary of significant accounting policies and accounting estimates (Cont'd)**

(31) Critical accounting estimates and judgements (Cont'd)

(i) Provision for impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment. The recoverable amount of the asset groups and the combination of asset groups that contain the apportioned goodwill is determined by the higher value between the use value and the net value that is calculated by the fair value less the disposal costs. Accounting estimate is required for the calculation of the recoverable amount. The impairment testing is performed by assessing the recoverable amount of the groups of assets containing the relevant goodwill, based on the present value of cash flows forecasts. Key assumptions adopted in the impairment testing of goodwill included expected revenue growth rates, EBITDA margins, perpetual annual growth rates, discount rates, etc. which involved critical accounting estimates and judgement.

(ii) Income tax

The Group is subject to income taxes in numerous jurisdictions. There are many transactions and events for which the ultimate tax determination is uncertain during the ordinary course of business. Significant judgement is required from the Group in determining the provision for income taxes in each of these jurisdictions. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

32 Significant changes in accounting policies

The Ministry of Finance released the revised CAS 22 - Recognition and Measurement of Financial Instruments, CAS 23 - Transfer of Financial Assets, CAS 24 - Hedge Accounting and CAS 37 - Presentation of Financial Instruments (hereinafter collectively referred to as "the new financial instruments standards") in 2017, and released the Circular on the Amendment to the Formats of Corporate Financial Statements for the Year of 2019 (Cai Kuai [2019] No. 6), the revised CAS 7 - Exchange of Non-monetary Assets (hereinafter the "exchange of non-monetary assets standard") and the revised CAS 12 - Debt Restructuring (hereinafter the "debt restructuring standard") in 2019. The financial statements for the year ended 31 December 2019 are prepared in accordance with the above standards and circular. The revised standards for exchange of non-monetary assets and debt restructuring had no significant impacts on the Group and the Company, and impacts of other revisions on financial statements of the Group and the Company are as follows:

(a) Revisions based on the circular on the amendment to the formats of corporate financial statements

Impacts on the consolidated balance sheet are as follows:

The nature and the reasons of the

changes in accounting policies	The line items affected	31 December 2018			1 January 2018		
		Before adjustment	The amounts affected	After adjustment	Before adjustment	The amounts affected	After adjustment
The Group split notes and accounts receivables into accounts receivable and notes receivable.	Accounts receivable	-	19,390,174	19,390,174	-	17,528,717	17,528,717
	Notes receivable	-	12,556,294	12,556,294	-	10,854,226	10,854,226
	Notes and accounts receivables	31,946,468	(31,946,468)	-	28,382,943	(28,382,943)	-
The Group split notes and accounts payables into accounts payable and notes payable.	Accounts payable	-	36,901,626	36,901,626	-	35,144,777	35,144,777
	Notes payable	-	23,325,115	23,325,115	-	25,207,785	25,207,785
	Notes and accounts payables	60,226,741	(60,226,741)	-	60,352,562	(60,352,562)	-

Except for the above items, amounts of other items as at 31 December 2018 and 1 January 2018 were not affected.

32 Significant changes in accounting policies (Cont'd)

(b) Revisions based on the new financial instruments standards

Accordance with relevant provisions of the new financial instruments standards, the Group and the Company recognised the cumulative effect of initially applying the standard as an adjustment to the opening balance of retained earnings in 2019 and other relevant line items in the financial statements. The comparatives were not restated.

(i) As at 1 January 2019, the financial assets represented in the Group's consolidated financial statements were disclosed and measured in accordance with the old/new financial instruments standards as follows:

Old financial instruments standards			New financial instruments standards		
Line item	Measurement	Carrying amount	Line item	Measurement	Carrying amount
Cash at bank and on hand	Amortised cost	27,888,280	Cash at bank and on hand	Amortised cost	27,888,280
Notes receivable	Amortised cost	12,556,294	Notes receivable	Amortised cost	11,049,539
			Receivables financing	Fair value through other comprehensive income	1,506,755
Accounts receivable	Amortised cost	19,390,174	Accounts receivable	Amortised cost	18,641,979
			Receivables financing	Fair value through other comprehensive income	748,195
Other receivables	Amortised cost	2,971,368	Other receivables	Amortised cost	2,960,939
Other current assets	Fair value through other comprehensive income (hedging instruments)	38,822	Financial assets held for trading	Fair value through profit or loss	10,429
	Fair value through other comprehensive income (wealth management products)	1,521,007	Other current assets	Fair value through other comprehensive income	38,822
	Amortised cost (structural deposits)	70,402,509	Financial assets held for trading	Fair value through profit or loss	1,521,007
Derivative financial assets	Fair value through profit or loss	220,197	Other current assets	Amortised cost	70,402,509
Loans and advances	Amortised cost	11,328,392	Derivative financial assets	Fair value through profit or loss	220,197
Long-term receivables	Amortised cost	34,815	Loans and advances	Amortised cost	11,328,392
Available-for-sale financial assets	Fair value through other comprehensive income (equity instruments) (Note)	1,184,859	Long-term receivables	Amortised cost	34,815
	Cost (equity instruments)	722,019	Financial assets held for trading	Fair value through profit or loss	1,122,609
			Other non-current financial assets	Fair value through profit or loss	62,250
			Other non-current financial assets	Fair value through profit or loss	722,019

(Note) As at 31 December 2018, the Group's financial assets held for trading measured at fair value through other comprehensive income amounted to RMB 1,184,859,000. As at 1 January 2019, such equity instruments were measured at fair value through profit or loss after the implementation of the new financial instruments standards. Correspondingly, the Group transferred RMB 337,447,000 of equity instruments measured at fair value through other comprehensive income in prior years to the opening balance of undistributed profit.

Surplus reserve with the Central Bank	355,471	204,073
Deposits with banks and other financial institutions (d)	20,562,160	10,573,622
Accrued interest	397,234	—
	<u>70,916,841</u>	<u>27,888,280</u>

Including: Total amounts deposited with banks overseas (including Hong Kong, China, Macau, China, Singapore, Japan, Italy, Brazil and Germany, etc.)	5,270,085	6,316,807
--	-----------	-----------

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**4 Notes to the consolidated financial statements (Cont'd)**

(1) Cash at bank and on hand (Cont'd)

(a) As at 31 December 2019, cash at bank included fixed deposits with the term of over three months, amounting to RMB 39,491,676,000 (31 December 2018: RMB 5,686,629,000)

(b) Other cash balances mainly include letters of guarantee, bank acceptance notes and letters of credit.

(c) Statutory reserve with the Central Bank represents the statutory reserve deposited in People's Bank of China by the financial enterprise in accordance with relevant regulations, which are calculated at 6% and 5% for eligible RMB deposits and foreign currency deposits, respectively, and are not available for use in the Group's daily operations.

(d) As at 31 December 2019, deposits with banks and other financial institutions included no fixed deposits with the term of over three months (31 December 2018: RMB 3,000,000,000).

(2) Financial assets held for trading

	31 December 2019	1 January 2019	31 December 2018
Financial assets held for trading	1,087,351	2,654,045	—

(a) As at 31 December 2019, financial assets held for trading are equity investments in listed companies, measured at fair value through profits or losses.

(3) Notes receivable

	31 December 2019	1 January 2019	31 December 2018
Bank acceptance notes	4,768,520	11,049,539	12,556,294
Less: Provision for bad debts	-	-	-
	<u>4,768,520</u>	<u>11,049,539</u>	<u>12,556,294</u>

(a) Provision for bad debts

For notes receivable of the Group arising from sales of goods or rendering of services in the ordinary course of business, the Group recognises the lifetime ECL provision regardless of whether there exists a significant financing component. As at 31 December 2019, bad debts risk was relatively low.

(4) Accounts receivable

	31 December 2019	1 January 2019	31 December 2018
Accounts receivable	19,631,644	19,624,088	20,372,283
Less: Provision for bad debts	(967,825)	(982,109)	(982,109)
	<u>18,663,819</u>	<u>18,641,979</u>	<u>19,390,174</u>

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**4 Notes to the consolidated financial statements (Cont'd)**

(4) Accounts receivable (Cont'd)

(a) The ageing of accounts receivable is analysed as follows:

	31 December 2019	1 January 2019	31 December 2018
Within 1 year	19,168,694	19,242,068	19,990,263
1 to 2 years	301,554	187,071	187,071
2 to 3 years	101,643	88,294	88,294
3 to 5 years	42,106	84,069	84,069
Over 5 years	17,647	22,586	22,586
	<u>19,631,644</u>	<u>19,624,088</u>	<u>20,372,283</u>

As at 31 December 2019, the Group had no significant overdue accounts receivable.

(b) Under the new financial instruments standards, the Group measures the loss provision for accounts receivable according to the lifetime ECL.

As at 31 December 2019, accounts receivable for which the related provision for bad debts was provided on the individual basis were analysed as follows:

	Book balance	Lifetime ECL rate	Provision for bad debts	Reason
Domestic customers	2,998	100%	(2,998)	The debtor encountered financial difficulties
Overseas customers	<u>4,767</u>	100%	<u>(4,767)</u>	
	<u>7,765</u>		<u>(7,765)</u>	

As at 31 December 2019, accounts receivable for which the related provision for bad debts was provided on the grouping basis were analysed as follows:

	31 December 2019		
	Book balance	Provision for bad debts	
	Amount	Lifetime ECL rate	Amount
Domestic business grouping	7,908,831	5.53%	(437,578)
Overseas business grouping	<u>11,715,048</u>	4.46%	<u>(522,482)</u>
	<u>19,623,879</u>		<u>(960,060)</u>

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**4 Notes to the consolidated financial statements (Cont'd)**

(4) Accounts receivable (Cont'd)

- (c) The provision for bad debts in current year amounted to RMB 215,902,000 (31 December 2018: RMB 334,946,000). The provision for bad debts reversed in current year amounted to RMB 145,990,000 (31 December 2018: RMB 137,346,000).

The accounts receivable written off by the Group for the current year were arising from transactions with third parties and there were no written-off accounts receivable that are individually significant.

- (d) As at 31 December 2019, the five largest accounts receivable aggregated by debtors were summarised and analysed as follows:

	Amount	Provision for bad debts	% of total balance
Total amount of the five largest accounts receivable	2,021,879	(47,562)	10.30%

(5) Other receivables

	31 December 2019	1 January 2019	31 December 2018
Other receivables	2,766,098	3,003,669	3,014,098
Less: Provision for bad debts	(53,124)	(42,730)	(42,730)
	<u>2,712,974</u>	<u>2,960,939</u>	<u>2,971,368</u>

- (a) Other receivables mainly include deposits, receivables related to share options, current accounts, petty cash to staff, and interest.

The ageing of other receivables is analysed as follows:

	31 December 2019	1 January 2019	31 December 2018
Within 1 year	2,643,584	2,795,057	2,805,486
1 to 2 years	69,490	118,049	118,049
2 to 3 years	16,555	60,259	60,259
3 to 5 years	25,773	20,900	20,900
Over 5 years	10,696	9,404	9,404
	<u>2,766,098</u>	<u>3,003,669</u>	<u>3,014,098</u>

As at 31 December 2019, the Group had no other receivables at stage 2.

(c) As at 31 December 2019, the Group's other receivables at stage 1 and stage 3 were analysed as follows:

(i) As at 31 December 2019, other receivables for which the related provision for bad debts was provided on the individual basis were analysed as follows:

	Book balance	ECL rate in the following 12 months	Provision for bad debts	Reason
Stage 1	<u>61,103</u>	<u>0%</u>	<u>-</u>	Relatively low bad debt risks
	Book balance	ECL rate in the following 12 months	Provision for bad debts	Reason
Stage 3	<u>3,357</u>	<u>100%</u>	<u>(3,357)</u>	The debtor encountered financial difficulties

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**4 Notes to the consolidated financial statements (Cont'd)**

(5) Other receivables (Cont'd)

(c) As at 31 December 2019, the Group's other receivables at stage 1 and stage 3 were analysed as follows (Cont'd):

(ii) As at 31 December 2019, other receivables at stage 1 for which the related provision for bad debts was provided on the grouping basis were analysed as follows:

	31 December 2019		
	Book balance	Provision for bad debts	
	Amount	Amount	Provision ratio
Security deposit/guarantee payables grouping	2,701,638	(49,767)	1.84%

(iii) The provision for bad debts in current year amounted to RMB 19,276,000 (31 December 2018: RMB 13,508,000). The provision for bad debts reversed in current year amounted to RMB 8,481,000 (31 December 2018: 21,166,000).

For the year ended 31 December 2019, no other receivables with significant amounts were written off.

(d) As at 31 December 2019, the five largest other receivables aggregated by debtors were summarised and analysed as follows:

	Amount	Provision for bad debts	% of total balance
Total amount of the five largest other receivables	222,226	(6,779)	8.03%

(e) As at 31 December 2019, the Group did not recognise significant government grants at amounts receivable.

(6) Receivables financing

	31 December 2019	1 January 2019	31 December 2018
Receivables financing	7,565,776	2,254,950	—

The Group's receivables financing were mainly bank acceptance notes and account receivables transferred, discounted and endorsed for the purpose of daily treasury management and were qualified for derecognition.

No provision for bank acceptance notes was individually provided. As at 31 December 2019, the Group measured bad debts based on the lifetime ECL and expected that there was no significant credit risk associated with its bank acceptance notes and did not expect that there will be any significant losses from non-performance by these banks.

As at 31 December 2019, the Group's transferred account receivables and notes receivables endorsed or discounted but not matured were as follows:

	Derecognised	Recognised
Receivables financing	20,946,601	-

**MIDEA GROUP CO., LTD.**

(7) Advances to suppliers

	31 December 2019	31 December 2018
Prepayments for raw materials and others	<u>2,246,177</u>	<u>2,215,888</u>

(a) The ageing of advances to suppliers is analysed as follows:

	31 December 2019		31 December 2018	
	Amount	% of total balance	Amount	% of total balance
Within 1 year	2,176,110	96.88%	2,112,343	95.33%
1 to 2 years	26,925	1.20%	78,764	3.55%
2 to 3 years	22,895	1.02%	11,870	0.54%
Over 3 years	20,247	0.90%	12,911	0.58%
	<u>2,246,177</u>	<u>100.00%</u>	<u>2,215,888</u>	<u>100.00%</u>

As at 31 December 2019, advances to suppliers over 1 year with a carrying amount of RMB 70,067,000 (31 December 2018: RMB 103,545,000) were mainly unsettled prepayments for raw materials.

As at 31 December 2019, the five largest advances to suppliers aggregated by debtors were summarised and analysed as follows:

	Amount	% of total balance
Total amount of the five largest advances to suppliers	<u>494,085</u>	<u>22.00%</u>

(8) Loans and advances to customers

(a) By individual and corporation:

	31 December 2019	31 December 2018
Loans and advances measured at amortised cost		
Loans and advances to individuals	1,110,127	894,392
Loans and advances to corporations	10,708,289	10,588,006
Including: Loans	9,558,953	4,702,308
Discounted bills	1,149,336	5,885,698
	11,818,416	11,482,398
Less: Provision for bad debts	<u>(158,919)</u>	<u>(154,006)</u>
	<u>11,659,497</u>	<u>11,328,392</u>

As at 31 December 2019, loans and advances to customers over 1 year amounted to RMB 790,101,000 (31 December 2018: Nil).

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**4 Notes to the consolidated financial statements (Cont'd)**

(8) Loans and advances to customers (Cont'd)

(b) By type of collateral held

	31 December 2019	31 December 2018
Unsecured loans	1,075,217	814,657
Guaranteed loans	1,476,273	614,688
Pledged loans	9,266,926	10,053,053
	<u>11,818,416</u>	<u>11,482,398</u>
Less: Provision for bad debts	(158,919)	(154,006)
	<u>11,659,497</u>	<u>11,328,392</u>

(c) For the year ended 31 December 2019, the Group's provision for bad debts was RMB 68,617,000, bad debts written-off were RMB 10,826,000 and reversal of bad debts was 52,878,000 (Note 4(21)).

(d) As at 31 December 2019, the Group's loans and advances for bad debt provision amounting to RMB 1,036,154,000, of which the bad debt provision is RMB 219,000.

(9) Inventories

(a) Inventories are summarised by categories as follows:

	31 December 2019			31 December 2018		
	Book balance	Provision for declines in the value of inventories	Carrying amount	Book balance	Provision for declines in the value of inventories	Carrying amount
Finished goods	22,046,730	(407,598)	21,639,132	18,600,407	(320,022)	18,280,385
Raw materials	5,009,197	(67,875)	4,941,322	5,181,916	(60,822)	5,121,094
Work in progress	1,596,042	-	1,596,042	2,040,228	-	2,040,228
Consigned processing material	219,542	-	219,542	239,741	-	239,741
Low value consumables	38,185	-	38,185	38,763	-	38,763
Projects completed but unsettled	4,009,176	-	4,009,176	3,924,807	-	3,924,807
	<u>32,918,872</u>	<u>(475,473)</u>	<u>32,443,399</u>	<u>30,025,862</u>	<u>(380,844)</u>	<u>29,645,018</u>

(b) Provision for decline in the value of inventories are analysed as follows:

	31 December 2018	Increase in	Decrease in	Differences on translation of foreign currency financial statements	31 December 2019
		current year Provision	current year Reversal or written-off		
Finished goods	320,022	311,801	(227,739)	3,514	407,598
Raw materials	60,822	11,434	(5,826)	1,445	67,875
	<u>380,844</u>	<u>323,235</u>	<u>(233,565)</u>	<u>4,959</u>	<u>475,473</u>

**4 Notes to the consolidated financial statements (Cont'd)**

(9) Inventories (Cont'd)

(c) Provision for decline in the value of inventories is as follows:

	Specific basis for determining net realisable value	Reason for the reversal or written- off of provision for decline in the value of inventories	
Finished goods	Stated at the lower of cost and net realisable value		Sales
Projects completed but unsettled	Stated at the lower of cost and net realisable value		Settled
Raw materials, etc.	Stated at the lower of cost and net realisable value		Requisition for production

(10) Other current assets	31 December 2019	1 January 2019	31 December 2018
Wealth management products	—	—	1,521,007
Structural deposits (a)	60,038,855	70,402,509	70,402,509
VAT input to be deducted	3,159,794	2,803,315	2,803,315
Prepaid expenses	875,451	647,648	647,648
Others	936,927	1,099,348	1,099,348
	<u>65,011,027</u>	<u>74,952,820</u>	<u>76,473,827</u>

(a) As at 31 December 2019, structural deposits represented deposits in financial instruments due within one year, mostly measured at fair value through profits or losses.

(11) Long-term receivables

	31 December 2019	31 December 2018
Long-term receivables	1,208,079	34,815
Less: Provision for bad debts	-	-
	<u>1,208,079</u>	<u>34,815</u>

The Group's long-term receivables are presented in net amount of finance lease receivables after offsetting the unrealised financing income.

(12) Long-term equity investments

Long-term equity investments are classified as follows:

	31 December 2019	31 December 2018
Investment in associates (a)	2,790,806	2,713,316
Less: Provision for impairment of long- term equity investments	-	-
	<u>2,790,806</u>	<u>2,713,316</u>

(a) Investment in associates mainly refers to the investments in Guangdong Shunde Rural Commercial Bank Co., Ltd. and Hefei Royalstar Motor Co., Ltd. and other companies by the Group.

**4 Notes to the consolidated financial statements (Cont'd)**

(17) Goodwill (Cont'd)

When making an impairment testing of goodwill for assets, the Group compares the carrying amount of the relevant assets or portfolios of asset groups (including goodwill) with their recoverable amount. If the recoverable amount is lower than the carrying amount, the difference shall be included in profit or loss for current period. The Group's allocation of goodwill was not changed in 2019.

As at 31 December 2019, the Group tested whether goodwill has suffered any impairment. The recoverable amount of asset groups with goodwill is calculated using discounted future cash flows determined according to the budget approved by management (the budget period is 5 to 6 years). The future cash flows beyond the budget periods are calculated based on the estimated perpetual annual growth rates. The perpetual annual growth rates (approx. 1%-2%) applied by management are consistent with the estimates of the industry, and do not exceed the long-term average growth rates of each product. Management determines expected revenue growth rates (approx. 2.27%-11.90%) and EBITDA margins (approx. 2.65%-11.30%) based on past experience and forecast on future market development. The discount rates (approx. 9.35%-15.43%) used by management are the pre-tax rates that are able to reflect the risks specific to the related asset groups. Management analyses the recoverable amount of each asset group based on these assumptions. As at 31 December 2019, the Group made a provision for impairment in amount of RMB 552,248,000 of the SMC asset group, and no provision for impairment was necessary for the goodwill of asset groups.

(18) Long-term prepaid expenses

The long-term prepaid expenses mainly include expenses prepaid for software and project reconstruction.

(19) Deferred tax assets and deferred tax liabilities

(a) Deferred tax assets before offsetting

	31 December 2019		31 December 2018

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**4 Notes to the consolidated financial statements (Cont'd)**

(37) Capital surplus (Cont'd)

- (a) The increase in share premium arose from the exercise of share options with the amount of RMB 2,372,248,000, restricted shares subscription with amount of RMB 54,668,000 and newly issued shares with the amount of RMB 2,833,991,000 for merge with Little Swan through share swap (Note 4(41)), and the decrease in share premium arose from the written-off for the repurchased restricted shares with the amount of RMB 150,501,000 and the repurchased public shares with the amount of RMB 3,905,151,000.
- (b) The increase of share-based payment incentive plan arose from expenses attributable to shareholders' equity of the parent company in the share-based payment incentive plan with the amount of RMB 733,330,000, while the decrease arose from the transfer of RMB 589,043,000 to share premium due to the share-based payment incentive plan.
- (c) Other decreases in capital surplus were mainly due to the Group's acquisition of equity held by the minority shareholders of SMC, a subsidiary, at a premium.

(39) Surplus reserve

	31 December 2018	Increase in current year	31 December 2019
Statutory surplus reserve	5,079,096	1,368,562	6,447,658
	31 December 2017	Increase in current year	31 December 2018
Statutory surplus reserve	3,882,232	1,196,864	5,079,096

In accordance with the *Company Law* and the Company's Articles of Association, the Company should appropriate 10% of net profit for the year to the statutory surplus reserve, and the Company can cease appropriation when the statutory surplus reserve accumulated to more than 50% of the registered capital. The statutory surplus reserve can be used to make up for the loss or increase the share capital after approval from the appropriate authorities. According to the resolution at the Board of Directors' meeting, the Company appropriated 10% of net profit, amounting to RMB 1,368,562,000 in 2019 (2018: 10% of net profit, amounting to RMB 1,196,864,000) to the statutory surplus reserve.

(40) Undistributed profits

	2019	2018
Undistributed profits at beginning of year	58,762,315	47,627,235
Changes in accounting policies	(337,447)	-
Add: Net profit attributable to shareholders of the parent company for current year	24,211,222	20,230,779
Less: Ordinary share dividends payable (a)	(8,553,897)	(7,898,785)
Appropriation to general reserve (b)	-	-
Appropriation to statutory surplus reserve (Note 4(39))	(1,368,562)	(1,196,864)
Others	-	(50)
Undistributed profit at end of year	72,713,631	58,762,315

(a) Ordinary share dividends distributed in current year

In accordance with the resolution at the shareholders' meeting, dated on 13 May 2019, the Company distributed a cash dividend to the shareholders at RMB 1.30 per share, amounting to RMB 8,561,590,000 calculated by 6,585,838,349 issued shares. As 40,014,998 public shares did not participate in dividend distribution of total amount of 6,605,842,687 shares at the time, 6,565,827,689 shares were actually entitled to distribution, and based on the principle that the total dividend remains unchanged, it was actually RMB 1.304 per share. Besides, 6,833,000 repurchased incentive shares in the restricted shares incentive plan were written off (Note 4(35)), and cash dividend amounting to RMB 7,693,000 was cancelled. The actual cash dividends distributed in current year amounted to RMB 8,553,897,000.

	2019	2018
Current income tax calculated based on tax law and related regulations	5,865,722	4,096,331
Deferred income tax	(1,213,752)	26,308
	<u>4,651,970</u>	<u>4,122,639</u>

The reconciliation from income tax calculated based on the applicable tax rates and total profit presented in the consolidated financial statements to the income tax expenses is listed below:

	2019	2018
Total profit	<u>29,929,114</u>	<u>25,773,058</u>
Income tax calculated at tax rate of 25%	7,482,279	6,443,265
Effect of different tax rates applicable to subsidiaries	(2,418,377)	(1,792,394)
Effect of income tax annual filing for prior periods	(132,198)	(91,527)
Income not subject to tax	(225,015)	(189,499)
Costs, expenses and losses not deductible for tax purposes	435,334	385,662
Utilisation of previous temporary differences or deductible losses not realised as deferred tax assets	(52,064)	(2,255)
Others	(437,989)	(630,613)
Income tax expenses	<u>4,651,970</u>	<u>4,122,639</u>

(56) Calculation of basic and diluted earnings per share

(a) Basic earnings per share

Basic earnings per share is calculated by dividing consolidated net profit attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding:

	Unit	2019	2018
Consolidated net profit attributable to ordinary shareholders of the parent company	RMB'000	24,211,222	20,230,779
Less: Dividends payable to restricted shares	RMB'000	<u>(41,095)</u>	<u>(23,538)</u>
		24,170,127	20,207,241
Weighted average number of outstanding ordinary shares	Thousands shares	<u>6,707,294</u>	<u>6,561,297</u>
	RMB		
Basic earnings per share	Yuan/share	<u>3.60</u>	<u>3.08</u>
Including:			
- Basic earnings per share from continuing operations:		3.60	3.08
- Basic earnings per share for discontinued operations:		<u>-</u>	<u>-</u>

**4 Notes to the consolidated financial statements (Cont'd)**

(56) Calculation of basic and diluted earnings per share (Cont'd)

- (b) Diluted earnings per share are calculated by dividing consolidated net profit attributable to ordinary shareholders of the parent company by the diluted weighted average number of outstanding ordinary shares:

	Unit	2019	2018
Consolidated net profit attributable to ordinary shareholders of the Company	RMB'000	24,211,222	20,230,779
Weighted average number of outstanding ordinary shares	Thousands shares	6,707,294	6,561,297
Weighted average number of ordinary shares increased from share-based payment	Thousands shares	64,256	69,395
Weighted average number of diluted outstanding ordinary shares	Thousands shares	6,771,550	6,630,692
Diluted earnings per share	RMB Yuan/share	3.58	3.05

(57) Notes to the cash flow statement

- (a) Cash received relating to other operating activities

	2019	2018
Other income	1,218,555	1,327,455
Other operating revenue	2,116,396	2,284,317
Non-operating income	612,867	418,984
Financial income - interest income	339,475	323,352
Others	721,528	1,204,113
	<u>5,008,821</u>	<u>5,558,221</u>

- (b) Cash paid relating to other operating activities

	2019	2018
Selling and distribution expenses (excluding employee benefits and taxes and surcharges)	30,246,514	22,942,704
General and administrative expenses and research and development expenses (excluding employee benefits and taxes and surcharges)	9,601,758	8,971,922
Others	1,283,489	486,046
	<u>41,131,761</u>	<u>32,400,672</u>

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

#### 5 Changes of consolidation scope

##### (1) Changes of consolidation scope due to other reasons

##### (a) Increase of consolidation scope

The Company's wholly-owned subsidiaries, Midea Electric Trading (Singapore) Co. Pte. Ltd. and Midea Electrics Netherlands B.V., established Midea Electric by cash of EGP 250,000 in March 2019, holding 99% and 1% of equity respectively.

The Company's wholly-owned subsidiary Guangdong Welling Auto Parts Co., Ltd. established Anhui Welling Auto Parts Corporation Limited in May 2019 by cash of RMB 100,000,000, holding 100% of its equity.

The Company established Wuxi Little Swan Electric Co., Ltd. in May 2019, holding 100% of its equity.

The Company's wholly-owned subsidiary Guangdong Midea Electric Co., Ltd. and, its subsidiary, Swisslog AG established Guangdong Swisslog Technology Co., Ltd. in August 2019, holding 50% and 50% of its equity respectively.

The Company and Guangdong Meicloud Technology Co., Ltd. (wholly-owned subsidiary) . South China Intelligent Robotics Innovation Research Institute (a third-party company) Guangdong Newpearl Ceramics Group, and Guangdong Robotics Institute Venture Capital Co., Ltd. established Guangdong Yueyun Industrial Internet Innovation Technology Co., Ltd. in September 2019, holding 62%, 22%, 3%, 10% and 3% of its equity, respectively.

The Company's wholly-owned subsidiaries, Midea Electric Trading (Singapore) Co., Pte. Ltd., Midea International Corporation Company Limited and Midea Home Appliances Investments (Hong Kong) Co., Limited, established Midea Refrigeration Equipment (Thailand) Co., Ltd. in November 2019, holding 100% of its equity.

The Company's wholly-owned subsidiary Foshan Shunde Midea Household Appliances Industry Co., Ltd. established Tianjin Midea Commercial Factoring Co., Ltd. in December 2019, holding 100% of its equity.

##### (b) Decrease of consolidation scope

In 2019, decrease of consolidation scope mainly includes deregistration of subsidiaries, details are as follows:

Name of company	Disposal method of the equity	Disposal time-point of the equity
Main Power Electrical Appliances (Guiyang) Limited	Deregistration	January 2019
Wuhu Midea Household Appliance Consultation Service Co., Ltd.	Deregistration	February 2019
Shenzhen Qianhai Midea Asset Management Co., Ltd.	Deregistration	March 2019
Midea Financial Holding (Shenzhen) Co., Ltd.	Deregistration	April 2019

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

#### 6 Interests in other entities (Cont'd)

##### (2) Interest in associates

The Group's associates have no significant influence on the Group and are summarised as follows:

	2019	2018
Aggregated carrying amount of investments	2,790,806	2,713,316
Aggregate of the following items in proportion		
Net profit (i)	506,225	349,321
Other comprehensive income (i)	(9,378)	51,924
Total comprehensive income	496,847	401,245

(i)The net profit and other comprehensive income have taken into account the impacts of both the fair value of the identifiable assets and liabilities upon the acquisition of investment in joint ventures and associates and the unification of accounting policies adopted by the joint ventures and the associates to those adopted by the Company.

#### 7 Segment information

The reportable segments of the Group are the business units that provide different products or service, or operate in the different areas. Different businesses or areas require different technologies and marketing strategies, the Group, therefore, separately manages the production and operation of each reportable segment and evaluates their operating results respectively, in order to make decisions about resources to be allocated to these segments and to assess their performance.

The Group identified 4 reportable segments as follows:

- Heating & ventilation, as well as air-conditioner
- Consumer appliances
- Robotics and automation system
- Others

Inter-segment transfer prices are measured by reference to selling prices to third parties.

The assets are allocated based on the operations of the segment and the physical location of the asset. The liabilities are allocated based on the operations of the segment. Expenses indirectly attributable to each segment are allocated to the segments based on the proportion of each segment's revenue.

Operating expenses include cost of sales, interest costs, fee and commission expenses, taxes and surcharges, selling and distribution expenses, general and administrative expenses, research and development expenses and financial income.

#### 10 Share-based payment

##### (1) Share option incentive plan

- (a) Pursuant to the fifth reserved share option incentive plan (the "Fifth Reserved Share Option Incentive Plan") approved at the eighth meeting of the third Board of Directors held during the year 2019, the Company granted 5,340,000 share options with exercise price of RMB 47.17 to 97 employees. Under the circumstance that the Company meets expected performance, 1/4 of the total share options granted will become effective after 2 years, 3 years, 4 years and 5 years respectively since 11 March 2019.

Determination method for fair value of share options at the grant date

Exercise price of options:	RMB 47.17
Effective period of options:	6 years
Current price of underlying shares:	RMB 46.58
Estimated fluctuation rate of share price:	37.02%
Estimated dividend rate:	2.95%
Risk-free interest rate within effective period of options:	2.42%

The fair value of the Fifth Share Option Incentive Plan calculated pursuant to the above parameters is: RMB 46,628,000.

Pursuant to the sixth share option incentive plan (the "Sixth Share Option Incentive Plan") approved at the shareholders' meeting for 2018 held during the year 2019, the Company granted 46,540,000 share options with exercise price of RMB 52.87 to 1,131 employees. Under the circumstance that the Company meets expected performance, 1/4 of the total share options granted will become effective after 2 years, 3 years, 4 years and 5 years respectively since 30 May 2019.

Determination method for fair value of share options at the grant date

Exercise price of options:	RMB 52.87
Effective period of options:	6 years
Current price of underlying shares:	RMB 49.45
Estimated fluctuation rate of share price:	37.04%
Estimated dividend rate:	2.62%
Risk-free interest rate within effective period of options:	2.68%

The fair value of the Sixth Share Option Incentive Plan calculated pursuant to the above parameters is: RMB 417,556,000.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

#### 10 Share-based payment (Cont'd)

##### (3) Employee stock ownership plan

Pursuant to the fifth stock ownership plan of the Midea Global Partner Plan (the "Fifth Global Partner Plan") approved at the shareholders' meeting for the year ended 31 December 2019 held during the year 2019, The Company would purchase a total of 3,732,075 shares of Midea Group from the secondary market, with an average purchase price of RMB 49.79 per share and the purchase fund was the special fund of RMB 185,820,000 accrued by the Company. The Company then entrusted China International Capital Corporation Limited ("CICC") to provide an asset management plan. The lock-up period of shares under this plan is from 11 July 2019 to 10 July 2020.

Pursuant to the second stock ownership plan of the Midea Business Partner Plan (the "Second Business Partner Plan") approved at the shareholders' meeting for the year ended 31 December 2018 held during the year 2019. The Company would purchase a total of 1,868,000 shares of Midea Group from the secondary market, with an average purchase price of RMB 49.79 per share. The purchase fund was the special fund and part of performance bonus for management of RMB 93,000,000 in total accrued by the Company. The Company then entrusted CICC to provide an asset management plan. The lock-up period of shares under this plan is from 16 July 2019 to 15 July 2020.

- (4) The total expenses due to the above share-based payment incentive plan, which were granted, recognised for the year ended 31 December 2019 were RMB 815,598,000. As at 31 December 2019, the balance relating to the share-based payment incentive and accrued from capital surplus was RMB 1,443,942,000.

#### 11 Contingencies

As at 31 December 2019, the amount in tax disputes involving Brazilian subsidiary with 51% interests held by the Company is about BRL 698 million (equivalent to RMB 1,207 million) (Some cases have lasted for more than 10 years. The above amount includes the principal and interest). As at 31 December 2019, relevant cases are still at court. Original shareholders of Brazilian subsidiary have agreed to compensate the Company according to verdict results of the above tax disputes. The maximum compensation amount is about BRL 157 million (equivalent to RMB 272 million). With reference to judgements of third-party attorneys, management believes that the probability of losing lawsuits and making compensation is small, and expects no significant risk of tax violation.

#### 12 Commitments

##### (1) Capital commitments

Capital expenditures contracted for by the Group but are not yet necessary to be recognised on the balance sheet as at the balance sheet date are as follows:

	31 December 2019	31 December 2018
Buildings, machinery and equipment	1,433,420	639,689

##### (2) Operating lease commitments

The Group has no significant operating lease commitments at the balance sheet date.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**13 Events after the balance sheet date**

(1) Significant non-adjusting events

(a) Outbreak of Coronavirus Epidemic 2019 (“COVID-2019”)

Under the outbreak of COVID-2019 in early 2020, domestic consumption and production have been affected in the short run. Started from the end of February, the development of the COVID-2019 outbreak is having increasing impacts overseas. The Group is consistently working on the prevention and control work of the COVID-2019 spreading. As at the date on which the financial statements were authorised for issue, the Group’s revenues and profits had a certain degree of decline under the influences of the epidemic. The duration of the COVID-2019 development will probably challenge the Group’s financial position and operating results in the year 2020.

(b) Repurchased shares

Pursuant to the *Proposal on the Scheme for the Repurchase of Certain Social Public Shares* approved at the eighteenth meeting of the third Board of Directors dated 21 February 2020, the Company is allowed to use its own funds to repurchase some of the Company’s shares through centralised price bidding, with number of shares to be repurchased ranging from 40 million to 80 million and purchase price not exceeding RMB 65 per share. The expected total amount for repurchases is no more than RMB 5,200 million. The scheme is to be implemented within 12 months from the date of approval by the Board of Directors. As at the date on which the financial statements were authorised for issue, the Group has repurchased 14.27million shares, and purchase price was RMB 700 million.

(c) Debt Financing

Pursuant to the Proposal on the Application for Registration and Issuance of Debt Financing Instruments approved at the first interim shareholders’ meeting in 2020 dated 13 March 2020, the total amount of the debt financing instruments to be registered is no more than RMB 20 billion (inclusive), of which the ultra-short-term financing bonds not more than RMB10 billion (inclusive) and the medium-term notes not more than 10 billion (inclusive). As at the date on which the financial statements were authorised for issue, the event was approved at the shareholders’ meeting and published named SCP Short Commercial Paper for 2 billion.

(2) Overview of profit distribution

On 28 April 2020, the company has total existing 6,999,467,315 shares. As 42,286,257 public shares did not participate in dividend distribution of total amount of 6,999,467,315 shares at the time, 6,957,181,058 shares were actually entitled to distribution. The Board of Directors proposed a distribution of cash dividends of approximately RMB 11,131,490,000 at RMB 16 every 10 shares (including tax). Such proposal is pending for approval at the shareholders’ meeting. The cash dividends distributed after the balance sheet date were not recognised as liabilities at the balance sheet date.

**14 Financial risk**

The Group is exposed to various financial risks in the ordinary course of business, mainly including:

- Market risk (mainly including foreign exchange risk, interest rate risk and price risk)
- Credit risk
- Liquidity risk

The following mainly relates to the above risk exposures and relevant causes, objectives, policies and process of risk management, method of risk measurement, etc.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**14 Financial risk (Cont'd)**

The objective of the Group's risk management is to seek balance between risk and income, minimising the adverse impact of financial risks on the Group's financial performance. Pursuant to the risk management objective, the Group has made risk management policies to identify and analyse the risks it is exposed to and set appropriate risk resistant level and design relevant internal control procedures to monitor the Group's risk level. The Group reviews regularly these risk management policies and relevant internal control systems to adapt to changes in market condition or its operating activities.

(1) Market risk

(a) Foreign exchange risk

The Group mainly operates in China, Europe, America, Asia, South America and Africa for the manufacturing, sales, investments and financing activities. Any foreign currency denominated monetary assets and liabilities other than in RMB would subject the Group to foreign exchange exposure.

The Group's finance department at its headquarters has a professional team to manage foreign exchange risk, with approach of the natural hedge for settling currencies, signing forward foreign exchange hedging contracts and controlling the scale of foreign currency assets and liabilities, to minimise foreign exchange risk, and to reduce the impact of exchange rate fluctuations on business performance.

(b) Interest rate risk

The Group's interest rate risk arises from interest bearing borrowings including long-term borrowings and debentures payable. Financial liabilities issued at floating rates expose the Group to cash flow interest rate risk. Financial liabilities issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 31 December 2019, the Group's long-term interest bearing borrowings at floating rates amounting to RMB 971,090,000 (31 December 2018: Nil) (Note 4(32)).

The Group's finance department at its headquarters continuously monitors the interest rate position of the Group. Increases in interest rates will increase the cost of new borrowing and the interest expenses with respect to the Group's outstanding floating rate borrowings, and therefore could have a material adverse effect on the Group's financial performance. The Group makes adjustments timely with reference to the latest market conditions and may enter into interest rate swap agreements to mitigate its exposure to interest rate risk.

As at 31 December 2019, if the borrowing rate rises or falls 50 base points while other factors remain constant, the group's profit before tax would increase or decrease amounting to RMB 206,492,000 (31 December 2018: RMB 160,457,000).

(c) Other price risk

The Group's other price risk arises mainly from financial assets held for trading (Note 4(2)) and other non-current financial assets (Note 4(13)) measured at fair value. As at 31 December 2019, if expected price of the investments held by the Group fluctuated, the Group's gains or losses on changes in fair value would be affected accordingly.

As at 31 December 2019, if the Group's expected price of equity instruments investment rises or falls by 10% while other factors remain constant, the Group would have an increase or decrease profit before tax amounting to RMB 283,746,000 (31 December 2018: RMB 190,688,000), other comprehensive income amounting to RMB 0 (31 December 2018:Nil).

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**14 Financial risk (Cont'd)**

(2) Credit risk

Credit risk is managed on the grouping basis. Credit risk mainly arises from cash at bank, deposits with the Central Bank, deposits with banks and other financial institutions, notes receivable, accounts receivable, loans and advances, other receivables and structural deposits in other current assets and non-current assets.

The Group expects that there is no significant credit risk associated with cash at bank, deposits with the Central Bank and deposits with banks and other financial institutions since they are deposited at state-owned banks and other medium or large size listed banks. Management does not expect that there will be any significant losses from non-performance by these counterparties.

In addition, the Group has policies to limit the credit exposure on notes receivable, accounts receivable, loans and advances, other receivables and structural deposits in other current assets and non-current assets. The Group assesses the credit quality of and sets credit limits on its customers by taking into account their financial position, the availability of guarantee from third parties, their credit history and other factors such as current market conditions. The credit history of the customers is regularly monitored by the Group. In respect of customers with a poor credit history, the Group will use written payment reminders, or shorten or cancel credit periods, to ensure the overall credit risk of the Group is limited to a controllable extent.

As at 31 December 2019, the Group has no significant collateral or other credit enhancements held as a result of the debtor's mortgage.

(3) Liquidity risk

Cash flow forecasting is performed by each subsidiary of the Group and aggregated by the Group's finance department in its headquarters. The Group's finance department at its headquarters monitors rolling forecasts of the Group's short-term and long-term liquidity requirements to ensure it has sufficient cash and securities that are readily convertible to cash to meet operational needs, while maintaining sufficient headroom on its undrawn committed borrowing facilities from major financial institutions so that the Group does not breach borrowing limits or covenants on any of its borrowing facilities to meet the short-term and long-term liquidity requirements. As at 31 December 2019, monetary assets held by the Group, including cash at bank and on hand, notes receivable, notes receivable included in loans and advances, discounted assets, notes receivable included in receivables financing and wealth management funds and structural deposits included in other current assets and other non-current assets amounted to RMB144,026,331,000.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**15 Fair value estimates**

The level in which fair value measurement is categorised is determined by the level of the fair value hierarchy of the lowest level input that is significant to the entire fair value measurement:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

(1) Assets and liabilities measured at fair value on a recurring basis

As at 31 December 2019, the assets and liabilities measured at fair value on a recurring basis by the above three levels are analysed below:

	Level 1	Level 2	Level 3	Total
Financial assets measured at fair value -				
Financial assets held for trading	1,087,351	-	-	1,087,351
Derivative financial assets	-	197,412	-	197,412
Receivables financing	-	7,565,776	-	7,565,776
Other current assets – hedging instruments	-	98,572	-	98,572
Structural deposits	-	50,557,518	-	50,557,518
Other non-current financial assets	-	-	1,750,107	1,750,107
<b>Total assets</b>	<b>1,087,351</b>	<b>58,419,278</b>	<b>1,750,107</b>	<b>61,256,736</b>
Financial liabilities measured at fair value -				
Derivative financial liabilities	-	27,100	-	27,100
Other financial liabilities – hedging instruments	-	32	-	32
<b>Total liabilities</b>	<b>-</b>	<b>27,132</b>	<b>-</b>	<b>27,132</b>

**MIDEA GROUP CO., LTD.****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**15 Fair value estimates (Cont'd)****(1) Assets and liabilities measured at fair value on a recurring basis (Cont'd)**

As at 31 December 2018, the assets and liabilities measured at fair value on a recurring basis by the above three levels are analysed below:

	Level 1	Level 2	Level 3	Total
Financial assets measured at fair value -				
Derivative financial assets	-	220,197	-	220,197
Other current assets - hedging instruments	-	38,822	-	38,822
Available-for-sale financial assets -				
Other current assets - wealth management products	-	-	1,521,007	1,521,007
Available-for-sale financial assets	1,122,609	-	62,250	1,184,859
<b>Total assets</b>	<b>1,122,609</b>	<b>259,019</b>	<b>1,583,257</b>	<b>2,964,885</b>
Financial liabilities measured at fair value -				
Derivative financial liabilities	-	756,299	-	756,299
Other financial liabilities - hedging instruments	-	146,496	-	146,496
<b>Total liabilities</b>	<b>-</b>	<b>902,795</b>	<b>-</b>	<b>902,795</b>

The Group takes the date on which events causing the transfers between the levels take place as the timing specific for recognising the transfers. There was no significant transfer of fair value measurement level of the above financial instruments among the three levels.

The fair value of financial instruments traded in an active market is determined at the quoted market price; and the fair value of those not traded in an active market is determined by the Group using valuation technique. The valuation models used mainly comprise discounted cash flow model and market comparable corporate model. Inputs of valuation technique mainly comprise risk-free interest rate, estimated interest rate and estimated annual yield.

**MIDEA GROUP CO., LTD.**

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2019**

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

**15 Fair value estimates (Cont'd)**

(1) Assets and liabilities measured at fair value on a recurring basis (Cont'd)

There was no change in the valuation technique for the fair value of the Group's financial instruments in current year.

The changes in Level 3 financial assets are analysed below:

	Financial assets held for trading and other non-current financial assets
31 December 2018	1,583,257
Impact of changes in standards	732,448
1 January 2019	2,315,705
Increase	4,232,805
Decrease	(5,274,444)
Transfer out from Level 3	(56,340)
Total gains of current period	
Investment income recognised in the income statement	509,578
Gains recognised in other comprehensive income	22,803
31 December 2019	1,750,107

The changes in Level 3 financial assets are analysed below:

	Available-for-sale financial assets
1 January 2018	22,174,966
Increase	1,576,579
Decrease	(22,660,142)
Total gains of current period	
Income recognised in the income statement	519,042
Gains recognised in other comprehensive income	(27,188)
31 December 2018	1,583,257

- (a) The fair value of this part of other non-current financial assets is measured using discounted cash flows approach. The judgement of Level 3 of the fair value hierarchy is based on the materiality of unobservable inputs towards calculation of whole fair value. Significant unobservable inputs mainly include the financial data of targeted company and risk adjusted discount rates.

Assets and liabilities subject to Level 2 fair value measurement are mainly structural deposits, receivables financing and forward exchange contracts and are evaluated by market approach and income approach.

## MIDEA GROUP CO., LTD.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

(All amounts in RMB'000 Yuan unless otherwise stated)  
[English translation for reference only]

#### 15 Fair value estimates (Cont'd)

##### (2) Assets and liabilities not measured at fair value but disclosed

The Group's financial assets and financial liabilities measured at amortised cost mainly include: cash at bank and on hand, deposits with the Central Bank, deposits with banks and other financial institutions, notes receivable, accounts receivable, loans and advances, other receivables, other current assets (excluding those mentioned in Note 15(1)), notes payable, accounts payable, short-term borrowings, borrowings from the Central Bank, long-term borrowings, current portion of non-current liabilities, customer deposits and deposits from banks and other financial institutions, other payables, other current liabilities, etc.

Carrying amounts of the Group's derecognized gains on financial assets and financial liabilities measured at amortized cost as at 31 December 2019 and 31 December 2018 approximated to their fair value.

#### 16 Capital management

The Group's capital management policies aim to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, refund capital to shareholders, issue new shares or sell assets to reduce debts.

The Group is not subject to external mandatory capital requirements, and monitors capital structure on the basis of gearing ratio (total liabilities divide total assets).

As at 31 December 2019 and 31 December 2018, the Group's gearing ratio is as follows:

	31 December 2019	31 December 2018
Total liabilities	194,459,322	171,246,631
Total assets	301,955,419	263,701,148
Gearing ratio	64.40%	64.94%

#### 17 Notes to the parent company's financial statements

##### (1) Other receivables

	31 December 2019	31 December 2018
Other receivables	18,377,123	11,599,860
Less: Provision for bad debts	(7,258)	(6,840)
	18,369,865	11,593,020
